

**Clarification #1 to LB&FC RFP #2014-1**

**Question Received:** If we were to respond to this solicitation or we were awarded this contract, would that in any way preclude us from being the consultant/broker for the merged public school districts that would be under the same group health benefits package? Also, would that preclude us from soliciting any of the school districts that were involved in the study?

**LB&FC Response:** If you respond to this solicitation or are awarded this contract, your future ability to contract with the merged public school districts or any of the school districts involved in the study would be an issue between you and those school districts and outside the control of the LB&FC.
