Unisys will provide a formal and structured training plan as outlined in this section. Note that we are proposing some training through our approach to continuous improvement, as outlined in Section 4 of this proposal. As part of our Continual Service Improvement and Innovation Program (CSIIP), Unisys will conduct regular Innovation Workshops for Commonwealth staff focused on innovative technology evaluation, opportunity identification, categorization, and prioritization followed by the development of high-level business cases and implementation roadmaps for the most promising technologies and opportunities for improvement of Commonwealth operations.

"When I think of training, I believe that effective training uses active learning techniques, providing as much hands-on as possible with the most relevant examples to the learner. At Unisys we incorporate problem-based learning and we focus on real tasks during training that may involve multiple software applications or technologies. We time the training appropriately so that learners can put their new knowledge to use immediately. We develop training to support multiple learning styles (visual, auditory, and kinesthetic learners) and respect the different means of learning, from in-person structured group sessions to online quick tips. We set goals for the learners prior to training and then measure progress during and after training. Having worked in environments where technology and systems are evolving, I know the importance of training to keep staff current. Our plan for this contract will get it done."

Training Descriptions

Training Requirement	Category	Personnel to be Trained	# to be Trained	Program Duration	Training Location	Curricula	Training Materials	# & Frequency of Sessions	# & Level of Instructors
Data Center Computing Services Offering, Architecture & Transition									
Data Center Computing Service Catalog	Process	OA and Agency Representatives	100	3 hours	Harrisburg University	Data Center Computing Services Available, Service Request Process, How to use Service Catalog, Demonstration	Presentation Handout	1 Initial	1 Senior
Limited-Use Colocation Services	Deliverable	OA and Agency Representatives	100	2 hours	Harrisburg University	Service Offering Overview: How to use	Presentation Handout	1 Initial	1 Senior
Multi-Data Center Technology and Architecture Overview (2+ Architecture) (Sch. K D-01) - Network and Security Architecture Overview - Data Center Architecture and Technology - Technology Architecture and Refresh Approach (Sch. K D-03) - IT Service Continuity Architecture and Plan Overview (Sch. K D-04)	Deliverable	OA and Agency Representatives	100	4 hours	Harrisburg University	Overview of 2+ Datacenter, network, security architecture and technology implementation roadmap Technology Overview Technology Roadmap	Presentation Handout	1 Initial	1 Senior
Quarterly Multi-Data Center Technology and Architecture Overview (2+ Architecture)	Deliverable	OA and Agency Representatives	100	2 hours	Harrisburg University	Changes to 2+ Datacenter, network, security architecture and technology implementation roadmap, Technology Overview Technology Roadmap	Presentation Handout	4/year	1 Senior
EDC Assessment Overview	Deliverable	OA CIO and CTO	2	3 hours	CoPA	EDC Assessment Results: Recommendations for Security, HVAC, and Power Upgrades required, Physical Access requirements, Monitoring and Operating the installed infrastructure	Presentation Handout	1 Initial	1 Senior
Transition Program Executive Workshop: What to Expect During Transition (Sch. K D-05)	Transition	OA and Agency Representatives	100	3 hours	Harrisburg University	Transition Program overview: Key Program Activities, Roles and Responsibilities, Schedule, Deliverable Acceptance Process	Presentation Handout	1 Initial	1 Senior
Data Center Computing Services Processes and Tools									
Commonwealth Computing Procedures Manual Training (Sch. K D-02)	Process	OA and Agency Representatives	100	2 hours	Harrisburg University	Overview of CCPM: How to Access Detail and Use	Presentation Handout	1 Initial	1 Senior
Security Management Plan Overview (Sch. K D-07)	Deliverable	OA and Agency CISO	25	2 hours	CoPA	Service Offering Overview	Presentation Handout	1 Initial	1 Senior
Security Risk and Vulnerability Assessment Report (Sch. K D-09)	Deliverable	OA and Agency CISO	25	2 hours	CoPA	Assessment Process Overview: Risk and Vulnerability Results, Roadmap and Remediation Plan	Presentation Handout	1 Initial	1 Senior

Training Requirement	Category	Personnel to be Trained	# to be Trained	Program Duration	Training Location	Curricula	Training Materials	# & Frequency of Sessions	# & Level of Instructors
Security Training (Sch. F 3.2.4.6)	Tools	OA and Agency Representatives	100	2 hours	Web Based	Security Tools Used, Security Functions, Reports, Escalation Process	Presentation Handout	1 Initial	1 Senior
Data Center Services Reporting Overview	Tools	OA and Agency Representatives	100	2 hours	Web Based	Portal Usage and Reports Available	Presentation Handout	1 Initial	1 Senior
Knowledge Management Portal (Sch. K D-02.20)	Tools	OA and Agency Representatives	100	2 hours	Web Based	Portal Usage and Content Available	Presentation Handout	1 Initial	1 Senior
Performance Monitoring Training (Sch. F 3.2.2.6)	Tools	OA and Agency Representatives	100	2 hours	Web Based	Performance Management Tools, Reporting, Usage Support	Presentation Handout	1 Initial	1 Senior
Continuous Service Improvement & Innovation Plan	Quality	OA and Agency Representatives	100	2 hours	Web Based	Program Overview: CoPA and Unisys Roles, Critical Success Factors, Governance	Presentation Handout	1 Initial	1 Senior
Disaster Recovery Planning Process and Tool Training	Disaster Recovery	OA and Agency DR Representatives	50	3 hours	Web Based	Disaster Recovery Scope, Declaration, DR Plan, Development/Review, DR Testing	Presentation Handout	1 Initial	1 Senior
Contract Management Training	Contract	OA and Agency Contract Staff	25	2 hours	CoPA	Contract Terms: Change Control Process, Vendor Contract Staff Responsibilities	Presentation Handout	1 Initial	1 Senior
Financial Management Training	Contract	OA and Agency Contract Staff	25	2 hours	CoPA	Fee Structure, Consumptive Model Process, Invoicing Process, Remedy System Usage	Presentation Handout	1 Initial	1 Senior
IT Service Management Workshops									
Change and Release Management Training	Process	OA and Agency Representatives	50	3 hours	Harrisburg University	Change Management Process: Change types, Approvals, Escalations, Enterprise Change Windows	Presentation Handout	1 Initial	1 Senior
Incident Management Training	Process	OA and Agency Representatives	50	3 hours	Harrisburg University	Incident Management Process: Communications, Incident Reports, Process Metrics, Roles & Responsibilities	Presentation Handout	1 Initial	1 Senior
Problem Management Training	Process	OA and Agency Representatives	50	3 hours	Harrisburg University	Problem Management Process: Problem Reports, Process Metrics, Roles & Responsibilities	Presentation Handout	1 Initial	1 Senior
Asset Management and CMDB Training	Process	OA and Agency Representatives	50	3 hours	Harrisburg University	Asset Management Process: Process Metrics, Reports, Roles & Responsibilities, CI Reconciliation	Presentation Handout	1 Initial	1 Senior
Capacity Management Training	Process	OA and Agency Representatives	50	3 hours	Harrisburg University	Capacity Management Process: Process Metrics, Reports, Roles & Responsibilities	Presentation Handout	1 Initial	1 Senior
Service Level and Availability Management Training	Process	OA and Agency Representatives	50	3 hours	Harrisburg University	Service Level/Availability Management Process: Service Level Reports, Process Metrics, Roles & Responsibilities	Presentation Handout	1 Initial	1 Senior

--Redacted—

7.0 Financial Capability

(Redacted pursuant to 65 P.S. § 67.708(b)(26), which exempts the financial information of a bidder or offeror requested in an invitation for bid or request for proposals to demonstrate the bidder's or offeror's economic capability)

8.0 Objections and Additions to Contract Terms and Conditions

8. OBJECTIONS AND ADDITIONS TO CONTRACT TERMS AND CONDITIONS 8-3

This page intentionally left blank.

8. Objections and Additions to Contract Terms and Conditions

RFP	*Requirement*
II-8	*Objections and Additions to Contract Terms and Conditions. The Offeror will identify which, if any, of the terms and conditions (contained in Appendix A) it would like to negotiate and what additional terms and conditions the Offeror would like to add to the standard contract terms and conditions. The Offeror's failure to make a submission under this paragraph will result in its waiving its right to do so later, but the Issuing Office may consider late objections and requests for additions if to do so, in the Issuing Office's sole discretion, would be in the best interest of the Commonwealth. The Issuing Office may, in its sole discretion, accept or reject any requested changes to the standard contract terms and conditions. The Offeror shall not request changes to the other provisions of the RFP, nor shall the Offeror request to completely substitute its own terms and conditions for Appendix A. All terms and conditions must appear in one integrated contract. The Issuing Office will not accept references to the Offeror's, or any other, online guides or online terms and conditions contained in any proposal.* *Regardless of any objections set out in its proposal, the Offeror must submit its proposal, including the cost proposal, on the basis of the terms and conditions set out in Appendix A.* *The Issuing Office will reject any proposal that is conditioned on the negotiation of the terms and conditions set out in Appendix A or to other provisions of the RFP as specifically identified above.*

As requested by the Request for Proposal, there are terms and conditions in the RFP (Appendix A and related Exhibits and Schedules) that Unisys would like to negotiate with the Commonwealth, and there are additional terms and conditions that Unisys would like to add to the contract. As per the RFP instructions, these areas of concern are included within Section 8 of our Response. Unisys' approach was to use the "comments" functionality within Word which we believe will help assist in the Commonwealth's review process. These comments should not be considered as a replacement or including the Unisys standard contractual language as this is not allowed within the Request for Proposal guidelines. Unisys does refer to the existing contractual language in a number of comments with the intent that this will expedite the negotiation process as these areas have already been mutually agreed by both parties in the recent past.

Also, please note that within Appendix G, there are areas that should be considered as Trade Secret and / or Confidential Proprietary Information. As a result, a redacted version of the Request for Proposal response has been included.

Finally, Unisys has indicated in our proposal submission that we are not participating in the COSTARS program for this Commonwealth procurement. Unisys would be interested in discussing and possibly revisiting this decision later during the procurement process.

TERMS AND CONDITIONS

1. CONTRACT TERM

a) The term of the Contract shall commence on the Effective Date and shall end in seven (7) years ("the Expiration Date"), subject to the other provisions of the Contract. The Effective Date shall be: a) the date the Contract has been fully executed by the Contractor and by the Commonwealth and all approvals required by Commonwealth contracting procedures have been obtained or b) the date referenced in the Contract, whichever is later. The Contract shall not be a legally binding contract until after the fully-executed Contract has been sent to the Contractor.

b) The Commonwealth may, in its sole discretion, renew the Contract for three (3) one (1) year periods, or any combination thereof, on the terms and conditions in force at the date of the renewal and utilizing pricing to be negotiated but consistent with and no less favorable than the pricing in force at the date of the renewal. Further, the Commonwealth reserves the right to extend this Contract or any part of this Contract up to three (3) months, or as necessary to prevent a lapse in Contract coverage.

~~b)~~c) The Commonwealth reserves the right to execute the Contract, Purchase Orders or any follow-up Contract documents in ink or electronically. The Contractor understands and agrees that the receipt of an electronically-printed Contract with the printed name of the Commonwealth purchasing agent constitutes a valid, binding contract with the Commonwealth. The printed name of the purchasing agent on the Contract represents the signature of that individual who is authorized to bind the Commonwealth to the obligations contained in the Contract. The printed name also indicates that all approvals required by Commonwealth contracting procedures have been obtained.

~~c)~~d) The Contractor shall not start performance, and the Commonwealth shall not be liable to pay the Contractor for any supply furnished or work performed or expenses incurred, until all of the following have occurred:

(1) The Effective Date has arrived;

(2) The Contractor has received a copy of the fully executed Contract (or written notice from the Commonwealth that the Contract has been fully executed); and

(3) The Contractor has received a Purchase Order or other written notice to proceed signed by the Commonwealth Contracting Officer.

Comment [A1]: Contractor proposes first year pricing can remain the same unless partial contract, then additional discussion will be required for solution, T&Cs and pricing Years 2 and 3 require additional discussion regarding capital assets and increase costs related to cost of living changes

No Commonwealth employee has the authority to verbally direct the commencement of any work or delivery of any supply under this Contract prior to the Effective Date.

2. PURCHASE ORDERS

a) The Commonwealth may issue Purchase Orders against the Contract. These orders constitute the Contractor's authority to make delivery. All Purchase Orders received by the Contractor up to and including the expiration date of the Contract are acceptable and must be performed in accordance with the Contract. Contractors are not permitted to accept Purchase Orders which require performance in excess of those performance time periods specified in the Contract. Each Purchase Order will be deemed to incorporate the terms and conditions set forth in the Contract.

b) Purchase Orders will not include an ink signature by the Commonwealth. The electronically-printed name of the purchaser represents the signature of the individual who has the authority, on behalf of the Commonwealth, to authorize the Contractor to proceed.

c) Purchase Orders may be issued electronically or through facsimile equipment. The electronic transmission of a purchase order shall require acknowledgement of receipt of the transmission by the Contractor.

d) Contractor's acknowledgment of receipt of the electronic or facsimile transmission of the Purchase Order shall constitute receipt of an order.

e) Purchase Orders received by the Contractor after 4:00 p m. will be considered received the following business day.

f) The Commonwealth and the Contractor specifically agree as follows:

(1) No handwritten signature shall be required in order for the Contract or Purchase Order to be legally enforceable.

(2) Upon receipt of a Purchase Order, the Contractor shall promptly and properly transmit an acknowledgement in return. Any order which is issued electronically shall not give rise to any obligation to deliver on the part of the Contractor, or any obligation to receive and pay for delivered products on the part of the Commonwealth, unless and until the Commonwealth agency transmitting the order has properly received an acknowledgement.

(3) The parties agree that no writing shall be required in order to make the order legally binding. The parties hereby agree not to contest the validity or enforceability of the Contract or a genuine Purchase

Order or acknowledgement that have been issued electronically under the provisions of a statute of frauds or any other applicable law relating to whether certain agreements shall be in writing and signed by the party bound thereby. The Contract and any genuine Purchase Order or acknowledgement issued electronically, if introduced as evidence on paper in any judicial, arbitration, mediation, or administrative proceedings, will be admissible as between the parties to the same extent and under the same conditions as other business records originated and maintained in documentary form. Neither party shall contest the admissibility of copies of the Contract or any genuine Purchase Order or acknowledgements under either the business records exception to the hearsay rule or the best evidence rule on the basis that the Contract or Purchase Order or acknowledgement were not in writing or signed by the parties. A Purchase Order or acknowledgment shall be deemed to be genuine for all purposes if it is transmitted to the location designated for such documents.

(4) Each party will immediately take steps to verify any document that appears to be obviously garbled in transmission or improperly formatted to include re-transmission of any such document if necessary.

g) Purchase Orders under five thousand dollars ($5,000) in total amount may also be made using a Commonwealth Procurement VISA Card in person or by telephone. When an order is placed by telephone, the Commonwealth agency shall provide the agency name, employee name, credit card number, and expiration date of the card. The Contractor agrees to accept payment through the use of the Commonwealth Procurement VISA card.

Comment [A2]: Contractor believes this will not be applicable due to dollar amount limit If there are purchases at this level whereby Commonwealth wishes to use VISA card, then Contractor and Commonwealth will agree at that time if this payment process will be acceptable

3. IDENTIFICATION NUMBER

The Contractor must have a SAP Vendor Number.

4. ORDER OF PRECEDENCE, DEFINITIONS AND CONSTRUCTION

a) If any conflicts or discrepancies should arise in the terms and conditions of this Contract, or the interpretation thereof, the order of precedence shall be:

(1) This Contract (first, the Contract, including the terms and conditions, second the Schedules and Appendices); then

(2) The Contractor's Proposal (including the clarifications and the Best and Final Offer), as accepted by the Commonwealth; and then

(3) The RFP.

Comment [A3]: Contractor believes this Contract should stand alone and therefore will not require reference to the Proposal nor RFP

b) Except as otherwise expressly provided in the Contract, all capitalized terms used in the Contract shall have the meanings set forth in *Schedule A* (Defined Terms).

c) Interpretation:

(1) The terms defined in the Contract include the plural as well as the singular and the derivatives of such terms. Unless otherwise expressly stated, the words "herein," "hereof," and "hereunder" and other words of similar import refer to the Contract as a whole and not to any particular Paragraph, Section, subsection or other subdivision. The words "include" and "including" shall not be construed as terms of limitation.

(2) Headings preceding the text of Paragraphs or Sections, and headings to Schedules and Appendices, the table of contents and the table of Schedules and Appendices included in or attached to the Contract are used for convenience only and are not to be considered in construing or interpreting the Contract.

(3) References to any law refer to such law in changed or supplemented form, or to a newly adopted law replacing a previous law.

(4) Except as may be expressly set forth herein, all references to time herein refer to Eastern Standard Time or Eastern Daylight Time, as applicable.

d) The Contract includes each Schedule, Exhibit and Appendix referenced herein, all of which are incorporated into the Contract by this reference

Comment [A4]: Contractor proposes that definitions in Schedule A will need to be revised and updated as appropriate once the parties have discussed and revised the provisions of this Appendix A

5. CONTRACT INTEGRATION

a) This Contract, including the Contract signature pages, together with the Contractor's Proposal, the Contractor's clarifications and the Contractor's Best and Final Offer, and the RFP and addenda thereto that are incorporated herein by reference, constitutes the final, complete, and exclusive Contract between the parties containing all the terms and conditions agreed to by the parties.

b) All representations, understandings, promises, and agreements pertaining to the subject matter of this Contract made prior to or at the time this Contract is executed are superseded by this Contract.

c) There are no conditions precedent to the performance of this Contract except as expressly set forth herein.

Comment [A5]: Similar to comment A3 - The RFP and Proposals should be superseded by this Contract We want one integrated document to contain all of the agreements between the Parties The various documents might well conflict with one another See Section 84 which conflicts with this provision

d) No contract terms or conditions are applicable to this Contract except as they are expressly set forth herein.

6. SERVICES

a) The Contractor agrees to provide the Services to the Commonwealth as such services are defined in this Contract, the RFP and the Contractor's Proposal, and in accordance with the terms of this Contract.

b) The Contractor shall provide to Commonwealth the following Services pursuant to the terms of the Contract:

(1) Commencing as of the Effective Date, the Transition Services set forth in *Section 14* (Transition) and *Schedule D* (Transition Milestones);

(2) Commencing as of the Effective Date and continuing until the Expiration Date:

1. The services, function and responsibilities described in the Contract, including the Services set forth in (Services Catalog) and *Schedule F* (Statement of Work);

2. Any incidental services, functions or responsibilities not specifically described in the Contract, but which are inherent or required for the proper performance and delivery of the Services; and

3. The services, functions and responsibilities related to those categories of Services which Contractor is assuming pursuant to the Contract; and

(3) Commencing upon written notice by Commonwealth to Contractor in accordance with *Section 33* (Termination Assistance).

c) The services set forth in (1) through (3) above shall be collectively referenced as the "Services," as they may evolve during the Term of the Contract or be supplemented, enhanced, modified or replaced pursuant to the terms hereof. The Services provided under this Contract are not exclusive to Contractor. The Commonwealth may in-source or re-procure any or all of the Services.

d) The Commonwealth may request a change to the Services through a "*Request for Services*" to increase or decrease the amount of the Services provided under this Contract, according to Commonwealth's demand for the Services. The parties shall use the Change Control Procedures to implement the changes required by the *Request for Services* and revise the Fees as applicable.

Comment [A6]: Contractor agrees as long as it is inherent to the performance of the Services

Comment [A7]: Contractor requests additional discussion on minimum baseline commitment as minimum requirement is not an unusual practice in industry and allows for best competitive pricing Similar concepts of non-exclusivity contained in Sections 18(a) and 76

Comment [A8]: Contractor requests that in-source and re-procure will require a form of termination for convenience fee structure due to investment required by Contractor and additional conversation may be required regarding Fee Structure for the remaining Services

Comment [A9]: Contractor proposes decreasing volume may be acceptable but to a minimum baseline This concept requires more discussion

Comment [A10]: Contractor proposes adding an "Additional Services" provision like Sec 3 02 of existing contract associated to "out of scope" Services

e) Except as may be necessary on an emergency basis to maintain the continuity of the Services or in the event of a declared disaster, Contractor shall not, without Commonwealth's written consent, modify (1) the composition of the Services, (2) the manner in which the Services are to be provided or delivered if such modification would have an adverse effect on the operations of Commonwealth, or (3) the applicable Services Levels.

f) Except as otherwise expressly provided in this Contract, Contractor is responsible for providing, and is financially and operationally responsible for, the Facilities, Personnel, Equipment, Materials, technical knowledge, expertise and other resources necessary to provide the Services (including all upgrades, improvements, replacements and additions to such resources).

g) Contractor acknowledges that Commonwealth encourages Contractor to provide the Services in a shared data processing environment, if such environment will materially reduce Commonwealth's costs under this Contract and can be accomplished within the confidentiality and physical security constraints imposed upon Contractor elsewhere in this Contract. Accordingly, upon the migration of any of Commonwealth's data processing to a Contractor Services Location, Contractor may provide the related Services from such Contractor Services Location in a shared data processing environment if Contractor reasonably believes such environment will materially reduce Commonwealth's costs under this Contract and if such shared environment and Contractor's use thereof to provide the Services otherwise comports with the terms of this Contract. Commonwealth reserves to itself the right of prior approval of any third party proposed by Contractor to share such data processing environment, such approval not to be unreasonably withheld. Contractor acknowledges that Commonwealth will be entitled to withhold its approval of any such third party if, among other things, there is no or insufficient economic benefit to Commonwealth from the proposed sharing arrangement or if any federal or state confidentiality issues are not resolved to the satisfaction of the applicable federal or state governmental entity.

h) **Technical Architecture and Product Standards**. As part of the Services, Contractor shall suggest to Commonwealth information management technical architecture and product standards to be in effect at the Contractor Services Locations during the Term and the parties shall work together in good faith to develop information management technical architecture and product standards that are mutually acceptable to the parties and consistent with the Services Levels then in effect.

i) **Remote Access Capabilities**. As part of the Services, Contractor shall provide remote access capabilities for use by authorized personnel of the Commonwealth. All such remote access capabilities shall meet or exceed all Commonwealth technology and security standards as set forth in *Section 12* (Service Locations).

j) **Contractor Licenses and Permits**. As part of the Services, Contractor is responsible for obtaining, and has financial responsibility for, all necessary licenses, consents, approvals, permits and authorizations that are legally required to be obtained in order for Contractor to perform the Services. Commonwealth shall reasonably cooperate with and assist Contractor in obtaining any such licenses, consents, approvals, permits and authorizations. Notwithstanding the foregoing, Commonwealth will retain responsibility for obtaining, and the financial responsibility for, all necessary licenses, consents, approvals, permits and authorizations necessary to enable Contractor and its subcontractors to use the Commonwealth Software to the extent necessary for Contractor's performance of the Services and with Contractor's cooperation as further described in *Section 8* (Commonwealth Third Party Software), and Contractor will cooperate, and will cause the Contractor agents to cooperate, in good faith and at no additional cost to Commonwealth, in obtaining such licenses, consents, approvals, permits and authorizations.

k) **Changes in Law and Regulations**. Each party shall identify, and notify the other party of, any changes in applicable statutes, regulations, or policies that may directly or indirectly relate to Contractor's performance of the Services. Contractor and Commonwealth shall work together to identify any impact of such changes upon Commonwealth's use, or Contractor's delivery, of the Services. Contractor shall be responsible for any fines and penalties arising from its noncompliance with any such identified statutes, regulations, or policies relating to the business of providing the Services and shall not be responsible for any fines and penalties assessed against Commonwealth by federal governmental entities from Commonwealth's noncompliance with any federal legislative enactments or federal regulatory requirements relating to Commonwealth's operations that does not result from Contractor's actions or inactions under this Contract. As part of the Services, Contractor shall, if possible, perform the Services regardless of changes in legislative enactments or regulatory requirements. If such changes prevent Contractor from performing any of its obligations under this Contract or increase Contractor's costs in connection therewith, Contractor shall provide written notice thereof to Commonwealth within five (5) days of learning of the change and, if possible, will develop and implement a suitable workaround until such time as Contractor can fully perform its obligations under this Contract without such workaround. Contractor shall bear any costs relating to any legislative enactments and regulatory requirements relating to its business, and Commonwealth shall bear all reasonable out of pocket expenses, excluding attorneys fees, incurred by Contractor relating to legislative enactments and regulatory requirements that require modification of the Services by Contractor. If the parties are unable to agree as to the allocation of such costs, the changes and costs that are the subject of this *Section 6(k)* shall be subject to the Change Control Procedures.

Comment [A11]: Contractor proposes this section should be limited to policies which have the force of law like statutes and regulations

l) **Access**. Upon Contractor's receipt of appropriate, advance notice (which except in an emergency situation shall not be less than three (3) business days) and subject to Contractor's reasonable security requirements, authorized representatives of Commonwealth, Commonwealth agents and agents of the Federal government shall be permitted access to any Contractor Services Location.

7. Equipment

Contractor shall provide the Services using the Equipment. Commonwealth shall provide Contractor with the required access and authorization to use the Commonwealth Machines.

Comment [A12]: Contractor proposes definition of Equipment will need to be discussed as the current proposed definition is too broad (for example, personal computers, cell phone, etc)

Comment [A13]: Contractor proposes that this section seems to be inconsistent with the direction of the type of Managed Services contract that is required within the RFP It is proposed to review this section to validate based on the Services requested

a) **Replacement and Upgrades of the Equipment**.

(1) Contractor shall maintain, replace and upgrade the Contractor Machines at its sole cost and expense. At its sole cost and expense, Contractor shall maintain the Commonwealth Machines and shall replace each Commonwealth Machine at its respective end of life or as otherwise required to provide the Services. All replacements and upgrades shall be addressed through the Change Control Procedure. Commonwealth agencies will work closely with the Office of Administration and Contractor to accurately plan for any additional just-in-time technology refresh and upgrade deployment as may be necessary for Contractor to perform the Services in accordance with the Services Levels while meeting new or increased demands of the agencies. Contractor acknowledges that all such replacements and upgrades shall consist of the then current technology; that is, Contractor will not extend use of then obsolete technology by increasing its capacity with additional hardware capacity if newer, proven technology is then available. In the case of all such replacement or upgrades, Contractor shall provide advance notice via the Change Control Procedure, reasonable under the circumstances to Commonwealth, and such replacement or upgrade shall be subject to Commonwealth's approval, including, without limitation, the approval of the contemplated implementation schedule and cost. If Commonwealth withholds its approval of such replacement, upgrade or contemplated schedule, the Contractor Project Manager and the Commonwealth Project Manager, in good faith and subject to the Change Control Procedures, will determine the appropriate adjustments to the Services Levels.

(2) In addition to the foregoing obligations of Contractor under this *Section 7* (Equipment). Contractor shall provide Commonwealth with information regarding additional Improved Technology for Commonwealth's evaluation in connection with the Services, to the

extent then known to Contractor, and shall meet with Commonwealth at least two (2) times during each Contract year to inform Commonwealth of any Improved Technology Contractor is developing or information processing trends and directions of which Contractor is aware. Upon the existence of any such additional Improved Technology that the parties believe would materially improve the performance, or reduce the cost, of the Services, (other than the required upgrades and replacements provided for above), the parties will meet and discuss in good faith the terms upon which such Improved Technology may be implemented into the Services. The parties acknowledge their intent, in such discussions, to develop terms for such implementation that will result in an equal sharing by the parties of the net economic benefit that is expected to result therefrom with the Fees adjusted accordingly (after taking into account Contractor's cost of the related hardware, software and implementation efforts). Upon any such projected reduction of the cost of the Services, the parties, working together in good faith, shall revise the Fees accordingly.

b) **Equipment Maintenance**. As part of the Services, Contractor shall provide to Commonwealth maintenance and support services in respect of the Equipment and shall, at its own cost and expense, maintain and support the Contractor Machines as necessary for Contractor to perform the Services in accordance with the Services Levels. All costs and expenses incurred in connection with the provision of maintenance and support services in respect of the Equipment (including third party maintenance fees) shall be the responsibility of Contractor.

8. THIRD PARTY SOFTWARE

a) As part of the Services, Contractor shall have operational responsibility for the Commonwealth Third Party Software for which Commonwealth has a valid license and current maintenance agreement ("Commonwealth Third Party Software") and shall be responsible for applying upgrades, enhancements and fixes as provided and directed by the applicable agency. The Commonwealth shall have financial responsibility for any Commonwealth Third Party Software license, upgrade, maintenance and support fees, except that Contractor shall be responsible for any third-party consulting fees in connection with the installation or implementation of any software upgrade, revision or replacement required by Contractor.

b) As part of the Services, Contractor shall have financial, administration, operational and maintenance responsibility for all Contractor Software and Third Party Software provided by the Contractor as part of the Services, including but not limited to the Third Party Software listed in *Exhibit B.4.*

Comment [A14]: Contractor proposes that the words "provided by the Contractor as part of the Services" is added after the words Contractor Software

c) As part of the Services, except for the cost of the license, Contractor shall have financial, administration, operational and maintenance responsibility for the Third

Party Software listed in *Exhibit B.10*, for which the Commonwealth has a valid license ("Hybrid Third Party Software").

d) The Contractor shall not require the Commonwealth to sign a software license agreement for any Contractor Software or Third Party Software, including but not limited to any click through agreement or other terms purported to apply to the software.

Comment [A15]: Contractor would like to understand the Commonwealth's intent with this language

e) The Commonwealth will continue to support and maintain the software owned by the Commonwealth ("Commonwealth Proprietary Software") as necessary for Contractor's performance of the Services.

9. DATA SECURITY

a) Commonwealth will retain administration of logical and data access security, and Contractor will host Commonwealth security applications software utilized by the Commonwealth in managing logical and data access security, and will not implement configurations that would prevent Commonwealth from managing logical and data access security. As part of the Services, Contractor shall implement and maintain the Commonwealth's safeguards against the disclosure, destruction, loss or alteration of the Commonwealth Data in the possession of Contractor in accordance with the terms of this Contract and with Commonwealth's other security policies and procedures provided, in writing, to Contractor. In any event, Contractor, as part of the Services, is required to meet or exceed the most stringent of any applicable federal or state law, statute, rule or regulation applicable to Contractor's and/or Contractor's Agents possession of, or access to, any Commonwealth Data (which includes *Section 12(d)*, herein). All changes or additions to any such Commonwealth security policies or procedure or any changes to any applicable federal or state law, statute, rule or regulation shall be implemented by Contractor. Any changes or additions which result in a material additional cost to Contractor shall be subject to the Change Control Procedures. To the degree such change applies to other Contractor customers, Contractor will mitigate the Commonwealth's economic exposure to additional cost by equitably spreading the additional cost of compliance to its multiple customers.

b) The Contractor shall not store the Commonwealth Data outside of the continental United States of America.

c) All of Contractor's activities relating to the safeguarding of Commonwealth Data shall be subject to periodic review and monitoring by Commonwealth and related Federal agencies, and Contractor shall cooperate fully with all such reviews and monitoring. In addition to, and not in limitation of, any restrictions set forth elsewhere in this Contract, Contractor shall have operational access to the Commonwealth Data only on an as-needed basis.

d) Upon request at any time during the term of this Contract, or upon termination, cancellation, expiration or other conclusion of the Contract, Contractor shall return the Commonwealth Data to the Commonwealth or, at the Commonwealth's request, destroy the Data. If the Commonwealth requests Contractor to destroy the Data, the Commonwealth shall have the right to conduct an audit to ensure the Data has been destroyed. This provision shall also apply to all Commonwealth Data that is in the possession of subcontractors or agents of Contractor. Contractor shall complete such return or destruction within ten (10) days of the request or after the conclusion of this Contract. Within such ten (10) day period, Contractor shall certify in writing to Commonwealth that such return or destruction has been completed. Contractor shall make available to the Commonwealth for a complete and secure (i.e. encrypted and appropriately authenticated) download file of the Commonwealth Data in XML format, or such other format as specified by the Commonwealth, including all schema and transformation definitions and/or delimited text files with documented, detailed schema definitions along with attachments in their native format. Contractor shall be available to answer questions about data schema, transformations, and other elements required to fully understand and utilize the Commonwealth's data file. Unless the Commonwealth agrees or specifies otherwise, the Contractor shall also deliver to the Commonwealth any copies, duplicates, summaries, abstracts or other representations of any such Commonwealth Data or any part thereof, in whatever form, then in the Contractor's possession or control in accordance with the "NIST Guidelines for Media Sanitization" (SP 800-88).

Comment [A16]: This subject is repeated in 37g and 42d, which is somewhat contradictory 42d is similar to current contract language Contractor proposes deleting this section and maintaining section 42d

e) Contractor shall comply with all state and Federal data breach laws, including but not limited to the Commonwealth Breach of Personal Information Notification Act (73 P.S. § §2301 *et seq*.). In the event Contractor or any of Contractor's Agents discover or are notified of a data breach or potential breach of security involving any of the Commonwealth Data, Contractor shall immediately notify the Commonwealth Project Manager and the Commonwealth's Chief Information Security Officer of the same and describe the nature of the breach, the Data compromised, the involved parties, mitigation efforts, and corrective actions to be taken by the Contractor. In addition, at Commonwealth's request and at Contractor's sole cost and expense, Contractor shall:

Comment [A17]: Contractor agrees to comply to applicable state and Federal laws as it relates to the delivery of Contractor Services

(1) Promptly provide Commonwealth Data security reports to Commonwealth in a form to be agreed upon by Commonwealth and Contractor; and

(2) Cooperate with any efforts by Commonwealth to investigate or prosecute any breach of security of the Commonwealth Data; and

(3) Provide credit monitoring services to all individuals or organizations that may be impacted by the security breach.

Contractor shall be solely responsible for any costs, losses or damages actually incurred by the Commonwealth due to Personal Information being accessed, used, released, disclosed and/or acquired in an unauthorized manner while in the possession and control of the Contractor or its employees, agents, and/or subcontractors. In the event of any data breach by Contractor or any of the Contractor Agents involving any of the Commonwealth Data, Contractor shall be assessed a credit against Fees due for Service provided during the period of breach of security.

f) Credit Card Information

(1) By providing the Services under this Contract, the Contractor may create, receive, or have access to credit card records or record systems containing cardholder data including credit card numbers (collectively the "Cardholder Data"). Contractor shall comply with the Payment Card Industry Data Security Standard ("PCI DSS") requirements for Cardholder Data that are prescribed by the payment brands (including but not limited to Visa, MasterCard, American Express, and Discover), as they may be amended from time to time. Contractor acknowledges and agrees that Cardholder Data may only be used for assisting in completing a card transaction, for fraud control services, for loyalty programs, or as specifically agreed to by the payment brands, for purposes of this Contract or as required by applicable law.

(2) Contractor shall conform to and comply with the PCI DSS standards as defined by The PCI Security Standards Council at: https://www.pcisecuritystandards.org/security_standards/index.php. Contractor shall monitor these PCI DSS standards and will promptly notify the Commonwealth if its practices should not conform to such standards. Contractor shall provide a letter of certification to attest to meeting this requirement within one week of Contractor's receipt of the annual PCI DSS compliance report.

Comment [A18]: Contractor should be responsible for the costs described in this paragraph only where due to Contractor's breach Also, Contractor proposes a cap similar to the current contract be incorporated in this Contract

Comment [A19]: Contractor proposes that the specific remedies resulting from a data breach should be discussed and negotiated as part of the limitation of liability discussion Contractor proposes this should be a damages claim, not a credit against fees

Comment [A20]: Contractor believes this may not apply within Services today, and so should be handled via change control at agency direction/request if and when it is needed

Comment [A21]: Contractor shall comply with PCI DSS however the Commonwealth will need to interpret and notify Contractor what requirements that need to be followed Change Control Procedure will be implemented whenever changes are required

10. CONDUCT OF SERVICES

a) Following execution of the Contract, Contractor shall proceed diligently with all Services and shall perform such Services with qualified personnel, in accordance with the completion criteria set forth in the Contract.

b) The Contractor's Services hereunder shall be monitored by the Commonwealth and the Commonwealth's designated representatives. If the Commonwealth reasonably determines that the Contractor has not performed to the requirements in the Contract or has otherwise exposed the Commonwealth to material risk, the Commonwealth and the Contractor will attempt to reach agreement with respect to such matter. Failure of the Commonwealth or the

Contractor to arrive at such mutual determinations shall be a dispute concerning a question of fact within the meaning of *Section 34* (Contract Controversies) of this Contract.

c) As part of the Services, Contractor shall conduct enterprise-wide Commonwealth Satisfaction Surveys, which surveys shall be conducted annually until completion of the Transition. Upon completion of the Transition, Contractor shall conduct the Commonwealth Satisfaction Surveys semi-annually for two years and annually thereafter.

11. QUALITY ASSURANCE AND INTERNAL CONTROLS

a) Contractor will develop and implement quality assurance and internal controls, including implementing tools and methodologies, to ensure that the Services are performed in an accurate and timely manner, in accordance with the Contract. Without limiting the foregoing, Contractor will:

(1) Maintain a strong control environment in day-to-day operations;

(2) Develop and execute a process to ensure regular internal control self-assessments are performed with respect to all Services and report the outcome of such self-assessments to the Commonwealth;

(3) Maintain an internal audit function sufficient to monitor the processes and systems used to provide the Services (i.e., perform audits, track control measures, communicate status to management, drive corrective action, etc.); and

(4) Provide to Commonwealth a summary of audit activity performed, associated significant findings, status of follow-up activity, summary of control incidents (i.e., frauds, conflict of interest situations, etc.) and related corrective action, every six (6) months.

b) As part of the Services and included in the Fees, Contractor shall:

(1) Implement and maintain independently audited quality certification (ISO 27001, ISO 9001 and ISO/IEC 20000 accreditation) and provide copies of its certification under such program and also any relevant audit or report documentation whenever so requested by the Commonwealth.

(2) Maintain valid security certifications including CISSP (Certified Information Systems Security Professional) or Comp TIA-Security+ or CASP and provide copies of its certification under such program and also any relevant documentation whenever so requested by the Commonwealth.

(3) Maintain compliance with Federal and State mandated policies including CJIS (Criminal Justice Information Services) and CHRIA (Criminal History Record Information Act) and provide copies of any relevant documentation whenever so requested by the Commonwealth.

(4) Undertake at least annually, and shall cause to be undertaken by Contractor's material subcontractors, a SSAE 16 Type II audit that covers the common controls for any Contractor sites where Contractor performs work for the Commonwealth; provide the reports from such audits to the Commonwealth; and perform these SSAE 16 Type II audits at such time(s) that shall mean the audit report is recent enough for Commonwealth to rely upon it in meeting its reporting obligations.

Comment [A22]: [illegible] A

12. SERVICE LOCATIONS

a) **Services Locations**. The Services shall be provided from and to the Service Locations as detailed in *Schedule E* (Datacenter Locations). Contractor shall not (1) provide the Services from a location other than a Service Location or (2) use the Commonwealth Enterprise Data Center to provide services to a third party without Commonwealth's consent. Authorized representatives of Commonwealth, Commonwealth agents and agents of the Federal government shall be permitted access to any Services Location, subject to the terms of *Section 12(d)*.

b) **Location of Performance.** Except where Contractor obtains the Commonwealth's prior written approval, Contractor shall perform all of the Services only from or at locations within the geographic boundaries of the continental United States. Any Commonwealth approval for the performance of Services outside of the continental United States shall be limited to the specific instance and scope of such written approval, including the types of Services and locations involved.

c) Right to Audit and Inspect:

(1) The Contractor shall permit the Commonwealth (or a third-party provider selected by the Commonwealth) to perform an onsite inspection of the Contractor's Service Locations, infrastructure and security practices as reasonably requested by the Commonwealth, but no more than once per month.

Comment [A23]: Contractor proposes 2 inspections per year as long as inspections are not disruptive to Contractor Services

(2) The Commonwealth shall have the right to request third-party audits and/or certifications related to each Serve Location's infrastructure and security, including penetration testing and vulnerability assessments. Any reports produced from these audits

and certifications will be provided to the Commonwealth for review at no cost.

(3) The Contractor shall provide the Commonwealth infrastructure and security specifications in written format for each Service Location as requested and at no cost to the Commonwealth.

(4) The Contractor shall provide the Commonwealth access to the performance records of the Contractor, as well as access to daily and weekly service quality statistics as requested and at no cost to the Commonwealth.

d) Security Procedures

(1) As part of the Services, Contractor shall maintain and enforce environmental and physical security standards and procedures at each of the Contractor Services Locations and shall comply with environmental and physical security procedures as described in *Schedule F* (COPA Datacenter Statement of Work) and pursuant to the physical security and environmental chapters of the Commonwealth Computing Procedures Manual, which compliance will be confirmed by Contractor's SSAE 16 Type II audit report which will be delivered to the Commonwealth. If the Commonwealth requests any changes to environmental and security standards after the Effective Date and such changes would subject Contractor to material additional costs, those changes will be addressed through the Change Control Procedures. In addition, each Contractor Services Location must meet a minimum of Class C2 controlled access protection as defined in the Federal Department of Defense Trusted Computer System Evaluation (DOD 5200.28-STD).

(2) Each Commonwealth Agency's specific security requirements must be satisfied prior to the migration of its data or processing activities to any Contractor Services Location, including any facilities to be used to support Disaster Recovery. Contractor shall maintain a log recording all entry to any Contractor Services Location, which log shall at all times be subject to Commonwealth review and audit. All of Contractor's security procedures required under this Contract shall be subject to periodic review by Commonwealth, any Commonwealth Agency or any agency of the United States federal government directly or indirectly having any dealings with any Commonwealth Agency.

(3) Contractor, as part of the Services, shall address any concerns any such reviewing entity may have regarding those security procedures and, if Commonwealth is not the reviewing entity, shall promptly

inform Commonwealth of the expressed concerns and its plans to address the same. Contractor acknowledges that, because Commonwealth is a governmental entity, Commonwealth is subject to various federal and state statutory and regulatory confidentiality and security requirements, all of which will be binding upon Contractor during the Term. This Contract and the business relationship between Commonwealth and Contractor will be subject to review and approval by impacted Commonwealth Agencies and impacted federal agencies and other entities. At a minimum, Contractor will be required to comply with the Privacy Act of 1974, as amended (42 U.S.C.A. 2000, *et seq.*), the Drivers Privacy Protection Act, as amended (18 U.S.C.A. 2721, *et seq.*), the Tax Information Security Guidelines promulgated by the Internal Revenue Service; and various confidentiality regulations promulgated by the U.S. Department of Health and Human Services, all as though Contractor were a governmental entity. Contractor will also be required to comply with the Health Insurance Portability and Accountability Act of 1996, Pub.L. 104-191 (HIPAA) and the regulations promulgated related thereto (45 C.F.R. 160.101, *et seq.*) as a Business Associate as that term is defined by HIPAA according to the Business Associate Contract included as Appendix A (which Contract shall apply to covered portions of the Commonwealth as a hybrid entity as agencies direct, and which Contract shall govern only insofar as no other more stringent law otherwise applies to that data, and only insofar as the Contract does not conflict with more stringent provisions of this Amendment, where "more stringent" is defined as in 45 C.F.R. 160.202). If and only to the extent specifically required in writing by a federal agency, in order for Contractor to be granted operational access to Commonwealth Data in connection with its performance of the Services, Contractor may be appointed as an agent of Commonwealth for the limited purpose of having operational access to certain Commonwealth Data not as a contractor of Commonwealth, but as an agent of Commonwealth having an agent's fiduciary obligations to Commonwealth as its principal. Contractor shall deliver to Commonwealth written notice of any breach of such security standards and procedures of which Contractor then has knowledge, which notice shall be delivered as promptly as is reasonable under the circumstances. Any breach by Contractor of such security standards or procedures under this *Section 12(d)* shall be subject to the provisions of *Section 30* (Default). As more fully set forth in *Section 59* (Independent Capacity of Contractor), parties to this Contract agree that the Services performed by the Contractor under the terms of this Contract are performed as an independent contractor.

Comment [A24]: Contractor proposes this reference should be to 32(c)

13. CONDITIONS OF CONTRACTOR'S OCCUPANCY OF COMMONWEALTH-PROVIDED REAL PROPERTY

a) General

(1) The Contractor shall use and occupy the property provided by the Commonwealth (the "Enterprise Data Center") continuously as a data processing center and for related administrative uses. No other use shall be permitted. A summary of the Enterprise Data Center is attached to the RFP and incorporated herein as *Exhibit D.7* (EDC Summary and Requirements).

(2) The Contractor shall have the sole responsibility to comply with all federal, state, and municipal laws, ordinances and regulations in its use and occupancy of the property.

(3) The Contractor agrees to accept the property in an "as-is" condition. The Contractor agrees that the Commonwealth extends no warranty of any kind, express or implied, in regard to the property provided to the Contractor for its use.

(4) The Commonwealth is immune from the payment of real estate taxes. If any relevant taxing authority deems the use of the property by the Contractor to cause the property to become taxable, the Contractor shall have sole responsibility for the timely payment of any tax levied. Payment of such taxes may be temporarily withheld if Contractor is, in good faith, contesting the assessment or tax in a court of competent jurisdiction.

(5) The Contractor agrees that this Contract does not grant or otherwise convey any legal interest in the real property to the Contractor.

b) Upkeep and Improvements

Comment [A25]: Contractor proposes additional language to be added whereby ordinary wear and tear excepted

(1) The Contractor, at its sole cost and expense, is responsible for all maintenance, security and upkeep of the property under its control. The Contractor agrees to keep the property in substantially the same condition as it was upon the Effective Date of the Contract.

(2) Except for minor, non-structural alterations costing less than $10,000, any and all Contractor alterations and additions to the Property shall be performed in accordance with plans and specifications prepared by a Pennsylvania-licensed architect and/or engineer. The Contractor shall submit plans and specifications to the Office of Administration and the Department of General Services concurrently for approval prior to initiation of

construction. Any and all alterations to the Property shall be performed in a good and workmanlike manner, in conformity with all laws, rules, ordinances and other requirements of all governmental entities having jurisdiction. The Department of General Services and the Office of Administration reserve the right to specify standards that must be maintained for any alterations and additions to the Property.

(3) The Contractor is solely responsible for all costs and expenses associated with any Contractor alterations or additions.

(4) The Contractor shall fully comply with Pennsylvania law governing contracting for construction, alteration or repair of a public building, including but not limited to the Prevailing Wage Act, Steel Products Procurement Act, and the Uniform Construction Code.

(5) To the fullest extent permitted by law, all Contractor contracts for alterations and additions must include a "No-Lien" clause requiring that the Property be kept free from mechanics' or materialmens' liens and that the parties must file the necessary documentation in the appropriate public offices to effectuate waivers of contractors', mechanics' and materialmens' liens.

(6) Any and all alterations and additions made to the property by either the Contractor or the Commonwealth shall become part of the real estate and become the property of the Commonwealth.

c) Utilities

Contractor shall have installed, at its sole cost, separate electric meters and distribution panels to support the raised floor compute space. The Contractor will be responsible to timely reimburse the Commonwealth for electricity consumed in the raised floor compute space.

d) Reserve Account

Contractor shall establish a capital improvement fund ("Reserve Account") into which Contractor shall deposit monthly ($84,000) dollars. The Reserve Account shall be cumulative, intended for capital improvements or major repairs to the Enterprise Data Center and disbursements from which shall be made only upon mutual agreement of the Commonwealth and the Contractor. Any remaining sums in the Reserve Account at termination of this Agreement shall be paid or credited to the Commonwealth. In the event that at any time during the term of this Contract sums in the Reserve Account are insufficient to

cover the cost of an agreed-to capital improvement or major repair, Contractor shall be reimbursed by the Commonwealth in an amount equal to such insufficiency. Contractor shall provide the Commonwealth at least semi-annually a report of all activity in the Reserve Account.

e) Termination Assistance

Contractor shall vacate the Enterprise Data Center and return to the Commonwealth, if not previously returned, any resources that are implicated by the relevant Assistance Event, as described in *Section 33* (Termination Assistance), and that are owned, leased or licensed by the Commonwealth or any Commonwealth Contractor, including the Commonwealth owned or leased Equipment, the Commonwealth Owned Materials and the Commonwealth licensed Materials, in condition at least as good as the condition of such facilities and resources when they were made available to Contractor, ordinary wear and tear excepted. Such facilities and resources shall be vacated and/or returned as of the later of the effective date of the relevant Assistance Event and the completion of the Termination Assistance requiring such facilities or resources.

14. TRANSITION

a) **Transition.** Contractor shall perform the Transition Services, including provision of the deliverables described in the Detailed Transition Plan. Contractor shall accomplish the Transition in a transparent, seamless, orderly, and uninterrupted manner. Contractor's responsibilities with respect to the transition include:

(1) Transfer of the Services to Contractor and subsequent transition of the Services to realize any planned cost reductions and Service performance improvements in accordance with the Transition Plans agreed to by Commonwealth and including a number of Transition Milestones;

(2) Performing the transition without disruption to Commonwealth's operations;

(3) Assuming responsibility for all costs associated with the transition; and

(4) Otherwise performing such transition and migration tasks as are necessary to enable Contractor to provide the Services in accordance with the terms of the Contract, including the applicable Service Levels.

b) **Transition Plan.** The preliminary Transition Plan is attached to this Contract as part of Contractor's Proposal. Contractor shall complete, and submit to

Commonwealth for review a final Detailed Transition Plan on or before the date set forth in *Schedule D* (Transition Milestones). If a Detailed Transition Plan submitted by Contractor is not acceptable to Commonwealth, Contractor will address and resolve any questions or concerns Commonwealth may have and will promptly incorporate any modifications, additions or deletions requested by Commonwealth. Contractor will revise and resubmit the Detailed Transition Plan until accepted by Commonwealth. Upon Commonwealth's acceptance, the Detailed Transition Plan shall automatically be incorporated into this Contract as *Schedule M* (Detailed Transition Plan) and shall supersede and replace all prior Transition Plans. The Detailed Transition Plan shall detail the specific activities to be performed by each Party, and, unless otherwise requested by Contractor and agreed to by Commonwealth in its sole discretion, shall be consistent in all material respects with any preliminary Transition Plan, including with respect to the activities, deliverables, Transition Milestones, and Transition Milestone Credits described therein. The Detailed Transition Plan may thereafter be amended as mutually agreed by the Parties.

Comment [A26]: Contractor proposes that this is subject to Contractor mutual agreement which will not be unreasonably withheld

The Parties recognize and agree that time is of the essence for a successful Transition and have designated certain actions and projects in the Detailed Transition Plan as Transition Milestones ("Transition Milestones"). Contractor shall achieve all such Transition Milestone by the date corresponding thereto in *Schedule D* (Transition Milestones). Without limiting the foregoing, the Detailed Transition Plan shall specify, among other things,

Comment [A27]: Contractor proposes that time is of the essence is not an appropriate concept in this type of Services agreement

1. the deliverables to be completed by Contractor,

2. the date(s) by which each such activity or deliverable is to be completed (the "Transition Milestones"),

3. a process and set of standards to which Contractor shall adhere in the performance of the Transition Services and that shall enable Commonwealth to determine whether Contractor has successfully completed the transition and the activities and deliverables associated with each Transition Milestone,

4. any transition responsibilities to be performed or transition resources to be provided by Commonwealth and/or Commonwealth Customers,

5. any transition responsibilities to be performed or transition resources to be provided by another Commonwealth Contractor, and

6. a detailed description of the processes and procedures that Contractor will implement (and associated implementation schedules) to effect the seamless integration and coordination

of the Services with related services to be provided by other Commonwealth Contractors.

The Detailed Transition Plan shall identify any related documents contemplated by this Contract and/or required to effectuate the transition that shall be executed by either of the Parties.

c) **Performance**. Contractor shall perform the Transition Services in accordance with the timetable and the Transition Milestones set forth in the Transition Detailed Plan. Contractor shall assist Commonwealth in connection with Commonwealth's evaluation or testing of the deliverables set forth in the Detailed Transition Plan. Except as otherwise expressly stipulated in the Detailed Transition Plan, Contractor shall perform the Transition Services in a manner that shall not (i) disrupt or have an unnecessary adverse impact on the activities or operations of Commonwealth or the Commonwealth Customers, (ii) degrade the Services then being received by Commonwealth or the Commonwealth Customers or (iii) disrupt or interfere with the ability of Commonwealth or the Commonwealth Customers to obtain the full benefit of the Services. In Contractor's performance and completion of Transition Services, no functionality of Commonwealth's then current business operations or environment will be discontinued until Contractor demonstrates to Commonwealth's reasonable satisfaction that the affected processes and operations have been successfully migrated to Contractor's target environment and are functioning properly in that environment.

Comment [A28]: Contractor requests a material qualification to be included in subsection ii and iii

Without limiting its obligations or responsibilities, prior to undertaking any transition activity, Contractor shall discuss with Commonwealth and the relevant Commonwealth Customers all known Commonwealth and Commonwealth Customer-specific material risks and shall not proceed with such activity until Commonwealth is reasonably satisfied with the plans with regard to such risks (provided that, neither Contractor's disclosure of any such risks to Commonwealth, nor Commonwealth's acquiescence in Contractor's plans, shall operate or be construed as limiting Contractor's responsibility under this Contract). Contractor will, at Commonwealth's request, participate in transition meetings with other Commonwealth Contractors. Commonwealth reserves the right to monitor, test and otherwise observe and participate in transition. Contractor will notify Commonwealth without delay if any Commonwealth monitoring, testing or participation has caused (or Contractor expects it to cause) a problem or delay in transition and work with Commonwealth to prevent or circumvent the problem or delay.

d) **Reports**. Beginning on the Effective Date, Contractor shall meet at least weekly with the Commonwealth to report on Contractor's progress in performing its responsibilities and meeting the timetable and Transition Milestones set forth in the Detailed Transition Plan. Contractor also shall provide written reports to Commonwealth at least weekly regarding such

matters, and shall provide oral reports more frequently if requested by Commonwealth. Promptly upon receiving any information indicating that Contractor may not perform its responsibilities or meet the timetable or Transition Milestones set forth in the Detailed Transition Plan, Contractor shall notify Commonwealth of such delays and shall identify for Commonwealth's consideration and approval specific measures to address such delays and mitigate the risks associated therewith.

e) **Notification of Problems**. Contractor shall provide to Commonwealth written notice of any acts or omissions (whether by Commonwealth, a Commonwealth Contractor, subcontractor or any third party), any failure to perform any of each such party's obligations under the Contract and any other events that may affect Contractor's performance of the Transition Services. Contractor shall provide such written notice within thirty (30) days after Contractor first knew or should have known of such acts, omissions, or failures or other events. Such written notice shall describe in reasonable detail such acts, omissions, failures or other events and the manner in which the foregoing may affect Contractor's performance.

Comment [A29]: Contractor proposes that Contractor will be reimbursed for Contractor costs and relieved for failure to perform Contractor's obligation if such costs or failure are due to such acts, omissions, or failures

f) **Corrective Action Plan**. In the event that either (1) the Commonwealth determines that Contractor has failed or is reasonably likely to fail to deliver the Transition Services, or (2) Contractor has determined that it has failed or is reasonably likely to fail to deliver the Transition Services, then Commonwealth or Contractor, as applicable, will notify the other Party of such failure (a "Transition CAP Notice"). Concurrently with such notice, Contractor will:

1. immediately take steps to mitigate any harmful effects of such failure, and
2. (promptly (and in any event as soon as reasonably practical) perform a Root Cause Analysis and prepare a Corrective Action Plan with respect to such failure, and
3. take all actions necessary to prevent its recurrence, including, without limitation, providing all additional resources necessary to resolve such failure.

If in Commonwealth's sole discretion any such Corrective Action Plan is not adequately addressing the failure, Contractor shall revise the Corrective Action Plan until it is accepted by the Commonwealth. In the event that Contractor is unable to complete the Transition Services on or before the dates specified in the Detailed Transition Plan (a "Transition Failure Event"), then Contractor will meet with Commonwealth to develop a workaround plan to address the Transition Failure Event, which plan may include, at Commonwealth's option, obtaining the services to workaround the Transition Failure Event from another Commonwealth contractor and/or the incumbent contractor. If the Commonwealth elects to obtain such services from another contractor and/or

Comment [A30]: Contractor requests to removing "sole" and replace with "reasonable"

the incumbent contractor, the Commonwealth will equitably adjust the Fees to reflect the reduction in Services being provided by Contractor.

g) **Failure to Meet Transition Milestones**. Neither the Transition Services nor the activities and deliverables associated with individual Transition Milestones shall be deemed complete until Commonwealth's acceptance of such activities and deliverables. If Contractor fails to meet a Transition Milestone, Contractor shall pay Commonwealth the applicable Milestone Credits specified in *Schedule D* (Transition Milestones) or the Detailed Transition Plan that are associated with such Transition Services.

h) **Additional Remedies**. In the event that Contractor fails to identify and resolve any problems that may impede or delay the timely completion of each task in the Detailed Transition Plan, without prejudice to Commonwealth's other rights and remedies under the Contract or at law or equity, (i) Contractor will provide, at its sole cost and expense, all such additional resources as are necessary to identify and resolve any problems that may impede or delay the timely completion of each task in the Detailed Transition Plan, and (ii) Commonwealth may equitably reduce the Fees set forth in *Schedule I* (Offeror Pricing Forms) in an amount reasonably estimated by Commonwealth to account for the Services that Commonwealth is not receiving or did not receive.

i) **Suspension or Delay of Transition Services.** Commonwealth reserves the right, in its sole discretion, to suspend or delay the performance of the Transition Services and/or the transition of all or any part of the Services. If Commonwealth elects to exercise this right and Commonwealth's decision is based in material part on concerns about Contractor's ability to perform material aspects of the Transition Services or Contractor's failure to perform its obligations under this Contract, the Commonwealth shall not incur any additional Fees or reimbursable expenses in connection with such decision, provided that Commonwealth shall work in good faith with Contractor to minimize the period of any such suspension or delay.

15. DISASTER RECOVERY AND BUSINESS CONTINUITY

a) Disaster Recovery Plan.

(1) Jointly with the Commonwealth, Contractor shall at least annually review and update the disaster recovery plan, it being understood and agreed that the parties will work together and cooperate in good faith on any such review or updated of the disaster recovery plans.

(2) With the Commonwealth's support as specified in the disaster recovery plan, Contractor shall every six (6) months test the operability of the disaster recovery plan then in effect.

Comment [A31]: Contractor believes unilateral deduction of Fees by Commonwealth is not an appropriate remedy, this should be a damages claim

Comment [A32]: For clarity purposes, if the Transition failure event is caused by the Commonwealth, the Commonwealth will not be able to obtain such services from another vendor and Contractor may process Change Control related to any additional costs it incurred

Comment [A33]: Contractor proposes cure periods for missed milestones

Comment [A34]: Contractor requests that Commonwealth will reimburse Contractor for any delays caused by the Commonwealth

1. Within fifteen (15) business days of completion of a disaster recovery test, Contractor will certify to Commonwealth that the disaster recovery plan was fully, timely and successfully implemented, or, if the disaster recovery plan was not fully, timely and successfully implemented, report all deficiencies (including root cause analysis) and corrective actions, and certify that such corrective actions addressed all deficiencies; and

2. Annually and at additional times at the request of Commonwealth, Contractor will certify to Commonwealth that that any applicable third-party business recovery center agreement remains in full force and effect without any default, including payment, thereunder by any party thereto, and that Commonwealth is entitled, pursuant to the terms of the business recovery center agreement, to assume that agreement upon the expiration or termination of this Contract.

b) Disaster Recovery Event.

(1) As part of the Services, Contractor shall have responsibility for executing the disaster recovery plan relating to the Services as described in *Schedule F* (COPA Datacenter Statement of Work). Contractor shall immediately provide Commonwealth with notice of the occurrence of any disaster affecting the provision or receipt of all or any material portion of the Services and implement the disaster recovery plan then in effect. Contractor agrees to utilize the disaster recovery planning methodology software then utilized by Commonwealth in connection with activities contemplated under this *Section 15* (Disaster Recovery and Business Continuity).

(2) Contractor shall reinstitute the Services as promptly as possible but in any event within subscribed restitution hours, as set forth in the disaster recovery plan then in effect, after the occurrence of a disaster. If the Services are not fully reinstituted within the subscribed restitution hours the Commonwealth shall have the right to terminate this Contract for critical failure pursuant to the provisions of *Section 32(c)*, and Contractor shall, prior to or at the expiration of the applicable restitution period, deliver to Commonwealth a written report detailing the cause of the disaster, Contractor's plans to reinstitute the Services and its anticipated schedule to do so. Thereafter, Contractor and Commonwealth shall develop a plan to reinstitute the Services as promptly as is possible under the circumstances, with Contractor making such reinstitution its highest priority. Contractor shall prepare and deliver to Commonwealth

Comment [A35]: Contractor proposes that Contractor is relieved to the extent Commonwealth causes the failure

Comment [A36]: Contractor suggesting deleting the highlighted words “with Contractor… priority ”

updated reports such that Commonwealth shall at all times be fully informed as to the status of Contractor's efforts and anticipated schedule to reinstitute the Services. In the event that any Contractor Machines are required to be replaced as a result of the disaster, Contractor shall replace such Contractor Machines with current or Improved Technology to the extent then available and compatible with the associated application(s). Any Contractor obligations to implement a disaster recovery plan set forth in this paragraph can be triggered by a notice of disaster provided to Contractor by Commonwealth.

Comment [A37]: Contractor proposes that Contractor should be able to replace with any equipment that enables Contractor to meet Service Levels, regardless of current or improved technology based on the Managed Services contract type

16. PRIME CONTRACTOR RESPONSIBILITIES

The Contractor will be responsible for all Services in this Contract whether or not Contractor provides them directly. Further, the Contractor is the sole point of contact with regard to all contractual matters, including payment of any and all charges resulting from the Contract.

17. KEY POSITIONS/CONTRACTOR PERSONNEL

a) **Contractor Project Manager and Transition Project Manager**.

(1) Upon the Effective Date, the Contractor shall appoint the Contractor Project Manager identified in its proposal, who on a full-time basis shall be in charge of implementing the Services. Contractor shall replace the Contractor Project Manager only when required or permitted pursuant to *Section 17(c)*. The Contractor Project Manager shall at all times be subject to Commonwealth's continuing approval.

(2) Upon the Effective Date he Contractor shall appoint the Transition Project Manager identified in its proposal, who will have the responsibilities set forth in *Schedule F* (COPA Datacenter Statement of Work). Contractor shall replace the Transition Project Manager only when required or permitted pursuant to *Section 17(c)*. The Contractor Project Manager shall at all times be subject to Commonwealth's continuing approval.

b) **Key Positions**. The positions identified in *Schedule G* (Staffing Plan and Key Positions), are designated by Commonwealth and Contractor as key positions within the Contractor's Personnel. All of the Key Employees shall be dedicated to the Commonwealth account on a full-time basis. The Commonwealth Project Manager and the Contractor Project Manager shall meet once every Contract Year thereafter or upon the request of either the Commonwealth Project Manager or the Contractor Project Manager to update the list of the Key Employees. Each Key Employee shall at all times be subject to Commonwealth's continuing approval. Except for a replacement or reassignment of a Key Employee pursuant to *Section 17(c)*, Contractor shall not reassign or replace any Key Employee. As

more fully set forth in *Section 59* (Independent Capacity of Contractor), parties to this Contract agree that the Services performed by the Contractor under the terms of this Contract are performed as an independent contractor.

c) **Reassignment Waivers**. Contractor shall not reassign or replace the Contractor Project Manager or any Contractor Services Location Manager during the first eighteen (18) months of his or her assignment as the Contractor Project Manager or a Contractor Services Location Manager unless Commonwealth consents to such reassignment or replacement or unless the individual (1) voluntarily resigns from Contractor, (2) is dismissed by Contractor for cause, or (3) is unable to work due to his or her death or disability. In addition, Contractor shall, in connection with its assignment of other Key Employees, use commercially reasonable efforts to assure the greatest degree of continuity possible among such Key Employees. If, in any instance, Commonwealth withholds or withdraws its approval of any employee or representative of Contractor for the performance of the Services, including without limitation, the Contractor Project Manager, any Contractor Services Location Manager or any other Key Employee, Contractor promptly shall reassign and replace such employee or representative

Comment [A38]: Contractor proposes adding language to include "displays unsatisfactory performance" as included in current contract

d) **Subcontractors**. The Contractor may subcontract any portion of the Services described in this Contract to third parties selected by Contractor and approved in writing by the Commonwealth, which approval will not be unreasonably withheld. Approved Subcontractors will be listed on *Schedule L* (Approved Subcontractors). Notwithstanding the above, if Contractor has disclosed the identity of Subcontractor(s) together with the scope of work to be subcontracted in the Contractor's Proposal, award of the Contract is deemed approval of all named Subcontractors for the specified scope of work and a separate approval is not required. The existence of any subcontract shall not change the obligations of Contractor to the Commonwealth under this Contract. Upon written request of the Commonwealth, the Contractor shall promptly provide the Commonwealth with a copy of any specified subcontract agreement between the Contractor and the subcontractor. If Commonwealth reasonably determines that a subcontractor should no longer be retained by Contractor due to material performance deficiencies arising from the subcontractor's performance, the Commonwealth reserves the right, for good cause, to require that the Contractor remove a subcontractor from the project. As more fully set forth in *Section 59* (Independent Capacity of Contractor), parties to this Contract agree that the Services performed by the Contractor under the terms of this Contract are performed as an independent contractor.

Comment [A39]: Contractor proposes that except to the extent required by law, economic terms shall not be discussed

e) **Managerial Control**. Subject to the other provisions of this Contract, including without limitation, provisions regarding security procedures and government security clearance and the other provisions of this *Section 17* (Key Positions/Contractor Personnel) Contractor shall have complete managerial control over its employees, and Contractor may dismiss, promote, replace or reassign a member of the Contractor Personnel; provided, however, that unless otherwise agreed to by Commonwealth, Contractor shall deliver a notice to

Commonwealth before or immediately after dismissing any member of the Contractor's Personnel. In addition, Contractor shall deliver to Commonwealth written notice of any criminal activities undertaken by, or alleged to have been undertaken by, any member of the Contractor Personnel and of which Contractor then has knowledge, which notice shall be delivered as promptly as is reasonable under the circumstances, and Contractor will cooperate fully with any investigation undertaken by or through Commonwealth in respect of such actual or alleged criminal activities.

Comment [A40]: To the extent permissible by law

f) **Conduct of Contractor Personnel**. While at the Commonwealth Services Locations and the Contractor Services locations, Contractor's personnel, subcontractors and agents (1) shall comply with all lawful requests, rules and regulations of Commonwealth regarding personal and professional conduct (including the wearing of a particular uniform, identification badge or personal protective equipment and adhering to security regulations and general safety practices or procedures) and (2) otherwise shall conduct themselves in a businesslike manner.

g) **Unsatisfactory Conduct**. If the Commonwealth determines in its sole discretion that a particular Contractor employee or subcontractor is not conducting himself or herself in an appropriate manner, Commonwealth may provide Contractor with notice of such conduct. Upon receipt of such notice, Contractor shall promptly investigate the matter and take appropriate action, which may include (1) removing the offending individual from the project and replacing him or her with a similarly qualified individual or (2) taking other appropriate disciplinary action to prevent a reoccurrence. In the event there are repeat violations of this *Section 17(g)* by a particular Contractor employee, contractor or subcontractor, Contractor shall promptly remove him or her from the project as set forth above.

h) **Confidentiality.** Contractor shall:

(1) Cause each Contractor Personnel to maintain and enforce the confidentiality provisions of the Contract both during and after their assignment to the Commonwealth account; and

(2) Enter into, or shall have entered into, an agreement with each Contractor Personnel member which assigns, transfers and conveys to Contractor all of such employee's right, title and interest in and to any materials created pursuant to the Contract, including all rights of patent, copyright, trade secret or other proprietary rights in and to such materials.

18. THIRD PARTY SERVICES

a) Commonwealth shall have the right, in its sole discretion, to contract with any number of third parties to perform Services which would otherwise fall within the

terms of this Contract. In the event Commonwealth contracts with a third party to perform any service on behalf of or for Commonwealth, Contractor, as part of the Services, shall cooperate with Commonwealth and such third party to the extent reasonably required by Commonwealth, including provision of (i) existing written requirements, standards and policies for systems operations so that the enhancements or developments of such third party may be operated by, and will be compatible with the operations of, Contractor, (ii) assistance and support services to such third party, and (iii) such access to the Systems as may be reasonably required by such third party (subject to all security standards, licenses, confidentiality restrictions and other standards and procedures then in effect at each of the Services Locations) to develop, test and deploy the service contracted for by Commonwealth. In addition thereto, Contractor shall not commit or permit any act which will unduly interfere with the performance of work by Commonwealth employees or any such third party, and Commonwealth will not commit or permit any act which will interfere with Contractor's performance of the Services. All additional out-of-scope support costs, excluding attorney fees, incurred by Contractor as a result of a Commonwealth contract with a third party will be handled in accordance with the Change Control Procedures.

Comment [A41]: Similar to the current contract, the right to contract with third parties should be limited to out-of-scope services The Commonwealth separately has the right to terminate the Contract for convenience

b) Throughout the Term, but not more than once every six months, Commonwealth may request that Contractor work together with Commonwealth and/or third parties to identify ways to achieve reductions in the cost of Service delivery and corresponding reductions in the price(s) quoted in the Contract. If so requested by Commonwealth, Contractor will, at its own expense, promptly prepare a detailed proposal identifying all viable means of achieving the desired reductions without (to the extent practically possible) adversely impacting business objectives or requirements identified by Commonwealth. Commonwealth shall not be obligated to accept or implement any such proposal.

19. COMPENSATION

In consideration of Contractor providing the Services, subject to the terms of this Contract, Commonwealth shall pay to Contractor the Fees as set out at *Schedule I* (Offeror Pricing Forms). All items shall be performed within the time period(s) specified in the Contract. The Contractor shall be compensated only for items supplied and performed to the satisfaction of the Commonwealth

Comment [A42]: Commonwealth should be based on the Contractor compliance with the obligations under this Contract

20. FEES

a) **Service Fees**. In consideration of Contractor providing the Services, subject to the terms of this Contract, Commonwealth shall pay to Contractor the Fees pursuant to *Schedule I* (Offeror Pricing Forms).

b) **Cost of Living Adjustment.** The Fees shall not be subject to any cost of living or inflationary adjustment or any other adjustment based on Contractor's costs to provide the Services.

c) **Expenses**. Except as expressly provided otherwise in this Contract, expenses of Contractor relating to the Services are included in the Fees, and no such expenses or other costs or fees shall be reimbursed by Commonwealth unless agreed to by Commonwealth in writing. The Contractor shall not be allowed or paid travel or per diem expenses unless agreed to by Commonwealth in writing.

d) **Pro-ration**. All periodic Fees or charges under this Contract are to be computed on a calendar month basis and shall be prorated on a per diem basis for any partial month.

e) **Unused Credits**. Any unused credits against future payments owed to either party by the other pursuant to this Contract shall be paid to the applicable party within forty-five (45) days after the expiration or termination for any reason of Contractor's obligation to provide the Services or of this Contract. This *Section 20(e)* shall survive the expiration or any termination of this Contract.

f) **Pricing Protection**. Notwithstanding anything to the contrary elsewhere in this Contract, the Fees shall in no event and at no time during the Term exceed Contractor's then lowest charges for such services to Contractor's state governmental customers generally receiving comparable goods and services at comparable volumes and upon material terms and conditions comparable to those contained in this Contract and pursuant to an outsourcing agreement dated after the Effective Date. Upon Commonwealth's request from time to time, and in any event on each anniversary of the Effective Date, Contractor shall advise Commonwealth in writing that this *Section 20(f)*has not been contradicted by any transaction entered into by Contractor on or after the Effective Date. If Contractor is unable to provide such written notice because of a transaction entered into by Contractor contradicting this *Section 20(f)*, Contractor shall offer to Commonwealth an adjustment to the Fees to correct such contradiction.

Comment [A43]: Similar to current contract, Contractor proposes pricing protection applies only to time & materials fees

21. PAYMENT SCHEDULE AND INVOICES

a) **Service Fees**. On or before the 15th day of each calendar month of the Term, Contractor shall provide Commonwealth with a single invoice for the Service Fees. Each such invoice shall include the Fees, if applicable, for the then current month, as well as any Service Level Credits then payable by Contractor or refundable by Commonwealth, or other reimbursable charges to Commonwealth for Services actually rendered prior to the date of such invoice.

b) **Detailed Invoices.** Contractor shall provide on the monthly invoices varying degrees of detail (e.g., per agency, end-user, department, project, site) as specified in *Schedule H* (Commonwealth Computing Procedures Manual). The Detailed Invoice will be delivered both in an electronic format compatible with the

Commonwealth's Invoice Processing System and a summary Invoice will be delivered for Management and Budgeting Purposes.

c) **Time of Payment**. Any sum due Contractor pursuant to any such invoice shall be due and payable on the last business day of the calendar month following the calendar month during which such invoice was delivered to Commonwealth. (e.g., an invoice delivered to Commonwealth on July 15, 2015 will be due and payable on August 31, 2015, the last business day of August, 2015.) In the event any invoices remain unpaid after such due date, the Commonwealth may pay interest as determined by the Secretary of Budget in accordance with Act No. 266 of 1982 and regulations promulgated pursuant thereto. Contractor shall continue to provide the Services even in the event payment is delayed or is not made in timely fashion.

Comment [A44]: Contractor proposes this provision to be adjusted to the current contract language

Comment [A45]: Contractor proposes this to be subject to Section 32 (f)

d) **Fee Dispute**. During the pendency of a dispute between Commonwealth and Contractor pursuant to which Commonwealth, in good faith, believes it is entitled to withhold, and does withhold, payment, Contractor shall continue to fully provide the Services and otherwise fully perform its obligations under this Contract.

Comment [A46]: Contractor proposes current contract language which includes limiting disputed amounts to 10% of the monthly invoice

22. INSPECTION AND ACCEPTANCE

Comment [A47]: Contractor proposes using the term Deliverables instead of Services within this Section 22

a) Acceptance of Services related to transition will occur in accordance with the Acceptance Criteria set out in *Schedule D* (Transition Milestones) and the Detailed Transition Plan.

b) Acceptance of Services other than those related to transition will occur in accordance with the Commonwealth Computing Procedures Manual.

c) If the Services are in compliance with the specifications, then the Commonwealth shall provide the Contractor with Commonwealth's written conditional acceptance of the Services. If the Services are not in compliance with the specifications, then the Commonwealth shall provide the Contractor with Commonwealth's written rejection of the Service. Payment will only be made if the Commonwealth has accepted the Service through written acceptance.

d) If the Services do not meet an accessibility standard as set out in ITB-ACC001, the Contractor must provide written justification for its failure to meet the standard. The justification must provide specific details as to why the standard has not been met. The Commonwealth may either waive the requirement as not applicable to the Commonwealth's business requirements or require that the Contractor provide an acceptable alternative. Any Commonwealth waiver of the requirement must be in writing.

e) Unless otherwise set forth in the Commonwealth Computing Procedures Manual (*Schedule H*), upon the Contractor's receipt of the Commonwealth's written notice of rejection, which must identify the reasons for the failure of the Services to comply with the Contract, the Contractor shall have fifteen (15) business days, or such other time as the Commonwealth and Contractor may agree is reasonable, within which to correct all such failures, and resubmit the corrected Services, certifying to the Commonwealth, in writing, that the failures have been corrected, and that the Services have been brought into compliance with the Contract. Upon receipt of such corrected and resubmitted Service and certification, the Commonwealth shall have thirty (30) business days to test the corrected Service to confirm that it is in compliance with the Contract. If the corrected Service is in compliance with the Contract, then the Commonwealth shall provide the Contractor with Commonwealth's acceptance of the Service.

f) If, in the opinion of the Commonwealth, the corrected Service still contains material failures, the Commonwealth may either:

(1) Repeat the procedure set forth above; or

(2) Terminate the Contract in accordance with *Section 32* (Termination).

23. SERVICE LEVELS

a) The Contractor shall comply with the procedures and requirements of *Schedule J.1* (Service Level Management), *Schedule J.2* (Datacenter Service Level Matrix), and *Schedule J.3* (Datacenter SLA Definitions) during the term of the Contract.

All Services without expressly defined Service Levels must be performed at least to the same degree of accuracy, completeness, efficiency, quality and timeliness as is provided by well-managed suppliers providing services similar to the Services, so long as such performance is operationally reasonable. For where there are expressly defined Service Levels, or where performance can be reasonably reported, Contractor will measure and report its performance against these standards on at least a monthly basis, except as may otherwise be agreed between the Parties in respect of Services performed less frequently than monthly.

Comment [A48]: Contractor proposes that a few SLA definition and targets are reviewed between the Commonwealth and Contractor to validate that these SLA targets are industry standard, which Contractor will commit to industry standard definitions and targets Also, J-1 should be reviewed at this time due to the interdependencies of Schedules J-1, J-2 and J-3

Comment [A49]: Contractor proposes that the Service Level terminology is generic and would like to discuss the purpose of this language as well as definition of each adjective

Comment [A50]: Contractor proposes deleting the language "or where performance can be reasonably reported"

b) The Commonwealth's acceptance of any Service Level Credit shall not bar or impair Commonwealth's rights and remedies in respect of the failure or root cause as set forth elsewhere in this Contract, including without limitation claims for liquidated damages, injunctive relief and termination rights, provided however, Service level Credits paid would be credited against any such claim for damages.

c) The Commonwealth's acceptance of any Service Level credit shall not bar or impair Commonwealth's rights and remedies in respect of the failure or root cause as set forth elsewhere in this Contract, including without limitation claims for damages, injunctive relief and termination rights, provided however, Service level credits paid would be credited against any such claim for damages.

24. LIQUIDATED DAMAGES

a) By accepting this Contract, the Contractor agrees to the delivery requirements of this Contract. If a Contract schedule is not met, including Transition Milestones set out in Transition Plan, the delay will interfere with the Commonwealth's program. In the event of any such delay, it would be impractical and extremely difficult to establish the actual damage for which the Contractor is the material cause. The Commonwealth and the Contractor therefore agree that, in the event of any such delay the amount of damage shall be the amount set forth in this *Section 24* and agree that the Contractor shall pay such amount as liquidated damages, not as a penalty.

Comment [A51]: Contractor suggests changing "will" to "may" as the delay may not interfere

b) The amount of liquidated damages for failure to meet Transition Milestones is set forth in *Schedule D* (Transition Milestones).

c) If, *Schedule D* (Transition Milestones) indicates that Contractor may earn back liquidated damages, then Contractor shall have the time specified in *Schedule D* (Transition Milestones), as indicated, to meet the Acceptance Criteria for the Transition Milestone and earn back the Milestone Credit. If Contractor fails to meet the Acceptance Criteria within 30 days following the Milestone Due Date or, if an earn back period is specified, then 30 days following the end of the specified earn back period, the Commonwealth, at no additional expense and at its option, may either:

Comment [A52]: Contractor proposes that failure must be material

(1) Immediately terminate the Contract and all software, documentation, reports, Developed Materials and any other materials provided for or created for the Commonwealth as a result of this Contract shall be given to the Commonwealth, and the Commonwealth shall be entitled to its remedies under Subsection 24(c); or

(2) Order the Contractor to continue with no decrease in effort until the work is completed in a manner acceptable to the Commonwealth or until the Commonwealth terminates the Contract. If the Contract is continued, the liquidated damages will also continue until the work is completed.

d) Liquidated damages shall be paid by the Contractor and collected by the Commonwealth by deducting them from the invoices submitted under this Contract or any other contract Contractor has with the Commonwealth, by

collecting them through the performance security, if any, or by billing the Contractor as a separate item.

e) To the extent that the delay is caused by the Commonwealth, as described in *Schedule D* (Transition Milestones), no liquidated damages will be applied.

Comment [A53]: Contractor proposes adding "or its third party contractors or agents"

f) Contractor shall not be liable for liquidated damages if the delay to the Contract arises out of causes beyond the control of and without the fault or negligence of the Contractor and/or its subcontractors. Such causes may include, but are not limited to, acts of God or of the public enemy, fires, floods, epidemics, quarantine restrictions, strikes, work stoppages, freight embargoes, acts of terrorism, and unusually severe weather; but in every case, the delay must be beyond the control of, and without the fault or negligence of, the Contractor and/or its subcontractors. The Contractor shall notify the Commonwealth immediately in writing of its inability to perform because of a cause beyond the control of the Contractor.

g) If the delays are caused by the default of a Subcontractor, and if such default arises out of causes beyond the control of both the Contractor and Subcontractor, and without their fault or negligence, the Contractor shall not be liable for liquidated damages for delays, unless the supplies or services to be furnished by the Subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required performance schedule.

25. CONTINUOUS IMPROVEMENT AND BENCHMARKING

a) **Benchmark Overview**. Prior to the expiration of the second anniversary of the Effective Date, Commonwealth and Contractor shall establish the details of the Benchmarking Process intended to ensure that Contractor provides Commonwealth with technology and Services Levels equal to or greater than other organizations receiving similar services. The parties acknowledge and agree that the benchmarking process is intended to assist Commonwealth in making decisions necessary to balance the desire for then current technology against the cost and uncertain performance of newly evolving technology.

b) **Benchmarker**. The Benchmark shall be conducted by a Benchmarker selected by the Commonwealth, subject to Contractor's approval thereof, in writing, such approval not to be unreasonably withheld, delayed or conditioned. The fees and expenses charged by the Benchmarker shall be paid by Commonwealth. Contractor shall at its expense cooperate with and assist the Benchmarker and any other third parties involved in the Benchmarking process, including meeting with Commonwealth and the Benchmarker before and throughout the Benchmarking Process and providing data relating to the provision of the Services, as requested by Commonwealth or the Benchmarker.

c) **Benchmark**. If Commonwealth undertakes the Benchmarking, Commonwealth and Contractor, in good faith, shall attempt to agree upon the period during which the Benchmarking shall be conducted. If the parties are unable to so agree, Commonwealth shall specify the relevant period, subject to Contractor's approval thereof, in writing, such approval not to be unreasonably withheld, delayed or conditioned.

d) **Benchmark Information**. Commonwealth and Contractor shall jointly determine the Benchmark Information with appropriate input from the Benchmarker. Commonwealth and Contractor shall (1) review the Benchmark Information, and (2) schedule a meeting to address any issues either party may have with the Benchmark Information. Contractor shall provide the Benchmark Information at no additional cost to Commonwealth; provided, however, that if Commonwealth wishes the Benchmarker to use information which Contractor does not otherwise have access to in the course of its business, Commonwealth shall provide such information at its own cost and Contractor may use such information but, unless Commonwealth expressly agrees otherwise in writing, only in connection with providing the Services.

e) **Benchmarking Results**. Within thirty (30) days after the completion of Benchmarking, the Benchmarker shall deliver the Benchmark Results to the Commonwealth Project Manager and the Contractor Project Manager for distribution to the members of the Management Committee.

f) **Benchmark Results Review Period and Adjustments**. The members of the Management Committee shall utilize the Benchmark Review Period to review such Benchmark Results, and the Management Committee shall meet during the Benchmark Review Period to collectively assess the Benchmark Results.

g) **Disputes of Benchmark Results**. Either Commonwealth or Contractor may in good faith dispute the Benchmark Results, in writing, prior to the expiration of the Benchmark Review Period. Any such notice of dispute issued by either party shall include a description of the nature of such dispute in sufficient detail so as to enable the Benchmarker and the other party to assess the motive and merit of the dispute. Within ten (10) days after receipt of such notice, the parties shall cause the Benchmarker to issue a written response addressing the dispute, and if such dispute requires a change to any of the Benchmark Results, the Benchmarker shall be directed to issue revised Benchmark Results. Upon issuing such revised Benchmark Results, Commonwealth and Contractor, as applicable, shall have another Benchmark Review Period to review the revised Benchmark Results in accordance with *Section 25(f)*. In the event either party disputes the revised Benchmark Results within the second Benchmark Review Period or if the parties are unable to agree as to the need for revised Benchmark Results, original Benchmark Results or the revised Benchmark Results, as the case may be, shall be subject to the contract controversy procedures set forth in *Section 34* (Contract Controversies).

h) **Benchmarking: Price Protection**. In addition to the Benchmarking provided for in this *Section 25* (Continuous Improvement and Benchmarking), no earlier than sixty (60) days after the end of Year 2 of this Contract, and no more frequently than annually thereafter, the Commonwealth may engage a Benchmarker, in accordance with the provisions of this *Section 25* (Continuous Improvement and Benchmarking) for the purpose of assessing the extent to which the prices paid for the Services hereunder are comparable to prices of a comparable reference group of clients for Services. This Benchmarking Price Protection process shall be an objective measurement and comparison process utilizing baseline methods and industry standards. The parties acknowledge and agree that this Benchmarking Price Protection process is intended to assure the Commonwealth that pricing and pricing models employed in this engagement are consistent with the reference group throughout the later years of the Contract, as it may be extended or renewed.

Comment [A54]: As per existing contract, Contractor proposes this should be limited to bi-annually

i) **Benchmark: Pricing Adjustments**. If the results of a Benchmarking Price Protection analysis, as reflected in written Benchmarking Results delivered to Contractor, reveal that amounts to be paid under the terms of the Contract for Services exceed by a factor of ten percent (10%) or more than the average of amounts paid by the reference group for comparable services (the "Market Rate"), the Commonwealth may elect to renegotiate those prices. When notified of the Commonwealth's intent to renegotiate the prices, the Contractor shall, as soon as practical following notification of the Commonwealth's intent, negotiate in good faith with Commonwealth for the adjustment and reduction of fees for the Services. If an agreement is reached for a pricing adjustment such agreement will be effective as of the date of delivery of the Benchmarking (Price Protection) Results. If the parties are unable to agree to a pricing adjustment within sixty (60) days after delivery of the Benchmarking (Price Protection) Results, the matter shall be submitted to the various dispute resolution procedures contained in *Section 34* (Contract Controversies) of the Contract. If the dispute resolution procedure results in a pricing adjustment, that adjustment will be effective as of the date of delivery of the Benchmarking (Price Protection) Results. In no event will Contractor increase the Fees as a result of any review pursuant to this *Section 25* (Continuous Improvement and Benchmarking).

j) **Annual Best Practices Reviews.** Within thirty (30) days of each anniversary of the Effective Date, Contractor shall, in accordance with procedures agreed upon by the Commonwealth Project Manager and the Contractor Project Manager, identify for Commonwealth any best practices that have emerged (within Contractor's organization or, to the knowledge of Contractor, within the processing services outsourcing market generally), that, if implemented by the Contractor would materially benefit the Commonwealth in terms of price reductions or performance improvement. If requested by Commonwealth, within sixty (60) days Contractor shall provide Commonwealth with proposals

for the implementation of such best practices in a manner consistent with the Change Control Procedures of the Contract. If approved by Commonwealth, Contractor shall implement such best practices on behalf of Commonwealth as expeditiously as possible.

26. GOVERNANCE

Provisions for the governance of this Contract and the Services delivered pursuant hereto are set forth in *Schedule B* (Governance) to this Contract.

27. CHANGE CONTROL

a) Change Control Procedures. The following Change Control Procedures will apply if either party wishes to implement or have Contractor implement a Change. The requesting Party will forward to the other party a Change Order which will include the following:

(1) Project identification
(2) Originator's name and title
(3) The date of the Change Order
(4) A description of the proposed change
(5) The reason for the proposed change

For Contractor, all Change Orders must be directed to Contractor's Project Manager. For Commonwealth, all Change Orders must be directed to or originate from the Commonwealth Project Manager.

(1) For any Contractor-initiated Change Order, Commonwealth shall have the option of accepting or rejecting that Change Order.

(2) Contractor will assign a number to and log each Change Order.

(3) All Change Orders will be categorized by Commonwealth as Priority 1 (urgent), Priority 2 (ordinary) or Priority 3 (low).

(4) Contractor will make reasonable efforts to investigate the impact of the Change Order on the Fees, timetable, specifications, Services, Service Levels, terms and conditions and, the relative obligations of the parties under this Contract and the (the "Impact Study") in accordance with a schedule that reflects the applicable priority category.

(5) Contractor will inform Commonwealth if there will be any charges for Contractor Services in conducting the Impact Study and Commonwealth will decide whether Contractor should conduct the Impact Study. Contractor shall be entitled hereunder to charge Commonwealth only for those expenses incurred by Contractor in

connection with the conduct of the Impact Study that are (i) Contractor's out-of-pocket expenses paid by Contractor to third parties (other than Contractor's or any Contractor's Agent's employees) for expertise not otherwise possessed by or available to Contractor or (ii) for employees of Contractor or any Contractor Agent not theretofore engaged in the provision of the Services. In order for any of the foregoing expenses to be reimbursable to Contractor, Contractor must first provide an estimate thereof to Commonwealth and obtain from Commonwealth its prior written approval thereof. If Contractor provides any such estimate and Commonwealth does not approve the estimated expenses, Contractor shall not be obligated to proceed with the Impact Study. In all cases, Contractor shall make a good faith effort to maximize its use of its employees and the employees of Contractors Agents then engaged in the provision of the Services to the extent Contractor can do so without adversely affecting its ability to provide the Services in accordance with the Services Levels. Any disputes between the parties regarding the validity, estimated amount or actual amount of any reimbursable expenses shall be subject to the dispute resolution provisions of *Section 34* (Contract Controversies).

(6) If both parties agree on the Impact Study and any necessary Changes to the Services, the relative obligations of the parties under this Contract, and the Fees, a Change Order will be issued to reflect the agreed to Changes.

(7) If the parties cannot agree upon the Impact Study or the resultant Changes to this Contract, any Commonwealth-initiated Change Order will nevertheless be implemented at Commonwealth's option and Contractor shall perform the Services, and either party may elect to have all outstanding related matters treated as a dispute between the parties under *Section 34* (Contract Controversies). During the pendency of any such dispute, Commonwealth shall pay to Contractor any undisputed amounts. Any changes to Service Levels which are required by the implementation of the Changes, will be reflected in the Change Order that is issued.

Comment [A55]: Contractor proposes to discuss the scenario where the dispute is regarding the price of the change order

b) All Changes shall be made pursuant to the Change Control Procedures. Contractor shall:

(1) schedule all Changes so as not to interrupt or unduly interfere with Commonwealth's operations,

(2) prepare and deliver to Commonwealth each month a ninety-day rolling schedule for ongoing proposed and approved and planned Changes,

(3) review and determine the cause of any failed Changes and deviations from scheduled Changes, and

(4) document and provide to the Management Committee and to the Commonwealth Project Manager, individually, same-day notification (which may be given orally provided that such oral notice is confirmed in writing to such persons within three (3) Commonwealth business days) of all changes performed on an emergency basis to maintain the continuity of the Services.

c) Without limiting any other provision of this Contract, the following Schedules may be modified through the Change Control Procedures set forth in this *Section 27* (Change Control):

- Schedule C – Services Catalog
- Schedule E – Datacenter Locations
- Schedule G – Staffing Plan and Key Positions
- Schedule J.1 – Service Level Management
- Schedule J.2 – Datacenter Service Level Matrix
- Schedule J.3 – Datacenter SLA Definitions
- Schedule H – Commonwealth Computing Procedures Manual

28. NOTICE OF DELAYS

Whenever the Contractor encounters any difficulty that delays or threatens to delay the timely performance of this Contract (including actual or potential labor disputes), the Contractor shall immediately give notice thereof in writing to the Commonwealth stating all relevant information with respect thereto. Such notice shall not in any way constitute a basis for an extension of the delivery schedule or be construed as a waiver by the Commonwealth of any rights or remedies to which it is entitled by law or pursuant to provisions of this Contract. Failure to give such notice, however, may be grounds for denial of any request for an extension of the delivery schedule because of such delay. If an extension of the delivery schedule is granted, it will be done consistent with *Section 27*(Change Control).

29. NOTICE

Any written notice to any party under this Contract shall be deemed sufficient if delivered personally, or by facsimile, telecopy, electronic or digital transmission (provided such delivery is confirmed), or by a recognized overnight courier service (e.g., DHL, Federal Express, etc.), with confirmed receipt, or by certified or registered United States mail, postage prepaid, return receipt requested, sent to the address such party may designate by notice given pursuant to this section.

30. DEFAULT

Comment [A56]: Contractor proposes deleting section 30 as Defaults are already covered in section 32 (c)

a) The Commonwealth may, subject to the provisions of *Section 28* (Notice of Delays), and in addition to its other rights under the Contract, declare the Contractor in default by written notice thereof to the Contractor, and terminate for cause (as provided in *Section 32* (Termination) the whole or any part of this Contract and shall further have the right to seek damages from Contractor for any of the following reasons:

(1) Failure to begin work within the time specified in the Contract or as otherwise specified;

(2) Failure to successfully complete a Major Milestone in accordance with the agreed Transition or Transition Plans or to complete specified work in accordance with the Contract terms;

(3) Multiple failures over time of a single Service Level or a pattern of failure over time across multiple Service Levels (a Service Level Termination Event); this will include failures of Service Levels and Key Service Levels;

(4) Failure to make agreed-upon adjustments to the fees or Service Levels in accordance with the outcome of Benchmarking Procedures;

(5) Failure or refusal to remove material, or remove and replace any work rejected as defective or unsatisfactory;

(6) Abandonment or willful refusal to provide the Services or any part of the Services;

(7) Failure to perform its responsibilities under any Business Continuity or Disaster Recovery Plans, including such Business Continuity or Disaster Recovery Plans that apply to Contractor's own locations used for the delivery of the Services;

(8) Insolvency or bankruptcy;

(9) Assignment made for the benefit of creditors;

(10) Failure or refusal within 30 days after written notice by the Contracting Officer, of the Contractor to make payment or show cause why payment should not be made, of any amounts due for materials furnished, labor supplied or performed, for equipment rentals, or for utility services rendered;

(11) Failure to protect, to repair, or to make good any damage or injury to property as required under the terms of this Contract;

(12) Breaches of covenants, agreements, obligations, representations or warranties in the Contract occurring simultaneously or over time, whether or not each such breach is a material breach, and whether or not each such breach was cured, that taken together constitute a material breach of the Contract after Contractor has been made aware of such breaches, on an individual basis. Regardless of any other provision in this Contract to the contrary no cure period is available to Contractor should the Commonwealth terminate under this *Section 30(a)(12)*;

(13) An act or omission of Contractor in the performance of this Contract, which is not otherwise explicitly required or permitted under this Contract, and which results in any Regulatory Entity notifying Commonwealth that it is subjecting the Commonwealth to a hearing or tribunal or withdrawing any license granted to Commonwealth or Contractor and such hearing, tribunal or withdrawal would have a material and adverse effect on Commonwealth's operations or business or the Services. Regardless of any other provision in this Contract the contrary no cure period is available to Contractor should the Commonwealth terminate under this *Section 30(a)(13)*;

b) In the event that the Commonwealth terminates this Contract in whole or in part as provided in Subparagraph (a) above, the Commonwealth may procure, upon such terms and in such manner as it determines, services similar or identical to those so terminated, and the Contractor shall be liable to the Commonwealth for any reasonable excess costs for such similar or identical services included within the terminated part of the Contract.

c) If the Contract is terminated as provided in Subparagraph (a) above, the Commonwealth, in addition to any other rights provided in this *Section 30* (Default), may require the Contractor to transfer title and deliver immediately to the Commonwealth in the manner and to the extent directed by the Commonwealth, such partially completed work, including, where applicable, reports, working papers and other documentation, as the Contractor has specifically produced or specifically acquired for the performance of such part of the Contract as has been terminated. Except as provided below, payment for completed work accepted by the Commonwealth shall be at the Contract price. Except as provided below, payment for partially completed work including, where applicable, reports and working papers, delivered to and accepted by the Commonwealth shall be in an amount agreed upon by the Contractor and the Commonwealth. The Commonwealth may withhold from amounts otherwise due the Contractor for such completed or partially completed work, such sum as the Commonwealth determines to be necessary to protect the Commonwealth against loss.

d) The rights and remedies of the Commonwealth provided in this *Section 30* (Default) shall not be exclusive and are in addition to any other rights and remedies provided by law or under this Contract.

e) The Commonwealth's failure to exercise any rights or remedies provided in this *Section 30* (Default) shall not be construed to be a waiver by the Commonwealth of its rights and remedies in regard to the event of default or any succeeding event of default.

f) Following exhaustion of the Contractor's administrative remedies as set forth in *Section 34* (Contract Controversies), the Contractor's exclusive remedy shall be to seek damages in the Board of Claims.

31. STEP-IN RIGHTS

a) In the event that Contractor is failing to deliver all or part of the Services, the Commonwealth shall give the Contractor notice of the failure. The Contractor shall have fifteen (15) days to provide the Commonwealth with a correction plan. If the correction plan is not received within fifteen (15) days or the failure is not corrected within thirty (30) days of the notice provided under this paragraph, Commonwealth may assign Commonwealth staff or third parties to step-in and perform failing elements of the Services, to the extent those Services are listed below, until such time as Contractor can demonstrate the ability to resume provision of such Services. Provided, however, that if in the Commonwealth's sole discretion the failure creates an emergency, no notice is required for the Commonwealth to exercise its rights under this paragraph.

(1) Co-location services;
(2) Management of Commonwealth owned equipment located within the Enterprise Data Center;
(3) Network Connectivity between the Commonwealth and the Contractor's datacenter(s); and
(4) Disaster Recovery Services.

b) All costs associated with the exercise of such step-in rights shall be borne by Contractor.

c) Commonwealth's exercise of its step-in rights shall not constitute a waiver by Commonwealth of any termination rights or rights to pursue a claim for damages arising out of the failure that led to the step-in rights being exercised.

32. TERMINATION

(a) For Convenience

Comment [A57]: Contractor proposes additional language to clearly state length of time, and minimal financial impacts required by both parties and the achievements required for the step out to occur

Comment [A58]: Propose additional conversation of the activities for step in for Co-location services and Disaster Recovery Services as these activities could be in a shared facility

(1) The Commonwealth may terminate this Contract without cause by giving Contractor thirty (30) calendar days prior written notice (Notice of Termination) whenever the Commonwealth shall determine that such termination is in the best interest of the Commonwealth (Termination for Convenience). Any such termination shall be effected by delivery to the Contractor of a Notice of Termination specifying the extent to which performance under this Contract is terminated either in whole or in part and the date on which such termination becomes effective.

In the event of termination hereunder, Contractor shall receive payment for the following:

(i) all Services performed consistent with the terms of the Contract prior to the effective date of termination;

(ii) all actual and reasonable costs incurred by Contractor as a result of the termination of the Contract; and

In no event shall the Contractor be paid for any loss of anticipated profit (by the Contractor or any Subcontractor), loss of use of money, or administrative or overhead costs.

Failure to agree on any termination costs shall be a dispute handled in accordance with *Section 34* (Contract Controversies) of this Contract.

(2) The Contractor shall cease Services as of the date set forth in the Notice of Termination, and shall be paid only for such Services as have already been satisfactorily rendered up to and including the termination date set forth in said notice, or as may be otherwise provided for in said Notice of Termination, and for such services performed during the thirty (30) calendar day notice period, if such services are requested by the Commonwealth, for the collection, assembling, and transmitting to the Commonwealth of at least all materials, manuals, magnetic media, studies, drawings, computations, maps, supplies, and survey notes including field books, which were obtained, prepared, or developed as part of the Services required under this Contract.

(3) The above shall not be deemed to limit the Commonwealth's right to terminate this Contract for any reason as permitted by the other provisions of this Contract, or under applicable law.

(b) Non-Appropriation

Any payment obligation or portion thereof of the Commonwealth created by this Contract is conditioned upon the availability and appropriation of funds. When funds (state or federal) are not appropriated or otherwise made available to

Comment [A59]: As consistent with current Contract, Contractor suggests 180 day prior written notice

Comment [A60]: Contractor proposes partial termination will result in a separate termination fee schedule and will require further clarification of scope

Comment [A61]: Contractor proposes a termination fee schedule to be included in the contract

support continuation of performance in a subsequent fiscal year period, the Commonwealth shall have the right to terminate the Contract. The Contractor shall be reimbursed in the same manner as that described in this section related to Termination for Convenience to the extent that appropriated funds are available.

(c) Default

The Commonwealth may, in addition to its other rights under this Contract, terminate this Contract in whole or in part by providing written notice of default to the Contractor if the Contractor materially fails to perform its obligations under the Contract and does not cure such failure within thirty (30) days or, if a cure within such period is not practical, commence a good faith effort to cure such failure to perform within the specified period or such longer period as the Commonwealth may specify in the written notice specifying such failure, and diligently and continuously proceed to complete the cure. The Contracting Officer shall provide any notice of default or written cure notice for Contract terminations.

(1) Subject to *Section 36* (Limitation of Liability) of this Contract, in the event the Commonwealth terminates this Contract in whole or in part as provided in this Subsection 32(c), the Commonwealth may procure services similar to those so terminated, and the Contractor, in addition to liability for any liquidated damages, shall be liable to the Commonwealth for the difference between the Contract price for the terminated portion of the services and the actual and reasonable cost (but in no event greater than the fair market value) of producing substitute equivalent services for the terminated services, provided that the Contractor shall continue the performance of this Contract to the extent not terminated under the provisions of this section.

(2) Except with respect to defaults of Subcontractors, the Contractor shall not be liable for any excess costs if the failure to perform the Contract arises out of causes beyond the control of the Contractor. Such causes may include, but are not limited to, acts of God or of the public enemy, fires, floods, epidemics, quarantine restrictions, strikes, work stoppages, freight embargoes, acts of terrorism, and unusually severe weather. The Contractor shall notify the Commonwealth Contracting Officer promptly in writing of its inability to perform because of a cause beyond the control of the Contractor.

(3) Nothing in this *Subsection 32(c)* shall abridge the Commonwealth's right to suspend, debar, or take other administrative action against the Contractor.

Comment [A62]: Contractor proposes the termination should be mutual and limited to material breach of the agreement

Comment [A63]: Contractor recommends cure period of 45 days as is in the current contract

(4) If it is later determined that the Commonwealth erred in terminating the Contract for default, then the Contract shall be deemed to have been terminated for convenience under Subsection (a).

(5) If this Contract is terminated as provided by this Subsection 31(c), the Commonwealth may, in addition to any other rights provided in this Subsection, and subject to *Section 40* (Proprietary Rights) of this Contract, require the Contractor to deliver to the Commonwealth in the manner and to the extent directed by the Contracting Officer, such reports and other documentation as the Contractor has specifically produced or specifically acquired for the performance of such part of the Contract as has been terminated. Payment for such reports and documentation will be made consistent with the Contract.

(d) In the event that Contractor becomes insolvent for any reason whatsoever, or makes an assignment for the benefit of creditors, or has a receiver appointed, or if it is declared as bankrupt under the laws of the United States, or if a petition of reorganization or rearrangement is filed against it under the bankruptcy laws, Commonwealth shall have the exclusive option of continuing with Contractor or its successors or assigns or trustee in bankruptcy under the terms and conditions of this Contract for the full remaining term of this Contract, or continuing with Contractor or its successors or assigns or trustee in bankruptcy under the terms and conditions of this Contract for such period of time as is necessary or desirable to terminate this Contract.

(e) In the event of the sale by Contractor of all or substantially all of its assets (in a single transaction or a series of related transactions) or the sale of a controlling interest in Contractor's outstanding stock, Contractor shall be entitled to assign this Contract to its successor upon written notice thereof to Commonwealth. Commonwealth shall be entitled to receive from Contractor, upon Commonwealth's request, such information as is reasonably requested by Commonwealth to enable Commonwealth to assess the financial, technical and management capabilities of such successor to assume Contractor's obligations under this Contract. If Commonwealth determines, in the exercise of its reasonable discretion, that such successor does not or may not have such requisite financial, technical or management capabilities, and if Commonwealth informs Contractor thereof in writing and describing in reasonable detail its basis therefore, then, and only then, such assignment by Contractor shall be subject to Commonwealth's prior written consent, which consent may be withheld, delayed or conditioned in Commonwealth's sole discretion. If Commonwealth withholds such consent, then Commonwealth shall have the exclusive option of continuing under the terms and conditions of this Contract with Contractor or its successors or assigns for the full remaining term of this Contract, or continuing under the terms and conditions of this Contract with Contractor or its successors or assigns for such period of time as is necessary or desirable to terminate this Contract.

Comment [A64]: Contractor suggests using language in current contract where Termination Fees should be payable if Commonwealth elects to terminate for anything other than non-appropriation

(f) In the event Commonwealth fails to pay undisputed Fees for twelve (12) consecutive months, Contractor may terminate this Contract for its convenience. In such event, notwithstanding any other provision of this Contract to the contrary, Contractor shall be released from any obligation to provide further Services pursuant to this Contract.

(g) The rights and remedies of the Commonwealth provided in this Section shall not be exclusive and are in addition to any other rights and remedies provided by law or under this Contract.

(h) The Commonwealth's failure to exercise any rights or remedies provided in this Section shall not be construed to be a waiver by the Commonwealth of its rights and remedies in regard to the event of default or any succeeding event of default.

(i) In no event shall the Contractor be paid for any loss of anticipated profit (by the Contractor or any Subcontractor), loss of use of money, or administrative or overhead costs. Any dispute regarding termination costs shall be a dispute handled in accordance with *Section 34* (Contract Controversies) of this Contract.

(j) Following exhaustion of the Contractor's administrative remedies as set forth in *Section 34* (Contract Controversies), the Contractor's exclusive remedy shall be to seek damages in the Board of Claims.

Comment [A65]: Contractor suggests using current contract language and stating 9 months rather than 12

Comment [A66]: Contractor proposes this subsection is made mutual as well as (h)

Comment [A67]: Based on Contractors proposal in subsection 32(g) that remedies should be non-exclusive, this subsection (j) would be deleted

33. TERMINATION ASSISTANCE

a) **General.** Upon the Commonwealth's request, Contractor shall provide Termination Assistance Services directly to the Commonwealth, or to any replacement provider designated by the Commonwealth, any successors or assigns of such entities or any of their designee(s). Contractor shall take all necessary and appropriate actions to accomplish a complete, timely, and seamless transition of any Terminated Services from Contractor to the Commonwealth, or to any replacement provider designated by the Commonwealth, without material interruption of or material adverse impact on the Terminated Services or any other services provided by third-parties or Services that Contractor shall continue to provide (each transition, an "Assistance Event"). Contractor shall cooperate with the Commonwealth and any new Contractor and otherwise promptly take all steps required or reasonably requested to assist the Commonwealth in effecting a complete and timely Termination Assistance Services of any Terminated Services. Contractor shall provide all information regarding the Terminated Services or as otherwise needed for Termination Assistance Services, including data conversion, interface specifications, and related professional services. Contractor shall provide for the prompt and orderly conclusion of all Terminated Services, as the Commonwealth may direct, including completion or partial completion of projects, documentation of work in process, and other measures to assure an orderly transition to the Commonwealth or the Commonwealth's designee. Contractor's obligation to provide the Services shall not cease until a Assistance Event satisfactory to the Commonwealth,

including the performance by Contractor of all asset-transfers and other obligations of Contractor provided in this *Section 33* (Termination Assistance), has been completed in accordance with mutually agreed to completion or acceptance criteria or if no agreed acceptance criteria exist, then to the Commonwealth's reasonable satisfaction.

(i) **Period of Provision**. Contractor shall provide Termination Assistance Services commencing on the date a determination is made by the Commonwealth that there shall be an Assistance Event**.**

(ii) **Notice of an Assistance Event.** The Commonwealth will provide Contractor with written notice of an Assistance Event. Such notice will include a description of the Services that are to be terminated or discontinued, the affected Commonwealth Agencies, and the anticipated effective date of the Assistance Event. The Commonwealth may modify or update any of the information provided in the initial notice of an Assistance Event from time to time by a supplemental notice from the Commonwealth to Contractor.

(iii) **Extension of Services**. The Commonwealth may elect, upon thirty (30) days prior notice to Contractor, to extend the period for performance of Termination Assistance Services (in whole or in part), in its sole discretion, provided that the total of all such extensions shall not result in Termination Assistance Services being performed beyond twenty-four (24) months following the effective date of the applicable Assistance Event without Contractor's consent. In each case, if the Commonwealth provides less than thirty (30) days prior notice of an extension, Contractor shall nonetheless use reasonable efforts to comply with the Commonwealth's request and provide the requested Services.

(iv) **Firm Commitment**. Contractor shall provide Termination Assistance Services regardless of the reason for the Assistance Event

Comment [A68]: As stated in our current contract, Contractor would propose to include "If this Contract is terminated due to failure by Commonwealth to pay amounts owed hereunder, Commonwealth will pay monthly in advance for Termination Assistance Services "

(v) **Performance**. Contractor shall provide all Termination Assistance Services subject to and in accordance with the terms and conditions of this Contract. Contractor shall perform Termination Assistance Services with at least the same degree of accuracy, quality, completeness, timeliness, responsiveness and resource efficiency as it is or was required to provide the same or similar Services in accordance with this Contract. The quality and level of performance of Termination Assistance Services provided by Contractor shall continue to meet or exceed the Service Levels and shall not be degraded or deficient in any respect. Service Level Credits shall be assessed for any failure to meet Service Levels during any period in which Termination Assistance Services are provided. If any period for performing any Termination

Comment [A69]: Contractor proposes further discussion on SLAs during termination assistance as this will depend on the assistance being requested of Contractor as well as the Services provided by new vendor or Commonwealth

Assistance Services extends beyond the expiration or the effective date of any termination of this Contract, the provisions of this Contract shall remain in full effect for the duration of such period.

b) **Scope.** As part of the Termination Assistance Services, Contractor shall timely transfer the control and responsibility for Services previously performed by or for Contractor to the Commonwealth and/or its designee(s), and upon Commonwealth request, shall execute any documents reasonably necessary to effect such transfers. Contractor shall also provide any and all information and assistance requested by the Commonwealth required for:

(i) the Systems and processes associated with the Services to operate and be maintained and enhanced efficiently;

(ii) the Services to continue without interruption or adverse effect; and

(iii) the orderly transfer of the Services (or replacement or supplemental services) to the Commonwealth and/or its designee(s).

c) **General Support**. Contractor shall:

(i) assist the Commonwealth and/or its designee(s) in developing a written plan for the migration of the Services to the Commonwealth and/or its designee(s), which plan shall include (as requested by the Commonwealth) capacity planning, process planning, facilities planning, human resources planning, technology planning, telecommunications planning and other planning necessary to effect the transition,

(ii) perform programming and consulting services as requested to assist in implementing the transition plan,

(iii) train personnel designated by the Commonwealth and/or its designee(s) in the use of any processes or associated Equipment, Materials, Systems or tools used in connection with the provision of the Services as needed for such personnel to assume responsibility for performance of the Services,

(iv) provide a catalog of all processes, Materials, the Commonwealth Data, Equipment, Software, Third Party Contracts and tools used to provide the Services,

(v) provide machine readable and printed listings and associated documentation for source code for Software owned by the Commonwealth and source code to which the Commonwealth is entitled under this Contract and assist in its re-configuration,

(vi) provide technical documentation for Software used by Contractor to provide the Services as needed for continuing performance of the Services,

(vii) analyze and report on the space required for the Commonwealth Data and the Software needed to provide the Services,

(viii) assist in the execution of a parallel operation, data migration and testing process until the successful completion of the transition to the Commonwealth and/or its designee(s),

(ix) create and provide copies of the Commonwealth Data in the format and on the media requested by the Commonwealth and/or its designee(s),

(x) provide a complete and up-to-date, electronic copy of the Commonwealth Procedure Manual in the format and on the media requested by the Commonwealth and/or its designee(s) and

(xi) provide other technical and process assistance, documentation and information as requested by the Commonwealth and/or its designee(s).

d) **Personnel**.

(i) **List of Contractor Personnel**. Contractor shall promptly provide to the Commonwealth a list, organized by location, of the Contractor Personnel dedicated (fifty percent (50%) or more) to the performance of the Services that are implicated by each Assistance Event. Such list shall, subject to applicable privacy laws, specify each such Contractor Personnel's name, job title, compensation package, leave status, years of service and job responsibilities. The Commonwealth agrees not to disseminate the personally identifiable information contained in such list without Contractor's consent. Contractor shall not terminate, reassign or otherwise remove from the performance of the Services any such dedicated Contractor Personnel until after the end of the applicable Termination Assistance Services period.

~~(i)~~(ii) **Right to Hire**. The Commonwealth and/or its designee(s) shall be permitted, without interference (including through counter-offers) from Contractor (subject to *Section 33(d)(iii)* below), to meet with, solicit and hire, effective after the later of (i) the date of the Commonwealth's notice of an Assistance Event and (ii) the completion of the Termination Assistance Services requiring such Contractor Personnel, any Contractor Personnel dedicated to the performance of the Services during the twelve (12) month period prior to the date of the Commonwealth's notice of an Assistance Event who are implicated by that Assistance Event. Contractor hereby waives its rights, if any, under contracts with such Contractor Personnel restricting the ability of such Contractor Personnel to be recruited or hired by the Commonwealth

Comment [A70]: Contractor proposes that the Contractor will provide the CCPM based on the then existing format and media

Comment [A71]: Proposed personnel who are solely dedicated rather than using 50% or more as a basis

Comment [A72]: Contractor proposes further discussion as personnel may not be required or may legitimately be subject to termination due to performance before end of Termination Assistance period

Comment [A73]: Contractor agrees as long as the deployment of the contractor assigned resource does not interfere with the contractors ability to continue to meet service obligations and service level requirements for service delivery to the commonwealth

and/or its designee(s) (including waiving any right to restrict such personnel via non-compete agreements or other contractual means). Contractor shall provide the Commonwealth and/or its designee(s) with reasonable assistance in their efforts to meet with, solicit and hire such Contractor Personnel, and shall give the Commonwealth and/or its designee(s) reasonable access to such Contractor Personnel for interviews, evaluations and recruitment. The Commonwealth shall endeavor, and shall cause its designee(s) to endeavor, to conduct the above-described activities in a manner that is not unnecessarily disruptive of Contractor's performance of its obligations under this Contract.

e) **Software and Developed Documentation**. The Contractor shall provide the Commonwealth with all Software and Developed Documentation as set forth in *Section 40* (Proprietary Rights).

f) **Equipment**.

(i) **List of Equipment**. Contractor shall promptly provide to the Commonwealth a list, organized by location, of the Equipment that is implicated by each Assistance Event. Such list shall specify information reasonably requested by the Commonwealth, including all fields tracked by Contractor in any asset management system used by Contractor for tracking and managing Equipment, such Equipment's function, manufacturer, model number, age, and other pertinent information.

(ii) **Right to Acquire**. The Commonwealth and/or its designee(s) shall have the right (but not the obligation) to purchase or assume the lease for any or all Equipment that is owned or leased by Contractor which is used in the provision of the Services and that is implicated by the relevant Assistance Event. Such Equipment shall be transferred in good working condition, reasonable wear and tear excepted, as of the later of the effective date of the relevant Assistance Event and the completion of the Termination Assistance Services requiring such Equipment. Contractor shall maintain such Equipment through the date of transfer so as to be eligible for the applicable manufacturer's maintenance program. In the case of Contractor-owned Equipment (including Equipment owned by Contractor Affiliates and Subcontractors and further including any such Equipment leased to Contractor), Contractor (or such Affiliate or Subcontractor) shall grant to the Commonwealth, and/or its designee(s) a warranty of title and a warranty that such Equipment is free and clear of all liens, security interests and other encumbrances. Such conveyance by Contractor (or Affiliate or Subcontractor) to the Commonwealth and/or its designee(s) shall be at fair market value (as shall be determined by an agreed-upon appraisal). At the Commonwealth's request, the Parties shall negotiate in good

Comment [A74]: Contractor proposes adding language stating that this should only be related to "solely" used for the Commonwealth

faith and agree upon the form and structure of the purchase. In the case of leased Equipment, Contractor shall (1) represent and warrant that the lease is not in default, (2) represent and warrant that all payments thereunder have been made through the date of transfer and (3) notify the Commonwealth and/or its designee(s) of any lessor defaults of which it is aware at the time.

g) **Third Party Contracts.** Contractor shall promptly, but no less than thirty (30) days from the Commonwealth's issuance of notice of an Assistance Event provide to the Commonwealth a list of the Third Party Contracts that are implicated by the relevant Assistance Event. Contractor shall, at the Commonwealth's request, cause the parties to such Third Party Contracts to permit the Commonwealth and/or its designee(s) to assume prospectively any or all such Third Party Contracts or to enter into new contracts with the Commonwealth and/or its designees on substantially the same terms and conditions, including price. Contractor shall transfer or assign those Third Party Contracts that the Commonwealth elects to assume prospectively to the Commonwealth and/or its designee(s) as of the later of the effective date of the relevant Assistance Event and the completion of the Termination Assistance requiring such Third Party Contracts. Such transfers or assignments shall be on terms and conditions acceptable to all applicable parties, provided that (A) there shall be no fee, charge or other amount imposed on the Commonwealth and/or its designee(s) by Contractor or the counter-parties to such Third Party Contracts for such transfer or assignment and (B) Contractor shall: (1) promptly cure and, in accordance with *Section 32(c)*, indemnify the Commonwealth against any default under such Third Party Contracts relating to the period prior to such transfer or assignment; (2) represent and warrant that all payments thereunder through the date of transfer or assignment are current; and (3) notify the Commonwealth and/or its designee(s) of any counter-party's default with respect to such Third Party Contracts of which it is aware at the time of such transfer or assignment.

Comment [A75]: Contractor will attempt however cannot guarantee third party contracts will accept this language

Contractor will request, with respect to any contracts applicable to Contractor Third Party Software being provided to Commonwealth and being used by Contractor to perform the Services, that the third party agree in writing that it will permit the assignment or transfer of the applicable agreement with Contractor to Commonwealth at the termination or expiration of this Contract. If any such third party refuses to provide such a written agreement, then Contractor will notify Commonwealth of this fact. Upon any such notification by Contractor, Commonwealth shall notify Contractor in writing whether Contractor may use such third party in connection with Contractor's performance of the Services. If Contractor is notified by Commonwealth that it must not use such third party services, then Contractor will make commercially reasonable efforts to locate an alternate third party provider, but Contractor is not responsible for any additional third-party costs that may result from using an alternate provider. If no alternate provider can be located by Contractor, Contractor will so notify Commonwealth and the parties, both acting in good faith and through their respective project

managers, will attempt to resolve the issue. The Contractor will not be responsible for any fees associated with the assignment or transfer of the license to the Commonwealth or for any breach by such third party of its agreement regarding the assignment or transfer.

h) **Other Subcontracts and Third Party Contracts**. With respect to Third Party Contracts implicated by the relevant Assistance Event that are not otherwise transferred or assigned to the Commonwealth and/or its designee(s) pursuant to *Section 33(g)*, Contractor shall make available to the Commonwealth and/or its designee(s), pursuant to reasonable terms and conditions, any third party services then being utilized by Contractor in the performance of the Services. Contractor shall retain the right to utilize any such third party services in connection with the performance of services for other Contractor customers. The Commonwealth shall retain the right to contract directly with any third party previously utilized by Contractor to perform any Services.

Comment [A76]: Contractor requires more discussion as we don't understand Commonwealth's intent with this section

i) **Rates and Charges**. Except as provided in this Subsection and *Section 33(j)*, Contractor shall provide all Termination Assistance Services at no additional charge. The Parties anticipate that Termination Assistance Services requested by the Commonwealth shall be provided by Contractor using Contractor Personnel already assigned to the performance of the Services and without adversely affecting Contractor's ability to meet its performance obligations. To the extent the Commonwealth requests that Contractor perform only a portion (but not all) of the Services included in a particular Fee, the amount to be paid by the Commonwealth shall be equitably adjusted downward in proportion to the portion of the Services that Contractor shall not be providing.

Comment [A77]: Contractor proposes to add language that if such services can't be provided using existing resources without affecting Contractor's ability to meet SLAs, Commonwealth will pay for such additional resources or Contractor has relief from SLAs

Comment [A78]: Contractor proposes that fees may be reduced however it will be based on then Services required rather than a pre-determined amount

j) **Proprietary Communications Network**. If Contractor uses a proprietary communications network to provide the Services, then for a period of up to two (2) years following the effective date of the relevant Assistance Event, Contractor shall, if requested by the Commonwealth, continue to provide such proprietary communications network and other network Services to the Commonwealth, the Commonwealth and/or its designee at the rates, and subject to the terms and conditions, set forth in this Contract.

k) **Resources.** Contractor shall maintain capability on at least thirty (30) days notice at all times during the Term to deploy all necessary resources to perform any Termination Assistance Services.

l) **Information.** At the Commonwealth's request, Contractor shall provide to and/or make available for the Commonwealth review, at Contractor's sole cost and expense, any and all reports, data and information that the Commonwealth deems necessary in order to evaluate all options related to an Assistance Event. Contractor shall provide all such reports, data and information regardless of whether the Commonwealth has provided notice of or otherwise declared an Assistance Event.

Comment [A79]: Contractor proposes that this subsection should apply to the information within Contactors possession only

Comment [A80]: Contractor proposes that if this is information in addition to steady state reports, Contractor should be paid for costs incurred

Breach. Contractor acknowledges and agrees that, upon any breach or threatened breach by Contractor of its obligations under this *Section 33* (Termination Assistance), Commonwealth shall be entitled to seek injunctive relief, including an order of specific performance. The provisions of this *Section 33* (Termination Assistance) will survive any expiration of the Term and any termination of this Contract.

34. CONTRACT CONTROVERSIES

a) All disputes between the parties arising under or relating to this Contract shall initially be referred in writing by either party to the Contractor Project Manager and the Commonwealth Project Manager. If the Contractor Project Manager and the Commonwealth Project Manager are unable to resolve the dispute within ten (10) Commonwealth business day(s) after referral of the matter to them or upon the earlier request by either the Contractor Project Manager or the Commonwealth Project Manager, the parties shall submit the dispute to the Management Committee for immediate review.

b) Within ten (10) Commonwealth business days after any dispute between the parties is submitted to the Management Committee pursuant to Subparagraph 30(a), the Management Committee shall meet for the purpose of attempting to resolve such dispute. At any meeting of the Management Committee at which more than one (1) dispute will be considered, Commonwealth may establish the order in which such disputes shall be addressed. If the Management Committee is unable to resolve a dispute within fifteen (15) Commonwealth business days after the date of the initial meeting of the Management Committee during which such dispute was considered, the Management Committee shall immediately notify Commonwealth and Contractor pursuant to Subparagraph 30(c).

c) In the event of a controversy or claim arising from the Contract that has not been resolved by the above process, the Contractor must, within six (6) months, file a written claim with the contracting officer for a determination. The claim shall state all grounds upon which the Contractor asserts a controversy exists

(1) The Commonwealth shall review timely-filed claims and issue a final determination, in writing, regarding the claim. The final determination shall be issued within 120 days of the receipt of the claim, unless extended by consent of the contracting officer and the Contractor. The Commonwealth shall send its written determination to the Contractor. If the Commonwealth fails to issue a final determination within the 120 days (unless extended by consent of the parties), the claim shall be deemed denied. The Commonwealth's determination shall be the final order of the purchasing agency.

Comment [A81]: Contractor proposes to be consistent to current contract the Contractor has a right to judicial review beyond the Board of Claims

(2) Within fifteen (15) days of the mailing date of the determination denying a claim or within one hundred thirty five (135) days of filing a claim if no extension is agreed to by the parties, whichever occurs first, the Contractor may file a statement of claim with the Commonwealth Board of Claims.

d) Each of Commonwealth and Contractor acknowledge that the provision of the Services is critical to the operations of Commonwealth. Accordingly, in the event of a dispute between Commonwealth and Contractor arising under or relating to this Contract, Contractor shall continue to provide the Services in accordance with the terms of this Contract during the pendency of the resolution of such dispute, including the final judicial resolution thereof by Commonwealth's Board of Claims or any appeal thereof, and Commonwealth shall compensate the Contractor pursuant to the terms of the Contract.

35. COMMONWEALTH HELD HARMLESS

Comment [A82]: Contractor proposes that this section be discussed with the Commonwealth to provide an indemnification section that is similar to our current Contract

a) The Contractor shall hold the Commonwealth harmless from and indemnify the Commonwealth against any and all third party claims, demands and actions based upon or arising out of any activities performed by the Contractor and its employees and agents under this Contract, provided the Commonwealth gives Contractor prompt notice of any such claim of which it learns. Pursuant to the Commonwealth Attorneys Act (71 P.S. § 732-101, et seq.), the Office of Attorney General (OAG) has the sole authority to represent the Commonwealth in actions brought against the Commonwealth. The OAG may, however, in its sole discretion and under such terms as it deems appropriate, delegate its right of defense. If OAG delegates the defense to the Contractor, the Commonwealth will cooperate with all reasonable requests of Contractor made in the defense of such suits.

b) Notwithstanding the above, neither party shall enter into any settlement without the other party's written consent, which shall not be unreasonably withheld. The Commonwealth may, in its sole discretion, allow the Contractor to control the defense and any related settlement negotiations.

36. LIMITATION OF LIABILITY

Comment [A83]: Contractor proposes that this section be discussed with the Commonwealth to include language that is similar to our current Contract For example, limitation of liability for direct damages is last 12 months charges, which is consistent with industry practice

a) The Contractor's liability to the Commonwealth under this Contract shall be limited to the value of the contract. This limitation will apply, except as otherwise stated in this *Section 36* (Limitation of Liability), regardless of the form of action, whether in contract or in tort, including negligence and whether related to direct, consequential, exemplary or punitive damages.

b) This limitation does not apply to damages for:

(1) Bodily injury

(2) Death;

(3) Intentional injury;

(4) Damage to real property or tangible personal property for which the Contractor is legally liable; or

(5) The Contractor's indemnity of the Commonwealth for patent, copyright, trade secret or trademark protection;

(6) Third party claims related to confidential or proprietary data misuse of confidential information or data;

(7) Milestone Credits, provided, however that payment will accrue against the cap;

(8) Commonwealth's losses resulting from Contractor's gross negligence, willful misconduct; or

(9) Contractor's costs incurred for notification, mitigation, and credit monitoring services required due to a security breach; or

(10) The Commonwealth costs, losses or damages incurred due to Personal Information being accessed, used, released, disclosed and/or acquired in an unauthorized manner while in the control of the Contractor; or

(11) Contractor's abandonment of any Services, wrongful termination of the Contract or willful refusal to provide Termination Assistance Services.

c) Except as provided for in *Section 36(c)(1) through (4)*, neither Party will be liable for indirect, incidental, special, consequential, exemplary or punitive damages arising out of or relating to the Contract :

(1) Additional costs to maintain the Services arising from a default by Contractor including the cost of work-arounds;

(2) Loss of or corruption to Commonwealth data including, without limitation, the cost and expense of rectification of the data arising out of a default (including for recovering, reconstructing, reformatting or reloading data), but only to the extent such damages arise out of the failure of Contractor to comply with its obligations under *Section 52* (Virus and Malicious Code);

(3) Expenditure or charges incurred by Commonwealth and rendered necessary as a result of a default by Contractor; and

(4) Any regulatory losses, fines, expenses or other losses suffered by Commonwealth as a result of Contractor's failure to comply with any law or regulation

37. CONFIDENTIALITY

a) For purposes of this Contract, *"Confidential Information"* of a party shall mean (1) with respect to Commonwealth, all Commonwealth Data and other information of Commonwealth or any Commonwealth agency or any private individual, organization or public agency, in each case to the extent such information and documentation is not permitted to be disclosed to third parties under local, Commonwealth or Federal laws and regulations or pursuant to any policy adopted by Commonwealth or pursuant to the terms of any third-party agreement to which Commonwealth is a party and (2) with respect to Contractor, all information identified in writing by Contractor as confidential or proprietary to Contractor, its subcontractors or licensors.

Comment [A84]: Contractor proposes using the current contract definition for Confidential Information as that definition is more complete

b) All Confidential Information relating to a party shall be held in confidence by the other party to the same extent and in at least the same manner as such party protects its own confidential or proprietary information. Neither party shall disclose, publish, release, transfer or otherwise make available any Confidential Information of the other party in any form to, or for the use or benefit of, any person or entity without the other party's consent. Subject to the other provisions of this Contractor, each party shall, however, be permitted to disclose relevant aspects of the other party's Confidential Information to its officers, agents, subcontractors and employees and to the officers, agents, subcontractors and employees of its corporate affiliates or subsidiaries to the extent that such disclosure is reasonably necessary for the performance of its duties and obligations under this Contract; provided, however, that such party shall take all reasonable measures to ensure that Confidential Information of the other party is not disclosed or duplicated in contravention of the provisions of this Contractor by such officers, agents, subcontractors and employees and that such party shall be responsible for any unauthorized disclosure of the Confidential Information of the other party by such officers, agents, subcontractors or employees; and further provided, that if the disclosure is by the Commonwealth to another contractor or sub-contractor, such disclosure is subject to a suitable non-disclosure agreement. The obligations in this Paragraph shall not restrict any disclosure by either party pursuant to any applicable law, or in accordance with the order of any court or government agency of competent jurisdiction (provided that the disclosing party shall give prompt notice to the non-disclosing party of such order) and, except to

the extent provided otherwise by any applicable law, shall not apply with respect to information which:

(1) is developed by the other party without violating the disclosing party's proprietary rights,

(2) is or becomes publicly known (other than through unauthorized disclosure),

(3) is disclosed by the owner of such information to a third party free of any obligation of confidentiality,

(4) is already known by such party without an obligation of confidentiality other than pursuant to this Contractor or any confidentiality Contractor entered into before the Effective Date between Commonwealth and Contractor, or

(5) is rightfully received by the disclosing party free of any obligation of confidentiality.

The confidentiality period for Confidential Information which is related to hardware, software, technical specifications, and methods and processes related to data processing and/or computing shall continue from the date of disclosure until two years following expiration or termination of this Contract. The immediately preceding sentence shall not release or relax, in whole or in part, Contractor's confidentiality obligations with respect to information pertaining to any private individual or, with respect to any Commonwealth Agency, information or documentation which is not permitted to be disclosed to third parties under local, Commonwealth or Federal laws and regulations or pursuant to the terms of any third party Contractor to which Commonwealth is a party.

Nothing in this *Section 37(b)* shall supersede or limit, or be deemed to supersede or limit, any other provision of this Contract pertaining to confidentiality or disclosure of any Commonwealth Data or to any security procedures required to be followed by Contractor or its employees and other representatives. In addition to the confidentiality and non-disclosure and other restrictive provisions of this *Section 37(b)* and elsewhere in this Contract, Contractor shall be subject to, and shall be required to abide by, the provisions set forth in the *Exhibits* to the RFP, all of which are required to be incorporated into this Contract to satisfy the requirements of a particular Commonwealth Agency, a particular agency of the Federal government with whom Commonwealth interacts or other third party.

c) Each party shall:

(1) Notify the other party promptly of any known unauthorized possession, use or knowledge of the other party's Confidential Information by any person or entity.

(2) Promptly furnish to the other party full details known by such party relating to the unauthorized possession, use or knowledge thereof and shall use reasonable efforts to assist the other party in investigating or preventing the recurrence of any unauthorized possession, use or knowledge of the other party's Confidential Information.

(3) Use reasonable efforts to cooperate with the other party in any litigation and investigation against third parties deemed necessary by the other party to protect its proprietary rights.

(4) Promptly use all reasonable efforts to prevent a recurrence of any such unauthorized possession, use or knowledge of the other party's Confidential Information.

d) Each party shall bear the cost it incurs as a result of compliance with this Paragraph. The obligations in this Paragraph shall not restrict any disclosure by either party pursuant to any applicable law or pursuant to the order of any court or other legal process or government agency of competent jurisdiction (provided that the disclosing party shall give prompt notice to the non-disclosing party of such order).

e) There shall be no restriction with respect to the use or disclosure of any ideas, concepts, know-how or data processing techniques developed alone or jointly with Commonwealth in connection with Services provided to Commonwealth under this Contractor.

f) The Contractor shall use the following process when submitting information to the Commonwealth it believes to be confidential and/or proprietary information or trade secrets:

Comment [A85]: Contractor proposes deletion as what is to be treated as confidential information is already defined

(1) Prepare an un-redacted version of the appropriate document, and

(2) Prepare a redacted version of the document that redacts the information that is asserted to be confidential or proprietary information or a trade secret, and

(3) Prepare a signed written statement that states:

(i) the attached document contains confidential or proprietary information or trade secrets;

(ii) the Contractor is submitting the document in both redacted and un-redacted format in accordance with 65 P.S. § 67.707(b); and

(iii) the Contractor is requesting that the document be considered exempt under 65 P.S. § 67.708(b)(11) from public records requests.

(4) Submit the two documents with the signed written statement to the Commonwealth.

g) When the Contract expires or terminates, and at any other time at the written request of the Commonwealth, the Contractor must promptly return to the Commonwealth all of the Commonwealth's Confidential Information and Data (and all copies of this information) that is in the Contractor's possession or control, in whatever form. Unless the Commonwealth agrees or specifies otherwise, the Contractor shall also deliver to the Commonwealth or, if requested by the Commonwealth, delete or destroy any copies, duplicates, summaries, abstracts or other representations of any such Confidential Information or any part thereof, in whatever form, then in the Contractor's possession or control in accordance with the "NIST Guidelines for Media Sanitization" (SP 800-88).

Comment [A86]: Contractor proposes mutual requirement to return the other parties confidential information

Comment [A87]: Contractor proposes an exception to the obligation to return or destroy data to the extent it is (1) embedded in records or documents maintained in the normal course of business, or (2) otherwise retained for legal, regulatory, or archival purposes

38. SENSITIVE INFORMATION

a) The Contractor shall not publish or otherwise disclose, except to the Commonwealth or the Contractor's subcontractors, any information or data obtained hereunder from private individuals, organizations, or public agencies, in a way that allows the information or data furnished by or about any particular person or establishment to be identified.

b) The parties shall not use or disclose any information about a recipient receiving services from, or otherwise enrolled in, a Commonwealth program affected by or benefiting from services under this Contract for any purpose not connected with the parties' Contract responsibilities.

c) Contractor, as directed, shall comply with all federal or state laws and regulations related to the use of information that constitutes protected health information (PHI) as defined by the regulations promulgated pursuant to the *Health Insurance Portability and Accountability Act* (HIPAA). By signing this Contract, the Contractor agrees to the terms of the Business Associates Contract, which is incorporated into this Contract as Appendix A. If Contract Participant, or relevant portion thereof, is a Covered Entity as defined in HIPAA, and the Contractor is performing the work of a Business Associate, the Contract Participant will fill in the blanks in the attached Appendix. It is understood that Appendix A is only applicable if the Contract Participant indicates in writing to Contractor, specifying the work and scope intended to be

subject to a Business Associates Contract, and only to the extent that Contractor and the Contract Participant agree in writing as to the specific application of Appendix A and the Business Associate Contract. If not applicable to the entire Contract Participant, Appendix A is only applicable with respect to the internal entities indicated by the Contract Participant and agreed to by the Contractor.

d) Contractor will comply with all obligations applicable to it under all applicable data protection legislation in relation to all personal data that is processed by it in the course of performing its obligations under this Contract including by:

(1) Maintaining a valid and up to date registration or notification under the data protection legislation; and

(2) Complying with all data protection legislation applicable to cross border data flows of personal data and required security measures for personal data.

39. PATENT, COPYRIGHT, TRADEMARK, AND TRADE SECRET PROTECTION

a) The Contractor shall hold the Commonwealth harmless from any suit or proceeding which may be brought by a third party against the Commonwealth, its departments, officers or employees for the alleged infringement of any United States or foreign patents, copyrights, or trademarks, or for a misappropriation of trade secrets arising out of performance of this Contract, including all work, services, materials, reports, studies, and computer programs provided by the Contractor, and in any such suit or proceeding will satisfy any final award for such infringement, including costs. The Commonwealth agrees to give Contractor prompt notice of any such claim of which it learns. Pursuant to the Commonwealth Attorneys Act 71 P.S. § 732-101, *et seq*., the Office of Attorney General (OAG) has the sole authority to represent the Commonwealth in actions brought against the Commonwealth. The OAG may, however, in its sole discretion and under the terms it deems appropriate, delegate its right of defense. If OAG delegates the defense to the Contractor, the Commonwealth will cooperate with all reasonable requests of Contractor made in the defense of such suits. No settlement which prevents the Commonwealth from continuing to use the Developed Materials as provided herein shall be made without the Commonwealth's prior written consent. In all events, the Commonwealth shall have the right, , to participate in the defense of any such suit or proceeding through counsel of its own choosing. It is expressly agreed by the Contractor that, in the event it requests that the Commonwealth to provide support to the Contractor in defending any such claim, the Contractor shall reimburse the Commonwealth for all reasonable expenses (including attorneys' fees, if such are made necessary by the Contractor's request) incurred by the Commonwealth for such support. If OAG does not delegate the defense of the matter, the Contractor's obligation to

Comment [A88]: Contractor proposes clarification and add the word "Contractors" performance

Comment [A89]: Contractor proposes adding the words ", at its expense,"

indemnify ceases. The Contractor will, at its expense, provide whatever cooperation OAG requests in the defense of the suit.

b) The Contractor agrees to exercise reasonable due diligence to prevent claims of infringement on the rights of third parties. The Contractor certifies that, in all respects applicable to this Contract, it has exercised and will continue to exercise due diligence to ensure that all works produced under this Contract do not infringe on the patents, copyrights, trademarks, trade secrets or other proprietary interests of any kind which may be held by third parties.

Comment [A90]: Contractor proposes that section b) be deleted

c) If the defense of the suit is delegated to the Contractor, the Contractor shall pay all damages and costs finally awarded therein against the Commonwealth, when such damages and costs are required to be paid. If information and assistance are furnished by the Commonwealth at the Contractor's written request, it shall be at the Contractor's expense, but the responsibility for such expense shall be only that within the Contractor's written authorization.

d) If the products, materials, reports, studies, or computer programs furnished hereunder become subject to a claim of infringement of a United States patent, copyright, or trademark, or for a misappropriation of trade secret, or if any of the products, materials, reports, studies or computer programs provided by the Contractor are in such suit or proceeding held to constitute infringement and the use or publication thereof is enjoined, then without diminishing the Contractor's obligation to satisfy any final award, the Contractor may, at its option and expense, substitute functional equivalents for the alleged infringing products, materials, reports, studies, or computer programs or, at the Contractor's option and expense, obtain the rights for the Commonwealth to continue the use of such products, materials, reports, studies, or computer programs

Comment [A91]: Contractor proposes adding the following at the end of the sentence "or modify them so that they are no longer infringing " Section 39 (e) can then be deleted

e) If any of the products, materials, reports, studies, or computer programs provided by the Contractor are in such suit or proceeding held to constitute infringement and the use or publication thereof is enjoined, the Contractor shall, at its own expense and at its option, either procure the right to publish or continue use of such infringing products, materials, reports, studies, or computer programs, replace them with non-infringing items, or modify them so that they are no longer infringing.

f) If the Contractor is unable to do any of the preceding, the Contractor agrees to pay the Commonwealth:

(1) Any amounts paid by the Commonwealth less a reasonable amount based on the acceptance and use of the deliverable;

(2) Any license fee less an amount for the period of usage of any software; and

(3) The prorated portion of any Fees representing the time remaining in any period of service for which payment was made.

g) The obligations of the Contractor under this Section 45 (Patent, Copyright, Trademark, and Trade Secret Protection) continue without time limit and survive the termination of this Contract.

h) Notwithstanding the above, the Contractor shall have no obligation for:

(1) Modification of any product, service, or deliverable provided by the Commonwealth or any third party, except for the Contractor or any of its Subcontractors;

(2) Any material provided by the Commonwealth to the Contractor and incorporated into, or used to prepare, a product, service, or deliverable;

(3) Use of the product, service, or deliverable in other than its specified operating environment;

(4) The combination, operation, or use of the product, service, or deliverable with other products, services, or deliverables not provided by the Contractor as a system or the combination, operation, or use of the product, service, or deliverable, with any products, data, or apparatus that the Contractor did not provide;

(5) Infringement of a non-Contractor product alone;

(6) The Commonwealth's distribution, marketing or use beyond the scope contemplated by the Contract;

(7) The Commonwealth's failure to use corrections or enhancements made available to the Commonwealth by the Contractor at no charge;

Comment [A92]: Contractor propose deleting "at no charge"

(8) Any infringement or claim thereof against the Commonwealth brought prior to the execution of this Contract, unless the infringement or claim relates to services provided by Contractor under another contract with the Commonwealth; or

(9) Infringement related to content provided by or on behalf of the Commonwealth, except as provided by the Contractor or any of its Subcontractors or suppliers.

i) The obligation to defend and indemnify the Commonwealth, under the terms of this *Section 39* (Patent, Copyright, Trademark, and Trade Secret Protection), shall be the Contractor's sole and exclusive obligation and the Commonwealth's sole and exclusive remedy against the Contractor for the infringement or misappropriation of intellectual property.

40. PROPRIETARY RIGHTS

a) **Commonwealth Software**. As between Commonwealth and Contractor, all Commonwealth Software shall be and shall remain the exclusive property of Commonwealth or its licensors, and Contractor shall have no rights or interests in the Commonwealth Software by virtue of this Contract except as described in this *Section 40* (Proprietary Rights) or elsewhere in this Contract. Commonwealth hereby grants to Contractor, at no cost to Contractor, for the limited purpose of providing the Services, a nonexclusive, nontransferable, royalty-free right (subject to the terms of any third party agreement to which Commonwealth is a party and which theretofore is disclosed to Contractor) to (1) have access to the Commonwealth Software, (2) copy the Commonwealth Software for archival purposes or as may otherwise be required by this Contract, (3) modify the Commonwealth Software as required by this Contract, if permitted by the Software licensing terms and pursuant to the terms of Commonwealth Third Party Software license agreement, if applicable, and (4) sublicense Contractor's subcontractors approved by Commonwealth to do any of the foregoing; provided, however, that neither Contractor nor any of its subcontractors may decompile or reverse engineer, or attempt to decompile or reverse engineer, any of the Commonwealth Software.

As of the Effective Date and subject to the terms of any third party agreement to which Commonwealth is a party, (1) Commonwealth shall, at no cost to Contractor, provide Contractor with access to the Commonwealth Software in the form in use by Commonwealth as of the Effective Date and (2) Contractor, as part of the Services, shall compile and, as changes are made, update a list of all of the Commonwealth Software then in use by Contractor or any of its subcontractors in connection with Contractor's performance of the Services. Upon the expiration or termination for any reason of Contractor's obligation to provide the Services or of this Contract, the rights granted to Contractor in this *Section 40(a)* shall immediately revert to Commonwealth or Commonwealth's designee, and Contractor forthwith shall, at no cost to Commonwealth, deliver to Commonwealth all of the Commonwealth Software (including any related source code and object code in Contractor's possession or under its control) in the form in use as of the effective date of such expiration or termination, together with a current copy of the list of Commonwealth Software in use as of the date of such expiration or termination. Concurrently therewith, Contractor shall destroy or erase all other copies of any of the Commonwealth Software then in Contractor's possession or under its control unless otherwise instructed by Commonwealth; provided, however, pursuant to and if permitted by the Commonwealth's license agreement for Commonwealth Third Party Software, if applicable, that

Contractor may retain one archival copy of such Commonwealth Software, including the Developed Software, until the later of six (6) years after such expiration or termination of this Contract and the final resolution of any actively asserted pending disputes between the parties, such retention being for the sole purpose of establishing Contractor's performance under this Contract.

b) **Contractor Software and Contractor Tools**. As between Commonwealth and Contractor, all Contractor Software and Contractor Tools shall be and shall remain the exclusive property of Contractor, and Commonwealth shall have no rights or interests in the Contractor Software or the Contractor Tools by virtue of this Contract except as described in this *Section 40(b)*. As part of the Services, Contractor shall during the Term (1) use the Contractor Software and the Contractor Tools to provide the Services, (2) make available the commercially available Contractor Software and the commercially available Contractor Tools to Commonwealth for use by Commonwealth solely in connection with the Services, and (3) maintain on Commonwealth's premises and make available to Commonwealth upon Commonwealth's request from time to time, for archival purposes only, a copy of the Contractor Software and the Contractor Tools owned by Contractor or its subcontractors and then being used by Contractor to provide the Services.

Upon the expiration or termination for any reason of Contractor's obligation to provide the Services under this Contract and at the request of Commonwealth, Contractor shall, subject to mutually agreed terms and conditions, (1) grant, or cause its subcontractors to grant, to Commonwealth a nonexclusive, nontransferable license to use and, if permitted by the terms of mutually agreed terms and conditions relating thereto, modify and make derivative works of, and unless Commonwealth terminates this Contract pursuant to the terms of *Section 32(a),(b), or (f)* to grant to third parties engaged by Commonwealth the right to use and, if permitted by mutually agreed terms and conditions relating thereto, modify and make derivative works of, all or any portion of the commercially available Contractor Software and the commercially available Contractor Tools owned by Contractor or its subcontractors theretofore being used by Contractor in connection with the Services, the foregoing rights being granted to the extent reasonably necessary to facilitate Commonwealth's or such third party's performance of the activities or services substantially equivalent to the Services to be provided by Contractor under this Contract immediately prior to such expiration or termination and (2) deliver to Commonwealth the object code version of such commercially available Contractor Software and such commercially available Contractor Tools in the form being used by Contractor in connection with the Services immediately prior to such expiration or termination.

It is understood and agreed by Contractor that the rights granted to Commonwealth hereunder in respect of the commercially available Contractor Software and the commercially available Contractor Tools shall not restrict Commonwealth from using such Contractor Software and such Contractor Tools

in the manner in which such items were used by Contractor and its subcontractors to provide the Services immediately prior to the expiration or termination of this Contract. The foregoing obligations of Contractor shall be subject to mutually agreed terms and conditions. In consideration of the grant to Commonwealth of the foregoing license, Commonwealth shall be assessed license fees hereunder not in excess of any license fees therefor being offered, as of the date of termination, by Contractor or its subcontractors, to their respective state governmental customers generally, unless Commonwealth terminates this Contract pursuant to the terms of *Section 32(a),(b) or (f)*, in which case the then-prevailing license fees of Contractor and its subcontractors, as applicable, shall apply. The foregoing shall not limit or otherwise affect Commonwealth's obligations to pay third party assignment or transfer fees as contemplated in *Section 33* (Termination Assistance); provided, however, that Commonwealth shall not be assessed any additional fees in respect thereof by Contractor.

c) **Developed Documentation.** Documentation developed by Contractor specifically for the Commonwealth in connection with its performance under this Contract is the sole and exclusive property of the Commonwealth and shall be considered "works made for hire" under the United States Copyright Act of 1976, as amended, 17 United States Code. In the event that the documentation does not fall within the specifically enumerated works that constitute works made for hire under the United States copyright laws, Contractor agrees to assign and, upon their authorship or creation, expressly and automatically assigns all copyright interests, proprietary rights, trade secrets, and other right, title, and interest in and to such documentation to Commonwealth. Commonwealth shall have all rights accorded an owner of copyright under the United States copyright laws including, but not limited to, the exclusive right to reproduce the documentation in multiple copies, the right to distribute, copies by sales or other transfers, the right to register all copyrights in its own name as author in the United States and in foreign countries, the right to prepare derivative works based upon the Creative Works and the right to display the documentation. Upon completion or termination of this Contract, all working papers, files and other documents related to the documentation shall immediately be delivered by Contractor to the Commonwealth. Contractor warrants that the documentation is original and does not infringe any copyright, patent, trademark, or other intellectual property right of any third party and are in conformance with the intellectual property laws of the United States. Provided however that Commonwealth's sole remedy for breach of this warranty is the indemnity contained in *Section 39* (Patent, Copyright, Trademark, and Trade Secret Protection).

d) All literary works, or other works of authorship (such as application programs, listings, programming tools, documentation, reports, drawings, procedure manuals and similar works) ("Developed Materials") developed hereunder shall be treated in accordance with the following general principles:

Comment [A93]: Contractor proposes that this is limited to those required to be developed under the Contract and paid for by the Commonwealth Ownership and license rights need to be clarified

(1) If and to the extent Developed Materials modify, improve or enhance software programs generally licensed by Contractor to end-users, then such Developed Materials shall be the property of Contractor and Contractor hereby grants to Commonwealth a perpetual, non-exclusive, nontransferable, royalty-free license to use such Developed Materials in Commonwealth's receipt and use of the Services;

(2) If and to the extent Developed Materials modify, improve or enhance software or other materials owned by Commonwealth or licensed to Commonwealth by a third party (i.e., a licensor other than Contractor or any Contractor agent), then such modification, improvement or enhancement and all related intellectual property rights therein shall, as between Commonwealth and Contractor, be the property of Commonwealth;

(3) If and to the extent Developed Materials constitute a newly created software program or module, and if Commonwealth funds the development cost thereof to any extent, then such software program or module and all related intellectual property rights therein shall be the property of Commonwealth; and

(4) If and to the extent Developed Materials constitute documentation, reports, drawings, procedure manuals and similar works, such Developed Materials shall be the property of Commonwealth. Contractor will not place trademarks or copyright notices on any such Developed Materials.

Comment [A94]: Contractor propose 40(d)(4) and 40(d)(5) should be limited to documentation, reports, data, etc generated for the Commonwealth as part of the Services

(5) Any data related to the use of the Services by the Commonwealth shall be the property of the Commonwealth. For this purpose, data includes ordering information, inventories, etc. At the end of the Contract, regardless of how it is ended, or at any time requested by the Commonwealth, the Contractor will provide the Commonwealth with such data in a format specified by the Commonwealth.

Comment [A95]: Contractor proposes Contractor return data in format then in use as of the date of the end of the contract This change is to be consistent with language in Section 42(d)

e) **Residual Knowledge**. Either Party, in the course of conducting business, may use any ideas, concepts, and know-how, relating to the Services which Contractor or Commonwealth (alone or jointly with the Commonwealth) develops or learns in connection with Contractor's provision of Services to Commonwealth under this Contract.

41. PUBLICATION RIGHTS AND/OR COPYRIGHTS

Comment [A96]: Contractor is uncertain of the purpose of this section and would like to discuss further with Commonwealth

a) The Contractor shall not publish any of the results of the work, which identify the Commonwealth, without the written permission of the Commonwealth. The publication shall include the following statement: "The opinions, findings, and conclusions expressed in this publication are those of the author and not

necessarily those of the Commonwealth of Pennsylvania." The Contractor shall not include in the documentation any copyrighted matter, unless the Contractor provides the Commonwealth with written permission of the copyright owner.

b) Except as otherwise provided in *Section 40* (Proprietary Rights) and the confidentiality provisions of *Section 37* (Confidentiality), the Commonwealth shall have unrestricted authority to reproduce, distribute, and use any submitted report or data designed or developed and delivered to the Commonwealth as part of the performance of the Contract.

c) Rights and obligations of the parties under this *Section 41* (Publication Rights and/or Copyrights) survive the termination of this Contract.

42. REPORTS AND DATA

a) Data. Commonwealth shall supply to Contractor the Commonwealth Data in the form maintained by the Commonwealth on such time schedules as may be agreed to by Commonwealth and Contractor from time to time. All Commonwealth Data is and shall remain the property of Commonwealth. Subject to *Section 40* (Proprietary Rights), the Commonwealth Data shall not be (1) used by Contractor or Contractor Agents other than in connection with providing the Services, and then only in accordance with the terms of this Contract, (2) disclosed, sold, assigned, leased or otherwise provided to third parties by Contractor or Contractor Agents without Commonwealth's consent and any applicable consent required by any federal governmental entity, or (3) commercially exploited by or on behalf of Contractor or Contractor Agents.

b) Reports. As part of the Services, Contractor shall provide the Reports, in electronic form, to Commonwealth. The Reports shall be prepared by Contractor and provided to the Commonwealth in a manner readable by a normal Windows based personal computer. Acceptable formats include but are not limited to: Adobe Acrobat (PDF), Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Text, Comma Separated Values (CSV).

c) Correction of Errors. In the event of any errors or inaccuracies in any of the Commonwealth Data or the Reports, or any other data processing errors or unexpected interruptions (e.g., "abends" or "freeze"), Contractor and Commonwealth shall work together in good faith, using all reasonable efforts and commencing immediately upon the discovery of the situation, to correct such error, inaccuracy or interruption. The foregoing obligations of Contractor under this *Section 42(c)* shall be subject to any limitations placed upon Contractor's access to the Commonwealth Data by Commonwealth or pursuant to this Contract. Promptly upon the completion of the correction of such error, inaccuracy or interruption, the Commonwealth Project Manager and the Contractor Project Manager shall meet to determine and document the cause

thereof. If the error, inaccuracy or interruption is determined to be caused by the error, negligence or omission of Contractor to perform an obligation under this Contract, there shall be no charge to Commonwealth for Contractor's participation in such correction. If the error, inaccuracy or interruption is determined to be caused by the error, negligence or omission of Commonwealth to perform an obligation under this Contract, Commonwealth shall reimburse Contractor for Contractor's out-of-pocket expenses paid by Contractor to third parties (other than Contractor's or any Contractor's Agent's employees) for expertise not otherwise possessed by or available to Contractor and Contractor's expenses for its employees or the employees of any Contractor agent not theretofore engaged in the provision of the Services.

d) Return of Data. At no cost to Commonwealth and as part of the Services, Contractor shall, upon Commonwealth's request at any time and at the cessation of the Termination Assistance, (1) promptly return to Commonwealth, in the format and on the media in use as of the date of the request, all or the requested portion of the Commonwealth Data then in Contractor's possession or under its control and (2) erase or destroy all or the requested portion of Commonwealth Data then in Contractor's possession or under its control. Commonwealth Data returned to the Commonwealth must be in a form that is freely accessible to the Commonwealth and not in a Contractor proprietary format.

43. SECURITY AND PROTECTION OF INFORMATION

a) At all times during the Term, Contractor shall provide all Services, and use all resources related thereto, in a secure manner and in accordance with the Commonwealth's security requirements, including the prevention and detection of fraud, abuse, or other inappropriate use or access of systems and networks by all appropriate means, including network management and maintenance applications and tools, and the use of appropriate encryption technologies. In addition, all Contractor personnel (including personnel of any Subcontractors) shall be subject to and shall at all times conform to the Commonwealth's laws, rules, and requirements for the protection of premises, materials, equipment, and personnel, as they have been previously disclosed to Contractor in writing, including those set forth in the *Exhibits* to the RFP. Any violations or disregard of these rules shall be cause for denial of access by such personnel to the Commonwealth's property. Contractor shall exercise due care and diligence to prevent any injury to person or damage to property while on the Commonwealth's premises. The operation of Contractor vehicles or private vehicles of Contractor personnel on the Commonwealth's property shall conform to posted and other regulations and safe driving practices. Vehicular accidents on the Commonwealth's property and involving Contractor personnel shall be reported promptly to the appropriate Commonwealth's security personnel.

Comment [A97]: Contractor proposes deleting "in a secure manner" as the language it will already be in accordance to the Commonwealth security requirements

Comment [A98]: Contractor requests that security requirements be documented as part of contract, with any subsequent changes handled via Change Control procedures

b) The Pennsylvania State Police's Criminal Justice Information Services Policy ("CJIS Policy"), is set forth in *Exhibits G.6 and G.7*, and is hereby incorporated by this reference into this Contract. Contractor acknowledges and agrees that it is bound by all applicable provisions of the CJIS Policy. Contractor and the Commonwealth further agree that, in accordance with the CJIS Policy, the Commonwealth does not anticipate and will not authorize any requests to Contractor for the criminal history record information covered by the CJIS Policy, because Contractor is performing an IT support function. The Commonwealth's Office of Attorney General's CHRIA Handbook, attached as *Exhibit G.12* to the RFP, is also incorporated by reference into this Contract. Contractor acknowledges and agrees that it is bound by all applicable provisions of the CHRIA Handbook.

.

44. BACKGROUND CHECKS

a) The Contractor must, at its expense, arrange for a background check for each of its employees, as well as for the employees of its subcontractors, who will have access to Commonwealth Services Locations, either through on site or remote access. Background checks will not be conducted by the Commonwealth but rather will be conducted by Contractor or its subcontractors according to Contractor policy and practice and consistent with ITB-SEC009. The background check must be conducted prior to initial access by a Contractor Personnel and every two (2) years thereafter or at a longer interval if required by applicable law.

b) Before the Commonwealth will permit Contractor Personnel access to Commonwealth facilities, the Contractor must provide written confirmation to the office designated by the agency that the background check has been conducted. If, at any time, it is discovered that Contractor Personnel has a criminal record that includes a felony or misdemeanor involving terroristic threats, violence, use of a lethal weapon, or breach of trust/fiduciary responsibility; or which raises concerns about building, system, or personal security, or is otherwise job-related, the Contractor shall notify the Commonwealth Contracting Officer immediately, shall not assign that employee to any Commonwealth facilities, shall remove any access privileges already given to the employee, and shall not permit that employee remote access to Commonwealth facilities or systems, unless the agency consents, in writing, prior to the access being provided. The agency may withhold its consent at its sole discretion. Failure of the Contractor to comply with the terms of this Paragraph may result in default of the Contractor under its Contract with the Commonwealth.

c) The Commonwealth specifically reserves the right of the Commonwealth to conduct background checks over and above that described herein.

45. INSURANCE

a) Contractor Insurance Requirements. During the Contract Term, Contractor shall maintain at its own expense, insurance of the type and in the amounts specified below and issued by companies authorized to conduct such business under the laws of Pennsylvania:

(1) Statutory workers' compensation in accordance with all applicable Federal, state and local requirements, and employer liability in an amount not less than $2,000,000 per occurrence;

(2) Comprehensive general public liability (including contractual liability insurance) in an amount not less than $5,000,000 per occurrence;

(3) Comprehensive automobile liability covering all vehicles that Contractor owns, hires, or leases in an amount not less than $5,000,000 per occurrence (combined single limit for bodily injury and property damages).

(4) Personal property insurance, on a replacement basis, covering all of Contractor's and Contractor's Agents' personal property located at any Contractor Services Location.

(5) Professional liability/error & omission in the aggregate amount of not less than $15,000,000.

(6) Comprehensive crime insurance in an amount of not less than $15,000,000 per claim.

(7) Network/Cyber Liability Insurance (including coverage for Technology Professional Liability if not covered under Contractor's Professional Liability/Errors and Omissions Insurance referenced above) in the amount of $20,000,000, per occurrence.

(8) Umbrella/excess in an aggregate amount of not less than $30,000,000.

b) Insurance Requirements for Subcontractors. During the Contract Term, Contractor shall require each of its subcontractors listed in *Schedule L* (Approved Subcontractors) and any other subcontractors performing any Services on-site at any of the Contractor Services Locations, to maintain at their own expense or Contractor's expense, insurance of the type and in the amounts specified below:

(1) Statutory workers' compensation in accordance with all applicable Federal, state and local requirements, and employer liability in an amount not less than $1,000,000 per occurrence;

(2) Comprehensive general public liability (including contractual liability insurance) in an amount not less than $2,000,000 per occurrence;

(3) If any of the subcontractor personnel will be on-site at any of the Commonwealth's or Contractor's facilities, comprehensive automobile liability covering all vehicles owned, hired or leased by that Subcontractor and in an amount not less than $2,000,000 per occurrence (combined single limit for bodily injury and property damages);

(4) If the subcontractor personnel will be on-site at any of Commonwealth's or Contractor's facilities, personal property

(5) insurance, on a replacement basis, covering all of that Subcontractor's personal property located at any such facilities; and

(6) Network/Cyber Liability Insurance (including coverage for Technology Professional Liability if not covered under Contractor's Professional Liability/Errors and Omissions Insurance referenced above) in the amount of $10,000,000, per occurrence; and

(7) Errors & Omissions liability in the amount of $2,000,000 each claim and aggregate (if applicable).

c) Prior to the expiration of any then effective insurance policy, Contractor shall furnish to Commonwealth certificates of insurance or other appropriate documentation (including evidence of renewal of insurance) evidencing all coverage referenced in this *Section 45* (Insurance), as applicable, and naming Commonwealth as an additional insured to the extent of Contractor's indemnities contained in this Contract. Contractor shall have included in all policies of insurance required hereunder a waiver by the insurer of all right of subrogation against Commonwealth in connection with any loss or damage thereby insured against. Such certificates or other documentation will include a provision whereby thirty (30) days' notice must be received by Commonwealth prior to coverage cancellation or alteration of the coverage by either Contractor or its subcontractors or the applicable insurer. Such cancellation or alteration shall not relieve Contractor of its continuing obligation to maintain insurance coverage in accordance with this *Section 45*(Insurance).

d) For purposes hereof, Contractor and such subcontractors may maintain "umbrella" insurance policies to fulfill the foregoing insurance requirements, as appropriate.

46. WARRANTIES

Comment [A99]: Contractor proposes dividing Section 46 into 2 parts Representation in Section a and Covenants in Section b Subsection 5 through 11 should be Covenants

a) Contractor represents, warrants and covenants that as of the Contract's Effective Date:

(1) It is a corporation duly incorporated, validly existing, and in good standing under the laws of _____..

(2) It has all requisite corporate power and authority to execute, deliver, and perform its obligations under this Contract.

(3) Contractor is duly licensed, authorized and qualified to do business and is in good standing in Pennsylvania and in every other jurisdiction where Services will be performed by Contractor pursuant to this Contract in which a license, authorization or qualification is required for the ownership or leasing of its assets or the transaction of business of the character transacted by it except where the failure to be so licensed, authorized or qualified would not have a material adverse effect on Contractor's ability to fulfill its obligations under this Contract.

(4) The execution, delivery and performance of this Contract by Contractor has been duly authorized by Contractor.

(5) Contractor shall comply with all applicable Federal, state and local laws and regulations applicable to Contractor and shall obtain all applicable permits and licenses required of Contractor in connection with its obligations under this Contract.

Comment [A100]: Contractor proposes to delete this section 5 as it appears redundant with Section 78

(6) Contractor has not disclosed any Confidential Information of Commonwealth.

(7) The Contractor Software does not and will not, and the Developed Software and the Services will not, infringe upon the proprietary rights of any third party, provided that Contractor will have no obligation with respect to any losses to the extent the same arise out of or in connection with Commonwealth's modification or misuse of equipment, systems, programs, or products or Commonwealth's combination, operation or use with devices, data, equipment, systems, programs or products not furnished by Contractor under this Contract.

(8) Contractor Personnel and Subcontractors that Contractor will use to provide and perform the Services have and during the Term will have, the suitable knowledge, skills, experience, qualifications and resources to provide and perform the Services:

1. In accordance with the Contract; and

2. In a diligent, workmanlike manner with due care and skill, consistent with the required level of quality and performance and in accordance with the Service Levels.

(9) The Services will comply with standards set in the Commonwealth's IT Bulletins as issued from time to time, and all internal policies and procedures as set from time to time and as a provided to Contractor.

(10) Contractor shall cooperate fully with Commonwealth and with any third party appointed by Commonwealth to the extent that such cooperation may be necessary to permit Commonwealth or such third parties to complete any work related to or impacted by the Services provided to Commonwealth by Contractor under the Contract.

(11) Contractor shall collaborate fully with Commonwealth or with any third party appointed by Commonwealth to the extent that such cooperation may be necessary to permit Commonwealth or such third parties to in-source or transfer to a third party any aspect of the Services then provided by Contractor under the Contract.

b) Commonwealth represents, warrants and covenants that as of the Contract's Effective Date:

(1) It is a sovereign entity and has all requisite power and authority to execute, deliver, and perform its obligations under this Contract.

(2) It has, or at any time of provision to Contractor, will have the right to use and to disclose to Contractor and Contractor Agents and to allow Contractor and Contractor Agents to use in accordance with the terms of this Contract any Commonwealth Software so disclosed to Contractor.

Comment [A101]: Contractor proposes deleting this subsection 9 as standards should be included within this Contract and any changes to the standards should be processed via Change Control

Comment [A102]: Contractor proposes having reciprocal representations and warranties similar to current contract provision 26 01

47. CONTRACTOR RESPONSIBILITY PROGRAM

a) The Contractor certifies, for itself and all its subcontractors, that as of the date of its execution of this Bid/Contract, that neither the Contractor, nor any subcontractors, nor any suppliers are under suspension or debarment by the Commonwealth or any governmental entity, instrumentality, or authority and, if the Contractor cannot so certify, then it agrees to submit, along with its Bid, a written explanation of why such certification cannot be made.

b) The Contractor must also certify, in writing, that as of the date of its execution of this Bid/Contract, it has no tax liabilities or other Commonwealth obligations.

c) The Contractor's obligations pursuant to these provisions are ongoing from and after the effective date of the contract through the termination date thereof.

Accordingly, the Contractor shall have an obligation to inform the Commonwealth if, at any time during the term of the Contract, it becomes delinquent in the payment of taxes, or other Commonwealth obligations, or if it or any of its subcontractors are suspended or debarred by the Commonwealth, the federal government, or any other state or governmental entity. Such notification shall be made within 15 days of the date of suspension or debarment.

d) The failure of the Contractor to notify the Commonwealth of its suspension or debarment by the Commonwealth, any other state, or the federal government shall constitute an event of default of the Contract with the Commonwealth.

e) The Contractor agrees to reimburse the Commonwealth for the reasonable costs of investigation incurred by the Office of State Inspector General for investigations of the Contractor's compliance with the terms of this or any other agreement between the Contractor and the Commonwealth, which results in the suspension or debarment of the Contractor. Such costs shall include, but shall not be limited to, salaries of investigators, including overtime; travel and lodging expenses; and expert witness and documentary fees. The Contractor shall not be responsible for investigative costs for investigations that do not result in the Contractor's suspension or debarment.

f) The Contractor may obtain a current list of suspended and debarred Commonwealth contractors by either searching the internet at *http://www.dgs.state.pa.us* or contacting the:

Department of General Services
Office of Chief Counsel
603 North Office Building
Harrisburg, PA 17125
Telephone No. (717) 783-6472
FAX No. (717) 787-9138

48. OFFSET PROVISION FOR COMMONWEALTH CONTRACTS

The Contractor agrees that the Commonwealth may set off the amount of any state tax liability or other obligation of the Contractor or its subsidiaries to the Commonwealth against any payments due the Contractor under any contract with the Commonwealth.

49. TAXES-FEDERAL, STATE, AND LOCAL

a) **Commonwealth Exemption**. No taxes from which the Commonwealth is exempt shall be included in the Fee. The Commonwealth is exempt from all excise taxes imposed by the Internal Revenue Service and has accordingly registered with the Internal Revenue Service to make tax-free purchases under registration No. 23-23740001-K. With the exception of purchases of the

following items, no exemption certificates are required and none will be issued: undyed diesel fuel, tires, trucks, gas-guzzler emergency vehicles, and sports fishing equipment. The Commonwealth is also exempt from Pennsylvania sales tax, local sales tax, public transportation assistance taxes, and fees and vehicle rental tax. The Department of Revenue regulations provide that exemption certificates are not required for sales made to governmental entities and none will be issued.

b) **Contractor Taxes**. Fees are inclusive of any applicable sales, use, personal property and other taxes attributable to periods on or after the Effective Date and based upon or measured by Contractor's cost in acquiring or providing equipment, materials, supplies or services furnished or used by Contractor in performing or furnishing the Services, including without limitation, all personal property and use taxes, if any, due on Contractor Machines.

c) **Segregation of Fees**. Commonwealth and Contractor shall cooperate to segregate the Fees into the following separate payment streams: (1) those for Services, and (2) those for which Contractor functions merely as a paying agent for Commonwealth in receiving goods, supplies, or services (including leasing and licensing arrangements).

50. POLICIES AND PROCEDURES

Contractor shall comply with the most stringent of:

Comment [A103]: Suggest removing "most stringent"

a) Commonwealth standards set out in IT Bulletins, standards and procedures related to the Services, including but not limited to those governing security, treatment of personal information, quality, change, and problem management, safety, data privacy and data security, and pervasive and transaction controls; provided, however that the Contractor may submit a request under *Section 27* (Change Control), if it believes that it has incurred costs or delay in complying with this Section due to changes in the IT Bulletins, standards and procedures related to the Services; or

b) The policies, standard and procedures that are generally adopted by leading providers of Services similar in scope, scale and geographic coverage to the outsourced Services.

51. AUDIT OBLIGATIONS

a) SINGLE AUDIT ACT OF 1984

In compliance with the *Single Audit Act of 1984*, the Contractor agrees to the following:

(1) This Contract is subject to audit by federal and state agencies or their authorized representative in accordance with the auditing standards promulgated by the Comptroller General of the United States and specified in *Government Auditing Standards*, 1994 Revisions (Yellow Book).

(2) The audit requirement of this Contract will be satisfied if a single audit is performed under the provisions of the *Single Audit Act of 1984, 31 U.S.C. § 7501, et seq*., and all rules and regulations promulgated pursuant to the Act.

(3) The Commonwealth reserves the right for federal and state agencies or their authorized representatives to perform additional audits of a financial/compliance, economy/efficiency, or program results nature, if deemed necessary.

(4) The Contractor further agrees to comply with requirements that may be issued by the state agency upon receipt of additional guidance received from the federal government regarding the *Single Audit Act of 1984.*

b) Access by Commonwealth

(1) **Processing**. Upon reasonable written notice from Commonwealth, Contractor and Contractor Agents shall provide such auditors and inspectors with access to the Services Locations and the Software and the Machines for the purpose of performing audits or inspections of the Services and the operations of Commonwealth and Contractor, subject always to Contractor's reasonable security requirements. Contractor shall provide, and shall cause Contractor Agents to provide, to such auditors and inspectors any reasonable assistance that they may require. If any such audit results in Contractor being notified that it or any Contractor Agent is not in compliance with any law, regulation, audit requirement or generally accepted accounting principle relating to the Services, Contractor shall, and shall cause such Contractor Agent to, promptly take actions to comply with such law, regulation, audit requirement or generally accepted accounting principle. Commonwealth shall bear the expense of any such compliance that is (1) required by a law, regulation or other audit requirement relating to Commonwealth's operations to the extent the same was first enacted on or after the Effective Date or (2) necessary due to Commonwealth's noncompliance with any law, regulation or audit requirement imposed on Commonwealth. Contractor shall bear the expense of any such response that is (1) required by a law, regulation or other audit requirement relating to Contractor's business or enacted prior to the Effective Date, (2) to be performed by

Contractor as part of the Services, or (3) necessary due to Contractor's noncompliance with any law, regulation or audit requirement imposed on Contractor. As part of the Services, Contractor shall provide to Commonwealth summary data of those portions of Contractor's and Contractor Agents' internal audit reports relating solely to the Services.

(2) **Fees**. Upon reasonable written notice from Commonwealth, Contractor shall provide such auditors and inspectors with access to such financial records and supporting documentation as may reasonably be requested by Commonwealth, and such auditors and inspectors may audit the Fees charged to Commonwealth to determine that such Fees are accurate and in accordance with this Contract.

(3) **Overcharges**. If, as a result of such audit, Commonwealth determines that Contractor has overcharged Commonwealth, Commonwealth shall notify Contractor of the amount of such overcharge and Contractor shall promptly pay to Commonwealth the amount of the overcharge, plus interest at the rate of six percent (6%) per annum, calculated from the date of receipt by Contractor of the overcharged amount until the date of repayment to Commonwealth. In the event any such audit reveals an overcharge to Commonwealth during any calendar month during the Term exceeding fifteen percent (15%) of all Fees in the aggregate paid by Commonwealth in respect of such calendar month, Contractor shall reimburse Commonwealth for the cost of such audit. If as a result of such audit, Commonwealth or Contractor determines that Contractor has undercharged Commonwealth, Commonwealth shall promptly pay to Contractor the amount of such undercharge, without interest. Any disagreement between the parties with regard to the results of any such audit shall be treated as a dispute between the parties subject to the provisions of *Section 34* (Contract Controversies).

(4) **Record Retention**. As part of the Services, Contractor shall (1) retain records and supporting documentation sufficient to document the Services and the Fees paid or payable by Commonwealth under this Contract for at least three (3) years after the expiration or termination of this Contract or until all questioned items relating to such records and documentation are resolved by the parties, whichever is later, and (2) upon notice from Commonwealth, provide such auditors and inspectors as are designated by Commonwealth with reasonable access to such records and documentation for inspection, audit and reproduction. Such records and documentation shall be in such detail as will properly reflect, in accordance with generally accepted accounting principles, all charges claimed under the provisions of this Contract. Any such records which relate to litigation or the settlement

of claims arising out of the performance of this Contract, or any Fees as to which exception has been taken by the auditors, shall be retained by Contractor until such litigation, claims, or exceptions have been finally resolved. Such audit shall not require Contractor to disclose cost, profit and overhead data, including direct and indirect rates, markups, profit margins or confidential employee records or other trade secret information.

(5) **Inclusion in Subcontracts**. The provisions of this *Section 51* (Audit Obligations), except for *Section 51(b)3*, shall be applicable to and included in each subcontract under this Contract.

52. VIRUS AND MALICIOUS CODE

(a) The Contractor shall be liable for any damage to any data and/or software owned or licensed by the Commonwealth if the Contractor or any of its employees, subcontractors or consultants introduces a virus or malicious, mischievous or destructive programming into the Commonwealth's software or computer networks and has failed to comply with the Commonwealth software security standards. The Commonwealth must demonstrate that the Contractor or any of its employees, subcontractors or consultants introduced the virus or malicious, mischievous or destructive programming. The Contractor's liability shall cease if the Commonwealth has not fully complied with its own software security standards.

(b) The Contractor shall be liable for any damages incurred by the Commonwealth including, but not limited to, the expenditure of Commonwealth funds to eliminate or remove a computer virus or malicious, mischievous or destructive programming that result from the Contractor's failure to take proactive measures to keep virus or malicious, mischievous or destructive programming from originating from the Contractor or any of its employees, subcontractors or consultants through appropriate firewalls and maintenance of anti-virus software and software security updates (such as operating systems security patches, etc.).

(c) In the event of destruction or modification of software, the Contractor shall eliminate the virus, malicious, mischievous or destructive programming, restore the Commonwealth's software, and be liable to the Commonwealth for any resulting damages.

(d) The Contractor shall be responsible for reviewing Commonwealth software security standards and complying with those standards.

(e) The Commonwealth may, at any time, audit, by a means deemed appropriate by the Commonwealth, any computing devices being used by representatives of the Contractor to provide Services to the Commonwealth for the sole purpose of determining whether those devices have anti-virus software with current virus

signature files and the current minimum operating system patches or workarounds have been installed. Devices found to be out of compliance will immediately be disconnected and will not be permitted to connect or reconnect to the Commonwealth network until the proper installations have been made.

(f) The Contractor may use the anti-virus software used by the Commonwealth to protect Contractor's computing devices used in the course of providing services to the Commonwealth. It is understood that the Contractor may not install the software on any computing device not being used to provide services to the Commonwealth, and that all copies of the software will be removed from all devices upon termination of this Contract.

(g) The Commonwealth will not be responsible for any damages to the Contractor's computers, data, software, etc. caused as a result of the installation of the Commonwealth's anti-virus software or monitoring software on the Contractor's computers.

53. THE AMERICANS WITH DISABILITIES ACT

During the term of this Contract, the Contractor agrees as follows:

(h) Pursuant to federal regulations promulgated under the authority of *The Americans With Disabilities Act*, 28 C.F.R.§ 35.101, *et seq*., the Contractor understands and agrees that no individual with a disability shall, on the basis of the disability, be excluded from participation in this Contract or from activities provided for under this Contract. As a condition of accepting and executing this Contract, the Contractor agrees to comply with the *General Prohibitions Against Discrimination*, 28 C.F.R. § 35.130, and all other regulations promulgated under Title II of *The Americans With Disabilities Act* which are applicable to the benefits, services, programs, and activities provided by the Commonwealth of Pennsylvania through Contracts with outside Contractors.

(i) The Contractor shall be responsible for and agrees to indemnify and hold harmless the Commonwealth of Pennsylvania from losses, damages, expenses claims, demands, suits, and actions brought by any party against the Commonwealth of Pennsylvania as a result of the Contractor's failure to comply with the provisions of subsection (a) above.

54. NONDISCRIMINATION CLAUSE/SEXUAL HARASSMENT CLAUSE

The Contractor agrees:

a) In the hiring of any employee(s) for the manufacture of supplies, performance of work, or any other activity required under the contract or any subcontract, the Contractor, each subcontractor, or any person acting on behalf of the Contractor or subcontractor shall not, by reason of gender, race, creed, or color,

discriminate against any citizen of this Commonwealth who is qualified and available to perform the work to which the employment relates.

b) Neither the Contractor nor any subcontractor nor any person on their behalf shall in any manner discriminate against or intimidate any employee involved in the manufacture of supplies, the performance of work, or any other activity required under the contract on account of gender, race, creed, or color.

c) The Contractor and each subcontractor shall establish and maintain a written sexual harassment policy and shall inform their employees of the policy. The policy must contain a notice that sexual harassment will not be tolerated and employees who practice it will be disciplined.

d) The Contractor and each subcontractor shall not discriminate by reason of gender, race, creed, or color against any subcontractor or supplier who is qualified to perform the work to which the contracts relates.

e) The Contractor and each subcontractor shall, within the time periods requested by the Commonwealth, furnish all necessary employment documents and records and permit access to their books, records, and accounts by the contracting agency and the Bureau of Small Business Opportunities (BSBO), for purpose of ascertaining compliance with provisions of this Nondiscrimination/Sexual Harassment Clause. Within fifteen (15) days after award of any contract, the Contractor shall be required to complete, sign and submit Form STD-21, the "Initial Contract Compliance Data" form. If the contract is a construction contract, then the Contractor shall be required to complete, sign and submit Form STD-28, the "Monthly Contract Compliance Report for Construction Contractors", each month no later than the 15th of the month following the reporting period beginning with the initial job conference and continuing through the completion of the project. Those contractors who have fewer than five employees or whose employees are all from the same family or who have completed the Form STD-21 within the past 12 months may, within the 15 days, request an exemption from the Form STD-21 submission requirement from the contracting agency.

f) The Contractor shall include the provisions of this Nondiscrimination/Sexual Harassment Clause in every subcontract so that those provisions applicable to subcontractors will be binding upon each subcontractor.

g) The Commonwealth may cancel or terminate the contract and all money due or to become due under the contract may be forfeited for a violation of the terms and conditions of this Nondiscrimination/Sexual Harassment Clause. In addition, the agency may proceed with debarment or suspension and may place the Contractor in the Contractor Responsibility File.

55. CONTRACTOR INTEGRITY PROVISIONS

It is essential that those who seek to contract with the Commonwealth of Pennsylvania observe high standards of honesty and integrity. They must conduct themselves in a manner that fosters public confidence in the integrity of the Commonwealth procurement process.

In furtherance of this policy, Contractor agrees to the following:

(a) Contractor shall maintain the highest standards of honesty and integrity during the performance of this contract and shall take no action in violation of state or federal laws or regulations or any other applicable laws or regulations, or other requirements applicable to Contractor or that govern contracting with the Commonwealth.

(b) Contractor shall establish and implement a written business integrity policy, which includes, at a minimum, the requirements of these provisions as they relate to Contractor employee activity with the Commonwealth and Commonwealth employees, and which is distributed and made known to all Contractor employees.

(c) Contractor, its affiliates, agents and employees shall not influence, or attempt to influence, any Commonwealth employee to breach the standards of ethical conduct for Commonwealth employees set forth in the *Public Official and Employees Ethics Act, 65 Pa.C.S. §§1101 et seq.*; the *State Adverse Interest Act, 71 P.S. §776.1 et seq.*; and the *Governor's Code of Conduct, Executive Order 1980-18, 4 Pa. Code §7.151 et seq.*, or to breach any other state or federal law or regulation.

(d) Contractor, its affiliates, agents and employees shall not offer, give, or agree or promise to give any gratuity to a Commonwealth official or employee or to any other person at the direction or request of any Commonwealth official or employee.

(e) Contractor, its affiliates, agents and employees shall not offer, give, or agree or promise to give any gratuity to a Commonwealth official or employee or to any other person, the acceptance of which would violate the *Governor's Code of Conduct, Executive Order 1980-18, 4 Pa. Code §7.151 et seq.* or any statute, regulation, statement of policy, management directive or any other published standard of the Commonwealth.

(f) Contractor, its affiliates, agents and employees shall not, directly or indirectly, offer, confer, or agree to confer any pecuniary benefit on anyone as consideration for the decision, opinion, recommendation, vote, other exercise of discretion, or violation of a known legal duty by any Commonwealth official or employee.

(g) Contractor, its affiliates, agents, employees, or anyone in privity with him or her shall not accept or agree to accept from any person, any gratuity in connection with the performance of work under the contract, except as provided in the contract.

(h) Contractor shall not have a financial interest in any other contractor, subcontractor, or supplier providing services, labor, or material on this project, unless the financial interest is disclosed to the Commonwealth in writing and the Commonwealth consents to Contractor's financial interest prior to Commonwealth execution of the contract. Contractor shall disclose the financial interest to the Commonwealth at the time of bid or proposal submission, or if no bids or proposals are solicited, no later than Contractor's submission of the contract signed by Contractor.

(i) Contractor, its affiliates, agents and employees shall not disclose to others any information, documents, reports, data, or records provided to, or prepared by, Contractor under this contract without the prior written approval of the Commonwealth, except as required by the *Pennsylvania Right-to-Know Law, 65 P.S. §§ 67.101-3104*, or other applicable law or as otherwise provided in this contract. Any information, documents, reports, data, or records secured by Contractor from the Commonwealth or a third party in connection with the performance of this contract shall be kept confidential unless disclosure of such information is:

(1) Approved in writing by the Commonwealth prior to its disclosure; or

(2) Directed by a court or other tribunal of competent jurisdiction unless the contract requires prior Commonwealth approval; or

(3) Required for compliance with federal or state securities laws or the requirements of national securities exchanges; or

(4) Necessary for purposes of Contractor's internal assessment and review; or

(5) Deemed necessary by Contractor in any action to enforce the provisions of this contract or to defend or prosecute claims by or against parties other than the Commonwealth; or

(6) Permitted by the valid authorization of a third party to whom the information, documents, reports, data, or records pertain: or

(7) Otherwise required by law.

(j) Contractor certifies that neither it nor any of its officers, directors, associates, partners, limited partners or individual owners has been officially notified of, charged with, or convicted of any of the following and agrees to immediately

Comment [A104]: Contractor proposes deleting this section (i), since this is covered in detail in Section 37

Comment [A105]: Contractor proposes that the Commonwealth is protected by the compliance with laws provisions

notify the Commonwealth agency contracting officer in writing if and when it or any officer, director, associate, partner, limited partner or individual owner has been officially notified of, charged with, convicted of, or officially notified of a governmental determination of any of the following:

(1) Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements or receiving stolen property.

(2) Commission of fraud or a criminal offense or other improper conduct or knowledge of, approval of or acquiescence in such activities by Contractor or any affiliate, officer, director, associate, partner, limited partner, individual owner, or employee or other individual or entity associated with:

i. obtaining;

ii. attempting to obtain; or

iii. performing a public contract or subcontract.

Contractor's acceptance of the benefits derived from the conduct shall be deemed evidence of such knowledge, approval or acquiescence.

(3) Violation of federal or state antitrust statutes.

(4) Violation of any federal or state law regulating campaign contributions.

(5) Violation of any federal or state environmental law.

(6) Violation of any federal or state law regulating hours of labor, minimum wage standards or prevailing wage standards; discrimination in wages; or child labor violations.

(7) Violation of the *Act of June 2, 1915 (P.L.736, No. 338)*, known as the *Workers' Compensation Act*, 77 P.S. 1 *et seq.*

(8) Violation of any federal or state law prohibiting discrimination in employment.

(9) Debarment by any agency or department of the federal government or by any other state.

(10) Any other crime involving moral turpitude or business honesty or integrity.

Contractor acknowledges that the Commonwealth may, in its sole discretion, terminate the contract for cause upon such notification or when the Commonwealth otherwise learns that Contractor has been officially notified, charged, or convicted.

(k) If this contract was awarded to Contractor on a non-bid basis, Contractor must, (as required by *Section 1641* of the *Pennsylvania Election Code*) file a report of political contributions with the Secretary of the Commonwealth on or before February 15 of the next calendar year. The report must include an itemized list of all political contributions known to Contractor by virtue of the knowledge possessed by every officer, director, associate, partner, limited partner, or individual owner that has been made by:

(1) Any officer, director, associate, partner, limited partner, individual owner or members of the immediate family when the contributions exceed an aggregate of one thousand dollars ($1,000) by any individual during the preceding year; or

(2) Any employee or members of his immediate family whose political contribution exceeded one thousand dollars ($1,000) during the preceding year.

To obtain a copy of the reporting form, Contractor shall contact the Bureau of Commissions, Elections and Legislation, Division of Campaign Finance and Lobbying Disclosure, Room 210, North Office Building, Harrisburg, PA 17120.

(l) Contractor shall comply with requirements of the *Lobbying Disclosure Act, 65 Pa.C.S. § 13A01 et seq*., and the regulations promulgated pursuant to that law. Contractor employee activities prior to or outside of formal Commonwealth procurement communication protocol are considered lobbying and subjects the Contractor employees to the registration and reporting requirements of the law. Actions by outside lobbyists on Contractor's behalf, no matter the procurement stage, are not exempt and must be reported.

(m) When Contractor has reason to believe that any breach of ethical standards as set forth in law, the Governor's Code of Conduct, or in these provisions has occurred, or may occur, including but not limited to contact by a Commonwealth officer or employee which, if acted upon, would violate such ethical standards, Contractor shall immediately notify the Commonwealth contracting officer or Commonwealth Inspector General in writing.

Comment [A106]: Contractor proposes more specific language regarding the role(s) within the Contractor organization and it is based on factual circumstances

(n) Contractor, by submission of its bid or proposal and/or execution of this contract and by the submission of any bills, invoices or requests for payment pursuant to the contract, certifies and represents that it has not violated any of these contractor integrity provisions in connection with the submission of the bid or proposal, during any contract negotiations or during the term of the contract.

Comment [A107]: Contractor proposes deleting subsection (n)

(o) Contractor shall cooperate with the Office of Inspector General in its investigation of any alleged Commonwealth employee breach of ethical standards and any alleged Contractor non-compliance with these provisions. Contractor agrees to make identified Contractor employees available for interviews at reasonable times and places. Contractor, upon the inquiry or request of the Office of Inspector General, shall provide, or if appropriate, make promptly available for inspection or copying, any information of any type or form deemed relevant by the Inspector General to Contractor's integrity and compliance with these provisions. Such information may include, but shall not be limited to, Contractor's business or financial records, documents or files of any type or form that refers to or concern this contract.

(p) For violation of any of these Contractor Integrity Provisions, the Commonwealth may terminate this and any other contract with Contractor, claim liquidated damages in an amount equal to the value of anything received in breach of these provisions, claim damages for all additional costs and expenses incurred in obtaining another contractor to complete performance under this contract, and debar and suspend Contractor from doing business with the Commonwealth. These rights and remedies are cumulative, and the use or non-use of any one shall not preclude the use of all or any other. These rights and remedies are in addition to those the Commonwealth may have under law, statute, regulation, or otherwise.

(q) For purposes of these Contractor Integrity Provisions, the following terms shall have the meanings found in this Section (q).

(1) "Confidential information" means information that a) is not already in the public domain; b) is not available to the public upon request; c) is not or does not become generally known to Contractor from a third party without an obligation to maintain its confidentiality; d) has not become generally known to the public through an act or omission of Contractor; or e) has not been independently developed by Contractor without the use of confidential information of the Commonwealth.

(2) **"**Consent" means written permission signed by a duly authorized officer or employee of the Commonwealth, provided that where the material facts have been disclosed, in writing, by pre-qualification, bid, proposal, or contractual terms, the Commonwealth shall be deemed to have consented by virtue of execution of this contract.

(3) **"**Contractor" means the individual or entity that has entered into this contract with the Commonwealth, including those directors, officers, partners, managers, and owners having more than a five percent interest in Contractor.

(4) "Financial interest" means:

Comment [A108]: Contractor proposes that specific type of exclusions should be identified For example, attorney / client privileges

Comment [A109]: Contractor proposes that a termination right of this Contract only should apply only if "material breach", and that damages should be subject to the liability provisions

i. Ownership of more than a five percent interest in any business; or

ii. Holding a position as an officer, director, trustee, partner, employee, or holding any position of management.

(5) "Gratuity" means tendering, giving or providing anything of more than nominal monetary value including, but not limited to, cash, travel, entertainment, gifts, meals, lodging, loans, subscriptions, advances, deposits of money, services, employment, or contracts of any kind. The exceptions set forth in the *Governor's Code of Conduct, Executive Order 1980-18*, the *4 Pa. Code §7.153(b)*, shall apply.

(6) "Immediate family" means a spouse and any unemancipated child.

(7) "Non-bid basis" means a contract awarded or executed by the Commonwealth with Contractor without seeking bids or proposals from any other potential bidder or offeror.

(8) "Political contribution" means any payment, gift, subscription, assessment, contract, payment for services, dues, loan, forbearance, advance or deposit of money or any valuable thing, to a candidate for public office or to a political committee, including but not limited to a political action committee, made for the purpose of influencing any election in the Commonwealth of Pennsylvania or for paying debts incurred by or for a candidate or committee before or after any election.

56. RIGHT-TO-KNOW LAW

(a) The Pennsylvania Right-to-Know Law, 65 P.S. §§ 67.101-3104, ("RTKL") applies to this Contract.

(b) If the Commonwealth requires the Contractor's assistance in any matter arising out of the RTKL related to this Contract, it shall notify the Contractor using the legal contact information provided in this Contract. The Contractor, at any time, may designate a different contact for such purpose upon reasonable prior written notice to the Commonwealth.

(c) Upon written notification from the Commonwealth that it requires the Contractor's assistance in responding to a request under the RTKL for information related to this Contract that may be in the Contractor's possession, constituting, or alleged to constitute, a public record in accordance with the RTKL ("Requested Information"), the Contractor shall:

(1) Provide the Commonwealth, within ten (10) calendar days after receipt of written notification, access to, and copies of, any document or information in the Contractor's possession arising out of this Contract that the

Commonwealth reasonably believes is Requested Information and may be a public record under the RTKL; and

(2) Provide such other assistance as the Commonwealth may reasonably request, in order to comply with the RTKL with respect to this Contract.

(d) If the Contractor considers the Requested Information to include a request for a Trade Secret or Confidential Proprietary Information, as those terms are defined by the RTKL, or other information that the Contractor considers exempt from production under the RTKL, the Contractor must notify the Commonwealth and provide, within seven (7) calendar days of receiving the written notification, a written statement signed by a representative of the Contractor explaining why the requested material is exempt from public disclosure under the RTKL.

(e) The Commonwealth will rely upon the written statement from the Contractor in denying a RTKL request for the Requested Information unless the Commonwealth determines that the Requested Information is clearly not protected from disclosure under the RTKL. Should the Commonwealth determine that the Requested Information is clearly not exempt from disclosure, the Contractor shall provide the Requested Information within five (5) business days of receipt of written notification of the Commonwealth's determination.

(f) If the Contractor fails to provide the Requested Information within the time period required by these provisions, the Contractor shall indemnify and hold the Commonwealth harmless for any damages, penalties, costs, detriment or harm that the Commonwealth may incur as a result of the Contractor's failure, including any statutory damages assessed against the Commonwealth.

Comment [A110]: Contractor proposes limiting the indemnity obligation to just government fines and penalties assessed against the Commonwealth and capping this indemnity obligation

(g) The Commonwealth will reimburse the Contractor for any costs associated with complying with these provisions only to the extent allowed under the fee schedule established by the Office of Open Records or as otherwise provided by the RTKL if the fee schedule is inapplicable.

(h) The Contractor may file a legal challenge to any Commonwealth decision to release a record to the public with the Office of Open Records, or in the Pennsylvania Courts, however, the Contractor shall indemnify the Commonwealth for any legal expenses incurred by the Commonwealth as a result of such a challenge and shall hold the Commonwealth harmless for any damages, penalties, costs, detriment or harm that the Commonwealth may incur as a result of the Contractor's failure, including any statutory damages assessed against the Commonwealth, regardless of the outcome of such legal challenge. As between the parties, the Contractor agrees to waive all rights or remedies that may be available to it as a result of the Commonwealth's disclosure of Requested Information pursuant to the RTKL.

Comment [A111]: Contractor proposes the deletion of subsection (h) as it is inappropriate to indemnify Commonwealth in the event Contractor challenge a disclosure by Commonwealth under the RTKL, even if Contractor wins the challenge; nor is it reasonable to waive all Contractor rights from any disclosure by Commonwealth under the RTKL

(i) The Contractor's duties relating to the RTKL are continuing duties that survive the expiration of this Contract and shall continue as long as the Contractor has Requested Information in its possession.

57. ENVIRONMENTAL PROTECTION

In carrying out this Contract, the Contractor shall minimize pollution and shall strictly comply with all applicable environmental laws and regulations, including the *Clean Streams Law*, Act of June 22, 1937, as amended; the *Pennsylvania Solid Waste Management Act*, Act of July 7, 1980 (P.L. 380, No. 97), as amended; and the *Dam Safety and Encroachment Act*, Act of November 26, 1978 (P.L. 1375, No. 325), as amended.

58. ASSIGNABILITY

a) This Contract may not be assigned by Contractor, either in whole or in part without the prior written consent of the Commonwealth, which consent shall not be unreasonably withheld, conditioned, or delayed. Transfer of the majority of the stock or the majority of the assets of a corporation, or other change of ownership will be deemed an assignment. In the event that Contractor requests the right to assign this Contract, including an assignment to an affiliate or subsidiary, Contractor will provide the Commonwealth with copies of the following documents (to the extent they exist): most recent audited financial statements and such other documents as Commonwealth reasonably deems necessary. Within thirty (30) days of such notice, the Commonwealth shall provide its written decision regarding the requested assignment.

b) Subject to the terms and conditions of this *Section 58* (Assignability), the Contract is binding upon the parties and their respective successors and assigns.

c) Any assignment consented to by the Commonwealth shall be evidenced by a written assignment agreement executed by the Contractor and its assignee in which the assignee agrees to be legally bound by all of the terms and conditions of the Contract and to assume the duties, obligations, and responsibilities being assigned. In addition, the assignee must execute a contract with the Commonwealth in the same form as this Contract.

d) Notwithstanding the foregoing, the Contractor may, without the consent of the Commonwealth, assign its rights to payment to be received under the Contract, provided that the Contractor provides written notice of such assignment to the Commonwealth together with a written acknowledgement from the assignee that any such payments are subject to all of the terms and conditions of the Contract.

e) A change of name by the Contractor, following which the Contractor's federal identification number remains unchanged, is not considered to be an assignment. The Contractor shall give the Commonwealth written notice of any such change of name.

59. INDEPENDENT CAPACITY OF CONTRACTOR

a) The parties to this Contract agree that the Services performed by the Contractor under the terms of this Contract are performed as an independent contractor and nothing contained in this Contract shall be construed to make either Contractor or Commonwealth partners, joint venturers, principals, agents or employees of the other, except only to the extent that Contractor is expressly appointed under the Contract to act as the agent of Commonwealth and, in those cases, only to the limited extent of such express appointment. No officer, director, employee, agent, affiliate or contractor retained by Contractor to perform work on Commonwealth's behalf hereunder shall be deemed to be an employee, agent or contractor of Commonwealth. Neither party shall have any right, power or authority, express or implied, to bind the other. As between Contractor and Commonwealth, Contractor is solely responsible for payment of all income, disability, withholding and other employment taxes, and all medical benefit premiums, vacation pay, sick pay and other fringe benefits resulting from Contractor's retention of any such officers, directors, employees, agents or contractors.

b) Except as otherwise provided by the terms of this Contract, the Commonwealth shall have no control over the manner in which the contractual Services are performed by the Contractor, or any subcontractor. Any job specifications or standards of work attached to or incorporated into this Contract or any subcontracting restrictions contained in this Contract shall not be construed as the Commonwealth's direction or control over the manner of the performance of Services provided by the Contractor.

60. THIRD PARTY BENEFICIARIES

Each party intends that this Contract shall not benefit, or create any right or cause of action in or on behalf of, any person or entity other than Commonwealth and Contractor.

61. CERTIFICATION REGARDING SUSPENSION

Contractor certificates that it is not currently under suspension or debarment by Commonwealth, any other state, or the Federal government.

62. SUSPENSION OF SUBCONTRACTORS

If Contractor enters into any subcontracts or employs under this Contract any subcontractor's individuals who are currently suspended or debarred by Commonwealth

or the Federal government or who become suspended or debarred by Commonwealth or the Federal government during the term of this Contract or any extensions or renewals thereof, Commonwealth shall have the right to require Contractor to terminate such subcontracts or employment.

63. ASSIGNMENT OF RIGHTS UNDER THE ANTITRUST LAWS

It is recognized that in actual economic practice, overcharges by Contractor's suppliers resulting from violations of state and federal antitrust laws are in fact borne by the Commonwealth. As part of the consideration for the award of this Contract, and intending to be legally bound, the Contractor assigns to the Commonwealth all rights, title, and interest in and to any claims Contractor now has or may hereafter acquire under state and federal antitrust laws relating to the goods and services which are provided by the Contractor under this Contract.

64. SIGNIFICANT EVENTS

Commonwealth requires the right to adjust the scope or volume of Services to be provided in response to an event, or series of events taken together, that have or will have a significant and sustained impact on Commonwealth's demand for the Services, and requires Contractor to equitably adjust the price for the Services to reflect any such changes to the scope or volume of the Services.

Comment [A112]: Contractor requests additional discussion on the "adjust the scope or volume of Services" as minimum requirement is not an unusual practice in industry and allows for best competitive pricing

65. FORCE MAJEURE

No failure or delay by Contractor in the performance of its obligations pursuant to this Contract shall be deemed a default of this Contract or a ground for termination hereunder (except as provided in this Section 65 (Force Majeure) to the extent such failure or delay is due to a Force Majeure Event and such Force Majeure Event could not have been prevented by Contractor's reasonable precautions or efforts to mitigate damage. The occurrence of a Force Majeure Event does not limit or otherwise affect Contractor's obligation to provide normal recovery procedures and any disaster recovery services described in Section 15 (Disaster Recovery and Business Continuity) to the extent such obligations are not directly precluded by the occurrence of that Force Majeure Event. The occurrence of a Force Majeure Event in respect of another customer of Contractor does not constitute a Force Majeure Event under this Contract, except to the extent such customer and Commonwealth experience the same Force Majeure Event at a site shared by Commonwealth and such other customer. The party delayed by a Force Majeure Event shall immediately orally notify the other party (to be confirmed in a written notice within three (3) business days after the inception of such delay) of the occurrence of a Force Majeure Event and describe in reasonable detail the nature of the Force Majeure Event. From and after becoming aware of a Force Majeure Event, the party delayed thereby shall undertake all commercially reasonable measures (including the use of alternative sources for products and services and workaround plans) to mitigate the impact and duration of the Force Majeure Event, and such party shall consistently and diligently prosecute such measures until the Force Majeure Event is relieved. If

Contractor does not fulfill its obligations under the immediately preceding sentence and, as a result thereof, such Force Majeure Event precludes Contractor from delivering the Services for more than forty five (45) days, Commonwealth may terminate this Contract for cause under Section 32(c), but without regard to any additional cure periods provided for therein. In any other case in which a Force Majeure Event precludes Contractor from delivering the Services for more than forty-five (45) days (without consideration of any such Services performed from a business recovery center under Section 15 (Disaster Recovery and Business Continuity)), Commonwealth may terminate this Contract for convenience under Section 32(a), but without regard to any notice period or additional cure periods provided for therein. In the event of a Force Majeure Event, Contractor shall not increase the Fees under this Contract or charge Commonwealth usage fees in addition to the Fees except for applicable disaster recovery declaration and usage fees in accordance with the provisions of Section 15 (Disaster Recovery and Business Continuity).

Comment [A113]: Contractor proposes to reference only critical services within this section (for example, those covered by Disaster Recovery) Commonwealth can terminate the Contract but not via section 32 (c) Commonwealth can terminate via section 32 (a) with a reduced termination fee

66. CONFLICT OF INTEREST

Contractor, by signing this Contract, covenants that it has no undisclosed public or private interest, direct or indirect, and shall not acquire directly or indirectly any such interest, and that Contractor has no association, direct or indirect, which interest or association does or may conflict in any manner with the performance of the Services or any other obligations of Contractor under this Contract. Any such conflicts shall be disclosed to Commonwealth, and Commonwealth shall determine whether such conflict is cause for termination of this Contract. Contractor further covenants that, in the performance of this Contract, no person having such interest shall be employed by or associated with Contractor.

67. OFFICIALS NOT TO BENEFIT

No official or employee of the Commonwealth and no member of its General Assembly who exercises any functions or responsibilities under this Contract shall participate in any decision relating to this Contract which affects their personal interest or the interest of any corporation, partnership, or association in which they are, directly or indirectly, interested; nor shall any such official or employee of the Commonwealth or member of its General Assembly have any interest, direct or indirect, in this Contract or the proceeds thereof.

68. CONSENTS, APPROVALS, NOTICES AND REQUESTS

Unless otherwise specified in this Contract, all consents, approvals, notices and requests, acceptances or similar actions to be given by either party under this Contract shall not be unreasonably withheld, delayed or conditioned and each party shall make only reasonable requests under this Contract.

69. REQUIRED CONSENTS

The Commonwealth, with reasonable assistance at no additional cost by Contractor and its agents shall obtain all consents, approvals, authorizations, notices, requests and acknowledgements necessary to allow Contractor to use the Commonwealth Software, the Commonwealth Machines and the services under Commonwealth's third party service contracts, all to the extent necessary to enable Contractor to provide the Services to Commonwealth. Commonwealth shall be responsible for all costs and expenses imposed by third parties in connection with obtaining any such consents. Contractor shall obtain all consents, approvals, authorizations, notices, requests and acknowledgements necessary to allow (1) Contractor to use the Contractor Software, the Developed Software and the Contractor Machines to provide the Services to Commonwealth, and (2) Commonwealth to use the Contractor Software in accordance with the terms of this Contract upon the expiration or termination for any reason of Contractor's obligation to provide the Services or of this Contract. Contractor shall be responsible for all costs and expenses imposed by a third party in connection with any such consents described in the foregoing clause (1). Commonwealth's costs and expenses under the foregoing clause (2) shall be governed by the terms of *Section 40(b).02*. Each party shall cooperate with and assist the other party in obtaining the consents contemplated in this *Section 69* (Required Consents).

70. REQUIREMENTS FOR INFORMATION IN LEGAL PROCEEDINGS

a) If the Commonwealth notifies Contractor, or Contractor is otherwise aware, that particular Commonwealth Confidential Information may be within attorney-client or work-product privileges of the Commonwealth, then regardless of any applicable exclusions, Contractor (i) shall not disclose such the Confidential Information or take any other action that would result in waiver of such privileges and (ii) shall instruct all Contractor Personnel who may have access to such communications to maintain privileged material as strictly confidential and otherwise protect the Commonwealth privileges.

b) To the extent requested by the Commonwealth, Contractor shall comply with the Commonwealth's litigation response plan, including policies and procedures to prepare for and respond to discovery requests, subpoenas, investigatory demands, and other requirements for information related to legal and regulatory proceedings, as such plan may be revised from time to time, including preparing for and complying with requirements for preservation and production of data in connection with legal and regulatory proceedings and government investigations. Upon receipt of any request, demand, notice, subpoena, order or other legal information request relating to legal proceedings or investigations by third parties relating to any Materials, the Confidential Information or related Systems in Contractor possession, Contractor shall immediately notify the Commonwealth and provide the Commonwealth with a copy of all documentation of such legal information request, to the extent Contractor legally may do so and shall cooperate with the Commonwealth in responding to such request, demand, notice, subpoena, order or other legal information request.

c) Contractor 's cost of complying with this section shall be at no additional charge to the Commonwealth.

Comment [A114]: Proposed Contractors compliance should be limited to reasonable assistance utilizing existing resources If additional resources are required, it is subject to Change Control procedures

71. EXAMINATION OF RECORDS

The Commonwealth may, at reasonable times and places, audit the books and records of Contractor or its subcontractors to the extent that the books and records relate to the performance of the contract. Contractor shall maintain books and records related to the Contract for a period of three years from the date of final payment under the Contract. Contractor shall include a requirement in agreements with subcontractors that requires the subcontractor to maintain its records for the same length of time.

72. SURVIVAL

Sections 4, 33, 35, 36, 37, 38, 38, 40, 41, 47, 48, 49, 52, 53, 72 shall survive the expiration or termination of the Contract.

73. SEVERABILITY

If any provision of this Contract is held by a court of competent jurisdiction to be contrary to law, then the remaining provisions of this Contract or the application of such provision to persons or circumstances other than those as to which it is invalid or unenforceable shall not be affected thereby, and each such provision of this Contract shall be valid and enforceable to the extent permitted by law.

74. WAIVER

No delay or omission by either party to exercise any right or power it has under this Contract shall impair or be construed as a waiver of such right or power. A waiver by any party of any breach or covenant shall not be construed to be a waiver of any succeeding breach or any other covenant. All waivers must be in writing and signed by the party waiving its rights.

75. PERIOD OF PERFORMANCE

The Contractor, for the life of this Contract, shall complete all Services as specified under the terms of this Contract. In no event shall the Commonwealth be responsible or liable to pay for any Services provided by the Contractor prior to the Effective Date, and the Contractor hereby waives any claim or cause of action for any such Services.

76. SPECIAL REQUIREMENTS

Comment [A115]: Contractor request clarification of this section

The Commonwealth reserves the right to purchase Services covered under this Contract through other procurement methods whenever the Commonwealth deems it to be in its best interest.

77. GOVERNING LAW

This Contract shall be interpreted in accordance with and governed by the laws of the Commonwealth of Pennsylvania, without giving effect to its conflicts of law provisions. Except as set forth in *Section 34* (Contract Controversies), Commonwealth and Contractor agree that the courts of the Commonwealth of Pennsylvania and the federal courts of the Middle District of Pennsylvania shall have exclusive jurisdiction over disputes under this Contract and the resolution thereof. Any legal action relating to this Contract must be brought in Dauphin County, Pennsylvania, and the parties agree that jurisdiction and venue in such courts is appropriate.

78. COMPLIANCE WITH LAWS

a) The Contractor shall comply with all federal, state, and local laws applicable to its work, including, but not limited to, all statutes, regulations and rules that are in effect as of the Effective Date of the Contract and shall procure at its expense all licenses and all permits necessary for the fulfillment of its obligation.

b) If any existing law, regulation or policy is changed or if any new law, regulation or policy is enacted that affects the Services provided under this Contract, the parties to the Contract shall modify this Contract, via *Section 27* (Change Control), to the extent reasonably necessary to:

(1) Ensure that such Services will be in full compliance with such laws, regulations and/or policies; and

(2) Modify the rates applicable to such Services; and

(3) Address any schedule impacts.

Comment [A116]: Contractor proposes to differentiate between Contractor Laws (those applicable to provider of IT services) and Commonwealth Laws

79. SMALL DIVERSE BUSINESS COMMITMENT

Contractor shall meet and maintain the commitments to small diverse businesses in the Small Diverse Business ("SDB") portion of its Proposal. Any proposed change to a SDB commitment must be submitted to the DGS Bureau of Small Business Opportunities ("BSBO"), which will make a recommendation as to a course of action to the Commonwealth Contracting Officer. Contractor shall complete the Prime Contractor's Quarterly Utilization Report and submit it to the Commonwealth Contracting Officer and BSBO within ten (10) workdays at the end of each calendar quarter that the Contract is in effect.

80. ACKNOWLEDGEMENT

Commonwealth and Contractor each acknowledge that the limitations and exclusions contained in this Contract have been the subject of active and complete negotiation between the parties and represent the parties' Contract based upon the level of risk to

Commonwealth and Contractor associated with their respective obligations under this Contract and the payments to be made to Contractor and credits to be issued to, and Services to be provided to, Commonwealth pursuant to this Contract. The parties agree that the terms and conditions of this Contract shall not be construed in favor of or against any party by reason of the extent to which any party or its professional advisors participated in the preparation of this Contract.

81. COVENANT OF FURTHER ASSURANCES

Commonwealth and Contractor covenant and agree that, subsequent to the execution and delivery of this Contract and without any additional consideration, each of Commonwealth and Contractor will execute and deliver any further legal instruments and perform any commercially reasonable acts which are or may become necessary to effectuate the purposes of this Contract.

82. COVENANT OF GOOD FAITH

Each Party agrees that, in its respective dealings with the other Party under or in connection with this Contract, it shall act in good faith.

83. AMENDMENTS

No amendment to, or change, waiver, or discharge of, any provision of this Contract shall be valid unless in writing and signed by an authorized representative of the party against which such amendment, change, waiver or discharge is sought to be enforced.

84. ENTIRE CONTRACT

This Contract is the entire Contract between the parties with respect to its subject matter, and there are no other representations, understandings or Contracts between the parties relative to such subject matter

APPENDIX A - BUSINESS ASSOCIATE APPENDIX LANGUAGE

COMMONWEALTH OF PENNSYLVANIA
BUSINESS ASSOCIATE AGREEMENT

WHEREAS, the ***[name of program and/or Department]*** (Covered Entity) and Contractor (Business Associate) intend to protect the privacy and security of certain Protected Health Information (PHI) to which Business Associate may have access in order to provide goods or services to or on behalf of Covered Entity, in accordance with the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191 (HIPAA), the Health Information Technology for Economic and Clinical Health (HITECH) Act, Title XIII of Division A and Title IV of Division B of the American Recovery and Reinvestment Act of 2009 (ARRA), Pub. L. No. 111-5 (Feb. 17, 2009), the HIPAA Privacy Rule (Privacy Rule), 45 C.F.R. Parts 160 and 164, and the HIPAA Security Rule (Security Rule), 45 C.F.R. Parts 160, 162 and 164, and all other applicable laws; and

WHEREAS, Business Associate may receive PHI from Covered Entity, or may create or obtain PHI from other parties for use on behalf of Covered Entity, which PHI can be used or disclosed only in accordance with this Agreement and the standards established by applicable laws; and

WHEREAS, Business Associate may receive PHI from Covered Entity, or may create or obtain PHI from other parties for use on behalf of Covered Entity that is in electronic form, which PHI must be handled in accordance with this Agreement and the standards established by HIPAA and the Security Rule and other applicable laws; and

NOW, THEREFORE, the parties to this Agreement set forth the following as the terms and conditions of their understanding.

1. Definitions.

a) "Breach" shall have the meaning assigned to such term at 42 USCS § 17921 and HIPAA regulations at 45 C.F.R. § 164.402.

b) "Business Associate" shall have the meaning given to such term under the Privacy and Security Rules, including but not limited to, 45 C.F.R. §160.103.

c) "Covered Entity" shall have the meaning given to such term under the Privacy and Security Rules, including, but not limited to, 45 C.F.R. §160.103.

d) "HIPAA" shall mean the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191.

e) "Privacy Rule" shall mean the standards for privacy of individually identifiable health information in 45 C.F.R. Parts 160 and 164.

f) "Protected Health Information" or "PHI" shall have the meaning given to such term under HIPAA and the HIPAA Regulations in 45 C.F.R. Parts 160, 162 and 164, including, but not limited to 45 C.F.R. §160.103.

g) "Security Rule" shall mean the security standards in 45 C.F.R. Parts 160, 162 and 164.

Comment [A117]: Contractor will comply with all federal or state laws applicable to its use or disclosure of information that constitutes personal health information (PHI) as defined by the Health Insurance Portability and Accountability Act (H PAA), the Health Information Technology for Economic and Clinical Health (HITECH) Act, Title XIII of Division A and Title IV of Division B of the American Recovery and Reinvestment Act of 2009 (ARRA), Pub. L. No. 111-5 (Feb. 17, 2009), the H PAA Privacy Rule (Privacy Rule), 45 C F.R. Parts 160 and 164, and the H PAA Security Rule (Security Rule), 45 C F.R. Parts 160, 162 and 164. Contractor understands that, as part of its Contract with the Commonwealth, that it will be required to agree to terms and conditions of a Business Associate Agreement. Contractor has reviewed the Commonwealth's terms Appendix A of the Contract Terms and Conditions, and believes some aspects of the terms require discussion and clarification between the parties so that provisions are consistent with and don't extend beyond the requirements of the applicable privacy laws, and believes some of the provisions need adjustment so that they are appropriate to the nature and extent of the Provider's access to personal health information and individual record sets. Contractor proposes to discuss these concerns and negotiate certain clarifications in the terms of this section upon award

h) Terms used, but not otherwise defined, in this Agreement shall have the same meaning as those terms in the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191 (HIPAA), the Health Information Technology for Economic and Clinical Health (HITECH) Act, Title XIII of Division A and Title IV of Division B of the American Recovery and Reinvestment Act of 2009 (ARRA), Pub. L. No. 111-5 (Feb. 17, 2009), the HIPAA Privacy Rule (Privacy Rule), 45 C.F.R. Parts 160 and 164, and the HIPAA Security Rule (Security Rule), 45 C.F.R. Parts 160, 162 and 164.

2. Stated Purposes For Which Business Associate May Use Or Disclose PHI. The Parties hereby agree that Business Associate shall be permitted to use and/or disclose PHI provided by or obtained on behalf of Covered Entity for purposes state in Attachment 1 , except as otherwise stated in this Agreement.

NO OTHER USES OR DISCLOSURES OF PHI ARE PERMITTED.

3. BUSINESS ASSOCIATE OBLIGATIONS:

i) Security and Privacy Provisions Applicable to Business Associate. Business Associate shall abide by the security and privacy provisions applicable to Covered Entities which are made applicable to the Business Associate by 42 USCS § 17931 and 17934.

j) Limits On Use And Further Disclosure Established By Agreement And Law. Business Associate hereby agrees that the PHI provided by, or created or obtained on behalf of Covered Entity shall not be further used or disclosed other than as permitted or required by this Agreement or as Required by Law.

k) Appropriate Safeguards. Business Associate shall establish and maintain appropriate safeguards to prevent any use or disclosure of PHI other than as provided for by this Agreement. Appropriate safeguards shall include implementing administrative, physical, and technical safeguards that reasonably and appropriately protect the confidentiality, integrity, and availability of the electronic PHI that is created, received, maintained, or transmitted on behalf of the Covered Entity.

l) Reports Of Improper Use Or Disclosure. Business Associate hereby agrees that it shall report to the Covered Entity's Privacy Officer, or his designee**,** and the Covered entity's legal office, within two (2) days of discovery any Breach or use or disclosure of PHI not provided for or allowed by this Agreement (unless some more stringent standard applies under this Agreement). Business Associate agrees to conduct reasonable diligence to discover improper use or disclosure of PHI.

.

Such notification shall be written and shall include the identification of each individual whose unsecured PHI has been, or is reasonably believed by the Business Associate to have been, accessed, acquired, or disclosed during the improper use or disclosure or Breach. An improper use or disclosure or Breach shall be treated as discovered by the Business Associate on the first day on which it is known to the Business Associate (including any person other than the person committing the Breach, that is an employee, officer, or other agent of the Business Associate) or should reasonably have been known to the Business Associate (or such person) to have occurred.

d) Reports Of Security Incidents. In addition to following the Breach notification requirements in section 13402 of the HITECH Act and related regulations and guidance, Business Associate shall report to Covered Entity's Privacy Officer, or his designee, within two (2) days of discovery any Security Incident of which it becomes aware.

e) Subcontractors And Agents. Business Associate hereby agrees that any time PHI is provided or made available to any subcontractors or agents, Business Associate shall provide only the minimum necessary PHI for the purpose of the covered transaction and shall first enter into a subcontract or contract with the subcontractor or agent that contains the same terms, conditions and restrictions on the use and disclosure of PHI as contained in this Agreement.

f) Right Of Access To PHI. Business Associate hereby agrees to allow an individual who is the subject of PHI maintained in a designated record set, to have access to and copy that individual's PHI within five (5) business days of receiving a written request from the Covered Entity or individual. Business Associate shall provide PHI in the format requested, unless it cannot readily be produced in such format, in which case it shall be provided in standard hard copy. If any individual requests from Business Associate or its agents or subcontractors access to PHI, Business Associate shall notify Covered Entity of same within two (2) business days. Business associate shall further conform with and meet all of the requirements of 45 C.F.R. §164.524, 42 USCS § 17936(e), and other applicable laws.

g) Amendment And Incorporation Of Amendments. Within five (5) business days of receiving a request from Covered Entity for an amendment of PHI maintained in a designated record set, Business Associate shall make the PHI available and incorporate the amendment to enable Covered Entity to comply with 45 C.F.R. §164.526 and other applicable laws. If any individual requests an amendment from Business Associate or its agents or subcontractors, Business Associate shall notify Covered Entity within five (5) business days.

h) Provide Accounting Of Disclosures. Business Associate agrees to maintain a record of all disclosures of PHI in accordance with 45 C.F.R. §164.528, 42 USCS § 17935(c), and other applicable laws. Such records shall include, for each disclosure, the date of the disclosure, the name and address of the recipient of the PHI, a description of the PHI disclosed, the name of the individual who is the subject of the PHI disclosed, the purpose of the disclosure, and shall include disclosures made on or after the date that is six (6) years prior to the request or April 14, 2003, whichever is later. Business Associate shall make such record available to the individual or the Covered Entity within five (5) business days of a request for an accounting of disclosures, or within such other time as may be dictated by applicable law.

i) Access To Books And Records. Business Associate hereby agrees to make its internal practices, books, and records relating to the use or disclosure of PHI received from, or created or received by Business Associate on behalf of the Covered Entity, available to the Secretary of Health and Human Services or designee for purposes of determining compliance with the HIPAA Privacy Regulations.

j) Return Or Destruction Of PHI. At termination of this Agreement, Business Associate hereby agrees to return or destroy all PHI provided by or obtained on behalf of Covered Entity. Business Associate agrees not to retain any copies of the PHI after termination of

this Agreement. If return or destruction of the PHI is not feasible, Business Associate agrees to extend the protections of this Agreement to limit any further use or disclosure until such time as the PHI may be returned or destroyed. If Business Associate elects to destroy the PHI, it shall certify to Covered Entity that the PHI has been destroyed.

k) Maintenance of PHI. Notwithstanding Section 5(j) of this Agreement, Business Associate and its subcontractors or agents shall retain all PHI throughout the term of the Agreement and shall continue to maintain the information required under §5(h) of this Agreement for a period of six (6) years after termination of the Agreement, unless Covered Entity and Business Associate agree otherwise.

l) Mitigation Procedures. Business Associate agrees to establish and to provide to Covered Entity upon request, procedures for mitigating, to the maximum extent practicable, any harmful effect from the use or disclosure of PHI in a manner contrary to this Agreement or the Privacy Rule. Business Associate further agrees to mitigate any harmful effect that is known to Business Associate of a use or disclosure of PHI by Business Associate in violation of this Agreement or the Privacy Rule.

m) Training. Business Associate will train all members of its workforce on its policies and procedures with respect to PHI as necessary and appropriate for the workforce members to carry out the functions required by this contract.

n) Sanction Procedures. Business Associate agrees that it shall develop and implement a system of sanctions for any employee, subcontractor or agent who violates this Agreement or other applicable laws.

o) Grounds For Breach by Covered Entity. Upon Business Associate's knowledge of a material breach by Commonwealth of this Business Associate Agreement, Business Associate shall notify Commonwealth of such breach and Commonwealth shall have at least thirty (30) days to cure such breach. In the event Commonwealth does not cure the breach~~,~~ Business Associate shall have the right to report the violation to the Secretary. Notwithstanding any other language in this Agreement, the parties agree that termination by the Business Associate is infeasible.

p) Grounds For Breach. Any non-compliance by Business Associate with this Agreement or the Privacy or Security Rules will automatically be considered to be a breach of the Agreement, if Business Associate knew or reasonably should have known of such non-compliance and failed to immediately take reasonable steps to cure the non-compliance. Business Associate shall have thirty (30) days to cure such breach from the date of notice to cure by the Commonwealth. In the event Business Associate does not cure the breach, the Commonwealth shall have the right to immediately terminate this Agreement and the underlying agreement. If termination is infeasible, the Commonwealth shall report the violation to the Secretary.

q) Termination by Commonwealth. Business Associate authorizes termination of this Agreement by the Commonwealth if the Commonwealth determines, in its sole discretion, that the Business Associate has violated a material term of this Agreement.

r) Failure to Perform Obligations. In the event Business Associate fails to perform its obligations under this Agreement, Covered Entity may immediately discontinue providing PHI to Business Associate. Covered Entity may also, at its option, require

Business Associate to submit to a plan of compliance, including monitoring by Covered Entity and reporting by Business Associate, as Covered Entity in its sole discretion determines to be necessary to maintain compliance with this Agreement and applicable law.

s) Privacy Practices. The Department will provide and Business Associate shall immediately begin using any applicable form, including but not limited to, any form used for Notice of Privacy Practices, Accounting for Disclosures, or Authorization, upon the effective date designated by the Program or Department. The Department retains the right to change the applicable privacy practices, documents and forms. The Business Associate shall implement changes as soon as practicable, but not later than 45 days from the date of notice of the change.

4. OBLIGATIONS OF COVERED ENTITY:

a) Provision of Notice of Privacy Practices. Covered Entity shall provide Business Associate with the notice of privacy practices that the Covered Entity produces in accordance with applicable laws, as well as changes to such notice.

b) Permissions. Covered Entity shall provide Business Associate with any changes in, or revocation of, permission by individual to use or disclose PHI of which Covered Entity is aware, if such changes affect Business Associate's permitted or required uses and disclosures.

c) Restrictions. Covered Entity shall notify Business Associate of any restriction to the use or disclosure of PHI that the Covered Entity has agreed to in accordance with 45 C.F.R. §164.522 and other applicable laws, to the extent that such restriction may affect Business Associate's use or disclosure of PHI.

5. MISCELLANEOUS:

a) Regulatory References. A reference in this Appendix to a section in the Privacy or Security Rules means the section as in effect or as amended as reasonably determined by the Covered Entity.

b) Amendment. The Parties agree to take such action as is necessary to amend this Appendix from time to time as is necessary for the Covered Entity to comply with the requirements of the Privacy and Security Rules and the Health Insurance Portability and Accountability Act of 1996, Pub. L. No. 104-191.

c) Survival. The respective rights and obligations of Business Associate under section 5(i) of this Appendix shall survive the termination of the Agreement.

d) Interpretation. Any ambiguity in this Appendix shall be resolved to permit Covered Entity to comply with the Privacy and Security Rules as reasonably determined by the Covered Entity.

e) Changes in Law. Business Associate shall comply with all applicable privacy and security rules and regulations, including but not limited to HIPAA regulations and the HITECH Act and HITECH regulations which are now in effect or which take effect during the term of this contract.

9.0 Required Forms

9. REQUIRED FORMS 9-3

9.1 DOMESTIC WORKFORCE UTILIZATION CERTIFICATION (RFP APPENDIX D) 9-5
9.2 COSTARS PROGRAM ELECTION TO PARTICIPATE (RFP APPENDIX E) 9-7
9.3 TRADE SECRET FORM (RFP APPENDIX G) 9-9
9.4 LOBBYING CERTIFICATION AND DISCLOSURE OF LOBBYING ACTIVITIES (RFP APPENDIX H) 9-11

This page intentionally left blank.

9. Required Forms

Unisys includes the following forms:

- Domestic Workforce Utilization Certification (RFP Appendix D)
- Costars Program Election To Participate (RFP Appendix E)
- Trade Secret Form (RFP Appendix G)
- Lobbying Certification And Disclosure Of Lobbying Activities (RFP Appendix H).

This page intentionally left blank.

9.1 Domestic Workforce Utilization Certification (RFP Appendix D)

RFP	*Requirement*
II-11	*Domestic Workforce Utilization Certification. Complete and sign the Domestic Workforce Utilization Certification contained in Appendix D of this RFP. Offerors who seek consideration for this criterion must submit in hardcopy the signed Domestic Workforce Utilization Certification Form in the same sealed envelope with the Technical Submittal.*

This page intentionally left blank.

9.2 Costars Program Election to Participate (RFP Appendix E)

RFP	*Requirement*
II-12	*COSTARS Program Election to Participate. Offerors electing to permit COSTARS members to participate in this Contract should complete and sign the COSTARS Program Election to Participate form contained in Appendix E of this RFP. If the Offeror is asserting that it is a Department of General Services Certified Small Business, also provide an active Department of General Services Small Business Certification. Submit the form and the certification, as applicable, in the same sealed envelope with the Technical Submittal only if the Offeror elects to participate in the program.*

Unisys has indicated in our proposal submission that we are not participating in the COSTARS program for this Commonwealth procurement. Unisys would be interested in discussing and possibly revisiting this decision later during the procurement process.

This page intentionally left blank.

9.3 Trade Secret Form (RFP Appendix G)

This page intentionally left blank.

9.4 Lobbying Certification and Disclosure of Lobbying Activities (RFP Appendix H)

RFP	*Requirement*
II-13	*This Project may be funded, in whole or in part, with federal monies. Public Law 101-121, Section 319, prohibits federal funds from being expended by the recipient or by any lower tier sub-recipients of a federal contract, grant, loan, or a cooperative agreement to pay any person for influencing, or attempting to influence a federal agency or Congress in connection with the awarding of any federal contract, the making of any federal grant or loan, or entering into any cooperative agreement. Offerors who submit proposals in response to this RFP must sign the "Lobbying Certification Form," (attached as Appendix H) and, if applicable, complete the "Disclosure of Lobbying Activities" form available at: http://www.whitehouse.gov/omb/assets/omb/grants/sfllin.pdf.*

Trade Secret/Confidential Proprietary Information Notice

Instructions:

The Commonwealth may not assert on behalf of a third party an exception to the public release of materials that contain trade secrets or confidential proprietary information unless the materials are accompanied, at the time they are submitted, by this form or a document containing similar information.

It is the responsibility of the party submitting this form to ensure that all statements and assertions made below are legally defensible and accurate. The Commonwealth will not provide a submitting party any advice with regard to trade secret law.

Name of submitting party:

Contact information for submitting party:

Unisys Corporation
Attention : Mr [redacted]
4750 Lindle Road, Suite 301
Harrisburg, PA 17111
Telephone: (717) 526-1267
E-Mail: [redacted]

Please provide a brief overview of the materials that you are submitting (e.g. bid proposal, grant application, technical schematics):

Request for Proposal - Data Center Computing Services

Please provide a brief explanation of why the materials are being submitted to the Commonwealth (e.g. response to bid #12345, application for grant XYZ being offered by the Department of Health, documents required to be submitted under law ABC)

Response to Request for Proposal #6100022698

Please provide a list detailing which portions of the material being submitted you believe constitute a trade secret or confidential proprietary information, and please provide an explanation of why you think those materials constitute a trade secret or confidential proprietary information. Also, please mark the submitted material in such a way to allow a reviewer to easily distinguish between the parts referenced below. (You may attach additional pages if needed)

Note: The following information will not be considered a trade secret or confidential proprietary information:

- Any information submitted as part of a vendor's cost proposal
- Information submitted as part of a vendor's technical response that does not pertain to specific business practices or product specification
- Information submitted as part of a vendor's technical or disadvantaged business response that is otherwise publicly available or otherwise easily obtained
- Information detailing the name, quantity, and price paid for any product or service being purchased by the Commonwealth

Page Number	Description	Explanation
Section 4.5.2	Contact Information for References	Private information that our clients do not want publicized.
Schedule J.3	SL20 and SL21 Description of Figures J-31 & J-33	Description references actual Commonwealth data and the Commonwealth may not want this to be known.
Schedule F, 3.2.2.3	Appendix to Item #2C	Actual DPH Capacity Planning Report that the Commonwealth may not want to provide.

Acknowledgment

The undersigned party hereby agrees that it has read and completed this form, and has marked the material being submitted in accordance with the instructions above. The undersigned party acknowledges that the Commonwealth is not liable for the use or disclosure of trade secret data or confidential proprietary information that has not been clearly marked as such, and which was not accompanied by a specific explanation included with this form.

The undersigned agrees to defend any action seeking release of the materials it believes to be trade secret or confidential, and indemnify and hold harmless the Commonwealth, its agents and employees, from any judgments awarded against the Commonwealth in favor of the party requesting the materials, and any and all costs connected with that defense. This indemnification survives so long as the Commonwealth has possession of the submitted material, and will apply to all costs unless and until the undersigned provides a written statement or similar notice to the Commonwealth stating that it no longer wishes to exempt the submitted material from public disclosure.

The undersigned acknowledges that the Commonwealth is required to keep all records for at least as long as specified in its published records retention schedule.

The undersigned acknowledges that the Commonwealth reserves the right to reject the undersigned's claim of trade secret/confidential proprietary information if the Commonwealth determines that the undersigned has not met the burden of establishing that the information constitutes a trade secret or is confidential. The undersigned also acknowledges that if only a certain part of the submitted material is found to constitute a trade secret or is confidential, the remainder of the submitted material will become public; only the protected information will be removed and remain nonpublic.

If being submitted electronically, the undersigned agrees that the mark below is a valid electronic signature.

DOMESTIC WORKFORCE UTILIZATION CERTIFICATE

DOMESTIC WORKFORCE UTILIZATION CERTIFICATION FOR MULTIPLE AWARD CONTRACTS (07/24/09)

To the extent permitted by the laws and treaties of the United States, this certification will be used by the Agency in making a best value selection for each particular assignment. Each quote will be evaluated for its commitment to use the domestic workforce in the fulfillment of the contract. Maximum consideration will be given to those suppliers who will perform the contracted direct labor exclusively within the geographical boundaries of the United States or within the geographical boundaries of a country that is a party to the World Trade Organization Government Procurement Agreement. Those who propose to perform a portion of the direct labor outside of the United States and not within the geographical boundaries of a party to the World Trade Organization Government Procurement Agreement will receive a correspondingly smaller score for this criterion. In order to be eligible for any consideration for this criterion, suppliers must complete and sign the following certification. This certification will be included as a contractual obligation when the contract is executed. Failure to complete and sign this certification will result in no consideration being given to the supplier for this criterion.

I, Reed Laughlin, Vice President of Unisys Corporation a Delaware corporation or other legal entity, ("Contractor") located at 801 Lakeview Drive, Blue Bell, PA 19422, having a Social Security or Federal Identification Number of [redacted] do hereby certify and represent to the Commonwealth of Pennsylvania ("Commonwealth") (Check **one** of the boxes below):

X All of the direct labor performed within the scope of services under the contract will be performed exclusively within the geographical boundaries of the United States or one of the following countries that is a party to the World Trade Organization Government Procurement Agreement: Aruba, Austria, Belgium, Bulgaria, Canada, Chinese Taipei, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hong Kong, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Latvia, Liechtenstein, Lithuania, Luxemburg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Singapore, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, and the United Kingdom

OR

_____ **percent (_____%) [Contractor must specify the percentage]** of the direct labor performed within the scope of services under the contract will be performed within the geographical boundaries of the United States or within the geographical boundaries of one of the countries listed above that is a party to the World Trade Organization Government Procurement Agreement. Please identify the direct labor performed under the contract that will be performed outside the United States and not within the geographical boundaries of a party to the World Trade Organization Government Procurement Agreement and identify the country where the direct labor will be performed:

_____

_____

[Use additional sheets if necessary]

The Department of General Services **[or other purchasing agency]** shall treat any misstatement as fraudulent concealment of the true facts punishable under Section 4904 of the *Pennsylvania Crimes Code*, Title 18, of Pa. Consolidated Statutes.

APPENDIX H

Lobbying Certification Form

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress , an officer or employee of Congress, or an employee of a member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.

(2) **If any** funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with this federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance is placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed under Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than **$100,000** for such failure.

10.1.5 Six Sigma Certifications / Assessments / Evaluations

Since 2005, Unisys has adopted the Six Sigma Lean methodology and embedded the methodologies and skills across our organization. For example, Six Sigma Lean methods and techniques underpin our Continual Service Improvement and Innovation Program (CSIIP) process and SEO. Our Root Cause Analysis methodologies (such as those for defect reduction) follow the Plan-Do-Check-Act (PDCA) Cycle and use Six Sigma Lean tools such as the fishbone diagram, graphical analysis, mistake-proofing, hypothesis testing, correlation/regression, value stream mapping, and Failure Mode and Effects Analysis (FMEA). Also, key leaders at the Unisys PMO are trained in Six Sigma Lean and, if appropriate, will have access to a Six Sigma Black Belt resource. Our Black Belts across the globe are trained as facilitators for collaborative events such as Kaizen and Innovation Workshops.

Unisys Six Sigma efforts focus on improving customer satisfaction, operational excellence, and overall efficiency of operations that reduce cost. We have a comprehensive Six Sigma Lean training curriculum with instructor-led and self-paced classes in topics such as Define, Measure, Analyze, Improve, and Control (DMAIC); statistical analysis; Lean thinking; Kaizen methods; and A3 problem-solving at the Yellow Belt, Green Belt, and Black Belt levels.

This page intentionally left blank.

10.1.6 ITIL Certifications / Assessments / Evaluations

IT Infrastructure Library (ITIL®) processes are well known as the de facto standard for service delivery and support in most IT organizations. Not only did Unisys implement these processes, but over the past few years we also developed procedures and work instructions that complement the ITIL v3 Framework. These procedures and instructions take a process from a best practice to a powerful daily tool used throughout our global delivery organization. The supporting tools are aligned, consolidated, and rationalized so that we can leverage the long history and legacy of service delivery with the process framework. The processes and procedures that we implement are Incident, Problem, Change, Release, Configuration, Request, and Asset Management. The global ITSM 7.6 toolset and all Service Delivery and Service Management functions support all processes.

IT Service Management practices guide our governance model, which fosters direct communications between our customers and Unisys at planned intervals, at various levels (from working to executive level) based on measurable and quantifiable targets.

Unisys Certifications

Certification and Standards	How they Apply at Unisys
ITIL V3	ITIL (the IT Infrastructure Library) is the most widely accepted approach to IT Service Management in the world. ITIL provides a cohesive set of best practices drawn from the public and private sectors worldwide. It is supported by a comprehensive qualifications program, accredited training organizations, and implementation and assessment tools. Best practice processes are promoted in ITIL support and supported by ISO 20000. Unisys is proud to be a truly global ITIL V3 compliant service provider—we can provide one global service delivery experience throughout all our Managed Services Centers and Data Centers. Fifty five Unisys resources dedicated to the Commonwealth are ITIL V3 certifications

CALENDAR OF EVENTS

The Commonwealth will make every effort to adhere to the following schedule:

Activity	Responsibility	Date
Enterprise Data Center (EDC) Tour and Exhibit Distribution	Issuing Office/Potential Offerors	12/12/12 and 12/13/12
Deadline to submit initial questions via email to RA-OITPurchases@state.pa.us.	Potential Offerors	12/21/12 by 1:00 PM EST
Pre-proposal Conference—Location. Forum 500 Walnut St. Harrisburg, PA 17101	Issuing Office/Potential Offerors	1/17/13 @ 9:00 AM EST
Deadline to submit second round questions via email to RA-OITPurchases@state.pa.us	Potential Offerors	2/1/13 by 1:00 PM EST
Answers to second round of questions posted to the DGS website **(**http://www.emarketplace.state.pa.us **)**.	Issuing Office	TBD
Deadline to submit third round questions via email to RA-OITPurchases@state.pa.us	Potential Offerors	2/22/13 by 1:00 PM EST
Answers to third round of questions posted to the DGS website **(**http://www.emarketplace.state.pa.us **)**.	Issuing Office	TBD
Post updated RFP documents including Schedules, Exhibits and answers to all questions received.	Issuing Office	4/17/13
Deadline to submit final questions via email to RA-OITPurchases@state.pa.us	Potential Offerors	4/26/13 by 12:00 PM EST
Answers to final questions posted to the DGS website **(**http://www.emarketplace.state.pa.us **)**.	Issuing Office	5/14/13
Please monitor website for all communications regarding the RFP.	Potential Offerors	Ongoing
Sealed proposal must be received by the Issuing Office at Bureau of IT Procurement c/o Commonwealth Mail Processing Center 2 Technology Park (rear)	Offerors	6/19/13 by 1:00 PM EST

Activity	Responsibility	Date
Attn: IT Procurement 506 Finance Harrisburg PA 17110 Attn: Janis Brown Proposals must be time and date stamped by the facility receiving the proposals. Proposals may only be hand-delivered between 6:00 a.m. and 2:45 p.m., Monday through Friday, excluding Commonwealth holidays.		

PART I

GENERAL INFORMATION

I-1. Purpose. This request for proposals (RFP) provides to those interested in submitting proposals for the subject procurement ("Offerors") sufficient information to enable them to prepare and submit proposals for the Office of Administration's consideration on behalf of the Commonwealth of Pennsylvania ("Commonwealth") to satisfy a need **for Data Center Computing Services** ("Project").

I-2. Issuing Office. The Office of Administration ("Issuing Office") has issued this RFP on behalf of the Commonwealth. The sole point of contact in the Commonwealth for this RFP shall be **Janis Brown, 506 Finance Building, Harrisburg PA, 17120, RA-OITPurchases@pa.gov,** the Issuing Officer for this RFP. Please refer all inquiries to the Issuing Officer.

I-3. Scope. This RFP contains instructions governing the requested proposals, including the requirements for the information and material to be included; a description of the service to be provided; requirements which Offerors must meet to be eligible for consideration; general evaluation criteria; and other requirements specific to this RFP.

I-4. Problem Statement. The current managed datacenter service contract is nearing its end and the Commonwealth is seeking to implement a new datacenter service model that will provide various infrastructures/computing platforms on a consumption basis to service the needs of the Commonwealth in a secure and flexible manner. Additional detail is provided in **Part IV** of this RFP.

I-5. Type of Contract. It is proposed that if the Issuing Office enters into a contract as a result of this RFP, it will be a firm, fixed price contract containing the Contract Terms and Conditions as shown in **Appendix A**. The Issuing Office, in its sole discretion, may undertake negotiations with one or more Offerors whose proposals, in the sole judgment of the Issuing Office, show them to be qualified, responsible and capable of performing the Project.

I-6. Rejection of Proposals. The Issuing Office reserves the right, in its sole and complete discretion, to reject any proposal received as a result of this RFP.

I-7. Incurring Costs. The Issuing Office is not liable for any costs the Offeror incurs in preparation and submission of its proposal, in participating in the RFP process or in anticipation of award of the contract.

I-8. Enterprise Data Center (EDC) Tour. The Issuing Office will hold a tour of the Commonwealth's Enterprise Data Center as specified in the Calendar of Events. The purpose of the tour is to provide a visual inspection of the facility which is required to be utilized by the selected Offeror as a datacenter location for this Project. The tour is **not mandatory**. Tours will be provided on the dates indicated in the Calendar of Events. Tours will be approximately 1 hour in length. Each tour will be limited in size of

participants and will be scheduled on a first come first basis. In order to take part in the EDC tour and reserve a tour time, the Offeror must contact, in advance, the Issuing Officer and provide a list of individuals who will be attending the tour. This tour is limited to **two (2)** individuals per Offeror. Only those named individuals will be given access to the facility.

Pre-proposal Conference. The Issuing Office will hold a Pre-proposal conference as specified in the Calendar of Events. The purpose of this conference is to provide opportunity for clarification of the RFP. Offerors should forward all questions to the Issuing Office in accordance with **Part I, Section I-9** to ensure adequate time for analysis before the Issuing Office provides an answer. Offerors may also ask questions at the conference. In view of the limited facilities available for the conference, Offerors should limit their representation to **two (2)** individuals per Offeror. The Pre-proposal conference is for information only. Any answers furnished during the conference will not be official until they have been verified, in writing, by the Issuing Office. All questions and written answers will be posted on the Department of General Services' ("DGS") website (http://www.emarketplace.state.pa.us) as an addendum to, and shall become part of, this RFP. Attendance at the Pre-proposal Conference is **not mandatory.**

Application and Architectural exhibits Distribution. The information included in the Application and Architectural exhibits is confidential and proprietary. In order for an Offeror to receive access to these exhibits, the Offeror must sign the non-disclosure agreement attached to this RFP as **Appendix F.** The non-disclosure agreement must be signed by an individual that has the authority to bind his or her company. Offerors may provide the signed agreement to the Issuing Officer at the EDC Tour, the Pre-Proposal Conference, or at a separate time as scheduled with the Issuing Officer. The Issuing Officer will distribute the exhibits only to those Offerors that provide a properly executed non-disclosure agreement. Individuals seeking to receive the exhibits will be required to provide contact information to the Issuing Officer including name, address, phone number, email address and title within their respective company, as well as a photo ID. The Commonwealth will provide one copy of the Application and Architectural exhibits per company.

I-9. Questions & Answers. If an Offeror has any questions regarding this RFP, the Offeror must submit the questions by email **(with the subject line "RFP 6100022698 Question")** to the Issuing Officer named in **Part I, Section I-2** of the RFP. All questions must be submitted using **Appendix I – Questions Submittal Form**. Questions must be submitted via email **no later than** the date indicated on the Calendar of Events. The Offeror shall not attempt to contact the Issuing Officer by any other means. The Issuing Officer shall post the answers to the questions on the DGS website by the date stated on the Calendar of Events**.** An Offeror who submits a question *after* the deadline date for receipt of questions indicated on the Calendar of Events assumes the risk that its proposal will not be responsive or competitive because the Commonwealth is not able to respond before the proposal receipt date or in sufficient time for the Offeror to prepare a responsive or competitive proposal. When submitted after the deadline date for receipt of questions indicated on the Calendar of Events, the Issuing Officer *may* respond to questions of an administrative nature by directing the questioning Offeror to specific

provisions in the RFP. To the extent that the Issuing Office decides to respond to a non-administrative question *after* the deadline date for receipt of questions indicated on the Calendar of Events, the answer must be provided to all Offerors through an addendum.

All questions and responses as posted on the DGS website are considered as an addendum to, and part of, this RFP in accordance with RFP **Part I, Section I-10.** Each Offeror shall be responsible to monitor the DGS website for new or revised RFP information. The Issuing Office shall not be bound by any verbal information nor shall it be bound by any written information that is not either contained within the RFP or formally issued as an addendum by the Issuing Office. The Issuing Office does not consider questions to be a protest of the specifications or of the solicitation. The required protest process for Commonwealth procurements is described on the DGS website.

I-10. Addenda to the RFP. If the Issuing Office deems it necessary to revise any part of this RFP before the proposal response date, the Issuing Office will post an addendum to the DGS website at http://www.emarketplace.state.pa.us . It is the Offeror's responsibility to periodically check the website for any new information or addenda to the RFP. Answers to the questions asked during the Questions & Answers period also will be posted to the website as an addendum to the RFP.

I-11. Response Date. To be considered for selection, hard copies of proposals must arrive at the Issuing Office on or before the time and date specified in the RFP Calendar of Events. The Issuing Office will **not** accept proposals via email or facsimile transmission. Offerors who send proposals by mail or other delivery service should allow sufficient delivery time to ensure timely receipt of their proposals. If, due to inclement weather, natural disaster, or any other cause, the Commonwealth office location to which proposals are to be returned is closed on the proposal response date, the deadline for submission will be automatically extended until the next Commonwealth business day on which the office is open, unless the Issuing Office otherwise notifies Offerors by posting an Addendum to the RFP. The hour for submission of proposals shall remain the same. The Issuing Office will reject, unopened, any late proposals.

I-12. Proposals. To be considered, Offerors should submit a complete response to this RFP to the Issuing Office, using the format provided in **Part II**, providing **fourteen (14) paper copies of the Technical Submittal and one (1) paper copy of the Cost Submittal and two (2) paper copies of the Small Diverse Business (SDB) participation submittal.** In addition to the paper copies of the proposal, Offerors shall submit **two (2)complete and exact** copies of the entire proposal (Technical, Cost and SDB submittals, along with all requested documents) on CD-ROM or Flash drive in Microsoft Office or Microsoft Office-compatible format. The electronic copy must be a mirror image of the paper copy and any spreadsheets must be in Microsoft Excel. The Offerors may not lock or protect any cells or tabs. Offerors should ensure that there is no costing information in the technical submittal. Offerors should not reiterate technical information in the cost submittal. The CD or Flash drive should clearly identify the Offeror and include the name and version number of the virus scanning software that was used to scan the CD or Flash drive before it was submitted. The Offeror shall make no other distribution of its proposal to any other Offeror or Commonwealth official or Commonwealth consultant.

Each proposal page should be numbered for ease of reference. An official authorized to bind the Offeror to its provisions must sign the proposal. If the official signs the Proposal Cover Sheet (**Appendix B** to this RFP) and the Proposal Cover Sheet is attached to the Offeror's proposal, the requirement will be met. For this RFP, the proposal must remain valid until a contract is fully executed. If the Issuing Office selects the Offeror's proposal for award, the contents of the selected Offeror's proposal will become, except to the extent the contents are changed through Best and Final Offers or negotiations, contractual obligations.

Each Offeror submitting a proposal specifically waives any right to withdraw or modify it, except that the Offeror may withdraw its proposal by written notice received at the Issuing Office's address for proposal delivery prior to the exact hour and date specified for proposal receipt. An Offeror or its authorized representative may withdraw its proposal in person prior to the exact hour and date set for proposal receipt, provided the withdrawing person provides appropriate identification and signs a receipt for the proposal. An Offeror may modify its submitted proposal prior to the exact hour and date set for proposal receipt only by submitting a new sealed proposal or sealed modification which complies with the RFP requirements.

I-13. Small Diverse Business Information. The Issuing Office encourages participation by small diverse businesses as prime contractors, and encourages all prime contractors to make a significant commitment to use small diverse businesses as subcontractors and suppliers**.**

A Small Diverse Businesses is a DGS-verified minority-owned business, woman-owned business, veteran-owned business or service-disabled veteran-owned business.

A small business is a business in the United States which is independently owned, not dominant in its field of operation, employs no more than 100 full-time or full-time equivalent employees, and earns less than $7 million in gross annual revenues for building design, $20 million in gross annual revenues for sales and services and $25 million in gross annual revenues for those businesses in the information technology sales or service business.

Questions regarding this Program can be directed to:

Department of General Services
Bureau of Small Business Opportunities
Room 611, North Office Building
Harrisburg, PA 17125
Phone: (717) 783-3119
Fax: (717) 787-7052
Email: gs-bsbo@pa.gov
Website: www.dgs.state.pa.us

The Department's directory of BSBO-verified minority, women, veteran and service disabled veteran-owned businesses can be accessed from: Searching for Small Diverse Businesses.

I-14. Economy of Preparation. Offerors should prepare proposals simply and economically, providing a straightforward, concise description of the Offeror's ability to meet the requirements of the RFP.

I-15. Alternate Proposals. The Issuing Office will not accept alternate proposals.

I-16. Discussions for Clarification. Offerors may be required to make an oral or written clarification of their proposals to the Issuing Office to ensure thorough mutual understanding and Offeror responsiveness to the solicitation requirements. The Issuing Office will initiate requests for clarification. Clarifications may occur at any stage of the evaluation and selection process prior to contract execution.

I-17. Prime Contractor Responsibilities. The contract will require the selected Offeror to assume responsibility for all services offered in its proposal whether it produces them itself or by subcontract. The Issuing Office will consider the selected Offeror to be the sole point of contact with regard to contractual matters.

I-18. Proposal Contents.

A. Confidential Information. The Commonwealth is not requesting, and does not require, confidential proprietary information or trade secrets to be included as part of Offerors' submissions in order to evaluate proposals submitted in response to this RFP. Accordingly, except as provided herein, Offerors should not label proposal submissions as confidential or proprietary or trade secret protected. Any Offeror who determines that it must divulge such information as part of its proposal must submit the signed written statement described in subsection c. below and must additionally provide a redacted version of its proposal, which removes only the confidential proprietary information and trade secrets, for required public disclosure purposes.

B. Commonwealth Use. All material submitted with the proposal shall be considered the property of the Commonwealth of Pennsylvania and may be returned only at the Issuing Office's option. The Commonwealth has the right to use any or all ideas not protected by intellectual property rights that are presented in any proposal regardless of whether the proposal becomes part of a contract. Notwithstanding any Offeror copyright and/or trademark designations contained on proposals, the Commonwealth shall have the right to make copies and distribute proposals internally and to comply with public record or other disclosure requirements under the provisions of any Commonwealth or United States statute or regulation, or rule or order of any court of competent jurisdiction.

C. Public Disclosure. After the award of a contract pursuant to this RFP, all proposal submissions are subject to disclosure in response to a request for public records made under the Pennsylvania Right-to-Know-Law, 65 P.S. § 67.101, et seq. If a proposal submission contains confidential proprietary information or trade secrets, a signed written statement to this effect must be provided with the submission in accordance with 65 P.S.

§ 67.707(b) for the information to be considered exempt under 65 P.S. § 67.708(b)(11) from public records requests. If financial capability information is submitted in response to Part II of this RFP such financial capability information is exempt from public records disclosure under 65 P.S. § 67.708(b)(26).

I-19. Best and Final Offers.

A. While not required, the Issuing Office reserves the right to conduct discussions with Offerors for the purpose of obtaining "best and final offers." To obtain best and final offers from Offerors, the Issuing Office may do one or more of the following, in any combination and order:

1. Schedule oral presentations;

2. Request revised proposals;

3. Conduct a reverse online auction; and

4. Enter into pre-selection negotiations.

B. The following Offerors will **not** be invited by the Issuing Office to submit a Best and Final Offer:

1. Those Offerors, which the Issuing Office has determined to be not responsible or whose proposals the Issuing Office has determined to be not responsive.

2. Those Offerors, which the Issuing Office has determined in accordance with **Part III, Section III-5**, from the submitted and gathered financial and other information, do not possess the financial capability, experience or qualifications to assure good faith performance of the contract.

3. Those Offerors whose score for their technical submittal of the proposal is less than 75% of the total amount of technical points allotted to the technical criterion.

The issuing office may further limit participation in the best and final offers process to those remaining responsible offerors which the Issuing Office has, within its discretion, determined to be within the top competitive range of responsive proposals.

C. The Evaluation Criteria found in **Part III, Section III-4**, shall also be used to evaluate the Best and Final offers.

D. Price reductions offered through any reverse online auction shall have no effect upon the Offeror's Technical Submittal. Dollar commitments to Small Diverse Businesses can be reduced only in the same percentage as the percent reduction in the total price offered through any reverse online auction or negotiations.

I-20. News Releases. Offerors shall not issue news releases, Internet postings, advertisements or any other public communications pertaining to this Project without prior written approval of the Issuing Office, and then only in coordination with the Issuing Office.

I-21. Restriction of Contact. From the issue date of this RFP until the Issuing Office selects a proposal for award, the Issuing Officer is the sole point of contact concerning this RFP. Any violation of this condition may be cause for the Issuing Office to reject the offending Offeror's proposal. If the Issuing Office later discovers that the Offeror has engaged in any violations of this condition, the Issuing Office may reject the offending Offeror's proposal or rescind its contract award. Offerors must agree not to distribute any part of their proposals beyond the Issuing Office. An Offeror who shares information contained in its proposal with other Commonwealth personnel and/or competing Offeror personnel may be disqualified.

I-22. Issuing Office Participation. Offerors shall provide all services, supplies, facilities, and other support necessary to complete the identified work, except as otherwise provided in this **Part I, Section I-22**.

I-23. Term of Contract. The term of the contract will commence on the Effective Date and will end in seven (7) years. The Commonwealth, at its sole option, may renew the contract for up to an additional three (3) years. The Commonwealth may exercise the renewal(s) in single or multiple year increments, at any time during the contact term**.** The Issuing Office will fix the Effective Date after the contract has been fully executed by the selected Offeror and by the Commonwealth and all approvals required by Commonwealth contracting procedures have been obtained. The selected Offeror shall not begin to perform or incur any expenses under the contract until (1) the contract Effective Date has arrived; (2) it has received a copy of the fully executed contract; and (3) it has received a purchase order or other written notice to proceed signed by the Contracting Officer.

I-24. Offeror's Representations and Authorizations. By submitting its proposal, each Offeror understands, represents, and acknowledges that:

A. All of the Offeror's information and representations in the proposal are true, correct, material and important, and the Issuing Office may rely upon the contents of the proposal in awarding the contract(s). The Commonwealth shall treat any misstatement, omission or misrepresentation as fraudulent concealment of the true facts relating to the Proposal submission, punishable pursuant to 18 Pa. C.S. § 4904.

B. The Offeror has arrived at the price(s) and amounts in its proposal independently and without consultation, communication, or agreement with any other Offeror or potential offeror.

C. The Offeror has not disclosed the price(s), the amount of the proposal, nor the approximate price(s) or amount(s) of its proposal to any other firm or person who is an Offeror or potential offeror for this RFP, and the Offeror shall not disclose any of these items on or before the proposal submission deadline specified in the Calendar of Events of this RFP.

D. The Offeror has not attempted, nor will it attempt, to induce any firm or person to refrain from submitting a proposal on this contract, or to submit a proposal higher

than this proposal, or to submit any intentionally high or noncompetitive proposal or other form of complementary proposal.

E. The Offeror makes its proposal in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive proposal.

F. To the best knowledge of the person signing the proposal for the Offeror, the Offeror, its affiliates, subsidiaries, officers, directors, and employees are not currently under investigation by any Local, State, or Federal governmental agency and have not in the last **four** years been convicted or found liable for any act prohibited by Local, State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to bidding or proposing on any public contract, except as the Offeror has disclosed in its proposal.

G. To the best of the knowledge of the person signing the proposal for the Offeror and except as the Offeror has otherwise disclosed in its proposal, the Offeror has no outstanding, delinquent obligations to the Commonwealth including, but not limited to, any state tax liability not being contested on appeal or other obligation of the Offeror that is owed to the Commonwealth.

H. The Offeror is not currently under suspension or debarment by the Commonwealth, any other state or the federal government, and if the Offeror cannot so certify, then it shall submit along with its proposal a written explanation of why it cannot make such certification.

I. The Offeror has not made, under separate contract with the Issuing Office, any recommendations to the Issuing Office concerning the need for the services described in its proposal or the specifications for the services described in the proposal. (*See* Pennsylvania State Adverse Interest Act)

J. Each Offeror, by submitting its proposal, authorizes Commonwealth agencies to release to the Commonwealth information concerning the Offeror's Pennsylvania taxes, unemployment compensation and workers' compensation liabilities.

K. Until the selected Offeror receives a fully executed and approved written contract from the Issuing Office, there is no legal and valid contract, in law or in equity. The selected Offeror shall not begin to perform or incur any expenses under the contract until (1) the contract Effective Date has arrived; (2) it has received a copy of the fully executed contract; and (3) it has received a purchase order or other written notice to proceed signed by the Contracting Officer.

I-25. Notification of Selection.

A. **Contract Negotiations.** The Issuing Office will notify all Offerors in writing of the Offeror selected for contract negotiations after the Issuing Office has determined, taking into consideration all of the evaluation factors, the proposal that is the most advantageous to the Issuing Office.

B. **Award.** Offerors whose proposals are not selected will be notified when contract negotiations have been successfully completed and the Issuing Office has received the final negotiated contract signed by the selected Offeror.

I-26. Debriefing Conferences. Upon notification of award, Offerors whose proposals were not selected will be given the opportunity to be debriefed. The Issuing Office will schedule the debriefing at a mutually agreeable time. The debriefing will not compare the Offeror with other Offerors, other than the position of the Offeror's proposal in relation to all other Offeror proposals. An Offeror's exercise of the opportunity to be debriefed does not constitute nor toll the time for filing a protest (See Section I-27 of this RFP).

I-27. RFP Protest Procedure.

A. Who May File a Protest. An Offeror or Prospective Offeror which is aggrieved in connection with the RFP or award of the contract may file a protest. An Offeror is an entity which submits a proposal in response to an RFP. A Prospective Offeror is an entity which has not submitted a proposal in response to the RFP. No protest may be filed if the RFP is cancelled or if all proposals received in response to the RFP are rejected.

B. Place for Filing. A protest must be filed with the Agency Head Designee at:

Mr. James E. Henning
Deputy Secretary for Administration
Department of General Services
515 North Office Building
Harrisburg, PA 17125

C. Time for Filing.

1. A Prospective Offeror which is considering filing a proposal must file the protest within seven (7) days after the Prospective Offeror knew or should have known of the facts giving rise to the protest, but in no event later than the proposal submission deadline specified in the RFP.

2. A protest filed by an Offeror which submits a proposal must be filed within seven (7) days after the protesting Offeror knew or should have known of the facts giving rise to the protest, but in no event may an Offeror file a protest later than seven (7) days after the date the notice of award of the contract is posted on the DGS website.

3. The date of filing the protest is the date the Agency Head Designee receives the protest.

4. For purposes of this RFP, to be timely, a protest must be received by 4:00 p.m. of the seventh day.

5. Commonwealth agencies are required by law to disregard any protest received beyond the deadlines established in this Section I-27.

D. Contents of Protest.

6. A protest must be in writing. Hard copy in paper and electronic copy via email are acceptable.

7. A protest shall state all grounds upon which the protesting party asserts that the RFP or contract award was improper.

8. The protesting party may submit with the protest any documents or information it deems relevant.

E. Notice of Protest.

1. The Agency Head Designee will notify the successful Offeror of the protest if contractor selection has already been made.

2. If the Agency Head Designee receives the protest before selection, and he or she determines that substantial issues are raised by the protest, the Agency Head Designee will, in the sole discretion of the Agency Head Designee, notify all Offerors which appear to have a substantial and reasonable prospect of selection, as determined by the Agency Head, that a protest has been filed.

F. Stay of Procurement.

3. The Agency Head designee will promptly decide upon receipt of a timely protest whether or not the award of a contract shall be delayed, or if the protest is timely received after the award, whether the performance of the contract should be suspended.

4. The Issuing Office shall not proceed further with the RFP unless the Agency Head Designee makes a written determination that the protest is clearly without merit or that award of the contract without delay is necessary to protect the substantial interests of the Commonwealth.

G. Response and Reply.

1. Within 15 days of receipt of the protest, a response to the protest may be submitted to the Agency Head Designee. The protesting party must be copied on the response.

2. The protesting party may file a reply to the response within ten days of the date of the response.

H. Procedures.

1. The Agency Head Designee shall review the protest and any response and reply.

2. The Agency Head Designee may request and review such additional documents or information he deems necessary to render a decision and may, at his sole discretion, conduct a hearing.

3. The Agency Head Designee shall provide to the protesting party and the contracting officer a reasonable opportunity to review and address any additional documents or information deemed necessary by the Agency Head Designee to render a decision.

I. Determination.

The Agency Head Designee shall promptly, but in no event later than 60 days from the filing of the protest unless both parties agree to an extension, issue a written determination. The determination shall:

1. State the reason for the decision, and

2. If the determination is a denial of the protest, inform the protesting party of its right to file an action in the Commonwealth Court within fifteen (15) days of the determination mailing date.

3. The Agency Head Designee shall send a copy of the determination to the protesting party and any other person determined by the Agency Head Designee in his sole discretion to be affected by the determination.

I-28. Use of Electronic Versions of this RFP. This RFP is being made available by electronic means. If an Offeror electronically accepts the RFP, the Offeror acknowledges and accepts full responsibility to insure that no changes are made to the RFP. In the event of a conflict between a version of the RFP in the Offeror's possession and the Issuing Office's version of the RFP, the Issuing Office's version shall govern.

I-29. Information Technology Bulletins.

This RFP is subject to the Information Technology Bulletins (ITB's) issued by the Office of Administration, Office for Information Technology (OA-OIT). ITB's may be found at http://www.portal.state.pa.us/portal/server.pt?open=512&objID=416&PageID=210791&mode=2

All proposals must be submitted on the basis that all ITBs are applicable to this procurement. It is the responsibility of the Offeror to read and be familiar with the ITBs. Notwithstanding the foregoing, if the Offeror believes that any ITB is not applicable to this procurement, it must list all such ITBs in its technical submittal, and explain why it believes the ITB is not applicable. The Issuing Office may, in its sole discretion, accept or reject any request that an ITB not be considered to be applicable to the procurement. The Offeror's failure to list an ITB will result in its waiving its right to do so later, unless the Issuing Office, in its sole discretion, determines that it would be in the best interest of the Commonwealth to waive the pertinent ITB.

I-30. COSTARS PROGRAM.

COSTARS Purchasers. Section 1902 of the Commonwealth Procurement Code, 62 Pa.C.S. § 1902 ("Section 1902"), authorizes local public procurement units and state-affiliated entities (together, "COSTARS Members") to participate in Commonwealth procurement contracts that the Department of General Services ("DGS") may choose to make available to COSTARS Members. DGS has identified this Contract as one which will be made available for COSTARS Members' participation.

A. Only those entities registered with DGS are authorized to participate as COSTARS Members in this Contract. A COSTARS Member may be either a local public procurement unit or a state-affiliated entity.

1. **A "local public procurement unit" is:**

   a) Any political subdivision (local government unit), such as a municipality, school district, or commission;
   b) Any public authority (including authorities formed under the Municipality Authorities Act of 1955 or other authorizing legislation, such as the Public Transportation Law or the Aviation Code);
   c) Any tax-exempt, nonprofit educational institution or organization;
   d) Any tax-exempt, nonprofit public health institution or organization;
   e) Any nonprofit fire, rescue, or ambulance company; and
   f) Any other entity that spends public funds for the procurement of supplies, services, and construction (such as a council of governments, an area government, or an organization that receives public grant funds).

2. **A state-affiliated entity is a Commonwealth authority or other Commonwealth entity that is not a Commonwealth agency. The term includes:**

   a) The Pennsylvania Turnpike Commission;
   b) The Pennsylvania Housing Finance Agency;

c) The Pennsylvania Municipal Retirement System;
d) The Pennsylvania Infrastructure Investment Authority;
e) The State Public School Building Authority;
f) The Pennsylvania Higher Education Facilities Authority, and
g) The State System of Higher Education.

The term does not include any court or other officer or agency of the unified judicial system, the General Assembly and its officers and agencies, any State-related institution, or any Commonwealth executive or independent agencies, boards, or commissions not listed above. Statewide "row" offices, including the Auditor General, Attorney General, and State Treasurer **are not** State-affiliated entities under the Procurement Code.

However, elements of the court system, the General Assembly, and independent agencies, boards, or commissions have been deemed eligible for COSTARS membership as entities that spend public funds for the procurement of supplies, services, and construction.

3. A complete list of local public procurement units and state-affiliated entities that have registered with DGS and that are authorized to procure items from the Contract can be found at http://www.dgsweb.state.pa.us/COSTARSReg/Member.aspx

B. COSTARS Members have the option to purchase from this Contract, from any DGS contract established exclusively for COSTARS Members in accordance with the requirements of Section 1902, from any other cooperative procurement contracts, or from their own procurement contracts established in accordance with the applicable laws governing such procurements. The Contractor understands and acknowledges that there is no guarantee that a COSTARS Member will place an order under this Contract, and that the decision to procure from this Contract is within the sole discretion of each COSTARS Member.

C. DGS is acting as a facilitator for COSTARS Members who may wish to purchase under this Contract. COSTARS Members that participate in this Contract and issue purchase orders ("POs") to Contractors are third party beneficiaries who have the right to sue and be sued for breach of this Contract without joining the Commonwealth or DGS as a party. The Commonwealth will not intervene in any action between a Contractor and a COSTARS Member unless substantial interests of the Commonwealth are involved.

D. COSTARS Members electing to participate in this Contract will order items directly from the Contractor and be responsible for payment directly to the Contractor.

E. Those Contractors electing to permit COSTARS Members to procure from this Contract shall pay the Required Administrative Fee applicable to the Contractor's classification:

Contractor Classification	Required Administrative Fee
Department of General Services Certified Small Business Bidder	$500
All Other Bidders	$1,500

1. Each bidder electing to permit COSTARS Members to participate in the Contract must submit the COSTARS Program Election to Participate form with its bid submittal and pay the applicable Administrative Fee upon Contract award in order to sell the awarded items/services to COSTARS Members. If the bidder is a Department of General Services-Certified Small Business, a copy of its active certification must be included with the bid submittal.

2. At the beginning of each Contract year and upon any Contract renewal, the Contractor shall submit a check for the required amount, payable to "Commonwealth of PA". The Contractor must pay the Administrative Fee at each contract renewal date to continue to sell the awarded items/services to COSTARS Members. If the bidder is a Department of General Services-Certified Small Business, a copy of its active certification must be included with the Administrative Fee for each contract year and upon each renewal.

F. DGS has registered the COSTARS name and logo (together, the "COSTARS Brand") as a trademark with the Pennsylvania Department of State. Therefore, the Contractor may use the COSTARS Brand only as permitted under in this Subsection.

1. The Contractor shall pay the Administrative Fee covering its participation in the program, including without limitation any use of the COSTARS Brand, for each year of the Contract period. The fee is payable upon Contract award and prior to the renewal date for each succeeding Contract period.

2. DGS grants the Contractor a nonexclusive license to use the COSTARS Brand, subject to the following conditions:

   a) The Contractor agrees not to transfer to any third party, including without limitation any of its subcontractors or suppliers, any privileges it may have to use the COSTARS Brand under this Contract.

   b) The Contractor agrees not to use the COSTARS Brand to represent or imply any Commonwealth endorsement or approval of its products or services.

   c) The Contractor is permitted to use the COSTARS Brand in broadcast, or Internet media solely in connection with this Contract and any other Contract with the Commonwealth under which it has agreed to make sales to COSTARS Purchasers. The Contractor may use the COSTARS Brand on

business cards, brochures, and other print publications so long as the purpose is to identify the Contractor as a COSTARS vendor, and only so long as the required Contract fee is kept current.

d) Should this Contract terminate for any reason, the Contractor agrees promptly to remove the COSTARS Brand from any and all print and electronic media and to refrain from using the COSTARS Brand for any purpose whatsoever from the date of Contract termination forward.

e) The Contractor agrees to defend, indemnify, and hold harmless the Commonwealth of Pennsylvania and DGS from and against all claims, demands, liabilities, obligations, costs, and expenses of any nature whatsoever arising out of or based upon the Contractor's use of the COSTARS Brand.

f) The Contractor agrees it has no property rights in the use of the COSTARS Brand by virtue of this nonexclusive license. The Contractor expressly waives any claims, including without limitation due process claims that may otherwise be available under the law in the event of any dispute involving these terms of use.

G. The Contractor shall furnish to the DGS COSTARS Program Office a quarterly electronic Contract sales report detailing the previous quarter's Contract purchasing activity, using the form and in the format prescribed by DGS. The Contractor shall submit its completed quarterly report no later than the fifteenth calendar day of the succeeding Contract quarter.

1. The Contractor shall submit the reports via the web-based COSTARS Suppliers' Gateway at www.dgs.state.pa.us/costars. If a Contractor does not have access to the Internet, the Contractor shall send the reports, using the form and in the format prescribed by DGS, on compact disc via US Postal Service to the DGS COSTARS Program Office, Bureau of Procurement, 6th Floor Forum Place, 555 Walnut Street, Harrisburg, PA 17101-1914.

   For each PO received, the Contractor shall include on the report the name and address of each COSTARS-Registered Purchaser that has used the Contract along with the sales date, and dollar volume of sales to the specific Purchaser for the reporting period.

2. DGS may suspend the Contractor's participation in the COSTARS Program for failure to provide the Quarterly Sales Report within the specified time.

H. Additional information regarding the COSTARS Program is available on the DGS COSTARS Website at www.dgs.state.pa.us/costars

1. If the Contractor is aware of any qualified entity not currently registered and wishing to participate in the COSTARS Program, please refer the potential purchaser to the DGS COSTARS Website at www.dgs.state.pa.us/costars, where it may register by completing the online registration form and receiving DGS

confirmation of its registration. To view a list of currently-registered COSTARS member entities, please visit the COSTARS website.

2. Direct all questions concerning the COSTARS Program to:

Department of General Services
COSTARS Program
555 Walnut Street, 6th Floor
Harrisburg, PA 17101
Telephone: 1-866-768-7827
E-mail: GS-PACostars@state.pa.us

PART II

PROPOSAL REQUIREMENTS

Offerors must submit their proposals in the format, including heading descriptions, outlined below. To be considered, the proposal must respond to all requirements in this part of the RFP. Offerors should provide any other information thought to be relevant, but not applicable to the enumerated categories, as an appendix to the Proposal. All cost data relating to this proposal and all Small Diverse Business cost data should be kept separate from and not included in the Technical Submittal. Each Proposal shall consist of the following **three** separately sealed submittals:

A. Technical Submittal, which shall be a response to RFP **Part II, Sections II-1 through II-8**;

B. Small Diverse Business participation submittal, in response to RFP **Part II, Section II-9**; and

C. Cost Submittal, in response to RFP **Part II, Section II-10.**

The Issuing Office reserves the right to request additional information which, in the Issuing Office's opinion, is necessary to assure that the Offeror's competence, number of qualified employees, business organization, and financial resources are adequate to perform according to the RFP.

The Issuing Office may make investigations as deemed necessary to determine the ability of the Offeror to perform the Project, and the Offeror shall furnish to the Issuing Office all requested information and data. The Issuing Office reserves the right to reject any proposal if the evidence submitted by, or investigation of, such Offeror fails to satisfy the Issuing Office that such Offeror is properly qualified to carry out the obligations of the RFP and to complete the Project as specified.

II-1. Statement of the Problem. State in succinct terms your understanding of the problem presented or the service required by this RFP.

II-2. Management Summary. Include a narrative description of the proposed effort and a list of the items to be delivered or services to be provided.

II-3. Work Plan. Describe in narrative form your technical plan for accomplishing the work. Use the task descriptions in **Part IV** of this RFP and **Schedule F** as your reference point. Modifications of the task descriptions are permitted; however, reasons for changes should be fully explained. Indicate the number of person hours allocated to each task. Include a Program Evaluation and Review Technique (PERT) or similar type display, time related, showing each event. If more than one approach is apparent, comment on why you chose this approach.

II-4. Prior Experience.

The Offeror's Background and Qualifications should cover the topics described below.

Overall

The Offeror must provide information describing its background, services, experience, and qualifications relative to the scope of this RFP. Information that will be considered includes the length of the service, service levels, references, and quality of comparable services provided to other clients. The Offeror should also indicate any additional information that will be helpful to the Commonwealth's evaluation.

Corporate Information

The Offeror must provide a narrative describing its background, history, services, and corporate organization. A general overview of the corporate organization is appropriate. If the Offeror is a subsidiary or division of a larger company, this section should concentrate on the operating history of the subsidiary or division which will provide the Services.

Strategic Direction

The Commonwealth places strong emphasis on the need for a long-term strategy. The Offeror should describe its strategic direction, and the implications of that strategy for the Commonwealth.

Dedication to Quality

The Offeror must provide details of its approach to measuring and maintaining high quality services. The Offeror should provide details of any industry-recognized quality standard to which it is, or will become, compliant (including a timeframe for compliance, if not already achieved), as well as any awards received over the past 18 months. Indicate all quality programs that are externally measured (e.g., Six Sigma, ISO 9001:2000) and how such certifications would directly benefit the Commonwealth. A detailed approach and quality plan should be included in the response to this section.

Client References

The Offeror must provide at least three (3) customer references for projects similar to this Project using **Appendix C – Project References**. If the Offeror is using subcontractors to provide a significant portion of services, each subcontractor must also provide at least three (3) references. To the extent possible, references should be selected to represent projects of similar size and complexity to the project described in this RFP. The Commonwealth at its sole discretion may request references from any or all proposed subcontractors.

The Offeror must include a client contact name, title, address, email address and phone number for each of the references provided. The Offeror will provide a brief description of the services provided for each client. The Offeror will also ensure that the

Commonwealth is able to discuss with the client or clients listed, the client's experience with the Offeror's services.

Experience shown should be work done by individuals who will be assigned to this project as well as that of your company. Studies or projects referred to must be identified and the name of the customer shown, including the name, address, and telephone number of the responsible official of the customer, company, or agency who may be contacted.

Subcontractors

The Offeror must provide a list of all proposed subcontractors that will be used as part of the project using **Schedule L – Approved Subcontractors**.

II-5. Personnel. Include the number of executive and professional personnel, analysts, auditors, researchers, programmers, consultants, etc., who will be engaged in the work. Show where these personnel will be physically located during the time they are engaged in the Project. Refer to **Schedule G - Staffing Plan and Key Positions** for key personnel, include the employee's name and, through a resume or similar document, the Project personnel's education and experience in respective Account Role as defined within **Schedule G - Staffing Plan and Key Positions.** Indicate the responsibilities each individual will have in this Project and how long each has been with your company. Identify by name any subcontractors you intend to use and the services they will perform.

II-6. Training. If appropriate, indicate recommended training of Commonwealth personnel. Include the Commonwealth personnel to be trained, the number to be trained, duration of the program, place of training, curricula, training materials to be used, number and frequency of sessions, and number and level of instructors.

II-7. Financial Capability. Describe your company's financial stability and economic capability to perform the contract requirements. Provide your company's financial statements (audited, if available) for the past three fiscal years. Financial statements must include the company's Balance Sheet and Income Statement or Profit/Loss Statements. Also include a Dun & Bradstreet comprehensive report, if available. If your company is a publicly traded company, please provide a link to your financial records on your company website in lieu of providing hardcopies. The Commonwealth reserves the right to request additional information it deems necessary to evaluate an Offeror's financial capability.

The Offeror must be able to demonstrate to the Commonwealth its financial soundness and its ability to remain viable as a provider of the Services over the term of the agreement. The Offeror must provide the following information for Offeror's lines of business that are directly comparable to outsourcing the Services:

- Revenues segmented by managed Datacenter business lines
- Revenues from all lines of business
- Total number of FTEs performing managed Datacenter services
- Locations and number of employees in each location
- Employee turnover rate

- Long-term debt rating (Moody's or S&P)
- Total market capitalization
- Number of customers to which it provides managed Datacenter services
- Length/total expected dollar value of all contracts in force

Offeror shall furnish to the Commonwealth as part of its technical submittal, certificates of insurance or other appropriate documentation evidencing all current insurance coverage.

The Commonwealth in its sole discretion reserves the right to request financial capability information from proposed subcontractors.

II-8. Objections and Additions to Contract Terms and Conditions. The Offeror will identify which, if any, of the terms and conditions (contained in **Appendix A**) it would like to negotiate and what additional terms and conditions the Offeror would like to add to the standard contract terms and conditions. The Offeror's failure to make a submission under this paragraph will result in its waiving its right to do so later, but the Issuing Office may consider late objections and requests for additions if to do so, in the Issuing Office's sole discretion, would be in the best interest of the Commonwealth. The Issuing Office may, in its sole discretion, accept or reject any requested changes to the standard contract terms and conditions. The Offeror shall not request changes to the other provisions of the RFP, nor shall the Offeror request to completely substitute its own terms and conditions for **Appendix A**. All terms and conditions must appear in one integrated contract. The Issuing Office will not accept references to the Offeror's, or any other, online guides or online terms and conditions contained in any proposal.

Regardless of any objections set out in its proposal, the Offeror must submit its proposal, including the cost proposal, on the basis of the terms and conditions set out in **Appendix A**.

The Issuing Office will reject any proposal that is conditioned on the negotiation of the terms and conditions set out in Appendix A or to other provisions of the RFP as specifically identified above.

II-9. Small Diverse Business Participation Submittal.

A. To receive credit for being a Small Diverse Business or for subcontracting with a Small Diverse Business (including purchasing supplies and/or services through a purchase agreement), an Offeror must include proof of Small Diverse Business qualification in the Small Diverse Business participation submittal of the proposal, as indicated below:

- A Small Diverse Business verified by BSBO as a Small Diverse Business must provide a photocopy of their verification letter.

B. In addition to the above verification letter, the Offeror must include in the Small Diverse Business participation submittal of the proposal the following information:

1. Offerors must include a numerical percentage which represents the total percentage of the work (as a percentage of the total amount paid to the Offeror under the contract) that the Offeror commits to paying to Small Diverse Businesses (SDBs) as subcontractors. To support its total percentage SDB subcontractor commitment, Offeror must also include:

   a) The percentage of each subcontract commitment to a Small Diverse Business.

   b) The name of each Small Diverse Business. The Offeror will not receive credit for stating that after the contract is awarded it will find a Small Diverse Business.

   c) The services or supplies each Small Diverse Business will provide, including the timeframe for providing the services or supplies.

   d) The location where each Small Diverse Business will perform services.

   e) The timeframe for each Small Diverse Business to provide or deliver the goods or services.

   f) A completed and signed letter of intent, in the format set forth in Appendix J - SDB Letter of Intent, for each Small Diverse Business.

   g) The name, address and telephone number of the primary contact person for each Small Diverse Business.

2. The total percentages and each SDB subcontractor commitment will become contractual obligations once the contract is fully executed.

3. The name and telephone number of the Offeror's project (contact) person for the Small Diverse Business information.

C. The Offeror is required to submit two copies of its Small Diverse Business participation submittal. The submittal shall be clearly identified as Small Diverse Business information and sealed in its own envelope, separate from the remainder of the proposal.

D. A Small Diverse Business can be included as a subcontractor with as many prime contractors as it chooses in separate proposals.

E. An Offeror that qualifies as a Small Diverse Business and submits a proposal as a prime contractor is not prohibited from being included as a subcontractor in separate proposals submitted by other Offerors.

II-10. Cost Submittal. The information submitted in **Schedule I - Offeror Pricing Forms** shall constitute the Cost Submittal. The Cost Submittal shall be placed in a separate sealed envelope within the sealed proposal, separated from the technical submittal. Offerors should **not** include any assumptions in their cost submittals. If the Offeror includes assumptions in its cost submittal, the Issuing Office may reject the proposal. Offerors should direct in writing to the Issuing Office pursuant to **Part I, Section I-9**, of this RFP any questions about whether a cost or other component is included or applies. All Offerors will then have the benefit of the Issuing Office's written answer so that all proposals are submitted on the same basis.

II-11. Domestic Workforce Utilization Certification. Complete and sign the Domestic Workforce Utilization Certification contained in **Appendix D** of this RFP. Offerors who seek consideration for this criterion must submit in hardcopy the signed Domestic Workforce Utilization Certification Form in the same sealed envelope with the Technical Submittal.

II-12. COSTARS Program Election to Participate. Offerors electing to permit COSTARS members to participate in this Contract should complete and sign the COSTARS Program Election to Participate form contained in **Appendix E** of this RFP. If the Offeror is asserting that it is a Department of General Services Certified Small Business, also provide an active Department of General Services Small Business Certification. Submit the form and the certification, as applicable, in the same sealed envelope with the Technical Submittal only if the Offeror elects to participate in the program.

II-13. Lobbying Certification and Disclosure of Lobbying Activities

This Project may be funded, in whole or in part, with federal monies. Public Law 101-121, Section 319, prohibits federal funds from being expended by the recipient or by any lower tier sub-recipients of a federal contract, grant, loan, or a cooperative agreement to pay any person for influencing, or attempting to influence a federal agency or Congress in connection with the awarding of any federal contract, the making of any federal grant or loan, or entering into any cooperative agreement. Offerors who submit proposals in response to this RFP must sign the "Lobbying Certification Form," (attached as **Appendix H**) and, if applicable, complete the "Disclosure of Lobbying Activities" form available at: http://www.whitehouse.gov/omb/assets/omb/grants/sflllin.pdf.

PART III

CRITERIA FOR SELECTION

III-1. Mandatory Responsiveness Requirements. To be responsive, a proposal must be:

A. Timely received from an Offeror;

B. Properly signed by the Offeror;

C. Submitted by an Offeror that is ISO 27001, ISO 9001 and ISO/IEC 20000 certified;

a. A copy of the certifications must be submitted with the proposal.

D. Submitted by an Offeror that has successfully passed a SSAE 16 audit within twelve (12) months of the proposal due date.

a. A copy of the audit findings report must be submitted with the proposal.

Offerors must provide the copies of the ISO 27001, ISO 9001 and ISO/IEC 20000 certifications and SSAE 16 audit findings report as an appendix to the Offeror's technical submittal. The appendix must be titled "Mandatory Requirements."

III-2. Technical Nonconforming Proposals. The **four (4)** Mandatory Responsiveness Requirements set forth in **Section III-1** above (A-D) are the only RFP requirements that the Commonwealth will consider to be *non-waivable.* The Issuing Office reserves the right, in its sole discretion, to (1) waive any other technical or immaterial nonconformities in an Offeror's proposal, (2) allow the Offeror to cure the nonconformity, or (3) consider the nonconformity in the scoring of the Offeror's proposal.

III-3. Evaluation. The Issuing Office has selected a committee of qualified personnel to review and evaluate timely submitted proposals. Independent of the committee, BSBO will evaluate the Small Diverse Business participation submittal and provide the Issuing Office with a rating for this component of each proposal. The Issuing Office will notify in writing of its selection for negotiation the responsible Offeror whose proposal is determined to be the most advantageous to the Commonwealth as determined by the Issuing Office after taking into consideration all of the evaluation factors.

III-4. Evaluation Criteria. The following criteria will be used in evaluating each proposal:

A. **Technical:** The Issuing Office has established the weight for the Technical criterion for this RFP as **50 %** of the total points. Evaluation will be based upon the following:

- **Proposed Facilities**
- **Offeror Qualification**
- **Personnel Qualifications**
- **Soundness of Approach**
- **Understanding the Problem**

The final Technical scores are determined by giving the maximum number of technical points available to the proposal with the highest raw technical score. The remaining proposals are rated by applying the Technical Scoring Formula set forth at the following webpage: http://www.portal.state.pa.us/portal/server.pt/community/rfp_scoring_formulas_overview/20124.

B. **Cost:** The Issuing Office has established the weight for the Cost criterion for this RFP as **30%** of the total points. The cost criterion is rated by giving the proposal with the lowest total cost the maximum number of Cost points available. The remaining proposals are rated by applying the Cost Formula set forth at the following webpage: http://www.portal.state.pa.us/portal/server.pt/community/rfp_scoring_formulas_overview/20124

C. **Small Diverse Business Participation:** BSBO has established the weight for the Small Diverse Business (SDB) participation criterion for this RFP as **20%** of the total points. Each SDB participation submittal will be rated for its approach to enhancing the utilization of SDBs in accordance with the below-listed priority ranking and subject to the following requirements:

1. To receive credit for an SDB subcontracting commitment, the SDB subcontractor must perform at least fifty percent (50%) of the work subcontracted to it.

2. A significant subcontracting commitment is a minimum of one percent (1%) of the total contract value.

3. A subcontracting commitment less than one percent (1%) of the total contract value is considered nominal and will receive reduced or no additional SDB points depending on the priority ranking.

Priority Rank 1: Proposals submitted by SDBs as prime contractors will receive 150 points. In addition, SDB prime contractors that have significant subcontracting commitments to additional SDBs may receive up to an additional 50 points (200 points total available).

Subcontracting commitments to additional SDBs are evaluated based on the proposal offering the highest total percentage SDB subcontracting commitment. All other Offerors will be scored in proportion to the highest total percentage SDB subcontracting commitment within this ranking. *See formula below.*

Priority Rank 2: Proposals submitted by SDBs as prime contractors, with no or nominal subcontracting commitments to additional SDBs, will receive 150 points.

Priority Rank 3: Proposals submitted by non-small diverse businesses as prime contractors, with significant subcontracting commitments to SDBs, will receive up to 100 points. Proposals submitted with nominal subcontracting commitments to SDBs will

receive points equal to the percentage level of their total SDB subcontracting commitment.

SDB subcontracting commitments are evaluated based on the proposal offering the highest total percentage SDB subcontracting commitment. All other Offerors will be scored in proportion to the highest total percentage SDB subcontracting commitment within this ranking. *See formula below.*

Priority Rank 4: Proposals by non-small diverse businesses as prime contractors with no SDB subcontracting commitments shall receive no points under this criterion.

To the extent that there are multiple SDB Participation submittals in Priority Rank 1 and/or Priority Rank 3 that offer significant subcontracting commitments to SDBs, the proposal offering the highest total percentage SDB subcontracting commitment shall receive the highest score (or additional points) available in that Priority Rank category and the other proposal(s) in that category shall be scored in proportion to the highest total percentage SDB subcontracting commitment. Proportional scoring is determined by applying the following formula:

SDB % Being Scored	*x*	*Points/Additional*	=	*Awarded/Additional*
Highest % SDB Commitment		*Points Available*		*SDB Points*

Priority Rank 1 = 50 Additional Points Available
Priority Rank 3 = 100 Total Points Available

Please refer to the following webpage for an illustrative chart which shows SDB scoring based on a hypothetical situation in which the Commonwealth receives proposals for each Priority Rank:

http://www.portal.state.pa.us/portal/server.pt/community/rfp_scoring_formulas_overview/20124

D. **Domestic Workforce Utilization:** Any points received for the Domestic Workforce Utilization criterion are bonus points in addition to the total points for this RFP. The maximum amount of bonus points available for this criterion is 3% of the total points for this RFP.

To the extent permitted by the laws and treaties of the United States, each proposal will be scored for its commitment to use domestic workforce in the fulfillment of the contract. Maximum consideration will be given to those Offerors who will perform the contracted direct labor exclusively within the geographical boundaries of the United States or within the geographical boundaries of a country that is a party to the World Trade Organization Government Procurement Agreement. Those who propose to perform a portion of the direct labor outside of the United States and not within the geographical boundaries of a party to the World Trade Organization Government Procurement Agreement will receive a correspondingly smaller score for this criterion. See the following webpage for the Domestic Workforce Utilization Formula:

http://www.portal.state.pa.us/portal/server.pt/community/rfp_scoring_formulas_overview/20124. Offerors who seek consideration for this criterion must submit in hardcopy the signed Domestic Workforce Utilization Certification Form in the same sealed envelope with the Technical Submittal. The certification will be included as a contractual obligation when the contract is executed.

III-5. Offeror Responsibility. To be responsible, an Offeror must submit a responsive proposal and possess the capability to fully perform the contract requirements in all respects and the integrity and reliability to assure good faith performance of the contract.

In order for an Offeror to be considered responsible for this RFP and therefore eligible for selection for best and final offers or selection for contract negotiations:

A. The total score for the technical submittal of the Offeror's proposal must be greater than or equal to **75% of the available technical points**; and

B. The Offeror's financial information must demonstrate that the Offeror possesses the financial capability to assure good faith performance of the contract. The Issuing Office will review the Offeror's previous three audited annual financial statements, any additional information received from the Offeror, and any other publicly-available financial information concerning the Offeror, and assess each Offeror's financial capacity based on calculating and analyzing various financial ratios, and comparison with industry standards and trends.

An Offeror which fails to demonstrate sufficient financial capability to assure good faith performance of the contract as specified herein may be considered by the Issuing Office, in its sole discretion, for Best and Final Offers or contract negotiation contingent upon such Offeror providing contract performance security, in a form acceptable to the Issuing Office, for twenty percent (20%) of the contract value for the base term proposed by the Offeror. Based on the financial condition of the Offeror, the Issuing Office may require a certified or bank (cashier's) check, letter of credit, or a performance bond conditioned upon the faithful performance of the contract by the Offeror. The required performance security must be issued or executed by a bank or surety company authorized to do business in the Commonwealth. The cost of the required performance security will be the sole responsibility of the Offeror and cannot increase the Offeror's cost proposal or the contract cost to the Commonwealth.

Further, the Issuing Office will award a contract only to an Offeror determined to be responsible in accordance with the most current version of Commonwealth Management Directive 215.9, Contractor Responsibility Program.

III-6. Final Ranking and Award.

A. After any best and final offer process conducted, the Issuing Office will combine the evaluation committee's final technical scores, BSBO's final small diverse business participation scores, the final cost scores, and (when applicable) the domestic workforce utilization scores, in accordance with the relative weights assigned to these areas as set forth in this Part.

B. The Issuing Office will rank responsible offerors according to the total overall score assigned to each, in descending order.

C. The Issuing Office must select for contract negotiations the offeror with the highest overall score; PROVIDED, HOWEVER, THAT AN AWARD WILL NOT BE MADE TO AN OFFEROR WHOSE PROPOSAL RECEIVED THE LOWEST TECHNICAL SCORE AND HAD THE LOWEST COST SCORE OF THE RESPONSIVE PROPOSALS RECEIVED FROM RESPONSIBLE OFFERORS. IN THE EVENT SUCH A PROPOSAL ACHIEVES THE HIGHEST OVERALL SCORE, IT SHALL BE ELIMINATED FROM CONSIDERATION AND AWARD SHALL BE MADE TO THE OFFEROR WITH THE NEXT HIGHEST OVERALL SCORE.

D. The Issuing Office has the discretion to reject all proposals or cancel the request for proposals, at any time prior to the time a contract is fully executed, when it is in the best interests of the Commonwealth. The reasons for the rejection or cancellation shall be made part of the contract file.

PART IV

WORK STATEMENT

IV-1. Objectives. The objective of this procurement is to enter into a single agreement with a company or consortium of companies (with a single prime) that will provide the entire scope of services detailed within this RFP, which include but is not limited, to replacing the existing DPH, EDC and agency datacenter services. The resulting contract is intended to provide the entire suite of services with common invoicing/billing, communications, governance, management, support organization and interface. Program objectives are described in **Schedule F Section 2.1 Program Objectives.**

IV-2. Nature and Scope of the Project.

The Commonwealth is focused on an agency-wide datacenter modernization initiative. This initiative includes implementing a new datacenter service model that will provide various infrastructures/computing platforms to service the needs of the Commonwealth in a secure and flexible manner.

The Commonwealth currently has six (6) datacenters located within Commonwealth controlled (owned or leased) buildings. These datacenters provide computing services for the Commonwealth as a whole or for a specific agency. The Commonwealth has over the last several years been consolidating its datacenters into one of two enterprise datacenters. One of these datacenters is managed under an agreement with Unisys Corporation and the other is managed by the OA/OIT. The datacenter managed by Unisys Corporation is under an agreement that terminates on December 31, 2014.With more than $1 billion in information technology (IT) investments annually, the Commonwealth of Pennsylvania (Commonwealth) is the equivalent of a Fortune 20 organization providing a diverse portfolio of IT services and solutions to its 12.3 million citizens and business customers worldwide. Prior to 2006, these services and solutions were offered by more than 45 individual agencies, boards and commissions; each operating under its own mission and business objectives.

Executive Order 2004-8, as amended May 9, 2007, addresses the need for coordinated IT planning and resource utilization by directing the consolidation of agency information technology organizations under the Office for Information Technology.

As a result of this directive, the Commonwealth's approach to IT was published. The Chief Information Officer issued an IT Strategic Plan for 2012-2015. This plan can be viewed in its entirety at:

http://www.portal.state.pa.us/portal/server.pt/document/1218867/it_strategic_plan_2012-15_pdf

IV-3. Requirements. The following sections set forth the requirements of the Project. Offerors must address each requirement:

A. **Business and Technical Requirements.**

The business and technical requirements are detailed in **Schedule F** of this RFP.

B. **Office Location.**

The selected Offeror must maintain an office in the Harrisburg, PA area during the term of the contract. If the selected Offeror does not currently have an office in the Harrisburg, PA area, it must establish an office within two (2) months of award of the contract.

C. **Proposed Services.**

The selected Offeror shall not significantly alter or discontinue any Service defined in this RFP or proposed by the Offeror without prior written authorization from the Commonwealth.

D. **Service Catalog**

The Offeror must provide the Services listed in Schedule C - Services Catalog.

E. **Payment for Services**

The selected Offeror may bill for a Service, including those transitioned from the EDC, DPH or a Commonwealth Agency datacenter, once the Commonwealth accepts the Service via ITSM.

F. **Emergency Preparedness.**

To support continuity of operations during an emergency, including a pandemic, the Commonwealth needs a strategy for maintaining operations for an extended period of time. One part of this strategy is to ensure that essential contracts that provide critical business services to the Commonwealth have planned for such an emergency and put contingencies in place to provide needed goods and services.

1. Describe Offeror anticipates such a crisis will impact its operations.

2. Describe Offeror's emergency response continuity of operations plan. Please attach a copy of the plan, or at a minimum, summarize how the plan addresses the following aspects of pandemic preparedness:

   a) Employee training (describe Offeror's training plan, and how frequently it plan will be shared with employees)

   b) Identified essential business functions and key employees (within Offeror's organization) necessary to carry them out

   c) Contingency plans for:

      i.) How Offeror will handle staffing issues when a portion of key employees are incapacitated due to illness.

      ii.) How Offeror employees will carry out the essential functions if contagion control measures prevent them from coming to the primary workplace.

d) How Offeror will communicate with staff and suppliers when primary communications systems are overloaded or otherwise fail, including key contacts, chain of communications (including suppliers), etc.

e) How and when Offeror's emergency plan will be tested, and if the plan will be tested by a third-party.

IV-4. Tasks.

A. **Schedule F** of this RFP details the specific tasks and requirements that encompass the Project. The selected Offeror shall perform the tasks set forth in **Schedule F**.

B. **Schedules J.1, J.2, and J.3** details the Service Levels required by the Commonwealth.

IV-5. Reports and Project Control.

A. **Task Plans.** A work plan for each task that identifies the work elements of each task, the resources assigned to the task, and the time allotted to each element and the deliverable items to be produced. Where appropriate, a PERT or GANTT chart display should be used to show project, task, and time relationship. This Plan should identify the Offer's PMO establishment, Major Transition Tasks, and Major Steady State events throughout the term of this engagement.

B. **Status Reports.** Monthly progress reports covering activities, problems, risks and recommendations. This report should be keyed to the work plan the Offeror developed in its proposal, as amended or approved by the Issuing Office. During the Transition period of this project additional progress reports are required.

Monthly Service Level, Change Management, Incident/Problem, Operational, and Billing Reports are to be provided. These reports will be developed in cooperation with the Commonwealth during the early stages of the engagement.

C. **Problem Identification Reports.** An "as required" report, identifying problem areas. The report should describe the problem and its impact on the overall project and on each affected task. It should list possible courses of action with advantages and disadvantages of each, and include Offeror recommendations with supporting rationale.

IV-6. Contract Requirements—Small Diverse Business Participation.

All contracts containing Small Diverse Business participation must also include a provision requiring the selected contractor to meet and maintain those commitments made to Small Diverse Businesses at the time of proposal submittal or contract negotiation, unless a change in the commitment is approved by the BSBO. All contracts containing Small Diverse Business participation must include a provision requiring Small Diverse Business subcontractors to perform at least **50%** of the subcontracted work.

The selected contractor's commitments to Small Diverse Businesses made at the time of proposal submittal or contract negotiation shall, to the extent so provided in the commitment, be maintained throughout the term of the contract and through any renewal or extension of the contract. Any proposed change must be submitted to BSBO, which will make a recommendation to the Contracting Officer regarding a course of action.

If a contract is assigned to another contractor, the new contractor must maintain the Small Diverse Business participation of the original contract.

The selected contractor shall complete the Prime Contractor's Quarterly Utilization Report (or similar type document containing the same information) and submit it to the contracting officer of the Issuing Office and BSBO within **ten** (**10)** workdays at the end of each quarter the contract is in force. This information will be used to determine the actual dollar amount paid to Small Diverse Business subcontractors and suppliers. Also, this information will serve as a record of fulfillment of the commitment the selected contractor made and for which it received Small Diverse Business participation points. If there was no activity during the quarter then the form must be completed by stating "No activity in this quarter."

NOTE: EQUAL EMPLOYMENT OPPORTUNITY AND CONTRACT COMPLIANCE STATEMENTS REFERRING TO COMPANY EQUAL EMPLOYMENT OPPORTUNITY POLICIES OR PAST CONTRACT COMPLIANCE PRACTICES DO NOT CONSTITUTE PROOF OF SMALL DIVERSE BUSINESS STATUS OR ENTITLE AN OFFEROR TO RECEIVE CREDIT FOR SMALL DIVERSE BUSINESS UTILIZATION.

TERMS AND CONDITIONS

1. CONTRACT TERM

(a) The term of the Contract shall commence on the Effective Date and shall end in seven (7) years ("the Expiration Date"), subject to the other provisions of the Contract. The Effective Date shall be: a) the date the Contract has been fully executed by the Contractor and by the Commonwealth and all approvals required by Commonwealth contracting procedures have been obtained or b) the date referenced in the Contract, whichever is later. The Contract shall not be a legally binding contract until after the fully-executed Contract has been sent to the Contractor.

(b) The Commonwealth may, in its sole discretion, renew the Contract for three (3) one (1) year periods, or any combination thereof, on the terms and conditions in force at the date of the renewal and utilizing pricing to be negotiated but consistent with and no less favorable than the pricing in force at the date of the renewal. Further, the Commonwealth reserves the right to extend this Contract or any part of this Contract up to three (3) months, or as necessary to prevent a lapse in Contract coverage.

(c) The Commonwealth reserves the right to execute the Contract, Purchase Orders or any follow-up Contract documents in ink or electronically. The Contractor understands and agrees that the receipt of an electronically-printed Contract with the printed name of the Commonwealth purchasing agent constitutes a valid, binding contract with the Commonwealth. The printed name of the purchasing agent on the Contract represents the signature of that individual who is authorized to bind the Commonwealth to the obligations contained in the Contract. The printed name also indicates that all approvals required by Commonwealth contracting procedures have been obtained.

(d) The Contractor shall not start performance, and the Commonwealth shall not be liable to pay the Contractor for any supply furnished or work performed or expenses incurred, until all of the following have occurred:

(1) The Effective Date has arrived;

(2) The Contractor has received a copy of the fully executed Contract (or written notice from the Commonwealth that the Contract has been fully executed); and

(3) The Contractor has received a Purchase Order or other written notice to proceed signed by the Commonwealth Contracting Officer.

No Commonwealth employee has the authority to verbally direct the commencement of any work or delivery of any supply under this Contract prior to the Effective Date.

2. PURCHASE ORDERS

(a) The Commonwealth may issue Purchase Orders against the Contract. These orders constitute the Contractor's authority to make delivery. All Purchase Orders received by the Contractor up to and including the expiration date of the Contract are acceptable and must be performed in accordance with the Contract. Contractors are not permitted to accept Purchase Orders which require performance in excess of those performance time periods specified in the Contract. Each Purchase Order will be deemed to incorporate the terms and conditions set forth in the Contract.

(b) Purchase Orders will not include an ink signature by the Commonwealth. The electronically-printed name of the purchaser represents the signature of the individual who has the authority, on behalf of the Commonwealth, to authorize the Contractor to proceed.

(c) Purchase Orders may be issued electronically or through facsimile equipment. The electronic transmission of a purchase order shall require acknowledgement of receipt of the transmission by the Contractor.

(d) Contractor's acknowledgment of receipt of the electronic or facsimile transmission of the Purchase Order shall constitute receipt of an order.

(e) Purchase Orders received by the Contractor after 4:00 p.m. will be considered received the following business day.

(f) The Commonwealth and the Contractor specifically agree as follows:

(1) No handwritten signature shall be required in order for the Contract or Purchase Order to be legally enforceable.

(2) Upon receipt of a Purchase Order, the Contractor shall promptly and properly transmit an acknowledgement in return. Any order which is issued electronically shall not give rise to any obligation to deliver on the part of the Contractor, or any obligation to receive and pay for delivered products on the part of the Commonwealth, unless and until the Commonwealth agency transmitting the order has properly received an acknowledgement.

(3) The parties agree that no writing shall be required in order to make the order legally binding. The parties hereby agree not to contest the validity or enforceability of the Contract or a genuine Purchase

Order or acknowledgement that have been issued electronically under the provisions of a statute of frauds or any other applicable law relating to whether certain agreements shall be in writing and signed by the party bound thereby. The Contract and any genuine Purchase Order or acknowledgement issued electronically, if introduced as evidence on paper in any judicial, arbitration, mediation, or administrative proceedings, will be admissible as between the parties to the same extent and under the same conditions as other business records originated and maintained in documentary form. Neither party shall contest the admissibility of copies of the Contract or any genuine Purchase Order or acknowledgements under either the business records exception to the hearsay rule or the best evidence rule on the basis that the Contract or Purchase Order or acknowledgement were not in writing or signed by the parties. A Purchase Order or acknowledgment shall be deemed to be genuine for all purposes if it is transmitted to the location designated for such documents.

(4) Each party will immediately take steps to verify any document that appears to be obviously garbled in transmission or improperly formatted to include re-transmission of any such document if necessary.

(g) Purchase Orders under five thousand dollars ($5,000) in total amount may also be made using a Commonwealth Procurement VISA Card in person or by telephone. When an order is placed by telephone, the Commonwealth agency shall provide the agency name, employee name, credit card number, and expiration date of the card. The Contractor agrees to accept payment through the use of the Commonwealth Procurement VISA card.

3. IDENTIFICATION NUMBER

The Contractor must have a SAP Vendor Number.

4. ORDER OF PRECEDENCE, DEFINITIONS AND CONSTRUCTION

(a) If any conflicts or discrepancies should arise in the terms and conditions of this Contract, or the interpretation thereof, the order of precedence shall be:

(1) This Contract (first, the Contract, including the terms and conditions, second the Schedules and Appendices); then

(2) The Contractor's Proposal (including the clarifications and the Best and Final Offer), as accepted by the Commonwealth; and then

(3) The RFP.

(b) Except as otherwise expressly provided in the Contract, all capitalized terms used in the Contract shall have the meanings set forth in *Schedule A* (Defined Terms).

(c) Interpretation:

(1) The terms defined in the Contract include the plural as well as the singular and the derivatives of such terms. Unless otherwise expressly stated, the words "herein," "hereof," and "hereunder" and other words of similar import refer to the Contract as a whole and not to any particular Paragraph, Section, subsection or other subdivision. The words "include" and "including" shall not be construed as terms of limitation.

(2) Headings preceding the text of Paragraphs or Sections, and headings to Schedules and Appendices, the table of contents and the table of Schedules and Appendices included in or attached to the Contract are used for convenience only and are not to be considered in construing or interpreting the Contract.

(3) References to any law refer to such law in changed or supplemented form, or to a newly adopted law replacing a previous law.

(4) Except as may be expressly set forth herein, all references to time herein refer to Eastern Standard Time or Eastern Daylight Time, as applicable.

(d) The Contract includes each Schedule, Exhibit and Appendix referenced herein, all of which are incorporated into the Contract by this reference

5. CONTRACT INTEGRATION

(a) This Contract, including the Contract signature pages, together with the Contractor's Proposal, the Contractor's clarifications and the Contractor's Best and Final Offer, and the RFP and addenda thereto that are incorporated herein by reference, constitutes the final, complete, and exclusive Contract between the parties containing all the terms and conditions agreed to by the parties.

(b) All representations, understandings, promises, and agreements pertaining to the subject matter of this Contract made prior to or at the time this Contract is executed are superseded by this Contract.

(c) There are no conditions precedent to the performance of this Contract except as expressly set forth herein.

(d) No contract terms or conditions are applicable to this Contract except as they are expressly set forth herein.

6. SERVICES

(a) The Contractor agrees to provide the Services to the Commonwealth as such services are defined in this Contract, the RFP and the Contractor's Proposal, and in accordance with the terms of this Contract.

(b) The Contractor shall provide to Commonwealth the following Services pursuant to the terms of the Contract:

(1) Commencing as of the Effective Date, the Transition Services set forth in *Section 14* (Transition) and *Schedule D* (Transition Milestones);

(2) Commencing as of the Effective Date and continuing until the Expiration Date:

(i) The services, function and responsibilities described in the Contract, including the Services set forth in (Services Catalog) and *Schedule F* (Statement of Work);

(ii) Any incidental services, functions or responsibilities not specifically described in the Contract, but which are inherent or required for the proper performance and delivery of the Services; and

(iii) The services, functions and responsibilities related to those categories of Services which Contractor is assuming pursuant to the Contract; and

(3) Commencing upon written notice by Commonwealth to Contractor in accordance with *Section 33* (Termination Assistance).

(c) The services set forth in (1) through (3) above shall be collectively referenced as the "Services," as they may evolve during the Term of the Contract or be supplemented, enhanced, modified or replaced pursuant to the terms hereof. The Services provided under this Contract are not exclusive to Contractor. The Commonwealth may in-source or re-procure any or all of the Services.

(d) The Commonwealth may request a change to the Services through a "*Request for Services*" to increase or decrease the amount of the Services provided under this Contract, according to Commonwealth's demand for the Services. The parties shall use the Change Control Procedures to implement the changes required by the *Request for Services* and revise the Fees as applicable.

(e) Except as may be necessary on an emergency basis to maintain the continuity of the Services or in the event of a declared disaster, Contractor shall not, without Commonwealth's written consent, modify (1) the composition of the Services, (2) the manner in which the Services are to be provided or delivered if such modification would have an adverse effect on the operations of Commonwealth, or (3) the applicable Services Levels.

(f) Except as otherwise expressly provided in this Contract, Contractor is responsible for providing, and is financially and operationally responsible for, the Facilities, Personnel, Equipment, Materials, technical knowledge, expertise and other resources necessary to provide the Services (including all upgrades, improvements, replacements and additions to such resources).

(g) Contractor acknowledges that Commonwealth encourages Contractor to provide the Services in a shared data processing environment, if such environment will materially reduce Commonwealth's costs under this Contract and can be accomplished within the confidentiality and physical security constraints imposed upon Contractor elsewhere in this Contract. Accordingly, upon the migration of any of Commonwealth's data processing to a Contractor Services Location, Contractor may provide the related Services from such Contractor Services Location in a shared data processing environment if Contractor reasonably believes such environment will materially reduce Commonwealth's costs under this Contract and if such shared environment and Contractor's use thereof to provide the Services otherwise comports with the terms of this Contract. Commonwealth reserves to itself the right of prior approval of any third party proposed by Contractor to share such data processing environment, such approval not to be unreasonably withheld. Contractor acknowledges that Commonwealth will be entitled to withhold its approval of any such third party if, among other things, there is no or insufficient economic benefit to Commonwealth from the proposed sharing arrangement or if any federal or state confidentiality issues are not resolved to the satisfaction of the applicable federal or state governmental entity.

(h) **Technical Architecture and Product Standards**. As part of the Services, Contractor shall suggest to Commonwealth information management technical architecture and product standards to be in effect at the Contractor Services Locations during the Term and the parties shall work together in good faith to develop information management technical architecture and product standards that are mutually acceptable to the parties and consistent with the Services Levels then in effect.

(i) **Remote Access Capabilities**. As part of the Services, Contractor shall provide remote access capabilities for use by authorized personnel of the Commonwealth. All such remote access capabilities shall meet or exceed all Commonwealth technology and security standards as set forth in *Section 12* (Service Locations).

(j) **Contractor Licenses and Permits**. As part of the Services, Contractor is responsible for obtaining, and has financial responsibility for, all necessary licenses, consents, approvals, permits and authorizations that are legally required to be obtained in order for Contractor to perform the Services. Commonwealth shall reasonably cooperate with and assist Contractor in obtaining any such licenses, consents, approvals, permits and authorizations. Notwithstanding the foregoing, Commonwealth will retain responsibility for obtaining, and the financial responsibility for, all necessary licenses, consents, approvals, permits and authorizations necessary to enable Contractor and its subcontractors to use the Commonwealth Software to the extent necessary for Contractor's performance of the Services and with Contractor's cooperation as further described in *Section 8* (Commonwealth Third Party Software), and Contractor will cooperate, and will cause the Contractor agents to cooperate, in good faith and at no additional cost to Commonwealth, in obtaining such licenses, consents, approvals, permits and authorizations.

(k) **Changes in Law and Regulations**. Each party shall identify, and notify the other party of, any changes in applicable statutes, regulations, or policies that may directly or indirectly relate to Contractor's performance of the Services. Contractor and Commonwealth shall work together to identify any impact of such changes upon Commonwealth's use, or Contractor's delivery, of the Services. Contractor shall be responsible for any fines and penalties arising from its noncompliance with any such identified statutes, regulations, or policies relating to the business of providing the Services and shall not be responsible for any fines and penalties assessed against Commonwealth by federal governmental entities from Commonwealth's noncompliance with any federal legislative enactments or federal regulatory requirements relating to Commonwealth's operations that does not result from Contractor's actions or inactions under this Contract. As part of the Services, Contractor shall, if possible, perform the Services regardless of changes in legislative enactments or regulatory requirements. If such changes prevent Contractor from performing any of its obligations under this Contract or increase Contractor's costs in connection therewith, Contractor shall provide written notice thereof to Commonwealth within five (5) days of learning of the change and, if possible, will develop and implement a suitable workaround until such time as Contractor can fully perform its obligations under this Contract without such workaround. Contractor shall bear any costs relating to any legislative enactments and regulatory requirements relating to its business, and Commonwealth shall bear all reasonable out of pocket expenses, excluding attorneys fees, incurred by Contractor relating to legislative enactments and regulatory requirements that require modification of the Services by Contractor. If the parties are unable to agree as to the allocation of such costs, the changes and costs that are the subject of this *Section 6(k)* shall be subject to the Change Control Procedures.

(l) **Access**. Upon Contractor's receipt of appropriate, advance notice (which except in an emergency situation shall not be less than three (3) business days) and subject to Contractor's reasonable security requirements, authorized representatives of Commonwealth, Commonwealth agents and agents of the Federal government shall be permitted access to any Contractor Services Location.

7. Equipment

Contractor shall provide the Services using the Equipment. Commonwealth shall provide Contractor with the required access and authorization to use the Commonwealth Machines.

(a) **Replacement and Upgrades of the Equipment**.

(1) Contractor shall maintain, replace and upgrade the Contractor Machines at its sole cost and expense. At its sole cost and expense, Contractor shall maintain the Commonwealth Machines and shall replace each Commonwealth Machine at its respective end of life or as otherwise required to provide the Services. All replacements and upgrades shall be addressed through the Change Control Procedure. Commonwealth agencies will work closely with the Office of Administration and Contractor to accurately plan for any additional just-in-time technology refresh and upgrade deployment as may be necessary for Contractor to perform the Services in accordance with the Services Levels while meeting new or increased demands of the agencies. Contractor acknowledges that all such replacements and upgrades shall consist of the then current technology; that is, Contractor will not extend use of then obsolete technology by increasing its capacity with additional hardware capacity if newer, proven technology is then available. In the case of all such replacement or upgrades, Contractor shall provide advance notice via the Change Control Procedure, reasonable under the circumstances to Commonwealth, and such replacement or upgrade shall be subject to Commonwealth's approval, including, without limitation, the approval of the contemplated implementation schedule and cost. If Commonwealth withholds its approval of such replacement, upgrade or contemplated schedule, the Contractor Project Manager and the Commonwealth Project Manager, in good faith and subject to the Change Control Procedures, will determine the appropriate adjustments to the Services Levels.

(2) In addition to the foregoing obligations of Contractor under this *Section 7* (Equipment). Contractor shall provide Commonwealth with information regarding additional Improved Technology for Commonwealth's evaluation in connection with the Services, to the extent then known to Contractor, and shall meet with Commonwealth

at least two (2) times during each Contract year to inform Commonwealth of any Improved Technology Contractor is developing or information processing trends and directions of which Contractor is aware. Upon the existence of any such additional Improved Technology that the parties believe would materially improve the performance, or reduce the cost, of the Services, (other than the required upgrades and replacements provided for above), the parties will meet and discuss in good faith the terms upon which such Improved Technology may be implemented into the Services. The parties acknowledge their intent, in such discussions, to develop terms for such implementation that will result in an equal sharing by the parties of the net economic benefit that is expected to result therefrom with the Fees adjusted accordingly (after taking into account Contractor's cost of the related hardware, software and implementation efforts). Upon any such projected reduction of the cost of the Services, the parties, working together in good faith, shall revise the Fees accordingly.

(b) **Equipment Maintenance**. As part of the Services, Contractor shall provide to Commonwealth maintenance and support services in respect of the Equipment and shall, at its own cost and expense, maintain and support the Contractor Machines as necessary for Contractor to perform the Services in accordance with the Services Levels. All costs and expenses incurred in connection with the provision of maintenance and support services in respect of the Equipment (including third party maintenance fees) shall be the responsibility of Contractor.

8. THIRD PARTY SOFTWARE

(a) As part of the Services, Contractor shall have operational responsibility for the Commonwealth Third Party Software for which Commonwealth has a valid license and current maintenance agreement ("Commonwealth Third Party Software") and shall be responsible for applying upgrades, enhancements and fixes as provided and directed by the applicable agency. The Commonwealth shall have financial responsibility for any Commonwealth Third Party Software license, upgrade, maintenance and support fees, except that Contractor shall be responsible for any third-party consulting fees in connection with the installation or implementation of any software upgrade, revision or replacement required by Contractor.

(b) As part of the Services, Contractor shall have financial, administration, operational and maintenance responsibility for all Contractor Software and Third Party Software provided by the Contractor as part of the Services, including but not limited to the Third Party Software listed in *Exhibit B.4.*

(c) As part of the Services, except for the cost of the license, Contractor shall have financial, administration, operational and maintenance responsibility for the Third

Party Software listed in *Exhibit B.10,* for which the Commonwealth has a valid license ("Hybrid Third Party Software").

(d) The Contractor shall not require the Commonwealth to sign a software license agreement for any Contractor Software or Third Party Software, including but not limited to any click through agreement or other terms purported to apply to the software.

(e) The Commonwealth will continue to support and maintain the software owned by the Commonwealth ("Commonwealth Proprietary Software") as necessary for Contractor's performance of the Services.

9. DATA SECURITY

(a) Commonwealth will retain administration of logical and data access security, and Contractor will host Commonwealth security applications software utilized by the Commonwealth in managing logical and data access security, and will not implement configurations that would prevent Commonwealth from managing logical and data access security. As part of the Services, Contractor shall implement and maintain the Commonwealth's safeguards against the disclosure, destruction, loss or alteration of the Commonwealth Data in the possession of Contractor in accordance with the terms of this Contract and with Commonwealth's other security policies and procedures provided, in writing, to Contractor. In any event, Contractor, as part of the Services, is required to meet or exceed the most stringent of any applicable federal or state law, statute, rule or regulation applicable to Contractor's and/or Contractor's Agents possession of, or access to, any Commonwealth Data (which includes *Section 12(d)*, herein). All changes or additions to any such Commonwealth security policies or procedure or any changes to any applicable federal or state law, statute, rule or regulation shall be implemented by Contractor. Any changes or additions which result in a material additional cost to Contractor shall be subject to the Change Control Procedures. To the degree such change applies to other Contractor customers, Contractor will mitigate the Commonwealth's economic exposure to additional cost by equitably spreading the additional cost of compliance to its multiple customers.

(b) The Contractor shall not store the Commonwealth Data outside of the continental United States of America.

(c) All of Contractor's activities relating to the safeguarding of Commonwealth Data shall be subject to periodic review and monitoring by Commonwealth and related Federal agencies, and Contractor shall cooperate fully with all such reviews and monitoring. In addition to, and not in limitation of, any restrictions set forth elsewhere in this Contract, Contractor shall have operational access to the Commonwealth Data only on an as-needed basis.

(d) Upon request at any time during the term of this Contract, or upon termination, cancellation, expiration or other conclusion of the Contract, Contractor shall return the Commonwealth Data to the Commonwealth or, at the Commonwealth's request, destroy the Data. If the Commonwealth request Contractor to destroy the Data, the Commonwealth shall have the right to conduct an audit to ensure the Data has been destroyed. This provision shall also apply to all Commonwealth Data that is in the possession of subcontractors or agents of Contractor. Contractor shall complete such return or destruction within ten (10) days of the request or after the conclusion of this Contract. Within such ten (10) day period, Contractor shall certify in writing to Commonwealth that such return or destruction has been completed. Contractor shall make available to the Commonwealth for a complete and secure (i.e. encrypted and appropriately authenticated) download file of the Commonwealth Data in XML format, or such other format as specified by the Commonwealth, including all schema and transformation definitions and/or delimited text files with documented, detailed schema definitions along with attachments in their native format. Contractor shall be available to answer questions about data schema, transformations, and other elements required to fully understand and utilize the Commonwealth's data file. Unless the Commonwealth agrees or specifies otherwise, the Contractor shall also deliver to the Commonwealth any copies, duplicates, summaries, abstracts or other representations of any such Commonwealth Data or any part thereof, in whatever form, then in the Contractor's possession or control in accordance with the "NIST Guidelines for Media Sanitization" (SP 800-88).

(e) Contractor shall comply with all state and Federal data breach laws, including but not limited to the Commonwealth Breach of Personal Information Notification Act (73 P.S. § §2301 *et seq*.). In the event Contractor or any of Contractor's Agents discover or are notified of a data breach or potential breach of security involving any of the Commonwealth Data, Contractor shall immediately notify the Commonwealth Project Manager and the Commonwealth's Chief Information Security Officer of the same and describe the nature of the breach, the Data compromised, the involved parties, mitigation efforts, and corrective actions to be taken by the Contractor. In addition, at Commonwealth's request and at Contractor's sole cost and expense, Contractor shall:

(1) Promptly provide Commonwealth Data security reports to Commonwealth in a form to be agreed upon by Commonwealth and Contractor; and

(2) Cooperate with any efforts by Commonwealth to investigate or prosecute any breach of security of the Commonwealth Data; and

(3) Provide credit monitoring services to all individuals or organizations that may be impacted by the security breach.

Contractor shall be solely responsible for any costs, losses or damages actually incurred by the Commonwealth due to Personal Information being accessed, used, released, disclosed and/or acquired in an unauthorized manner while in the possession and control of the Contractor or its employees, agents, and/or subcontractors. In the event of any data breach by Contractor or any of the Contractor Agents involving any of the Commonwealth Data, Contractor shall be assessed a credit against Fees due for Service provided during the period of breach of security.

(f) Credit Card Information

(1) By providing the Services under this Contract, the Contractor may create, receive, or have access to credit card records or record systems containing cardholder data including credit card numbers (collectively the "Cardholder Data"). Contractor shall comply with the Payment Card Industry Data Security Standard ("PCI DSS") requirements for Cardholder Data that are prescribed by the payment brands (including but not limited to Visa, MasterCard, American Express, and Discover), as they may be amended from time to time. Contractor acknowledges and agrees that Cardholder Data may only be used for assisting in completing a card transaction, for fraud control services, for loyalty programs, or as specifically agreed to by the payment brands, for purposes of this Contract or as required by applicable law.

(2) Contractor shall conform to and comply with the PCI DSS standards as defined by The PCI Security Standards Council at: https://www.pcisecuritystandards.org/security_standards/index.php. Contractor shall monitor these PCI DSS standards and will promptly notify the Commonwealth if its practices should not conform to such standards. Contractor shall provide a letter of certification to attest to meeting this requirement within one week of Contractor's receipt of the annual PCI DSS compliance report.

10. CONDUCT OF SERVICES

(a) Following execution of the Contract, Contractor shall proceed diligently with all Services and shall perform such Services with qualified personnel, in accordance with the completion criteria set forth in the Contract.

(b) The Contractor's Services hereunder shall be monitored by the Commonwealth and the Commonwealth's designated representatives. If the Commonwealth reasonably determines that the Contractor has not performed to the requirements in the Contract or has otherwise exposed the Commonwealth to material risk, the Commonwealth and the Contractor will attempt to reach agreement with respect to such matter. Failure of the Commonwealth or the

Contractor to arrive at such mutual determinations shall be a dispute concerning a question of fact within the meaning of *Section 34* (Contract Controversies) of this Contract.

(c) As part of the Services, Contractor shall conduct enterprise-wide Commonwealth Satisfaction Surveys, which surveys shall be conducted annually until completion of the Transition. Upon completion of the Transition, Contractor shall conduct the Commonwealth Satisfaction Surveys semi-annually for two years and annually thereafter.

11. QUALITY ASSURANCE AND INTERNAL CONTROLS

(a) Contractor will develop and implement quality assurance and internal controls, including implementing tools and methodologies, to ensure that the Services are performed in an accurate and timely manner, in accordance with the Contract. Without limiting the foregoing, Contractor will:

(1) Maintain a strong control environment in day-to-day operations;

(2) Develop and execute a process to ensure regular internal control self-assessments are performed with respect to all Services and report the outcome of such self-assessments to the Commonwealth;

(3) Maintain an internal audit function sufficient to monitor the processes and systems used to provide the Services (i.e., perform audits, track control measures, communicate status to management, drive corrective action, etc.); and

(4) Provide to Commonwealth a summary of audit activity performed, associated significant findings, status of follow-up activity, summary of control incidents (i.e., frauds, conflict of interest situations, etc.) and related corrective action, every six (6) months.

(b) As part of the Services and included in the Fees, Contractor shall:

(1) Implement and maintain independently audited quality certification (ISO 27001, ISO 9001 and ISO/IEC 20000 accreditation) and provide copies of its certification under such program and also any relevant audit or report documentation whenever so requested by the Commonwealth.

(2) Maintain valid security certifications including CISSP (Certified Information Systems Security Professional) or Comp TIA-Security+ or CASP and provide copies of its certification under such program and also any relevant documentation whenever so requested by the Commonwealth.

(3) Maintain compliance with Federal and State mandated policies including CJIS (Criminal Justice Information Services) and CHRIA (Criminal History Record Information Act) and provide copies of any relevant documentation whenever so requested by the Commonwealth.

(4) Undertake at least annually, and shall cause to be undertaken by Contractor's material subcontractors, a SSAE 16 Type II audit that covers the common controls for any Contractor sites where Contractor performs work for the Commonwealth; provide the reports from such audits to the Commonwealth; and perform these SSAE 16 Type II audits at such time(s) that shall mean the audit report is recent enough for Commonwealth to rely upon it in meeting its reporting obligations.

12. SERVICE LOCATIONS

(a) **Services Locations**. The Services shall be provided from and to the Service Locations as detailed in *Schedule E* (Datacenter Locations). Contractor shall not (1) provide the Services from a location other than a Service Location or (2) use the Commonwealth Enterprise Data Center to provide services to a third party without Commonwealth's consent. Authorized representatives of Commonwealth, Commonwealth agents and agents of the Federal government shall be permitted access to any Services Location, subject to the terms of *Section 12(d)*.

(b) **Location of Performance.** Except where Contractor obtains the Commonwealth's prior written approval, Contractor shall perform all of the Services only from or at locations within the geographic boundaries of the continental United States. Any Commonwealth approval for the performance of Services outside of the continental United States shall be limited to the specific instance and scope of such written approval, including the types of Services and locations involved.

(c) Right to Audit and Inspect:

(1) The Contractor shall permit the Commonwealth (or a third-party provider selected by the Commonwealth) to perform an onsite inspection of the Contractor's Service Locations, infrastructure and security practices as reasonably requested by the Commonwealth, but no more than once per month.

(2) The Commonwealth shall have the right to request third-party audits and/or certifications related to each Serve Location's infrastructure and security, including penetration testing and vulnerability assessments. Any reports produced from these audits

and certifications will be provided to the Commonwealth for review at no cost.

(3) The Contractor shall provide the Commonwealth infrastructure and security specifications in written format for each Service Location as requested and at no cost to the Commonwealth.

(4) The Contractor shall provide the Commonwealth access to the performance records of the Contractor, as well as access to daily and weekly service quality statistics as requested and at no cost to the Commonwealth.

(d) Security Procedures

(1) As part of the Services, Contractor shall maintain and enforce environmental and physical security standards and procedures at each of the Contractor Services Locations and shall comply with environmental and physical security procedures as described in *Schedule F* (COPA Datacenter Statement of Work) and pursuant to the physical security and environmental chapters of the Commonwealth Computing Procedures Manual, which compliance will be confirmed by Contractor's SSAE 16 Type II audit report which will be delivered to the Commonwealth. If the Commonwealth requests any changes to environmental and security standards after the Effective Date and such changes would subject Contractor to material additional costs, those changes will be addressed through the Change Control Procedures. In addition, each Contractor Services Location must meet a minimum of Class C2 controlled access protection as defined in the Federal Department of Defense Trusted Computer System Evaluation (DOD 5200.28-STD).

(2) Each Commonwealth Agency's specific security requirements must be satisfied prior to the migration of its data or processing activities to any Contractor Services Location, including any facilities to be used to support Disaster Recovery. Contractor shall maintain a log recording all entry to any Contractor Services Location, which log shall at all times be subject to Commonwealth review and audit. All of Contractor's security procedures required under this Contract shall be subject to periodic review by Commonwealth, any Commonwealth Agency or any agency of the United States federal government directly or indirectly having any dealings with any Commonwealth Agency.

(3) Contractor, as part of the Services, shall address any concerns any such reviewing entity may have regarding those security procedures and, if Commonwealth is not the reviewing entity, shall promptly

inform Commonwealth of the expressed concerns and its plans to address the same. Contractor acknowledges that, because Commonwealth is a governmental entity, Commonwealth is subject to various federal and state statutory and regulatory confidentiality and security requirements, all of which will be binding upon Contractor during the Term. This Contract and the business relationship between Commonwealth and Contractor will be subject to review and approval by impacted Commonwealth Agencies and impacted federal agencies and other entities. At a minimum, Contractor will be required to comply with the Privacy Act of 1974, as amended (42 U.S.C.A. 2000, *et seq.*), the Drivers Privacy Protection Act, as amended (18 U.S.C.A. 2721, *et seq.*), the Tax Information Security Guidelines promulgated by the Internal Revenue Service; and various confidentiality regulations promulgated by the U.S. Department of Health and Human Services, all as though Contractor were a governmental entity. Contractor will also be required to comply with the Health Insurance Portability and Accountability Act of 1996, Pub.L. 104-191 (HIPAA) and the regulations promulgated related thereto (45 C.F.R. 160.101, *et seq.*) as a Business Associate as that term is defined by HIPAA according to the Business Associate Contract included as Appendix A (which Contract shall apply to covered portions of the Commonwealth as a hybrid entity as agencies direct, and which Contract shall govern only insofar as no other more stringent law otherwise applies to that data, and only insofar as the Contract does not conflict with more stringent provisions of this Amendment, where "more stringent" is defined as in 45 C.F.R. 160.202). If and only to the extent specifically required in writing by a federal agency, in order for Contractor to be granted operational access to Commonwealth Data in connection with its performance of the Services, Contractor may be appointed as an agent of Commonwealth for the limited purpose of having operational access to certain Commonwealth Data not as a contractor of Commonwealth, but as an agent of Commonwealth having an agent's fiduciary obligations to Commonwealth as its principal. Contractor shall deliver to Commonwealth written notice of any breach of such security standards and procedures of which Contractor then has knowledge, which notice shall be delivered as promptly as is reasonable under the circumstances. Any breach by Contractor of such security standards or procedures under this *Section 12(d)* shall be subject to the provisions of *Section 30* (Default). As more fully set forth in *Section 59* (Independent Capacity of Contractor), parties to this Contract agree that the Services performed by the Contractor under the terms of this Contract are performed as an independent contractor.

13. CONDITIONS OF CONTRACTOR'S OCCUPANCY OF COMMONWEALTH-PROVIDED REAL PROPERTY

(a) General

(1) The Contractor shall use and occupy the property provided by the Commonwealth (the "Enterprise Data Center") continuously as a data processing center and for related administrative uses. No other use shall be permitted. A summary of the Enterprise Data Center is attached to the RFP and incorporated herein as *Exhibit D.7* (EDC Summary and Requirements).

(2) The Contractor shall have the sole responsibility to comply with all federal, state, and municipal laws, ordinances and regulations in its use and occupancy of the property.

(3) The Contractor agrees to accept the property in an "as-is" condition. The Contractor agrees that the Commonwealth extends no warranty of any kind, express or implied, in regard to the property provided to the Contractor for its use.

(4) The Commonwealth is immune from the payment of real estate taxes. If any relevant taxing authority deems the use of the property by the Contractor to cause the property to become taxable, the Contractor shall have sole responsibility for the timely payment of any tax levied. Payment of such taxes may be temporarily withheld if Contractor is, in good faith, contesting the assessment or tax in a court of competent jurisdiction.

(5) The Contractor agrees that this Contract does not grant or otherwise convey any legal interest in the real property to the Contractor.

(b) Upkeep and Improvements

(1) The Contractor, at its sole cost and expense, is responsible for all maintenance, security and upkeep of the property under its control. The Contractor agrees to keep the property in substantially the same condition as it was upon the Effective Date of the Contract.

(2) Except for minor, non-structural alterations costing less than $10,000, any and all Contractor alterations and additions to the Property shall be performed in accordance with plans and specifications prepared by a Pennsylvania-licensed architect and/or engineer. The Contractor shall submit plans and specifications to the Office of Administration and the Department of General Services concurrently for approval prior to initiation of

construction. Any and all alterations to the Property shall be performed in a good and workmanlike manner, in conformity with all laws, rules, ordinances and other requirements of all governmental entities having jurisdiction. The Department of General Services and the Office of Administration reserve the right to specify standards that must be maintained for any alterations and additions to the Property.

(3) The Contractor is solely responsible for all costs and expenses associated with any Contractor alterations or additions.

(4) The Contractor shall fully comply with Pennsylvania law governing contracting for construction, alteration or repair of a public building, including but not limited to the Prevailing Wage Act, Steel Products Procurement Act, and the Uniform Construction Code.

(5) To the fullest extent permitted by law, all Contractor contracts for alterations and additions must include a "No-Lien" clause requiring that the Property be kept free from mechanics' or materialmens' liens and that the parties must file the necessary documentation in the appropriate public offices to effectuate waivers of contractors', mechanics' and materialmens' liens.

(6) Any and all alterations and additions made to the property by either the Contractor or the Commonwealth shall become part of the real estate and become the property of the Commonwealth.

(c) Utilities

Contractor shall have installed, at its sole cost, separate electric meters and distribution panels to support the raised floor compute space. The Contractor will be responsible to timely reimburse the Commonwealth for electricity consumed in the raised floor compute space.

(d) Reserve Account

Contractor shall establish a capital improvement fund ("Reserve Account") into which Contractor shall deposit monthly ($84,000) dollars. The Reserve Account shall be cumulative, intended for capital improvements or major repairs to the Enterprise Data Center and disbursements from which shall be made only upon mutual agreement of the Commonwealth and the Contractor. Any remaining sums in the Reserve Account at termination of this Agreement shall be paid or credited to the Commonwealth. In the event that at any time during the term of this Contract sums in the Reserve Account are insufficient to

cover the cost of an agreed-to capital improvement or major repair, Contractor shall be reimbursed by the Commonwealth in an amount equal to such insufficiency. Contractor shall provide the Commonwealth at least semi-annually a report of all activity in the Reserve Account.

(e) Termination Assistance

Contractor shall vacate the Enterprise Data Center and return to the Commonwealth, if not previously returned, any resources that are implicated by the relevant Assistance Event, as described in *Section 33* (Termination Assistance), and that are owned, leased or licensed by the Commonwealth or any Commonwealth Contractor, including the Commonwealth owned or leased Equipment, the Commonwealth Owned Materials and the Commonwealth licensed Materials, in condition at least as good as the condition of such facilities and resources when they were made available to Contractor, ordinary wear and tear excepted. Such facilities and resources shall be vacated and/or returned as of the later of the effective date of the relevant Assistance Event and the completion of the Termination Assistance requiring such facilities or resources.

14. TRANSITION

(a) **Transition.** Contractor shall perform the Transition Services, including provision of the deliverables described in the Detailed Transition Plan. Contractor shall accomplish the Transition in a transparent, seamless, orderly, and uninterrupted manner. Contractor's responsibilities with respect to the transition include:

(1) Transfer of the Services to Contractor and subsequent transition of the Services to realize any planned cost reductions and Service performance improvements in accordance with the Transition Plans agreed to by Commonwealth and including a number of Transition Milestones;

(2) Performing the transition without disruption to Commonwealth's operations;

(3) Assuming responsibility for all costs associated with the transition; and

(4) Otherwise performing such transition and migration tasks as are necessary to enable Contractor to provide the Services in accordance with the terms of the Contract, including the applicable Service Levels.

(b) **Transition Plan.** The preliminary Transition Plan is attached to this Contract as part of Contractor's Proposal. Contractor shall complete, and submit to

Commonwealth for review a final Detailed Transition Plan on or before the date set forth in *Schedule D* (Transition Milestones). If a Detailed Transition Plan submitted by Contractor is not acceptable to Commonwealth, Contractor will address and resolve any questions or concerns Commonwealth may have and will promptly incorporate any modifications, additions or deletions requested by Commonwealth. Contractor will revise and resubmit the Detailed Transition Plan until accepted by Commonwealth. Upon Commonwealth's acceptance, the Detailed Transition Plan shall automatically be incorporated into this Contract as *Schedule M* (Detailed Transition Plan) and shall supersede and replace all prior Transition Plans. The Detailed Transition Plan shall detail the specific activities to be performed by each Party, and, unless otherwise requested by Contractor and agreed to by Commonwealth in its sole discretion, shall be consistent in all material respects with any preliminary Transition Plan, including with respect to the activities, deliverables, Transition Milestones, and Transition Milestone Credits described therein. The Detailed Transition Plan may thereafter be amended as mutually agreed by the Parties.

The Parties recognize and agree that time is of the essence for a successful Transition and have designated certain actions and projects in the Detailed Transition Plan as Transition Milestones (“Transition Milestones”). Contractor shall achieve all such Transition Milestone by the date corresponding thereto in *Schedule D* (Transition Milestones). Without limiting the foregoing, the Detailed Transition Plan shall specify, among other things,

(i) the deliverables to be completed by Contractor,

(ii) the date(s) by which each such activity or deliverable is to be completed (the "Transition Milestones"),

(iii) a process and set of standards to which Contractor shall adhere in the performance of the Transition Services and that shall enable Commonwealth to determine whether Contractor has successfully completed the transition and the activities and deliverables associated with each Transition Milestone,

(iv) any transition responsibilities to be performed or transition resources to be provided by Commonwealth and/or Commonwealth Customers,

(v) any transition responsibilities to be performed or transition resources to be provided by another Commonwealth Contractor, and

(vi) a detailed description of the processes and procedures that Contractor will implement (and associated implementation schedules) to effect the seamless integration and coordination

of the Services with related services to be provided by other Commonwealth Contractors.

The Detailed Transition Plan shall identify any related documents contemplated by this Contract and/or required to effectuate the transition that shall be executed by either of the Parties.

(c) **Performance**. Contractor shall perform the Transition Services in accordance with the timetable and the Transition Milestones set forth in the Transition Detailed Plan. Contractor shall assist Commonwealth in connection with Commonwealth's evaluation or testing of the deliverables set forth in the Detailed Transition Plan. Except as otherwise expressly stipulated in the Detailed Transition Plan, Contractor shall perform the Transition Services in a manner that shall not (i) disrupt or have an unnecessary adverse impact on the activities or operations of Commonwealth or the Commonwealth Customers, (ii) degrade the Services then being received by Commonwealth or the Commonwealth Customers or (iii) disrupt or interfere with the ability of Commonwealth or the Commonwealth Customers to obtain the full benefit of the Services. In Contractor's performance and completion of Transition Services, no functionality of Commonwealth's then current business operations or environment will be discontinued until Contractor demonstrates to Commonwealth's reasonable satisfaction that the affected processes and operations have been successfully migrated to Contractor's target environment and are functioning properly in that environment.

Without limiting its obligations or responsibilities, prior to undertaking any transition activity, Contractor shall discuss with Commonwealth and the relevant Commonwealth Customers all known Commonwealth and Commonwealth Customer-specific material risks and shall not proceed with such activity until Commonwealth is reasonably satisfied with the plans with regard to such risks (provided that, neither Contractor's disclosure of any such risks to Commonwealth, nor Commonwealth's acquiescence in Contractor's plans, shall operate or be construed as limiting Contractor's responsibility under this Contract). Contractor will, at Commonwealth's request, participate in transition meetings with other Commonwealth Contractors. Commonwealth reserves the right to monitor, test and otherwise observe and participate in transition. Contractor will notify Commonwealth without delay if any Commonwealth monitoring, testing or participation has caused (or Contractor expects it to cause) a problem or delay in transition and work with Commonwealth to prevent or circumvent the problem or delay.

(d) **Reports**. Beginning on the Effective Date, Contractor shall meet at least weekly with the Commonwealth to report on Contractor's progress in performing its responsibilities and meeting the timetable and Transition Milestones set forth in the Detailed Transition Plan. Contractor also shall provide written reports to Commonwealth at least weekly regarding such

matters, and shall provide oral reports more frequently if requested by Commonwealth. Promptly upon receiving any information indicating that Contractor may not perform its responsibilities or meet the timetable or Transition Milestones set forth in the Detailed Transition Plan, Contractor shall notify Commonwealth of such delays and shall identify for Commonwealth's consideration and approval specific measures to address such delays and mitigate the risks associated therewith.

(e) **Notification of Problems**. Contractor shall provide to Commonwealth written notice of any acts or omissions (whether by Commonwealth, a Commonwealth Contractor, subcontractor or any third party), any failure to perform any of each such party's obligations under the Contract and any other events that may affect Contractor's performance of the Transition Services. Contractor shall provide such written notice within thirty (30) days after Contractor first knew or should have known of such acts, omissions, or failures or other events. Such written notice shall describe in reasonable detail such acts, omissions, failures or other events and the manner in which the foregoing may affect Contractor's performance.

(f) **Corrective Action Plan**. In the event that either (1) the Commonwealth determines that Contractor has failed or is reasonably likely to fail to deliver the Transition Services, or (2) Contractor has determined that it has failed or is reasonably likely to fail to deliver the Transition Services, then Commonwealth or Contractor, as applicable, will notify the other Party of such failure (a "Transition CAP Notice"). Concurrently with such notice, Contractor will:

(i) immediately take steps to mitigate any harmful effects of such failure, and

(ii) (promptly (and in any event as soon as reasonably practical) perform a Root Cause Analysis and prepare a Corrective Action Plan with respect to such failure, and

(iii) take all actions necessary to prevent its recurrence, including, without limitation, providing all additional resources necessary to resolve such failure.

If in Commonwealth's sole discretion any such Corrective Action Plan is not adequately addressing the failure, Contractor shall revise the Corrective Action Plan until it is accepted by the Commonwealth. In the event that Contractor is unable to complete the Transition Services on or before the dates specified in the Detailed Transition Plan (a "Transition Failure Event"), then Contractor will meet with Commonwealth to develop a workaround plan to address the Transition Failure Event, which plan may include, at Commonwealth's option, obtaining the services to workaround the Transition Failure Event from another Commonwealth contractor and/or the incumbent contractor. If the Commonwealth elects to obtain such services from another contractor and/or

the incumbent contractor, the Commonwealth will equitably adjust the Fees to reflect the reduction in Services being provided by Contractor.

(g) **Failure to Meet Transition Milestones**. Neither the Transition Services nor the activities and deliverables associated with individual Transition Milestones shall be deemed complete until Commonwealth's acceptance of such activities and deliverables. If Contractor fails to meet a Transition Milestone, Contractor shall pay Commonwealth the applicable Milestone Credits specified in *Schedule D* (Transition Milestones) or the Detailed Transition Plan that are associated with such Transition Services.

(h) **Additional Remedies**. In the event that Contractor fails to identify and resolve any problems that may impede or delay the timely completion of each task in the Detailed Transition Plan, without prejudice to Commonwealth's other rights and remedies under the Contract or at law or equity, (i) Contractor will provide, at its sole cost and expense, all such additional resources as are necessary to identify and resolve any problems that may impede or delay the timely completion of each task in the Detailed Transition Plan, and (ii) Commonwealth may equitably reduce the Fees set forth in *Schedule I* (Offeror Pricing Forms) in an amount reasonably estimated by Commonwealth to account for the Services that Commonwealth is not receiving or did not receive.

(i) **Suspension or Delay of Transition Services.** Commonwealth reserves the right, in its sole discretion, to suspend or delay the performance of the Transition Services and/or the transition of all or any part of the Services. If Commonwealth elects to exercise this right and Commonwealth's decision is based in material part on concerns about Contractor's ability to perform material aspects of the Transition Services or Contractor's failure to perform its obligations under this Contract, the Commonwealth shall not incur any additional Fees or reimbursable expenses in connection with such decision, provided that Commonwealth shall work in good faith with Contractor to minimize the period of any such suspension or delay.

15. DISASTER RECOVERY AND BUSINESS CONTINUITY

(a) Disaster Recovery Plan.

(1) Jointly with the Commonwealth, Contractor shall at least annually review and update the disaster recovery plan, it being understood and agreed that the parties will work together and cooperate in good faith on any such review or updated of the disaster recovery plans.

(2) With the Commonwealth's support as specified in the disaster recovery plan, Contractor shall every six (6) months test the operability of the disaster recovery plan then in effect.

(i) Within fifteen (15) business days of completion of a disaster recovery test, Contractor will certify to Commonwealth that the disaster recovery plan was fully, timely and successfully implemented, or, if the disaster recovery plan was not fully, timely and successfully implemented, report all deficiencies (including root cause analysis) and corrective actions, and certify that such corrective actions addressed all deficiencies; and

(ii) Annually and at additional times at the request of Commonwealth, Contractor will certify to Commonwealth that that any applicable third-party business recovery center agreement remains in full force and effect without any default, including payment, thereunder by any party thereto, and that Commonwealth is entitled, pursuant to the terms of the business recovery center agreement, to assume that agreement upon the expiration or termination of this Contract.

(b) Disaster Recovery Event.

(1) As part of the Services, Contractor shall have responsibility for executing the disaster recovery plan relating to the Services as described in *Schedule F* (COPA Datacenter Statement of Work). Contractor shall immediately provide Commonwealth with notice of the occurrence of any disaster affecting the provision or receipt of all or any material portion of the Services and implement the disaster recovery plan then in effect. Contractor agrees to utilize the disaster recovery planning methodology software then utilized by Commonwealth in connection with activities contemplated under this *Section 15* (Disaster Recovery and Business Continuity).

(2) Contractor shall reinstitute the Services as promptly as possible but in any event within subscribed restitution hours, as set forth in the disaster recovery plan then in effect, after the occurrence of a disaster. If the Services are not fully reinstituted within the subscribed restitution hours the Commonwealth shall have the right to terminate this Contract for critical failure pursuant to the provisions of *Section 32(c)*, and Contractor shall, prior to or at the expiration of the applicable restitution period, deliver to Commonwealth a written report detailing the cause of the disaster, Contractor's plans to reinstitute the Services and its anticipated schedule to do so. Thereafter, Contractor and Commonwealth shall develop a plan to reinstitute the Services as promptly as is possible under the circumstances, with Contractor making such reinstitution its highest priority. Contractor shall prepare and deliver to Commonwealth

updated reports such that Commonwealth shall at all times be fully informed as to the status of Contractor's efforts and anticipated schedule to reinstitute the Services. In the event that any Contractor Machines are required to be replaced as a result of the disaster, Contractor shall replace such Contractor Machines with current or Improved Technology to the extent then available and compatible with the associated application(s). Any Contractor obligations to implement a disaster recovery plan set forth in this paragraph can be triggered by a notice of disaster provided to Contractor by Commonwealth.

16. PRIME CONTRACTOR RESPONSIBILITIES

The Contractor will be responsible for all Services in this Contract whether or not Contractor provides them directly. Further, the Contractor is the sole point of contact with regard to all contractual matters, including payment of any and all charges resulting from the Contract.

17. KEY POSITIONS/CONTRACTOR PERSONNEL

(a) **Contractor Project Manager and Transition Project Manager**.

(1) Upon the Effective Date, the Contractor shall appoint the Contractor Project Manager identified in its proposal, who on a full-time basis shall be in charge of implementing the Services. Contractor shall replace the Contractor Project Manager only when required or permitted pursuant to *Section 17(c)*. The Contractor Project Manager shall at all times be subject to Commonwealth's continuing approval.

(2) Upon the Effective Date he Contractor shall appoint the Transition Project Manager identified in its proposal, who will have the responsibilities set forth in *Schedule F* (COPA Datacenter Statement of Work). Contractor shall replace the Transition Project Manager only when required or permitted pursuant to *Section 17(c)*. The Contractor Project Manager shall at all times be subject to Commonwealth's continuing approval.

(b) **Key Positions**. The positions identified in *Schedule G* (Staffing Plan and Key Positions), are designated by Commonwealth and Contractor as key positions within the Contractor's Personnel. All of the Key Employees shall be dedicated to the Commonwealth account on a full-time basis. The Commonwealth Project Manager and the Contractor Project Manager shall meet once every Contract Year thereafter or upon the request of either the Commonwealth Project Manager or the Contractor Project Manager to update the list of the Key Employees. Each Key Employee shall at all times be subject to Commonwealth's continuing approval. Except for a replacement or reassignment of a Key Employee pursuant to *Section 17(c)*, Contractor shall not reassign or replace any Key Employee. As

more fully set forth in *Section 59* (Independent Capacity of Contractor), parties to this Contract agree that the Services performed by the Contractor under the terms of this Contract are performed as an independent contractor.

(c) **Reassignment Waivers**. Contractor shall not reassign or replace the Contractor Project Manager or any Contractor Services Location Manager during the first eighteen (18) months of his or her assignment as the Contractor Project Manager or a Contractor Services Location Manager unless Commonwealth consents to such reassignment or replacement or unless the individual (1) voluntarily resigns from Contractor, (2) is dismissed by Contractor for cause, or (3) is unable to work due to his or her death or disability. In addition, Contractor shall, in connection with its assignment of other Key Employees, use commercially reasonable efforts to assure the greatest degree of continuity possible among such Key Employees. If, in any instance, Commonwealth withholds or withdraws its approval of any employee or representative of Contractor for the performance of the Services, including without limitation, the Contractor Project Manager, any Contractor Services Location Manager or any other Key Employee, Contractor promptly shall reassign and replace such employee or representative.

(d) **Subcontractors**. The Contractor may subcontract any portion of the Services described in this Contract to third parties selected by Contractor and approved in writing by the Commonwealth, which approval will not be unreasonably withheld. Approved Subcontractors will be listed on *Schedule L* (Approved Subcontractors). Notwithstanding the above, if Contractor has disclosed the identity of Subcontractor(s) together with the scope of work to be subcontracted in the Contractor's Proposal, award of the Contract is deemed approval of all named Subcontractors for the specified scope of work and a separate approval is not required. The existence of any subcontract shall not change the obligations of Contractor to the Commonwealth under this Contract. Upon written request of the Commonwealth, the Contractor shall promptly provide the Commonwealth with a copy of any specified subcontract agreement between the Contractor and the subcontractor. If Commonwealth reasonably determines that a subcontractor should no longer be retained by Contractor due to material performance deficiencies arising from the subcontractor's performance, the Commonwealth reserves the right, for good cause, to require that the Contractor remove a subcontractor from the project. As more fully set forth in *Section 59* (Independent Capacity of Contractor), parties to this Contract agree that the Services performed by the Contractor under the terms of this Contract are performed as an independent contractor.

(e) **Managerial Control**. Subject to the other provisions of this Contract, including without limitation, provisions regarding security procedures and government security clearance and the other provisions of this *Section 17* (Key Positions/Contractor Personnel) Contractor shall have complete managerial control over its employees, and Contractor may dismiss, promote, replace or reassign a member of the Contractor Personnel; provided, however, that unless

otherwise agreed to by Commonwealth, Contractor shall deliver a notice to Commonwealth before or immediately after dismissing any member of the Contractor's Personnel. In addition, Contractor shall deliver to Commonwealth written notice of any criminal activities undertaken by, or alleged to have been undertaken by, any member of the Contractor Personnel and of which Contractor then has knowledge, which notice shall be delivered as promptly as is reasonable under the circumstances, and Contractor will cooperate fully with any investigation undertaken by or through Commonwealth in respect of such actual or alleged criminal activities.

(f) **Conduct of Contractor Personnel**. While at the Commonwealth Services Locations and the Contractor Services locations, Contractor's personnel, subcontractors and agents (1) shall comply with all lawful requests, rules and regulations of Commonwealth regarding personal and professional conduct (including the wearing of a particular uniform, identification badge or personal protective equipment and adhering to security regulations and general safety practices or procedures) and (2) otherwise shall conduct themselves in a businesslike manner.

(g) **Unsatisfactory Conduct**. If the Commonwealth determines in its sole discretion that a particular Contractor employee or subcontractor is not conducting himself or herself in an appropriate manner, Commonwealth may provide Contractor with notice of such conduct. Upon receipt of such notice, Contractor shall promptly investigate the matter and take appropriate action, which may include (1) removing the offending individual from the project and replacing him or her with a similarly qualified individual or (2) taking other appropriate disciplinary action to prevent a reoccurrence. In the event there are repeat violations of this *Section 17(g)* by a particular Contractor employee, contractor or subcontractor, Contractor shall promptly remove him or her from the project as set forth above.

(h) **Confidentiality.** Contractor shall:

(1) Cause each Contractor Personnel to maintain and enforce the confidentiality provisions of the Contract both during and after their assignment to the Commonwealth account; and

(2) Enter into, or shall have entered into, an agreement with each Contractor Personnel member which assigns, transfers and conveys to Contractor all of such employee's right, title and interest in and to any materials created pursuant to the Contract, including all rights of patent, copyright, trade secret or other proprietary rights in and to such materials.

18. THIRD PARTY SERVICES

(a) Commonwealth shall have the right, in its sole discretion, to contract with any number of third parties to perform Services which would otherwise fall within the terms of this Contract. In the event Commonwealth contracts with a third party to perform any service on behalf of or for Commonwealth, Contractor, as part of the Services, shall cooperate with Commonwealth and such third party to the extent reasonably required by Commonwealth, including provision of (i) existing written requirements, standards and policies for systems operations so that the enhancements or developments of such third party may be operated by, and will be compatible with the operations of, Contractor, (ii) assistance and support services to such third party, and (iii) such access to the Systems as may be reasonably required by such third party (subject to all security standards, licenses, confidentiality restrictions and other standards and procedures then in effect at each of the Services Locations) to develop, test and deploy the service contracted for by Commonwealth. In addition thereto, Contractor shall not commit or permit any act which will unduly interfere with the performance of work by Commonwealth employees or any such third party, and Commonwealth will not commit or permit any act which will interfere with Contractor's performance of the Services. All additional out-of-scope support costs, excluding attorney fees, incurred by Contractor as a result of a Commonwealth contract with a third party will be handled in accordance with the Change Control Procedures.

(b) Throughout the Term, but not more than once every six months, Commonwealth may request that Contractor work together with Commonwealth and/or third parties to identify ways to achieve reductions in the cost of Service delivery and corresponding reductions in the price(s) quoted in the Contract. If so requested by Commonwealth, Contractor will, at its own expense, promptly prepare a detailed proposal identifying all viable means of achieving the desired reductions without (to the extent practically possible) adversely impacting business objectives or requirements identified by Commonwealth. Commonwealth shall not be obligated to accept or implement any such proposal.

19. COMPENSATION

In consideration of Contractor providing the Services, subject to the terms of this Contract, Commonwealth shall pay to Contractor the Fees as set out at *Schedule I* (Offeror Pricing Forms). All items shall be performed within the time period(s) specified in the Contract. The Contractor shall be compensated only for items supplied and performed to the satisfaction of the Commonwealth.

20. FEES

(a) **Service Fees**. In consideration of Contractor providing the Services, subject to the terms of this Contract, Commonwealth shall pay to Contractor the Fees pursuant to *Schedule I* (Offeror Pricing Forms).

(b) **Cost of Living Adjustment.** The Fees shall not be subject to any cost of living or inflationary adjustment or any other adjustment based on Contractor's costs to provide the Services.

(c) **Expenses**. Except as expressly provided otherwise in this Contract, expenses of Contractor relating to the Services are included in the Fees, and no such expenses or other costs or fees shall be reimbursed by Commonwealth unless agreed to by Commonwealth in writing. The Contractor shall not be allowed or paid travel or per diem expenses unless agreed to by Commonwealth in writing.

(d) **Pro-ration**. All periodic Fees or charges under this Contract are to be computed on a calendar month basis and shall be prorated on a per diem basis for any partial month.

(e) **Unused Credits**. Any unused credits against future payments owed to either party by the other pursuant to this Contract shall be paid to the applicable party within forty-five (45) days after the expiration or termination for any reason of Contractor's obligation to provide the Services or of this Contract. This *Section 20(e)* shall survive the expiration or any termination of this Contract.

(f) **Pricing Protection**. Notwithstanding anything to the contrary elsewhere in this Contract, the Fees shall in no event and at no time during the Term exceed Contractor's then lowest charges for such services to Contractor's state governmental customers generally receiving comparable goods and services at comparable volumes and upon material terms and conditions comparable to those contained in this Contract and pursuant to an outsourcing agreement dated after the Effective Date. Upon Commonwealth's request from time to time, and in any event on each anniversary of the Effective Date, Contractor shall advise Commonwealth in writing that this *Section 20(f)*has not been contradicted by any transaction entered into by Contractor on or after the Effective Date. If Contractor is unable to provide such written notice because of a transaction entered into by Contractor contradicting this *Section 20(f)*, Contractor shall offer to Commonwealth an adjustment to the Fees to correct such contradiction.

21. PAYMENT SCHEDULE AND INVOICES

(a) **Service Fees**. On or before the 15th day of each calendar month of the Term, Contractor shall provide Commonwealth with a single invoice for the Service Fees. Each such invoice shall include the Fees, if applicable, for the then current month, as well as any Service Level Credits then payable by Contractor or refundable by Commonwealth, or other reimbursable charges to Commonwealth for Services actually rendered prior to the date of such invoice.

(b) **Detailed Invoices.** Contractor shall provide on the monthly invoices varying degrees of detail (e.g., per agency, end-user, department, project, site) as specified in *Schedule H* (Commonwealth Computing Procedures Manual). The Detailed Invoice will be delivered both in an electronic format compatible with the

Commonwealth's Invoice Processing System and a summary Invoice will be delivered for Management and Budgeting Purposes.

(c) **Time of Payment**. Any sum due Contractor pursuant to any such invoice shall be due and payable on the last business day of the calendar month following the calendar month during which such invoice was delivered to Commonwealth. (e.g., an invoice delivered to Commonwealth on July 15, 2015 will be due and payable on August 31, 2015, the last business day of August, 2015.) In the event any invoices remain unpaid after such due date, the Commonwealth may pay interest as determined by the Secretary of Budget in accordance with Act No. 266 of 1982 and regulations promulgated pursuant thereto. Contractor shall continue to provide the Services even in the event payment is delayed or is not made in timely fashion.

(d) **Fee Dispute**. During the pendency of a dispute between Commonwealth and Contractor pursuant to which Commonwealth, in good faith, believes it is entitled to withhold, and does withhold, payment, Contractor shall continue to fully provide the Services and otherwise fully perform its obligations under this Contract.

22. INSPECTION AND ACCEPTANCE

(a) Acceptance of Services related to transition will occur in accordance with the Acceptance Criteria set out in *Schedule D* (Transition Milestones) and the Detailed Transition Plan.

(b) Acceptance of Services other than those related to transition will occur in accordance with the Commonwealth Computing Procedures Manual.

(c) If the Services are in compliance with the specifications, then the Commonwealth shall provide the Contractor with Commonwealth's written conditional acceptance of the Services. If the Services are not in compliance with the specifications, then the Commonwealth shall provide the Contractor with Commonwealth's written rejection of the Service. Payment will only be made if the Commonwealth has accepted the Service through written acceptance.

(d) If the Services do not meet an accessibility standard as set out in ITB-ACC001, the Contractor must provide written justification for its failure to meet the standard. The justification must provide specific details as to why the standard has not been met. The Commonwealth may either waive the requirement as not applicable to the Commonwealth's business requirements or require that the Contractor provide an acceptable alternative. Any Commonwealth waiver of the requirement must be in writing.

(e) Unless otherwise set forth in the Commonwealth Computing Procedures Manual (*Schedule H*), upon the Contractor's receipt of the Commonwealth's written notice of rejection, which must identify the reasons for the failure of the Services to comply with the Contract, the Contractor shall have fifteen (15) business days, or such other time as the Commonwealth and Contractor may agree is reasonable, within which to correct all such failures, and resubmit the corrected Services, certifying to the Commonwealth, in writing, that the failures have been corrected, and that the Services have been brought into compliance with the Contract. Upon receipt of such corrected and resubmitted Service and certification, the Commonwealth shall have thirty (30) business days to test the corrected Service to confirm that it is in compliance with the Contract. If the corrected Service is in compliance with the Contract, then the Commonwealth shall provide the Contractor with Commonwealth's acceptance of the Service.

(f) If, in the opinion of the Commonwealth, the corrected Service still contains material failures, the Commonwealth may either:

(1) Repeat the procedure set forth above; or

(2) Terminate the Contract in accordance with *Section 32* (Termination).

23. SERVICE LEVELS

(a) The Contractor shall comply with the procedures and requirements of *Schedule J.1* (Service Level Management), *Schedule J.2* (Datacenter Service Level Matrix), and *Schedule J.3* (Datacenter SLA Definitions) during the term of the Contract.

(b) All Services without expressly defined Service Levels must be performed at least to the same degree of accuracy, completeness, efficiency, quality and timeliness as is provided by well-managed suppliers providing services similar to the Services, so long as such performance is operationally reasonable. For where there are expressly defined Service Levels, or where performance can be reasonably reported, Contractor will measure and report its performance against these standards on at least a monthly basis, except as may otherwise be agreed between the Parties in respect of Services performed less frequently than monthly.

(c) The Commonwealth's acceptance of any Service Level Credit shall not bar or impair Commonwealth's rights and remedies in respect of the failure or root cause as set forth elsewhere in this Contract, including without limitation claims for liquidated damages, injunctive relief and termination rights, provided however, Service level Credits paid would be credited against any such claim for damages.

(d) The Commonwealth's acceptance of any Service Level credit shall not bar or impair Commonwealth's rights and remedies in respect of the failure or root cause as set forth elsewhere in this Contract, including without limitation claims for damages, injunctive relief and termination rights, provided however, Service level credits paid would be credited against any such claim for damages.

24. LIQUIDATED DAMAGES

(a) By accepting this Contract, the Contractor agrees to the delivery requirements of this Contract. If a Contract schedule is not met, including Transition Milestones set out in Transition Plan, the delay will interfere with the Commonwealth's program. In the event of any such delay, it would be impractical and extremely difficult to establish the actual damage for which the Contractor is the material cause. The Commonwealth and the Contractor therefore agree that, in the event of any such delay the amount of damage shall be the amount set forth in this *Section 24* and agree that the Contractor shall pay such amount as liquidated damages, not as a penalty.

(b) The amount of liquidated damages for failure to meet Transition Milestones is set forth in *Schedule D* (Transition Milestones).

(c) If, *Schedule D* (Transition Milestones) indicates that Contractor may earn back liquidated damages, then Contractor shall have the time specified in *Schedule D* (Transition Milestones), as indicated, to meet the Acceptance Criteria for the Transition Milestone and earn back the Milestone Credit. If Contractor fails to meet the Acceptance Criteria within 30 days following the Milestone Due Date or, if an earn back period is specified, then 30 days following the end of the specified earn back period, the Commonwealth, at no additional expense and at its option, may either:

(1) Immediately terminate the Contract and all software, documentation, reports, Developed Materials and any other materials provided for or created for the Commonwealth as a result of this Contract shall be given to the Commonwealth, and the Commonwealth shall be entitled to its remedies under Subsection 24(c); or

(2) Order the Contractor to continue with no decrease in effort until the work is completed in a manner acceptable to the Commonwealth or until the Commonwealth terminates the Contract. If the Contract is continued, the liquidated damages will also continue until the work is completed.

(d) Liquidated damages shall be paid by the Contractor and collected by the Commonwealth by deducting them from the invoices submitted under this Contract or any other contract Contractor has with the Commonwealth, by collecting them through the performance security, if any, or by billing the Contractor as a separate item.

(e) To the extent that the delay is caused by the Commonwealth, as described in *Schedule D* (Transition Milestones), no liquidated damages will be applied.

(f) Contractor shall not be liable for liquidated damages if the delay to the Contract arises out of causes beyond the control of and without the fault or negligence of the Contractor and/or its subcontractors. Such causes may include, but are not limited to, acts of God or of the public enemy, fires, floods, epidemics, quarantine restrictions, strikes, work stoppages, freight embargoes, acts of terrorism, and unusually severe weather; but in every case, the delay must be beyond the control of, and without the fault or negligence of, the Contractor and/or its subcontractors. The Contractor shall notify the Commonwealth immediately in writing of its inability to perform because of a cause beyond the control of the Contractor.

(g) If the delays are caused by the default of a Subcontractor, and if such default arises out of causes beyond the control of both the Contractor and Subcontractor, and without their fault or negligence, the Contractor shall not be liable for liquidated damages for delays, unless the supplies or services to be furnished by the Subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required performance schedule.

25. CONTINUOUS IMPROVEMENT AND BENCHMARKING

(a) **Benchmark Overview**. Prior to the expiration of the second anniversary of the Effective Date, Commonwealth and Contractor shall establish the details of the Benchmarking Process intended to ensure that Contractor provides Commonwealth with technology and Services Levels equal to or greater than other organizations receiving similar services. The parties acknowledge and agree that the benchmarking process is intended to assist Commonwealth in making decisions necessary to balance the desire for then current technology against the cost and uncertain performance of newly evolving technology.

(b) **Benchmarker**. The Benchmark shall be conducted by a Benchmarker selected by the Commonwealth, subject to Contractor's approval thereof, in writing, such approval not to be unreasonably withheld, delayed or conditioned. The fees and expenses charged by the Benchmarker shall be paid by Commonwealth. Contractor shall at its expense cooperate with and assist the Benchmarker and any other third parties involved in the Benchmarking process, including meeting with Commonwealth and the Benchmarker before and throughout the Benchmarking Process and providing data relating to the provision of the Services, as requested by Commonwealth or the Benchmarker.

(c) **Benchmark**. If Commonwealth undertakes the Benchmarking, Commonwealth and Contractor, in good faith, shall attempt to agree upon the period during which the Benchmarking shall be conducted. If the parties are unable to so agree,

Commonwealth shall specify the relevant period, subject to Contractor's approval thereof, in writing, such approval not to be unreasonably withheld, delayed or conditioned.

(d) **Benchmark Information**. Commonwealth and Contractor shall jointly determine the Benchmark Information with appropriate input from the Benchmarker. Commonwealth and Contractor shall (1) review the Benchmark Information, and (2) schedule a meeting to address any issues either party may have with the Benchmark Information. Contractor shall provide the Benchmark Information at no additional cost to Commonwealth; provided, however, that if Commonwealth wishes the Benchmarker to use information which Contractor does not otherwise have access to in the course of its business, Commonwealth shall provide such information at its own cost and Contractor may use such information but, unless Commonwealth expressly agrees otherwise in writing, only in connection with providing the Services.

(e) **Benchmarking Results**. Within thirty (30) days after the completion of Benchmarking, the Benchmarker shall deliver the Benchmark Results to the Commonwealth Project Manager and the Contractor Project Manager for distribution to the members of the Management Committee.

(f) **Benchmark Results Review Period and Adjustments**. The members of the Management Committee shall utilize the Benchmark Review Period to review such Benchmark Results, and the Management Committee shall meet during the Benchmark Review Period to collectively assess the Benchmark Results.

(g) **Disputes of Benchmark Results**. Either Commonwealth or Contractor may in good faith dispute the Benchmark Results, in writing, prior to the expiration of the Benchmark Review Period. Any such notice of dispute issued by either party shall include a description of the nature of such dispute in sufficient detail so as to enable the Benchmarker and the other party to assess the motive and merit of the dispute. Within ten (10) days after receipt of such notice, the parties shall cause the Benchmarker to issue a written response addressing the dispute, and if such dispute requires a change to any of the Benchmark Results, the Benchmarker shall be directed to issue revised Benchmark Results. Upon issuing such revised Benchmark Results, Commonwealth and Contractor, as applicable, shall have another Benchmark Review Period to review the revised Benchmark Results in accordance with *Section 25(f)*. In the event either party disputes the revised Benchmark Results within the second Benchmark Review Period or if the parties are unable to agree as to the need for revised Benchmark Results, original Benchmark Results or the revised Benchmark Results, as the case may be, shall be subject to the contract controversy procedures set forth in *Section 34* (Contract Controversies).

(h) **Benchmarking: Price Protection**. In addition to the Benchmarking provided for in this *Section 25* (Continuous Improvement and Benchmarking), no earlier

than sixty (60) days after the end of Year 2 of this Contract, and no more frequently than annually thereafter, the Commonwealth may engage a Benchmarker, in accordance with the provisions of this *Section 25* (Continuous Improvement and Benchmarking) for the purpose of assessing the extent to which the prices paid for the Services hereunder are comparable to prices of a comparable reference group of clients for Services. This Benchmarking Price Protection process shall be an objective measurement and comparison process utilizing baseline methods and industry standards. The parties acknowledge and agree that this Benchmarking Price Protection process is intended to assure the Commonwealth that pricing and pricing models employed in this engagement are consistent with the reference group throughout the later years of the Contract, as it may be extended or renewed.

(i) **Benchmark: Pricing Adjustments**. If the results of a Benchmarking Price Protection analysis, as reflected in written Benchmarking Results delivered to Contractor, reveal that amounts to be paid under the terms of the Contract for Services exceed by a factor of ten percent (10%) or more than the average of amounts paid by the reference group for comparable services (the "Market Rate"), the Commonwealth may elect to renegotiate those prices. When notified of the Commonwealth's intent to renegotiate the prices, the Contractor shall, as soon as practical following notification of the Commonwealth's intent, negotiate in good faith with Commonwealth for the adjustment and reduction of fees for the Services. If an agreement is reached for a pricing adjustment such agreement will be effective as of the date of delivery of the Benchmarking (Price Protection) Results. If the parties are unable to agree to a pricing adjustment within sixty (60) days after delivery of the Benchmarking (Price Protection) Results, the matter shall be submitted to the various dispute resolution procedures contained in *Section 34* (Contract Controversies) of the Contract. If the dispute resolution procedure results in a pricing adjustment, that adjustment will be effective as of the date of delivery of the Benchmarking (Price Protection) Results. In no event will Contractor increase the Fees as a result of any review pursuant to this *Section 25* (Continuous Improvement and Benchmarking).

(j) **Annual Best Practices Reviews.** Within thirty (30) days of each anniversary of the Effective Date, Contractor shall, in accordance with procedures agreed upon by the Commonwealth Project Manager and the Contractor Project Manager, identify for Commonwealth any best practices that have emerged (within Contractor’s organization or, to the knowledge of Contractor, within the processing services outsourcing market generally), that, if implemented by the Contractor would materially benefit the Commonwealth in terms of price reductions or performance improvement. If requested by Commonwealth, within sixty (60) days Contractor shall provide Commonwealth with proposals for the implementation of such best practices in a manner consistent with the Change Control Procedures of the Contract. If approved by Commonwealth,

Contractor shall implement such best practices on behalf of Commonwealth as expeditiously as possible.

26. GOVERNANCE

Provisions for the governance of this Contract and the Services delivered pursuant hereto are set forth in *Schedule B* (Governance) to this Contract.

27. CHANGE CONTROL

(a) Change Control Procedures. The following Change Control Procedures will apply if either party wishes to implement or have Contractor implement a Change. The requesting Party will forward to the other party a Change Order which will include the following:

(1) Project identification
(2) Originator's name and title
(3) The date of the Change Order
(4) A description of the proposed change
(5) The reason for the proposed change

For Contractor, all Change Orders must be directed to Contractor's Project Manager. For Commonwealth, all Change Orders must be directed to or originate from the Commonwealth Project Manager.

(1) For any Contractor-initiated Change Order, Commonwealth shall have the option of accepting or rejecting that Change Order.

(2) Contractor will assign a number to and log each Change Order.

(3) All Change Orders will be categorized by Commonwealth as Priority 1 (urgent), Priority 2 (ordinary) or Priority 3 (low).

(4) Contractor will make reasonable efforts to investigate the impact of the Change Order on the Fees, timetable, specifications, Services, Service Levels, terms and conditions and, the relative obligations of the parties under this Contract and the (the "Impact Study") in accordance with a schedule that reflects the applicable priority category.

(5) Contractor will inform Commonwealth if there will be any charges for Contractor Services in conducting the Impact Study and Commonwealth will decide whether Contractor should conduct the Impact Study. Contractor shall be entitled hereunder to charge Commonwealth only for those expenses incurred by Contractor in connection with the conduct of the Impact Study that are (i) Contractor's out-of-pocket expenses paid by Contractor to third parties

(other than Contractor's or any Contractor's Agent's employees) for expertise not otherwise possessed by or available to Contractor or (ii) for employees of Contractor or any Contractor Agent not theretofore engaged in the provision of the Services. In order for any of the foregoing expenses to be reimbursable to Contractor, Contractor must first provide an estimate thereof to Commonwealth and obtain from Commonwealth its prior written approval thereof. If Contractor provides any such estimate and Commonwealth does not approve the estimated expenses, Contractor shall not be obligated to proceed with the Impact Study. In all cases, Contractor shall make a good faith effort to maximize its use of its employees and the employees of Contractors Agents then engaged in the provision of the Services to the extent Contractor can do so without adversely affecting its ability to provide the Services in accordance with the Services Levels. Any disputes between the parties regarding the validity, estimated amount or actual amount of any reimbursable expenses shall be subject to the dispute resolution provisions of *Section 34* (Contract Controversies).

(6) If both parties agree on the Impact Study and any necessary Changes to the Services, the relative obligations of the parties under this Contract, and the Fees, a Change Order will be issued to reflect the agreed to Changes.

(7) If the parties cannot agree upon the Impact Study or the resultant Changes to this Contract, any Commonwealth-initiated Change Order will nevertheless be implemented at Commonwealth's option and Contractor shall perform the Services, and either party may elect to have all outstanding related matters treated as a dispute between the parties under *Section 34* (Contract Controversies). During the pendency of any such dispute, Commonwealth shall pay to Contractor any undisputed amounts. Any changes to Service Levels which are required by the implementation of the Changes, will be reflected in the Change Order that is issued.

(b) All Changes shall be made pursuant to the Change Control Procedures. Contractor shall:

(1) schedule all Changes so as not to interrupt or unduly interfere with Commonwealth's operations,

(2) prepare and deliver to Commonwealth each month a ninety-day rolling schedule for ongoing proposed and approved and planned Changes,

(3) review and determine the cause of any failed Changes and deviations from scheduled Changes, and

(4) document and provide to the Management Committee and to the Commonwealth Project Manager, individually, same-day notification (which may be given orally provided that such oral notice is confirmed in writing to such persons within three (3) Commonwealth business days) of all changes performed on an emergency basis to maintain the continuity of the Services.

(c) Without limiting any other provision of this Contract, the following Schedules may be modified through the Change Control Procedures set forth in this *Section 27* (Change Control):

- Schedule C – Services Catalog
- Schedule E – Datacenter Locations
- Schedule G – Staffing Plan and Key Positions
- Schedule J.1 – Service Level Management
- Schedule J.2 – Datacenter Service Level Matrix
- Schedule J.3 – Datacenter SLA Definitions
- Schedule H – Commonwealth Computing Procedures Manual

28. NOTICE OF DELAYS

Whenever the Contractor encounters any difficulty that delays or threatens to delay the timely performance of this Contract (including actual or potential labor disputes), the Contractor shall immediately give notice thereof in writing to the Commonwealth stating all relevant information with respect thereto. Such notice shall not in any way constitute a basis for an extension of the delivery schedule or be construed as a waiver by the Commonwealth of any rights or remedies to which it is entitled by law or pursuant to provisions of this Contract. Failure to give such notice, however, may be grounds for denial of any request for an extension of the delivery schedule because of such delay. If an extension of the delivery schedule is granted, it will be done consistent with *Section 27*(Change Control).

29. NOTICE

Any written notice to any party under this Contract shall be deemed sufficient if delivered personally, or by facsimile, telecopy, electronic or digital transmission (provided such delivery is confirmed), or by a recognized overnight courier service (e.g., DHL, Federal Express, etc.), with confirmed receipt, or by certified or registered United States mail, postage prepaid, return receipt requested, sent to the address such party may designate by notice given pursuant to this section.

30. DEFAULT

(a) The Commonwealth may, subject to the provisions of *Section 28* (Notice of Delays), and in addition to its other rights under the Contract, declare the Contractor in default by written notice thereof to the Contractor, and terminate

for cause (as provided in *Section 32* (Termination) the whole or any part of this Contract and shall further have the right to seek damages from Contractor for any of the following reasons:

(1) Failure to begin work within the time specified in the Contract or as otherwise specified;

(2) Failure to successfully complete a Major Milestone in accordance with the agreed Transition or Transition Plans or to complete specified work in accordance with the Contract terms;

(3) Multiple failures over time of a single Service Level or a pattern of failure over time across multiple Service Levels (a Service Level Termination Event); this will include failures of Service Levels and Key Service Levels;

(4) Failure to make agreed-upon adjustments to the fees or Service Levels in accordance with the outcome of Benchmarking Procedures;

(5) Failure or refusal to remove material, or remove and replace any work rejected as defective or unsatisfactory;

(6) Abandonment or willful refusal to provide the Services or any part of the Services;

(7) Failure to perform its responsibilities under any Business Continuity or Disaster Recovery Plans, including such Business Continuity or Disaster Recovery Plans that apply to Contractor's own locations used for the delivery of the Services;

(8) Insolvency or bankruptcy;

(9) Assignment made for the benefit of creditors;

(10) Failure or refusal within 30 days after written notice by the Contracting Officer, of the Contractor to make payment or show cause why payment should not be made, of any amounts due for materials furnished, labor supplied or performed, for equipment rentals, or for utility services rendered;

(11) Failure to protect, to repair, or to make good any damage or injury to property as required under the terms of this Contract;

(12) Breaches of covenants, agreements, obligations, representations or warranties in the Contract occurring simultaneously or over time,

whether or not each such breach is a material breach, and whether or not each such breach was cured, that taken together constitute a material breach of the Contract after Contractor has been made aware of such breaches, on an individual basis. Regardless of any other provision in this Contract to the contrary no cure period is available to Contractor should the Commonwealth terminate under this *Section 30(a)(12)*;

(13) An act or omission of Contractor in the performance of this Contract, which is not otherwise explicitly required or permitted under this Contract, and which results in any Regulatory Entity notifying Commonwealth that it is subjecting the Commonwealth to a hearing or tribunal or withdrawing any license granted to Commonwealth or Contractor and such hearing, tribunal or withdrawal would have a material and adverse effect on Commonwealth's operations or business or the Services. Regardless of any other provision in this Contract the contrary no cure period is available to Contractor should the Commonwealth terminate under this *Section 30(a)(13)*;

(b) In the event that the Commonwealth terminates this Contract in whole or in part as provided in Subparagraph (a) above, the Commonwealth may procure, upon such terms and in such manner as it determines, services similar or identical to those so terminated, and the Contractor shall be liable to the Commonwealth for any reasonable excess costs for such similar or identical services included within the terminated part of the Contract.

(c) If the Contract is terminated as provided in Subparagraph (a) above, the Commonwealth, in addition to any other rights provided in this *Section 30* (Default), may require the Contractor to transfer title and deliver immediately to the Commonwealth in the manner and to the extent directed by the Commonwealth, such partially completed work, including, where applicable, reports, working papers and other documentation, as the Contractor has specifically produced or specifically acquired for the performance of such part of the Contract as has been terminated. Except as provided below, payment for completed work accepted by the Commonwealth shall be at the Contract price. Except as provided below, payment for partially completed work including, where applicable, reports and working papers, delivered to and accepted by the Commonwealth shall be in an amount agreed upon by the Contractor and the Commonwealth. The Commonwealth may withhold from amounts otherwise due the Contractor for such completed or partially completed work, such sum as the Commonwealth determines to be necessary to protect the Commonwealth against loss.

(d) The rights and remedies of the Commonwealth provided in this *Section 30* (Default) shall not be exclusive and are in addition to any other rights and remedies provided by law or under this Contract.

(e) The Commonwealth's failure to exercise any rights or remedies provided in this *Section 30* (Default) shall not be construed to be a waiver by the Commonwealth of its rights and remedies in regard to the event of default or any succeeding event of default.

(f) Following exhaustion of the Contractor's administrative remedies as set forth in *Section 34* (Contract Controversies), the Contractor's exclusive remedy shall be to seek damages in the Board of Claims.

31. STEP-IN RIGHTS

(a) In the event that Contractor is failing to deliver all or part of the Services, the Commonwealth shall give the Contractor notice of the failure. The Contractor shall have fifteen (15) days to provide the Commonwealth with a correction plan. If the correction plan is not received within fifteen (15) days or the failure is not corrected within thirty (30) days of the notice provided under this paragraph, Commonwealth may assign Commonwealth staff or third parties to step-in and perform failing elements of the Services, to the extent those Services are listed below, until such time as Contractor can demonstrate the ability to resume provision of such Services. Provided, however, that if in the Commonwealth's sole discretion the failure creates an emergency, no notice is required for the Commonwealth to exercise its rights under this paragraph.

(1) Co-location services;
(2) Management of Commonwealth owned equipment located within the Enterprise Data Center;
(3) Network Connectivity between the Commonwealth and the Contractor's datacenter(s); and
(4) Disaster Recovery Services.

(b) All costs associated with the exercise of such step-in rights shall be borne by Contractor.

(c) Commonwealth's exercise of its step-in rights shall not constitute a waiver by Commonwealth of any termination rights or rights to pursue a claim for damages arising out of the failure that led to the step-in rights being exercised.

32. TERMINATION

(a) For Convenience

(1) The Commonwealth may terminate this Contract without cause by giving Contractor thirty (30) calendar days prior written notice (Notice of Termination) whenever the Commonwealth shall determine that such termination is in the best interest of the Commonwealth (Termination for Convenience). Any such termination shall be effected by delivery to the Contractor of a Notice of Termination specifying the extent to which performance under this Contract is terminated either in whole or in part and the date on which such termination becomes effective.

In the event of termination for convenience, Contractor shall receive a termination for convenience fee ("Termination for Convenience Fee").

The Termination for Convenience Fee shall equal the applicable amount set out in Tab #6 of Schedule I (Termination Fees) minus the value of all Services performed by the Contractor consistent with the terms of the Contract prior to the effective date of termination.

In no event shall the Contractor be paid for any loss of anticipated profit (by the Contractor or any Subcontractor), loss of use of money, or administrative or overhead costs.

Failure to agree on any termination costs shall be a dispute handled in accordance with *Section 34* (Contract Controversies) of this Contract.

(2) The Contractor shall cease Services as of the date set forth in the Notice of Termination, and shall be paid only for such Services as have already been satisfactorily rendered up to and including the termination date set forth in said notice, or as may be otherwise provided for in said Notice of Termination, and for such services performed during the thirty (30) calendar day notice period, if such services are requested by the Commonwealth, for the collection, assembling, and transmitting to the Commonwealth of at least all materials, manuals, magnetic media, studies, drawings, computations, maps, supplies, and survey notes including field books, which were obtained, prepared, or developed as part of the Services required under this Contract.

(3) The above shall not be deemed to limit the Commonwealth's right to terminate this Contract for any reason as permitted by the other provisions of this Contract, or under applicable law.

(b) Non-Appropriation

Any payment obligation or portion thereof of the Commonwealth created by this Contract is conditioned upon the availability and appropriation of funds. When funds (state or federal) are not appropriated or otherwise made available to support continuation of performance in a subsequent fiscal year period, the

Commonwealth shall have the right to terminate the Contract. The Contractor shall be reimbursed in the same manner as that described in this section related to Termination for Convenience to the extent that appropriated funds are available.

(c) Default

The Commonwealth may, in addition to its other rights under this Contract, terminate this Contract in whole or in part by providing written notice of default to the Contractor if the Contractor materially fails to perform its obligations under the Contract and does not cure such failure within thirty (30) days or, if a cure within such period is not practical, commence a good faith effort to cure such failure to perform within the specified period or such longer period as the Commonwealth may specify in the written notice specifying such failure, and diligently and continuously proceed to complete the cure. The Contracting Officer shall provide any notice of default or written cure notice for Contract terminations.

(1) Subject to *Section 36* (Limitation of Liability) of this Contract, in the event the Commonwealth terminates this Contract in whole or in part as provided in this Subsection 32(c), the Commonwealth may procure services similar to those so terminated, and the Contractor, in addition to liability for any liquidated damages, shall be liable to the Commonwealth for the difference between the Contract price for the terminated portion of the services and the actual and reasonable cost (but in no event greater than the fair market value) of producing substitute equivalent services for the terminated services, provided that the Contractor shall continue the performance of this Contract to the extent not terminated under the provisions of this section.

(2) Except with respect to defaults of Subcontractors, the Contractor shall not be liable for any excess costs if the failure to perform the Contract arises out of causes beyond the control of the Contractor. Such causes may include, but are not limited to, acts of God or of the public enemy, fires, floods, epidemics, quarantine restrictions, strikes, work stoppages, freight embargoes, acts of terrorism, and unusually severe weather. The Contractor shall notify the Commonwealth Contracting Officer promptly in writing of its inability to perform because of a cause beyond the control of the Contractor.

(3) Nothing in this *Subsection 32(c)* shall abridge the Commonwealth's right to suspend, debar, or take other administrative action against the Contractor.

(4) If it is later determined that the Commonwealth erred in terminating the Contract for default, then the Contract shall be deemed to have been terminated for convenience under Subsection (a).

(5) If this Contract is terminated as provided by this Subsection 31(c), the Commonwealth may, in addition to any other rights provided in this Subsection, and subject to *Section 40* (Proprietary Rights) of this Contract, require the Contractor to deliver to the Commonwealth in the manner and to the extent directed by the Contracting Officer, such reports and other documentation as the Contractor has specifically produced or specifically acquired for the performance of such part of the Contract as has been terminated. Payment for such reports and documentation will be made consistent with the Contract.

(d) In the event that Contractor becomes insolvent for any reason whatsoever, or makes an assignment for the benefit of creditors, or has a receiver appointed, or if it is declared as bankrupt under the laws of the United States, or if a petition of reorganization or rearrangement is filed against it under the bankruptcy laws, Commonwealth shall have the exclusive option of continuing with Contractor or its successors or assigns or trustee in bankruptcy under the terms and conditions of this Contract for the full remaining term of this Contract, or continuing with Contractor or its successors or assigns or trustee in bankruptcy under the terms and conditions of this Contract for such period of time as is necessary or desirable to terminate this Contract.

(e) In the event of the sale by Contractor of all or substantially all of its assets (in a single transaction or a series of related transactions) or the sale of a controlling interest in Contractor's outstanding stock, Contractor shall be entitled to assign this Contract to its successor upon written notice thereof to Commonwealth. Commonwealth shall be entitled to receive from Contractor, upon Commonwealth's request, such information as is reasonably requested by Commonwealth to enable Commonwealth to assess the financial, technical and management capabilities of such successor to assume Contractor's obligations under this Contract. If Commonwealth determines, in the exercise of its reasonable discretion, that such successor does not or may not have such requisite financial, technical or management capabilities, and if Commonwealth informs Contractor thereof in writing and describing in reasonable detail its basis therefore, then, and only then, such assignment by Contractor shall be subject to Commonwealth's prior written consent, which consent may be withheld, delayed or conditioned in Commonwealth's sole discretion. If Commonwealth withholds such consent, then Commonwealth shall have the exclusive option of continuing under the terms and conditions of this Contract with Contractor or its successors or assigns for the full remaining term of this Contract, or continuing under the terms and conditions of this Contract with Contractor or its successors or assigns for such period of time as is necessary or desirable to terminate this Contract.

(f) In the event Commonwealth fails to pay undisputed Fees for twelve (12) consecutive months, Contractor may terminate this Contract for its convenience. In such event,

notwithstanding any other provision of this Contract to the contrary, Contractor shall be released from any obligation to provide further Services pursuant to this Contract.

(g) The rights and remedies of the Commonwealth provided in this Section shall not be exclusive and are in addition to any other rights and remedies provided by law or under this Contract.

(h) The Commonwealth's failure to exercise any rights or remedies provided in this Section shall not be construed to be a waiver by the Commonwealth of its rights and remedies in regard to the event of default or any succeeding event of default.

(i) In no event shall the Contractor be paid for any loss of anticipated profit (by the Contractor or any Subcontractor), loss of use of money, or administrative or overhead costs. Any dispute regarding termination costs shall be a dispute handled in accordance with *Section 34* (Contract Controversies) of this Contract.

(j) Following exhaustion of the Contractor's administrative remedies as set forth in *Section 34* (Contract Controversies), the Contractor's exclusive remedy shall be to seek damages in the Board of Claims.

33. TERMINATION ASSISTANCE

(a) **General.** Upon the Commonwealth's request, Contractor shall provide Termination Assistance Services directly to the Commonwealth, or to any replacement provider designated by the Commonwealth, any successors or assigns of such entities or any of their designee(s). Contractor shall take all necessary and appropriate actions to accomplish a complete, timely, and seamless transition of any Terminated Services from Contractor to the Commonwealth, or to any replacement provider designated by the Commonwealth, without material interruption of or material adverse impact on the Terminated Services or any other services provided by third-parties or Services that Contractor shall continue to provide (each transition, an "Assistance Event"). Contractor shall cooperate with the Commonwealth and any new Contractor and otherwise promptly take all steps required or reasonably requested to assist the Commonwealth in effecting a complete and timely Termination Assistance Services of any Terminated Services. Contractor shall provide all information regarding the Terminated Services or as otherwise needed for Termination Assistance Services, including data conversion, interface specifications, and related professional services. Contractor shall provide for the prompt and orderly conclusion of all Terminated Services, as the Commonwealth may direct, including completion or partial completion of projects, documentation of work in process, and other measures to assure an orderly transition to the Commonwealth or the Commonwealth's designee. Contractor's obligation to provide the Services shall not cease until a Assistance Event satisfactory to the Commonwealth, including the performance by Contractor of all asset-transfers and other obligations of Contractor provided in this *Section 33* (Termination Assistance),

has been completed in accordance with mutually agreed to completion or acceptance criteria or if no agreed acceptance criteria exist, then to the Commonwealth's reasonable satisfaction.

(i) **Period of Provision**. Contractor shall provide Termination Assistance Services commencing on the date a determination is made by the Commonwealth that there shall be an Assistance Event**.**

(ii) **Notice of an Assistance Event.** The Commonwealth will provide Contractor with written notice of an Assistance Event. Such notice will include a description of the Services that are to be terminated or discontinued, the affected Commonwealth Agencies, and the anticipated effective date of the Assistance Event. The Commonwealth may modify or update any of the information provided in the initial notice of an Assistance Event from time to time by a supplemental notice from the Commonwealth to Contractor.

(iii) **Extension of Services**. The Commonwealth may elect, upon thirty (30) days prior notice to Contractor, to extend the period for performance of Termination Assistance Services (in whole or in part), in its sole discretion, provided that the total of all such extensions shall not result in Termination Assistance Services being performed beyond twenty-four (24) months following the effective date of the applicable Assistance Event without Contractor's consent. In each case, if the Commonwealth provides less than thirty (30) days prior notice of an extension, Contractor shall nonetheless use reasonable efforts to comply with the Commonwealth's request and provide the requested Services.

(iv) **Firm Commitment**. Contractor shall provide Termination Assistance Services regardless of the reason for the Assistance Event.

(v) **Performance**. Contractor shall provide all Termination Assistance Services subject to and in accordance with the terms and conditions of this Contract. Contractor shall perform Termination Assistance Services with at least the same degree of accuracy, quality, completeness, timeliness, responsiveness and resource efficiency as it is or was required to provide the same or similar Services in accordance with this Contract. The quality and level of performance of Termination Assistance Services provided by Contractor shall continue to meet or exceed the Service Levels and shall not be degraded or deficient in any respect. Service Level Credits shall be assessed for any failure to meet Service Levels during any period in which Termination Assistance Services are provided. If any period for performing any Termination Assistance Services extends beyond the expiration or the effective date of any termination of this Contract, the provisions of this Contract shall remain in full effect for the duration of such period.

(b) **Scope.** As part of the Termination Assistance Services, Contractor shall timely transfer the control and responsibility for Services previously performed by or for Contractor to the Commonwealth and/or its designee(s), and upon Commonwealth request, shall execute any documents reasonably necessary to effect such transfers. Contractor shall also provide any and all information and assistance requested by the Commonwealth required for:

(i) the Systems and processes associated with the Services to operate and be maintained and enhanced efficiently;

(ii) the Services to continue without interruption or adverse effect; and

(iii) the orderly transfer of the Services (or replacement or supplemental services) to the Commonwealth and/or its designee(s).

(c) **General Support**. Contractor shall:

(i) assist the Commonwealth and/or its designee(s) in developing a written plan for the migration of the Services to the Commonwealth and/or its designee(s), which plan shall include (as requested by the Commonwealth) capacity planning, process planning, facilities planning, human resources planning, technology planning, telecommunications planning and other planning necessary to effect the transition,

(ii) perform programming and consulting services as requested to assist in implementing the transition plan,

(iii) train personnel designated by the Commonwealth and/or its designee(s) in the use of any processes or associated Equipment, Materials, Systems or tools used in connection with the provision of the Services as needed for such personnel to assume responsibility for performance of the Services,

(iv) provide a catalog of all processes, Materials, the Commonwealth Data, Equipment, Software, Third Party Contracts and tools used to provide the Services,

(v) provide machine readable and printed listings and associated documentation for source code for Software owned by the Commonwealth and source code to which the Commonwealth is entitled under this Contract and assist in its re-configuration,

(vi) provide technical documentation for Software used by Contractor to provide the Services as needed for continuing performance of the Services,

(vii) analyze and report on the space required for the Commonwealth Data and the Software needed to provide the Services,

(viii) assist in the execution of a parallel operation, data migration and testing process until the successful completion of the transition to the Commonwealth and/or its designee(s),

(ix) create and provide copies of the Commonwealth Data in the format and on the media requested by the Commonwealth and/or its designee(s),

(x) provide a complete and up-to-date, electronic copy of the Commonwealth Procedure Manual in the format and on the media requested by the Commonwealth and/or its designee(s) and

(xi) provide other technical and process assistance, documentation and information as requested by the Commonwealth and/or its designee(s).

(d) **Personnel**.

(i) **List of Contractor Personnel**. Contractor shall promptly provide to the Commonwealth a list, organized by location, of the Contractor Personnel dedicated (fifty percent (50%) or more) to the performance of the Services that are implicated by each Assistance Event. Such list shall, subject to applicable privacy laws, specify each such Contractor Personnel's name, job title, compensation package, leave status, years of service and job responsibilities. The Commonwealth agrees not to disseminate the personally identifiable information contained in such list without Contractor's consent. Contractor shall not terminate, reassign or otherwise remove from the performance of the Services any such dedicated Contractor Personnel until after the end of the applicable Termination Assistance Services period.

(ii) **Right to Hire**. The Commonwealth and/or its designee(s) shall be permitted, without interference (including through counter-offers) from Contractor (subject to *Section 33(d)(iii)* below), to meet with, solicit and hire, effective after the later of (i) the date of the Commonwealth's notice of an Assistance Event and (ii) the completion of the Termination Assistance Services requiring such Contractor Personnel, any Contractor Personnel dedicated to the performance of the Services during the twelve (12) month period prior to the date of the Commonwealth's notice of an Assistance Event who are implicated by that Assistance Event. Contractor hereby waives its rights, if any, under contracts with such Contractor Personnel restricting the ability of such Contractor Personnel to be recruited or hired by the Commonwealth and/or its designee(s) (including waiving any right to restrict such personnel via non-compete agreements or other contractual means). Contractor shall provide the Commonwealth and/or its designee(s) with reasonable assistance in their efforts to meet with, solicit and hire such

Contractor Personnel, and shall give the Commonwealth and/or its designee(s) reasonable access to such Contractor Personnel for interviews, evaluations and recruitment. The Commonwealth shall endeavor, and shall cause its designee(s) to endeavor, to conduct the above-described activities in a manner that is not unnecessarily disruptive of Contractor's performance of its obligations under this Contract.

(e) **Software and Developed Documentation**. The Contractor shall provide the Commonwealth with all Software and Developed Documentation as set forth in *Section 40* (Proprietary Rights).

(f) **Equipment**.

(i) **List of Equipment**. Contractor shall promptly provide to the Commonwealth a list, organized by location, of the Equipment that is implicated by each Assistance Event. Such list shall specify information reasonably requested by the Commonwealth, including all fields tracked by Contractor in any asset management system used by Contractor for tracking and managing Equipment, such Equipment's function, manufacturer, model number, age, and other pertinent information.

(ii) **Right to Acquire**. The Commonwealth and/or its designee(s) shall have the right (but not the obligation) to purchase or assume the lease for any or all Equipment that is owned or leased by Contractor which is used in the provision of the Services and that is implicated by the relevant Assistance Event. Such Equipment shall be transferred in good working condition, reasonable wear and tear excepted, as of the later of the effective date of the relevant Assistance Event and the completion of the Termination Assistance Services requiring such Equipment. Contractor shall maintain such Equipment through the date of transfer so as to be eligible for the applicable manufacturer's maintenance program. In the case of Contractor-owned Equipment (including Equipment owned by Contractor Affiliates and Subcontractors and further including any such Equipment leased to Contractor), Contractor (or such Affiliate or Subcontractor) shall grant to the Commonwealth, and/or its designee(s) a warranty of title and a warranty that such Equipment is free and clear of all liens, security interests and other encumbrances. Such conveyance by Contractor (or Affiliate or Subcontractor) to the Commonwealth and/or its designee(s) shall be at fair market value (as shall be determined by an agreed-upon appraisal). At the Commonwealth's request, the Parties shall negotiate in good faith and agree upon the form and structure of the purchase. In the case of leased Equipment, Contractor shall (1) represent and warrant that the lease is not in default, (2) represent and warrant that all payments thereunder have been made through the date of transfer and (3) notify

the Commonwealth and/or its designee(s) of any lessor defaults of which it is aware at the time.

(g) **Third Party Contracts.** Contractor shall promptly, but no less than thirty (30) days from the Commonwealth's issuance of notice of an Assistance Event provide to the Commonwealth a list of the Third Party Contracts that are implicated by the relevant Assistance Event. Contractor shall, at the Commonwealth's request, cause the parties to such Third Party Contracts to permit the Commonwealth and/or its designee(s) to assume prospectively any or all such Third Party Contracts or to enter into new contracts with the Commonwealth and/or its designees on substantially the same terms and conditions, including price. Contractor shall transfer or assign those Third Party Contracts that the Commonwealth elects to assume prospectively to the Commonwealth and/or its designee(s) as of the later of the effective date of the relevant Assistance Event and the completion of the Termination Assistance requiring such Third Party Contracts. Such transfers or assignments shall be on terms and conditions acceptable to all applicable parties, provided that (A) there shall be no fee, charge or other amount imposed on the Commonwealth and/or its designee(s) by Contractor or the counter-parties to such Third Party Contracts for such transfer or assignment and (B) Contractor shall: (1) promptly cure and, in accordance with *Section 32(c)*, indemnify the Commonwealth against any default under such Third Party Contracts relating to the period prior to such transfer or assignment; (2) represent and warrant that all payments thereunder through the date of transfer or assignment are current; and (3) notify the Commonwealth and/or its designee(s) of any counter-party's default with respect to such Third Party Contracts of which it is aware at the time of such transfer or assignment.

Contractor will request, with respect to any contracts applicable to Contractor Third Party Software being provided to Commonwealth and being used by Contractor to perform the Services, that the third party agree in writing that it will permit the assignment or transfer of the applicable agreement with Contractor to Commonwealth at the termination or expiration of this Contract. If any such third party refuses to provide such a written agreement, then Contractor will notify Commonwealth of this fact. Upon any such notification by Contractor, Commonwealth shall notify Contractor in writing whether Contractor may use such third party in connection with Contractor's performance of the Services. If Contractor is notified by Commonwealth that it must not use such third party services, then Contractor will make commercially reasonable efforts to locate an alternate third party provider, but Contractor is not responsible for any additional third-party costs that may result from using an alternate provider. If no alternate provider can be located by Contractor, Contractor will so notify Commonwealth and the parties, both acting in good faith and through their respective project managers, will attempt to resolve the issue. The Contractor will not be responsible for any fees associated with the assignment or transfer of the license to the Commonwealth or for any breach by such third party of its agreement regarding the assignment or transfer.

(h) **Other Subcontracts and Third Party Contracts**. With respect to Third Party Contracts implicated by the relevant Assistance Event that are not otherwise transferred or assigned to the Commonwealth and/or its designee(s) pursuant to *Section 33(g)*, Contractor shall make available to the Commonwealth and/or its designee(s), pursuant to reasonable terms and conditions, any third party services then being utilized by Contractor in the performance of the Services. Contractor shall retain the right to utilize any such third party services in connection with the performance of services for other Contractor customers. The Commonwealth shall retain the right to contract directly with any third party previously utilized by Contractor to perform any Services.

(i) **Rates and Charges**. Except as provided in this Subsection and *Section 33(j)*, Contractor shall provide all Termination Assistance Services at no additional charge. The Parties anticipate that Termination Assistance Services requested by the Commonwealth shall be provided by Contractor using Contractor Personnel already assigned to the performance of the Services and without adversely affecting Contractor's ability to meet its performance obligations. To the extent the Commonwealth requests that Contractor perform only a portion (but not all) of the Services included in a particular Fee, the amount to be paid by the Commonwealth shall be equitably adjusted downward in proportion to the portion of the Services that Contractor shall not be providing.

(j) **Proprietary Communications Network**. If Contractor uses a proprietary communications network to provide the Services, then for a period of up to two (2) years following the effective date of the relevant Assistance Event, Contractor shall, if requested by the Commonwealth, continue to provide such proprietary communications network and other network Services to the Commonwealth, the Commonwealth and/or its designee at the rates, and subject to the terms and conditions, set forth in this Contract.

(k) **Resources.** Contractor shall maintain capability on at least thirty (30) days notice at all times during the Term to deploy all necessary resources to perform any Termination Assistance Services.

(l) **Information.** At the Commonwealth's request, Contractor shall provide to and/or make available for the Commonwealth review, at Contractor's sole cost and expense, any and all reports, data and information that the Commonwealth deems necessary in order to evaluate all options related to an Assistance Event. Contractor shall provide all such reports, data and information regardless of whether the Commonwealth has provided notice of or otherwise declared an Assistance Event.

(m) **Breach**. Contractor acknowledges and agrees that, upon any breach or threatened breach by Contractor of its obligations under this *Section 33* (Termination Assistance), Commonwealth shall be entitled to seek injunctive relief, including an order of specific performance. The provisions of this *Section 33* (Termination

Assistance) will survive any expiration of the Term and any termination of this Contract.

34. CONTRACT CONTROVERSIES

(a) All disputes between the parties arising under or relating to this Contract shall initially be referred in writing by either party to the Contractor Project Manager and the Commonwealth Project Manager. If the Contractor Project Manager and the Commonwealth Project Manager are unable to resolve the dispute within ten (10) Commonwealth business day(s) after referral of the matter to them or upon the earlier request by either the Contractor Project Manager or the Commonwealth Project Manager, the parties shall submit the dispute to the Management Committee for immediate review.

(b) Within ten (10) Commonwealth business days after any dispute between the parties is submitted to the Management Committee pursuant to Subparagraph 30(a), the Management Committee shall meet for the purpose of attempting to resolve such dispute. At any meeting of the Management Committee at which more than one (1) dispute will be considered, Commonwealth may establish the order in which such disputes shall be addressed. If the Management Committee is unable to resolve a dispute within fifteen (15) Commonwealth business days after the date of the initial meeting of the Management Committee during which such dispute was considered, the Management Committee shall immediately notify Commonwealth and Contractor pursuant to Subparagraph 30(c).

(c) In the event of a controversy or claim arising from the Contract that has not been resolved by the above process, the Contractor must, within six (6) months, file a written claim with the contracting officer for a determination. The claim shall state all grounds upon which the Contractor asserts a controversy exists

(1) The Commonwealth shall review timely-filed claims and issue a final determination, in writing, regarding the claim. The final determination shall be issued within 120 days of the receipt of the claim, unless extended by consent of the contracting officer and the Contractor. The Commonwealth shall send its written determination to the Contractor. If the Commonwealth fails to issue a final determination within the 120 days (unless extended by consent of the parties), the claim shall be deemed denied. The Commonwealth's determination shall be the final order of the purchasing agency.

(2) Within fifteen (15) days of the mailing date of the determination denying a claim or within one hundred thirty five (135) days of filing a claim if no extension is agreed to by the parties, whichever

occurs first, the Contractor may file a statement of claim with the Commonwealth Board of Claims.

(d) Each of Commonwealth and Contractor acknowledge that the provision of the Services is critical to the operations of Commonwealth. Accordingly, in the event of a dispute between Commonwealth and Contractor arising under or relating to this Contract, Contractor shall continue to provide the Services in accordance with the terms of this Contract during the pendency of the resolution of such dispute, including the final judicial resolution thereof by Commonwealth's Board of Claims or any appeal thereof, and Commonwealth shall compensate the Contractor pursuant to the terms of the Contract.

35. COMMONWEALTH HELD HARMLESS

(a) The Contractor shall hold the Commonwealth harmless from and indemnify the Commonwealth against any and all third party claims, demands and actions based upon or arising out of any activities performed by the Contractor and its employees and agents under this Contract, provided the Commonwealth gives Contractor prompt notice of any such claim of which it learns. Pursuant to the Commonwealth Attorneys Act (71 P.S. § 732-101, et seq.), the Office of Attorney General (OAG) has the sole authority to represent the Commonwealth in actions brought against the Commonwealth. The OAG may, however, in its sole discretion and under such terms as it deems appropriate, delegate its right of defense. If OAG delegates the defense to the Contractor, the Commonwealth will cooperate with all reasonable requests of Contractor made in the defense of such suits.

(b) Notwithstanding the above, neither party shall enter into any settlement without the other party's written consent, which shall not be unreasonably withheld. The Commonwealth may, in its sole discretion, allow the Contractor to control the defense and any related settlement negotiations.

36. LIMITATION OF LIABILITY

(a) The Contractor's liability to the Commonwealth under this Contract shall be limited to the value of the contract. This limitation will apply, except as otherwise stated in this *Section 36* (Limitation of Liability), regardless of the form of action, whether in contract or in tort, including negligence and whether related to direct, consequential, exemplary or punitive damages.

(b) This limitation does not apply to damages for:

(1) Bodily injury;

(2) Death;

(3) Intentional injury;

(4) Damage to real property or tangible personal property for which the Contractor is legally liable; or

(5) The Contractor's indemnity of the Commonwealth for patent, copyright, trade secret or trademark protection;

(6) Third party claims related to confidential or proprietary data misuse of confidential information or data;

(7) Milestone Credits, provided, however that payment will accrue against the cap;

(8) Commonwealth's losses resulting from Contractor's gross negligence, willful misconduct; or

(9) Contractor's costs incurred for notification, mitigation, and credit monitoring services required due to a security breach; or

(10) The Commonwealth costs, losses or damages incurred due to Personal Information being accessed, used, released, disclosed and/or acquired in an unauthorized manner while in the control of the Contractor; or

(11) Contractor's abandonment of any Services, wrongful termination of the Contract or willful refusal to provide Termination Assistance Services.

(c) Except as provided for in *Section 36(c)(1) through (4)*, neither Party will be liable for indirect, incidental, special, consequential, exemplary or punitive damages arising out of or relating to the Contract:

(1) Additional costs to maintain the Services arising from a default by Contractor including the cost of work-arounds;

(2) Loss of or corruption to Commonwealth data including, without limitation, the cost and expense of rectification of the data arising out of a default (including for recovering, reconstructing, reformatting or reloading data), but only to the extent such damages arise out of the failure of Contractor to comply with its obligations under *Section 52* (Virus and Malicious Code);

(3) Expenditure or charges incurred by Commonwealth and rendered necessary as a result of a default by Contractor; and

(4) Any regulatory losses, fines, expenses or other losses suffered by Commonwealth as a result of Contractor's failure to comply with any law or regulation.

37. CONFIDENTIALITY

(a) For purposes of this Contract, "*Confidential Information*" of a party shall mean (1) with respect to Commonwealth, all Commonwealth Data and other information of Commonwealth or any Commonwealth agency or any private individual, organization or public agency, in each case to the extent such information and documentation is not permitted to be disclosed to third parties under local, Commonwealth or Federal laws and regulations or pursuant to any policy adopted by Commonwealth or pursuant to the terms of any third-party agreement to which Commonwealth is a party and (2) with respect to Contractor, all information identified in writing by Contractor as confidential or proprietary to Contractor, its subcontractors or licensors.

(b) All Confidential Information relating to a party shall be held in confidence by the other party to the same extent and in at least the same manner as such party protects its own confidential or proprietary information. Neither party shall disclose, publish, release, transfer or otherwise make available any Confidential Information of the other party in any form to, or for the use or benefit of, any person or entity without the other party's consent. Subject to the other provisions of this Contractor, each party shall, however, be permitted to disclose relevant aspects of the other party's Confidential Information to its officers, agents, subcontractors and employees and to the officers, agents, subcontractors and employees of its corporate affiliates or subsidiaries to the extent that such disclosure is reasonably necessary for the performance of its duties and obligations under this Contract; provided, however, that such party shall take all reasonable measures to ensure that Confidential Information of the other party is not disclosed or duplicated in contravention of the provisions of this Contractor by such officers, agents, subcontractors and employees and that such party shall be responsible for any unauthorized disclosure of the Confidential Information of the other party by such officers, agents, subcontractors or employees; and further provided, that if the disclosure is by the Commonwealth to another contractor or sub-contractor, such disclosure is subject to a suitable non-disclosure agreement. The obligations in this Paragraph shall not restrict any disclosure by either party pursuant to any applicable law, or in accordance with the order of any court or government agency of competent jurisdiction (provided that the disclosing party shall give prompt notice to the non-disclosing party of such order) and, except to the extent provided otherwise by any applicable law, shall not apply with respect to information which:

(1) is developed by the other party without violating the disclosing party's proprietary rights,

(2) is or becomes publicly known (other than through unauthorized disclosure),

(3) is disclosed by the owner of such information to a third party free of any obligation of confidentiality,

(4) is already known by such party without an obligation of confidentiality other than pursuant to this Contractor or any confidentiality Contractor entered into before the Effective Date between Commonwealth and Contractor, or

(5) is rightfully received by the disclosing party free of any obligation of confidentiality.

The confidentiality period for Confidential Information which is related to hardware, software, technical specifications, and methods and processes related to data processing and/or computing shall continue from the date of disclosure until two years following expiration or termination of this Contract. The immediately preceding sentence shall not release or relax, in whole or in part, Contractor's confidentiality obligations with respect to information pertaining to any private individual or, with respect to any Commonwealth Agency, information or documentation which is not permitted to be disclosed to third parties under local, Commonwealth or Federal laws and regulations or pursuant to the terms of any third party Contractor to which Commonwealth is a party.

Nothing in this *Section 37(b)* shall supersede or limit, or be deemed to supersede or limit, any other provision of this Contract pertaining to confidentiality or disclosure of any Commonwealth Data or to any security procedures required to be followed by Contractor or its employees and other representatives. In addition to the confidentiality and non-disclosure and other restrictive provisions of this *Section 37(b)* and elsewhere in this Contract, Contractor shall be subject to, and shall be required to abide by, the provisions set forth in the *Exhibits* to the RFP, all of which are required to be incorporated into this Contract to satisfy the requirements of a particular Commonwealth Agency, a particular agency of the Federal government with whom Commonwealth interacts or other third party.

(c) Each party shall:

(1) Notify the other party promptly of any known unauthorized possession, use or knowledge of the other party's Confidential Information by any person or entity.

(2) Promptly furnish to the other party full details known by such party relating to the unauthorized possession, use or knowledge thereof and shall use reasonable efforts to assist the other party in investigating or

preventing the recurrence of any unauthorized possession, use or knowledge of the other party's Confidential Information.

(3) Use reasonable efforts to cooperate with the other party in any litigation and investigation against third parties deemed necessary by the other party to protect its proprietary rights.

(4) Promptly use all reasonable efforts to prevent a recurrence of any such unauthorized possession, use or knowledge of the other party's Confidential Information.

(d) Each party shall bear the cost it incurs as a result of compliance with this Paragraph. The obligations in this Paragraph shall not restrict any disclosure by either party pursuant to any applicable law or pursuant to the order of any court or other legal process or government agency of competent jurisdiction (provided that the disclosing party shall give prompt notice to the non-disclosing party of such order).

(e) There shall be no restriction with respect to the use or disclosure of any ideas, concepts, know-how or data processing techniques developed alone or jointly with Commonwealth in connection with Services provided to Commonwealth under this Contractor.

(f) The Contractor shall use the following process when submitting information to the Commonwealth it believes to be confidential and/or proprietary information or trade secrets:

(1) Prepare an un-redacted version of the appropriate document, and

(2) Prepare a redacted version of the document that redacts the information that is asserted to be confidential or proprietary information or a trade secret, and

(3) Prepare a signed written statement that states:

(i) the attached document contains confidential or proprietary information or trade secrets;

(ii) the Contractor is submitting the document in both redacted and un-redacted format in accordance with 65 P.S. § 67.707(b); and

(iii) the Contractor is requesting that the document be considered exempt under 65 P.S. § 67.708(b)(11) from public records requests.

(4) Submit the two documents with the signed written statement to the Commonwealth.

(g) When the Contract expires or terminates, and at any other time at the written request of the Commonwealth, the Contractor must promptly return to the Commonwealth all of the Commonwealth's Confidential Information and Data (and all copies of this information) that is in the Contractor's possession or control, in whatever form. Unless the Commonwealth agrees or specifies otherwise, the Contractor shall also deliver to the Commonwealth or, if requested by the Commonwealth, delete or destroy any copies, duplicates, summaries, abstracts or other representations of any such Confidential Information or any part thereof, in whatever form, then in the Contractor's possession or control in accordance with the "NIST Guidelines for Media Sanitization" (SP 800-88).

38. SENSITIVE INFORMATION

(a) The Contractor shall not publish or otherwise disclose, except to the Commonwealth or the Contractor's subcontractors, any information or data obtained hereunder from private individuals, organizations, or public agencies, in a way that allows the information or data furnished by or about any particular person or establishment to be identified.

(b) The parties shall not use or disclose any information about a recipient receiving services from, or otherwise enrolled in, a Commonwealth program affected by or benefiting from services under this Contract for any purpose not connected with the parties' Contract responsibilities.

(c) Contractor, as directed, shall comply with all federal or state laws and regulations related to the use of information that constitutes protected health information (PHI) as defined by the regulations promulgated pursuant to the *Health Insurance Portability and Accountability Act* (HIPAA). By signing this Contract, the Contractor agrees to the terms of the Business Associates Contract, which is incorporated into this Contract as Appendix A. If Contract Participant, or relevant portion thereof, is a Covered Entity as defined in HIPAA, and the Contractor is performing the work of a Business Associate, the Contract Participant will fill in the blanks in the attached Appendix. It is understood that Appendix A is only applicable if the Contract Participant indicates in writing to Contractor, specifying the work and scope intended to be subject to a Business Associates Contract, and only to the extent that Contractor and the Contract Participant agree in writing as to the specific application of Appendix A and the Business Associate Contract. If not applicable to the entire Contract Participant, Appendix A is only applicable with respect to the internal entities indicated by the Contract Participant and agreed to by the Contractor.

(d) Contractor will comply with all obligations applicable to it under all applicable data protection legislation in relation to all personal data that is processed by it in the course of performing its obligations under this Contract including by:

(1) Maintaining a valid and up to date registration or notification under the data protection legislation; and

(2) Complying with all data protection legislation applicable to cross border data flows of personal data and required security measures for personal data.

39. PATENT, COPYRIGHT, TRADEMARK, AND TRADE SECRET PROTECTION

(a) The Contractor shall hold the Commonwealth harmless from any suit or proceeding which may be brought by a third party against the Commonwealth, its departments, officers or employees for the alleged infringement of any United States or foreign patents, copyrights, or trademarks, or for a misappropriation of trade secrets arising out of performance of this Contract, including all work, services, materials, reports, studies, and computer programs provided by the Contractor, and in any such suit or proceeding will satisfy any final award for such infringement, including costs. The Commonwealth agrees to give Contractor prompt notice of any such claim of which it learns. Pursuant to the Commonwealth Attorneys Act 71 P.S. § 732-101, *et seq.*, the Office of Attorney General (OAG) has the sole authority to represent the Commonwealth in actions brought against the Commonwealth. The OAG may, however, in its sole discretion and under the terms it deems appropriate, delegate its right of defense. If OAG delegates the defense to the Contractor, the Commonwealth will cooperate with all reasonable requests of Contractor made in the defense of such suits. No settlement which prevents the Commonwealth from continuing to use the Developed Materials as provided herein shall be made without the Commonwealth's prior written consent. In all events, the Commonwealth shall have the right to participate in the defense of any such suit or proceeding through counsel of its own choosing. It is expressly agreed by the Contractor that, in the event it requests that the Commonwealth to provide support to the Contractor in defending any such claim, the Contractor shall reimburse the Commonwealth for all reasonable expenses (including attorneys' fees, if such are made necessary by the Contractor's request) incurred by the Commonwealth for such support. <u>If OAG does not delegate the defense of the matter, the Contractor's obligation to indemnify ceases</u>. The Contractor will, at its expense, provide whatever cooperation OAG requests in the defense of the suit.

(b) The Contractor agrees to exercise reasonable due diligence to prevent claims of infringement on the rights of third parties. The Contractor certifies that, in all respects applicable to this Contract, it has exercised and will continue to exercise due diligence to ensure that all works produced under this Contract do

not infringe on the patents, copyrights, trademarks, trade secrets or other proprietary interests of any kind which may be held by third parties.

(c) If the defense of the suit is delegated to the Contractor, the Contractor shall pay all damages and costs finally awarded therein against the Commonwealth, when such damages and costs are required to be paid. If information and assistance are furnished by the Commonwealth at the Contractor's written request, it shall be at the Contractor's expense, but the responsibility for such expense shall be only that within the Contractor's written authorization.

(d) If the products, materials, reports, studies, or computer programs furnished hereunder become subject to a claim of infringement of a United States patent, copyright, or trademark, or for a misappropriation of trade secret, or if any of the products, materials, reports, studies or computer programs provided by the Contractor are in such suit or proceeding held to constitute infringement and the use or publication thereof is enjoined, then without diminishing the Contractor's obligation to satisfy any final award, the Contractor may, at its option and expense, substitute functional equivalents for the alleged infringing products, materials, reports, studies, or computer programs or, at the Contractor's option and expense, obtain the rights for the Commonwealth to continue the use of such products, materials, reports, studies, or computer programs.

(e) If any of the products, materials, reports, studies, or computer programs provided by the Contractor are in such suit or proceeding held to constitute infringement and the use or publication thereof is enjoined, the Contractor shall, at its own expense and at its option, either procure the right to publish or continue use of such infringing products, materials, reports, studies, or computer programs, replace them with non-infringing items, or modify them so that they are no longer infringing.

(f) If the Contractor is unable to do any of the preceding, the Contractor agrees to pay the Commonwealth:

(1) Any amounts paid by the Commonwealth less a reasonable amount based on the acceptance and use of the deliverable;

(2) Any license fee less an amount for the period of usage of any software; and

(3) The prorated portion of any Fees representing the time remaining in any period of service for which payment was made.

(g) The obligations of the Contractor under this Section 45 (Patent, Copyright, Trademark, and Trade Secret Protection) continue without time limit and survive the termination of this Contract.

(h) Notwithstanding the above, the Contractor shall have no obligation for:

(1) Modification of any product, service, or deliverable provided by the Commonwealth or any third party, except for the Contractor or any of its Subcontractors;

(2) Any material provided by the Commonwealth to the Contractor and incorporated into, or used to prepare, a product, service, or deliverable;

(3) Use of the product, service, or deliverable in other than its specified operating environment;

(4) The combination, operation, or use of the product, service, or deliverable with other products, services, or deliverables not provided by the Contractor as a system or the combination, operation, or use of the product, service, or deliverable, with any products, data, or apparatus that the Contractor did not provide;

(5) Infringement of a non-Contractor product alone;

(6) The Commonwealth's distribution, marketing or use beyond the scope contemplated by the Contract;

(7) The Commonwealth's failure to use corrections or enhancements made available to the Commonwealth by the Contractor at no charge;

(8) Any infringement or claim thereof against the Commonwealth brought prior to the execution of this Contract, unless the infringement or claim relates to services provided by Contractor under another contract with the Commonwealth; or

(9) Infringement related to content provided by or on behalf of the Commonwealth, except as provided by the Contractor or any of its Subcontractors or suppliers.

(i) The obligation to defend and indemnify the Commonwealth, under the terms of this *Section 39* (Patent, Copyright, Trademark, and Trade Secret Protection), shall be the Contractor's sole and exclusive obligation and the Commonwealth's sole and exclusive remedy against the Contractor for the infringement or misappropriation of intellectual property.

40. PROPRIETARY RIGHTS

(a) **Commonwealth Software**. As between Commonwealth and Contractor, all Commonwealth Software shall be and shall remain the exclusive property of Commonwealth or its licensors, and Contractor shall have no rights or interests in the Commonwealth Software by virtue of this Contract except as described in this *Section 40* (Proprietary Rights) or elsewhere in this Contract. Commonwealth hereby grants to Contractor, at no cost to Contractor, for the limited purpose of providing the Services, a nonexclusive, nontransferable, royalty-free right (subject to the terms of any third party agreement to which Commonwealth is a party and which theretofore is disclosed to Contractor) to (1) have access to the Commonwealth Software, (2) copy the Commonwealth Software for archival purposes or as may otherwise be required by this Contract, (3) modify the Commonwealth Software as required by this Contract, if permitted by the Software licensing terms and pursuant to the terms of Commonwealth Third Party Software license agreement, if applicable, and (4) sublicense Contractor's subcontractors approved by Commonwealth to do any of the foregoing; provided, however, that neither Contractor nor any of its subcontractors may decompile or reverse engineer, or attempt to decompile or reverse engineer, any of the Commonwealth Software.

As of the Effective Date and subject to the terms of any third party agreement to which Commonwealth is a party, (1) Commonwealth shall, at no cost to Contractor, provide Contractor with access to the Commonwealth Software in the form in use by Commonwealth as of the Effective Date and (2) Contractor, as part of the Services, shall compile and, as changes are made, update a list of all of the Commonwealth Software then in use by Contractor or any of its subcontractors in connection with Contractor's performance of the Services. Upon the expiration or termination for any reason of Contractor's obligation to provide the Services or of this Contract, the rights granted to Contractor in this *Section 40(a)* shall immediately revert to Commonwealth or Commonwealth's designee, and Contractor forthwith shall, at no cost to Commonwealth, deliver to Commonwealth all of the Commonwealth Software (including any related source code and object code in Contractor's possession or under its control) in the form in use as of the effective date of such expiration or termination, together with a current copy of the list of Commonwealth Software in use as of the date of such expiration or termination. Concurrently therewith, Contractor shall destroy or erase all other copies of any of the Commonwealth Software then in Contractor's possession or under its control unless otherwise instructed by Commonwealth; provided, however, pursuant to and if permitted by the Commonwealth's license agreement for Commonwealth Third Party Software, if applicable, that Contractor may retain one archival copy of such Commonwealth Software, including the Developed Software, until the later of six (6) years after such expiration or termination of this Contract and the final resolution of any actively asserted pending disputes between the parties, such retention being for the sole purpose of establishing Contractor's performance under this Contract.

(b) **Contractor Software and Contractor Tools**. As between Commonwealth and Contractor, all Contractor Software and Contractor Tools shall be and shall remain the exclusive property of Contractor, and Commonwealth shall have no rights or interests in the Contractor Software or the Contractor Tools by virtue of this Contract except as described in this *Section 40(b)*. As part of the Services, Contractor shall during the Term (1) use the Contractor Software and the Contractor Tools to provide the Services, (2) make available the commercially available Contractor Software and the commercially available Contractor Tools to Commonwealth for use by Commonwealth solely in connection with the Services, and (3) maintain on Commonwealth's premises and make available to Commonwealth upon Commonwealth's request from time to time, for archival purposes only, a copy of the Contractor Software and the Contractor Tools owned by Contractor or its subcontractors and then being used by Contractor to provide the Services.

Upon the expiration or termination for any reason of Contractor's obligation to provide the Services under this Contract and at the request of Commonwealth, Contractor shall, subject to mutually agreed terms and conditions, (1) grant, or cause its subcontractors to grant, to Commonwealth a nonexclusive, nontransferable license to use and, if permitted by the terms of mutually agreed terms and conditions relating thereto, modify and make derivative works of, and unless Commonwealth terminates this Contract pursuant to the terms of *Section 32(a),(b), or (f)* to grant to third parties engaged by Commonwealth the right to use and, if permitted by mutually agreed terms and conditions relating thereto, modify and make derivative works of, all or any portion of the commercially available Contractor Software and the commercially available Contractor Tools owned by Contractor or its subcontractors theretofore being used by Contractor in connection with the Services, the foregoing rights being granted to the extent reasonably necessary to facilitate Commonwealth's or such third party's performance of the activities or services substantially equivalent to the Services to be provided by Contractor under this Contract immediately prior to such expiration or termination and (2) deliver to Commonwealth the object code version of such commercially available Contractor Software and such commercially available Contractor Tools in the form being used by Contractor in connection with the Services immediately prior to such expiration or termination.

It is understood and agreed by Contractor that the rights granted to Commonwealth hereunder in respect of the commercially available Contractor Software and the commercially available Contractor Tools shall not restrict Commonwealth from using such Contractor Software and such Contractor Tools in the manner in which such items were used by Contractor and its subcontractors to provide the Services immediately prior to the expiration or termination of this Contract. The foregoing obligations of Contractor shall be subject to mutually agreed terms and conditions. In consideration of the grant to Commonwealth of the foregoing license, Commonwealth shall be assessed license fees hereunder not in excess of any license fees therefor being offered, as of the date of

termination, by Contractor or its subcontractors, to their respective state governmental customers generally, unless Commonwealth terminates this Contract pursuant to the terms of *Section 32(a),(b) or (f)*, in which case the then-prevailing license fees of Contractor and its subcontractors, as applicable, shall apply. The foregoing shall not limit or otherwise affect Commonwealth's obligations to pay third party assignment or transfer fees as contemplated in *Section 33* (Termination Assistance); provided, however, that Commonwealth shall not be assessed any additional fees in respect thereof by Contractor.

(c) **Developed Documentation.** Documentation developed by Contractor specifically for the Commonwealth in connection with its performance under this Contract is the sole and exclusive property of the Commonwealth and shall be considered "works made for hire" under the United States Copyright Act of 1976, as amended, 17 United States Code. In the event that the documentation does not fall within the specifically enumerated works that constitute works made for hire under the United States copyright laws, Contractor agrees to assign and, upon their authorship or creation, expressly and automatically assigns all copyright interests, proprietary rights, trade secrets, and other right, title, and interest in and to such documentation to Commonwealth. Commonwealth shall have all rights accorded an owner of copyright under the United States copyright laws including, but not limited to, the exclusive right to reproduce the documentation in multiple copies, the right to distribute, copies by sales or other transfers, the right to register all copyrights in its own name as author in the United States and in foreign countries, the right to prepare derivative works based upon the Creative Works and the right to display the documentation. Upon completion or termination of this Contract, all working papers, files and other documents related to the documentation shall immediately be delivered by Contractor to the Commonwealth. Contractor warrants that the documentation is original and does not infringe any copyright, patent, trademark, or other intellectual property right of any third party and are in conformance with the intellectual property laws of the United States. Provided however that Commonwealth's sole remedy for breach of this warranty is the indemnity contained in *Section 39* (Patent, Copyright, Trademark, and Trade Secret Protection).

(d) All literary works, or other works of authorship (such as application programs, listings, programming tools, documentation, reports, drawings, procedure manuals and similar works) ("Developed Materials") developed hereunder shall be treated in accordance with the following general principles:

(1) If and to the extent Developed Materials modify, improve or enhance software programs generally licensed by Contractor to end-users, then such Developed Materials shall be the property of Contractor and Contractor hereby grants to Commonwealth a perpetual, non-exclusive, nontransferable, royalty-free license to use such Developed Materials in Commonwealth's receipt and use of the Services;

(2) If and to the extent Developed Materials modify, improve or enhance software or other materials owned by Commonwealth or licensed to Commonwealth by a third party (i.e., a licensor other than Contractor or any Contractor agent), then such modification, improvement or enhancement and all related intellectual property rights therein shall, as between Commonwealth and Contractor, be the property of Commonwealth;

(3) If and to the extent Developed Materials constitute a newly created software program or module, and if Commonwealth funds the development cost thereof to any extent, then such software program or module and all related intellectual property rights therein shall be the property of Commonwealth; and

(4) If and to the extent Developed Materials constitute documentation, reports, drawings, procedure manuals and similar works, such Developed Materials shall be the property of Commonwealth. Contractor will not place trademarks or copyright notices on any such Developed Materials.

(5) Any data related to the use of the Services by the Commonwealth shall be the property of the Commonwealth. For this purpose, data includes ordering information, inventories, etc. At the end of the Contract, regardless of how it is ended, or at any time requested by the Commonwealth, the Contractor will provide the Commonwealth with such data in a format specified by the Commonwealth.

(e) **Residual Knowledge**. Either Party, in the course of conducting business, may use any ideas, concepts, and know-how, relating to the Services which Contractor or Commonwealth (alone or jointly with the Commonwealth) develops or learns in connection with Contractor's provision of Services to Commonwealth under this Contract.

41. PUBLICATION RIGHTS AND/OR COPYRIGHTS

(a) The Contractor shall not publish any of the results of the work, which identify the Commonwealth, without the written permission of the Commonwealth. The publication shall include the following statement: "The opinions, findings, and conclusions expressed in this publication are those of the author and not necessarily those of the Commonwealth of Pennsylvania." The Contractor shall not include in the documentation any copyrighted matter, unless the Contractor provides the Commonwealth with written permission of the copyright owner.

(b) Except as otherwise provided in *Section 40* (Proprietary Rights) and the confidentiality provisions of *Section 37* (Confidentiality), the Commonwealth shall have unrestricted authority to reproduce, distribute, and use any submitted report or data designed or developed and delivered to the Commonwealth as part of the performance of the Contract.

(c) Rights and obligations of the parties under this *Section 41* (Publication Rights and/or Copyrights) survive the termination of this Contract.

42. REPORTS AND DATA

(a) Data. Commonwealth shall supply to Contractor the Commonwealth Data in the form maintained by the Commonwealth on such time schedules as may be agreed to by Commonwealth and Contractor from time to time. All Commonwealth Data is and shall remain the property of Commonwealth. Subject to *Section 40* (Proprietary Rights), the Commonwealth Data shall not be (1) used by Contractor or Contractor Agents other than in connection with providing the Services, and then only in accordance with the terms of this Contract, (2) disclosed, sold, assigned, leased or otherwise provided to third parties by Contractor or Contractor Agents without Commonwealth's consent and any applicable consent required by any federal governmental entity, or (3) commercially exploited by or on behalf of Contractor or Contractor Agents.

(b) Reports. As part of the Services, Contractor shall provide the Reports, in electronic form, to Commonwealth. The Reports shall be prepared by Contractor and provided to the Commonwealth in a manner readable by a normal Windows based personal computer. Acceptable formats include but are not limited to: Adobe Acrobat (PDF), Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Text, Comma Separated Values (CSV).

(c) Correction of Errors. In the event of any errors or inaccuracies in any of the Commonwealth Data or the Reports, or any other data processing errors or unexpected interruptions (e.g., "abends" or “freeze”), Contractor and Commonwealth shall work together in good faith, using all reasonable efforts and commencing immediately upon the discovery of the situation, to correct such error, inaccuracy or interruption. The foregoing obligations of Contractor under this *Section 42(c)* shall be subject to any limitations placed upon Contractor's access to the Commonwealth Data by Commonwealth or pursuant to this Contract. Promptly upon the completion of the correction of such error, inaccuracy or interruption, the Commonwealth Project Manager and the Contractor Project Manager shall meet to determine and document the cause thereof. If the error, inaccuracy or interruption is determined to be caused by the error, negligence or omission of Contractor to perform an obligation under this Contract, there shall be no charge to Commonwealth for Contractor's participation in such correction. If the error, inaccuracy or interruption is determined to be caused by the error, negligence or omission of

Commonwealth to perform an obligation under this Contract, Commonwealth shall reimburse Contractor for Contractor's out-of-pocket expenses paid by Contractor to third parties (other than Contractor's or any Contractor's Agent's employees) for expertise not otherwise possessed by or available to Contractor and Contractor's expenses for its employees or the employees of any Contractor agent not theretofore engaged in the provision of the Services.

(d) Return of Data. At no cost to Commonwealth and as part of the Services, Contractor shall, upon Commonwealth's request at any time and at the cessation of the Termination Assistance, (1) promptly return to Commonwealth, in the format and on the media in use as of the date of the request, all or the requested portion of the Commonwealth Data then in Contractor's possession or under its control and (2) erase or destroy all or the requested portion of Commonwealth Data then in Contractor's possession or under its control. Commonwealth Data returned to the Commonwealth must be in a form that is freely accessible to the Commonwealth and not in a Contractor proprietary format.

43. SECURITY AND PROTECTION OF INFORMATION

(a) At all times during the Term, Contractor shall provide all Services, and use all resources related thereto, in a secure manner and in accordance with the Commonwealth's security requirements, including the prevention and detection of fraud, abuse, or other inappropriate use or access of systems and networks by all appropriate means, including network management and maintenance applications and tools, and the use of appropriate encryption technologies. In addition, all Contractor personnel (including personnel of any Subcontractors) shall be subject to and shall at all times conform to the Commonwealth's laws, rules, and requirements for the protection of premises, materials, equipment, and personnel, as they have been previously disclosed to Contractor in writing, including those set forth in the *Exhibits* to the RFP. Any violations or disregard of these rules shall be cause for denial of access by such personnel to the Commonwealth's property. Contractor shall exercise due care and diligence to prevent any injury to person or damage to property while on the Commonwealth's premises. The operation of Contractor vehicles or private vehicles of Contractor personnel on the Commonwealth's property shall conform to posted and other regulations and safe driving practices. Vehicular accidents on the Commonwealth's property and involving Contractor personnel shall be reported promptly to the appropriate Commonwealth's security personnel.

(b) The Pennsylvania State Police's Criminal Justice Information Services Policy ("CJIS Policy"), is set forth in *Exhibits G.6 and G.7*, and is hereby incorporated by this reference into this Contract. Contractor acknowledges and agrees that it is bound by all applicable provisions of the CJIS Policy. Contractor and the Commonwealth further agree that, in accordance with the CJIS Policy, the Commonwealth does not anticipate and will not authorize any

requests to Contractor for the criminal history record information covered by the CJIS Policy, because Contractor is performing an IT support function. The Commonwealth's Office of Attorney General's CHRIA Handbook, attached as *Exhibit G.12* to the RFP, is also incorporated by reference into this Contract. Contractor acknowledges and agrees that it is bound by all applicable provisions of the CHRIA Handbook.

.

44. BACKGROUND CHECKS

(a) The Contractor must, at its expense, arrange for a background check for each of its employees, as well as for the employees of its subcontractors, who will have access to Commonwealth Services Locations, either through on site or remote access. Background checks will not be conducted by the Commonwealth but rather will be conducted by Contractor or its subcontractors according to Contractor policy and practice and consistent with ITB-SEC009. The background check must be conducted prior to initial access by a Contractor Personnel and every two (2) years thereafter or at a longer interval if required by applicable law.

(b) Before the Commonwealth will permit Contractor Personnel access to Commonwealth facilities, the Contractor must provide written confirmation to the office designated by the agency that the background check has been conducted. If, at any time, it is discovered that Contractor Personnel has a criminal record that includes a felony or misdemeanor involving terroristic threats, violence, use of a lethal weapon, or breach of trust/fiduciary responsibility; or which raises concerns about building, system, or personal security, or is otherwise job-related, the Contractor shall notify the Commonwealth Contracting Officer immediately, shall not assign that employee to any Commonwealth facilities, shall remove any access privileges already given to the employee, and shall not permit that employee remote access to Commonwealth facilities or systems, unless the agency consents, in writing, prior to the access being provided. The agency may withhold its consent at its sole discretion. Failure of the Contractor to comply with the terms of this Paragraph may result in default of the Contractor under its Contract with the Commonwealth.

(c) The Commonwealth specifically reserves the right of the Commonwealth to conduct background checks over and above that described herein.

45. INSURANCE

(a) Contractor Insurance Requirements. During the Contract Term, Contractor shall maintain at its own expense, insurance of the type and in the amounts specified below and issued by companies authorized to conduct such business under the laws of Pennsylvania:

(1) Statutory workers' compensation in accordance with all applicable Federal, state and local requirements, and employer liability in an amount not less than $2,000,000 per occurrence;

(2) Comprehensive general public liability (including contractual liability insurance) in an amount not less than $5,000,000 per occurrence;

(3) Comprehensive automobile liability covering all vehicles that Contractor owns, hires, or leases in an amount not less than $5,000,000 per occurrence (combined single limit for bodily injury and property damages).

(4) Personal property insurance, on a replacement basis, covering all of Contractor's and Contractor's Agents' personal property located at any Contractor Services Location.

(5) Professional liability/error & omission in the aggregate amount of not less than $15,000,000.

(6) Comprehensive crime insurance in an amount of not less than $15,000,000 per claim.

(7) Network/Cyber Liability Insurance (including coverage for Technology Professional Liability if not covered under Contractor's Professional Liability/Errors and Omissions Insurance referenced above) in the amount of $20,000,000, per occurrence.

(8) Umbrella/excess in an aggregate amount of not less than $30,000,000.

(b) Insurance Requirements for Subcontractors. During the Contract Term, Contractor shall require each of its subcontractors listed in *Schedule L* (Approved Subcontractors) and any other subcontractors performing any Services on-site at any of the Contractor Services Locations, to maintain at their own expense or Contractor's expense, insurance of the type and in the amounts specified below:

(1) Statutory workers' compensation in accordance with all applicable Federal, state and local requirements, and employer liability in an amount not less than $1,000,000 per occurrence;

(2) Comprehensive general public liability (including contractual liability insurance) in an amount not less than $2,000,000 per occurrence;

(3) If any of the subcontractor personnel will be on-site at any of the Commonwealth's or Contractor's facilities, comprehensive automobile liability covering all vehicles owned, hired or leased by that Subcontractor and in an amount not less than $2,000,000 per

occurrence (combined single limit for bodily injury and property damages);

(4) If the subcontractor personnel will be on-site at any of Commonwealth's or Contractor's facilities, personal property insurance, on a replacement basis, covering all of that Subcontractor's personal property located at any such facilities; and

(5) Network/Cyber Liability Insurance (including coverage for Technology Professional Liability if not covered under Contractor's Professional Liability/Errors and Omissions Insurance referenced above) in the amount of $10,000,000, per occurrence; and

(6) Errors & Omissions liability in the amount of $2,000,000 each claim and aggregate (if applicable).

(c) Prior to the expiration of any then effective insurance policy, Contractor shall furnish to Commonwealth certificates of insurance or other appropriate documentation (including evidence of renewal of insurance) evidencing all coverage referenced in this *Section 45* (Insurance), as applicable, and naming Commonwealth as an additional insured to the extent of Contractor's indemnities contained in this Contract. Contractor shall have included in all policies of insurance required hereunder a waiver by the insurer of all right of subrogation against Commonwealth in connection with any loss or damage thereby insured against. Such certificates or other documentation will include a provision whereby thirty (30) days' notice must be received by Commonwealth prior to coverage cancellation or alteration of the coverage by either Contractor or its subcontractors or the applicable insurer. Such cancellation or alteration shall not relieve Contractor of its continuing obligation to maintain insurance coverage in accordance with this *Section 45*(Insurance).

(d) For purposes hereof, Contractor and such subcontractors may maintain "umbrella" insurance policies to fulfill the foregoing insurance requirements, as appropriate.

46. WARRANTIES

(a) Contractor represents, warrants and covenants that as of the Contract's Effective Date:

(1) It is a corporation duly incorporated, validly existing, and in good standing under the laws of _____.

(2) It has all requisite corporate power and authority to execute, deliver, and perform its obligations under this Contract.

(3) Contractor is duly licensed, authorized and qualified to do business and is in good standing in Pennsylvania and in every other jurisdiction where Services will be performed by Contractor pursuant to this Contract in which a license, authorization or qualification is required for the ownership or leasing of its assets or the transaction of business of the character transacted by it except where the failure to be so licensed, authorized or qualified would not have a material adverse effect on Contractor's ability to fulfill its obligations under this Contract.

(4) The execution, delivery and performance of this Contract by Contractor has been duly authorized by Contractor.

(5) Contractor shall comply with all applicable Federal, state and local laws and regulations applicable to Contractor and shall obtain all applicable permits and licenses required of Contractor in connection with its obligations under this Contract.

(6) Contractor has not disclosed any Confidential Information of Commonwealth.

(7) The Contractor Software does not and will not, and the Developed Software and the Services will not, infringe upon the proprietary rights of any third party, provided that Contractor will have no obligation with respect to any losses to the extent the same arise out of or in connection with Commonwealth's modification or misuse of equipment, systems, programs, or products or Commonwealth's combination, operation or use with devices, data, equipment, systems, programs or products not furnished by Contractor under this Contract.

(8) Contractor Personnel and Subcontractors that Contractor will use to provide and perform the Services have and during the Term will have, the suitable knowledge, skills, experience, qualifications and resources to provide and perform the Services:

(i) In accordance with the Contract; and

(ii) In a diligent, workmanlike manner with due care and skill, consistent with the required level of quality and performance and in accordance with the Service Levels.

(9) The Services will comply with standards set in the Commonwealth’s IT Bulletins as issued from time to time, and all internal policies and procedures as set from time to time and as a provided to Contractor.

(10) Contractor shall cooperate fully with Commonwealth and with any third party appointed by Commonwealth to the extent that such cooperation may be necessary to permit Commonwealth or such third parties to complete any work related to or impacted by the Services provided to Commonwealth by Contractor under the Contract.

(11) Contractor shall collaborate fully with Commonwealth or with any third party appointed by Commonwealth to the extent that such cooperation may be necessary to permit Commonwealth or such third parties to in-source or transfer to a third party any aspect of the Services then provided by Contractor under the Contract.

(b) Commonwealth represents, warrants and covenants that as of the Contract's Effective Date:

(1) It is a sovereign entity and has all requisite power and authority to execute, deliver, and perform its obligations under this Contract.

(2) It has, or at any time of provision to Contractor, will have the right to use and to disclose to Contractor and Contractor Agents and to allow Contractor and Contractor Agents to use in accordance with the terms of this Contract any Commonwealth Software so disclosed to Contractor.

47. CONTRACTOR RESPONSIBILITY PROGRAM

(a) The Contractor certifies, for itself and all its subcontractors, that as of the date of its execution of this Bid/Contract, that neither the Contractor, nor any subcontractors, nor any suppliers are under suspension or debarment by the Commonwealth or any governmental entity, instrumentality, or authority and, if the Contractor cannot so certify, then it agrees to submit, along with its Bid, a written explanation of why such certification cannot be made.

(b) The Contractor must also certify, in writing, that as of the date of its execution of this Bid/Contract, it has no tax liabilities or other Commonwealth obligations.

(c) The Contractor's obligations pursuant to these provisions are ongoing from and after the effective date of the contract through the termination date thereof. Accordingly, the Contractor shall have an obligation to inform the Commonwealth if, at any time during the term of the Contract, it becomes delinquent in the payment of taxes, or other Commonwealth obligations, or if it or any of its subcontractors are suspended or debarred by the Commonwealth, the federal government, or any other state or governmental entity. Such

notification shall be made within 15 days of the date of suspension or debarment.

(d) The failure of the Contractor to notify the Commonwealth of its suspension or debarment by the Commonwealth, any other state, or the federal government shall constitute an event of default of the Contract with the Commonwealth.

(e) The Contractor agrees to reimburse the Commonwealth for the reasonable costs of investigation incurred by the Office of State Inspector General for investigations of the Contractor's compliance with the terms of this or any other agreement between the Contractor and the Commonwealth, which results in the suspension or debarment of the Contractor. Such costs shall include, but shall not be limited to, salaries of investigators, including overtime; travel and lodging expenses; and expert witness and documentary fees. The Contractor shall not be responsible for investigative costs for investigations that do not result in the Contractor's suspension or debarment.

(f) The Contractor may obtain a current list of suspended and debarred Commonwealth contractors by either searching the internet at *http://www.dgs.state.pa.us* or contacting the:

Department of General Services
Office of Chief Counsel
603 North Office Building
Harrisburg, PA 17125
Telephone No. (717) 783-6472
FAX No. (717) 787-9138

48. OFFSET PROVISION FOR COMMONWEALTH CONTRACTS

The Contractor agrees that the Commonwealth may set off the amount of any state tax liability or other obligation of the Contractor or its subsidiaries to the Commonwealth against any payments due the Contractor under any contract with the Commonwealth.

49. TAXES-FEDERAL, STATE, AND LOCAL

(a) **Commonwealth Exemption**. No taxes from which the Commonwealth is exempt shall be included in the Fee. The Commonwealth is exempt from all excise taxes imposed by the Internal Revenue Service and has accordingly registered with the Internal Revenue Service to make tax-free purchases under registration No. 23-23740001-K. With the exception of purchases of the following items, no exemption certificates are required and none will be issued: undyed diesel fuel, tires, trucks, gas-guzzler emergency vehicles, and sports fishing equipment. The Commonwealth is also exempt from Pennsylvania sales tax, local sales tax, public transportation assistance taxes, and fees and vehicle rental tax. The Department of Revenue regulations provide that exemption

certificates are not required for sales made to governmental entities and none will be issued.

(b) **Contractor Taxes**. Fees are inclusive of any applicable sales, use, personal property and other taxes attributable to periods on or after the Effective Date and based upon or measured by Contractor's cost in acquiring or providing equipment, materials, supplies or services furnished or used by Contractor in performing or furnishing the Services, including without limitation, all personal property and use taxes, if any, due on Contractor Machines.

(c) **Segregation of Fees**. Commonwealth and Contractor shall cooperate to segregate the Fees into the following separate payment streams: (1) those for Services, and (2) those for which Contractor functions merely as a paying agent for Commonwealth in receiving goods, supplies, or services (including leasing and licensing arrangements).

50. POLICIES AND PROCEDURES

Contractor shall comply with the most stringent of:

(a) Commonwealth standards set out in IT Bulletins, standards and procedures related to the Services, including but not limited to those governing security, treatment of personal information, quality, change, and problem management, safety, data privacy and data security, and pervasive and transaction controls; provided, however that the Contractor may submit a request under *Section 27* (Change Control), if it believes that it has incurred costs or delay in complying with this Section due to changes in the IT Bulletins, standards and procedures related to the Services; or

(b) The policies, standard and procedures that are generally adopted by leading providers of Services similar in scope, scale and geographic coverage to the outsourced Services.

51. AUDIT OBLIGATIONS

(a) SINGLE AUDIT ACT OF 1984

In compliance with the *Single Audit Act of 1984*, the Contractor agrees to the following:

(1) This Contract is subject to audit by federal and state agencies or their authorized representative in accordance with the auditing standards promulgated by the Comptroller General of the United States and specified in *Government Auditing Standards*, 1994 Revisions (Yellow Book).

(2) The audit requirement of this Contract will be satisfied if a single audit is performed under the provisions of the *Single Audit Act of 1984, 31 U.S.C.* § *7501, et seq.,* and all rules and regulations promulgated pursuant to the Act.

(3) The Commonwealth reserves the right for federal and state agencies or their authorized representatives to perform additional audits of a financial/compliance, economy/efficiency, or program results nature, if deemed necessary.

(4) The Contractor further agrees to comply with requirements that may be issued by the state agency upon receipt of additional guidance received from the federal government regarding the *Single Audit Act of 1984.*

(b) Access by Commonwealth

(1) **Processing**. Upon reasonable written notice from Commonwealth, Contractor and Contractor Agents shall provide such auditors and inspectors with access to the Services Locations and the Software and the Machines for the purpose of performing audits or inspections of the Services and the operations of Commonwealth and Contractor, subject always to Contractor's reasonable security requirements. Contractor shall provide, and shall cause Contractor Agents to provide, to such auditors and inspectors any reasonable assistance that they may require. If any such audit results in Contractor being notified that it or any Contractor Agent is not in compliance with any law, regulation, audit requirement or generally accepted accounting principle relating to the Services, Contractor shall, and shall cause such Contractor Agent to, promptly take actions to comply with such law, regulation, audit requirement or generally accepted accounting principle. Commonwealth shall bear the expense of any such compliance that is (1) required by a law, regulation or other audit requirement relating to Commonwealth's operations to the extent the same was first enacted on or after the Effective Date or (2) necessary due to Commonwealth's noncompliance with any law, regulation or audit requirement imposed on Commonwealth. Contractor shall bear the expense of any such response that is (1) required by a law, regulation or other audit requirement relating to Contractor's business or enacted prior to the Effective Date, (2) to be performed by Contractor as part of the Services, or (3) necessary due to Contractor's noncompliance with any law, regulation or audit requirement imposed on Contractor. As part of the Services, Contractor shall provide to Commonwealth summary data of those portions of Contractor's and Contractor Agents' internal audit reports relating solely to the Services.

(2) **Fees**. Upon reasonable written notice from Commonwealth, Contractor shall provide such auditors and inspectors with access to such financial records and supporting documentation as may reasonably be requested by Commonwealth, and such auditors and inspectors may audit the Fees charged to Commonwealth to determine that such Fees are accurate and in accordance with this Contract.

(3) **Overcharges**. If, as a result of such audit, Commonwealth determines that Contractor has overcharged Commonwealth, Commonwealth shall notify Contractor of the amount of such overcharge and Contractor shall promptly pay to Commonwealth the amount of the overcharge, plus interest at the rate of six percent (6%) per annum, calculated from the date of receipt by Contractor of the overcharged amount until the date of repayment to Commonwealth. In the event any such audit reveals an overcharge to Commonwealth during any calendar month during the Term exceeding fifteen percent (15%) of all Fees in the aggregate paid by Commonwealth in respect of such calendar month, Contractor shall reimburse Commonwealth for the cost of such audit. If as a result of such audit, Commonwealth or Contractor determines that Contractor has undercharged Commonwealth, Commonwealth shall promptly pay to Contractor the amount of such undercharge, without interest. Any disagreement between the parties with regard to the results of any such audit shall be treated as a dispute between the parties subject to the provisions of *Section 34* (Contract Controversies).

(4) **Record Retention**. As part of the Services, Contractor shall (1) retain records and supporting documentation sufficient to document the Services and the Fees paid or payable by Commonwealth under this Contract for at least three (3) years after the expiration or termination of this Contract or until all questioned items relating to such records and documentation are resolved by the parties, whichever is later, and (2) upon notice from Commonwealth, provide such auditors and inspectors as are designated by Commonwealth with reasonable access to such records and documentation for inspection, audit and reproduction. Such records and documentation shall be in such detail as will properly reflect, in accordance with generally accepted accounting principles, all charges claimed under the provisions of this Contract. Any such records which relate to litigation or the settlement of claims arising out of the performance of this Contract, or any Fees as to which exception has been taken by the auditors, shall be retained by Contractor until such litigation, claims, or exceptions have been finally resolved. Such audit shall not require Contractor to disclose cost, profit and overhead data, including direct and indirect rates,

markups, profit margins or confidential employee records or other trade secret information.

(5) **Inclusion in Subcontracts**. The provisions of this *Section 51* (Audit Obligations), except for *Section 51(b)3*, shall be applicable to and included in each subcontract under this Contract.

52. VIRUS AND MALICIOUS CODE

(a) The Contractor shall be liable for any damage to any data and/or software owned or licensed by the Commonwealth if the Contractor or any of its employees, subcontractors or consultants introduces a virus or malicious, mischievous or destructive programming into the Commonwealth's software or computer networks and has failed to comply with the Commonwealth software security standards. The Commonwealth must demonstrate that the Contractor or any of its employees, subcontractors or consultants introduced the virus or malicious, mischievous or destructive programming. The Contractor's liability shall cease if the Commonwealth has not fully complied with its own software security standards.

(b) The Contractor shall be liable for any damages incurred by the Commonwealth including, but not limited to, the expenditure of Commonwealth funds to eliminate or remove a computer virus or malicious, mischievous or destructive programming that result from the Contractor's failure to take proactive measures to keep virus or malicious, mischievous or destructive programming from originating from the Contractor or any of its employees, subcontractors or consultants through appropriate firewalls and maintenance of anti-virus software and software security updates (such as operating systems security patches, etc.).

(c) In the event of destruction or modification of software, the Contractor shall eliminate the virus, malicious, mischievous or destructive programming, restore the Commonwealth's software, and be liable to the Commonwealth for any resulting damages.

(d) The Contractor shall be responsible for reviewing Commonwealth software security standards and complying with those standards.

(e) The Commonwealth may, at any time, audit, by a means deemed appropriate by the Commonwealth, any computing devices being used by representatives of the Contractor to provide Services to the Commonwealth for the sole purpose of determining whether those devices have anti-virus software with current virus signature files and the current minimum operating system patches or workarounds have been installed. Devices found to be out of compliance will immediately be disconnected and will not be permitted to connect or reconnect to the Commonwealth network until the proper installations have been made.

(f) The Contractor may use the anti-virus software used by the Commonwealth to protect Contractor's computing devices used in the course of providing services to the Commonwealth. It is understood that the Contractor may not install the software on any computing device not being used to provide services to the Commonwealth, and that all copies of the software will be removed from all devices upon termination of this Contract.

(g) The Commonwealth will not be responsible for any damages to the Contractor's computers, data, software, etc. caused as a result of the installation of the Commonwealth's anti-virus software or monitoring software on the Contractor's computers.

53. THE AMERICANS WITH DISABILITIES ACT

During the term of this Contract, the Contractor agrees as follows:

(h) Pursuant to federal regulations promulgated under the authority of *The Americans With Disabilities Act*, 28 C.F.R.§ 35.101, *et seq*., the Contractor understands and agrees that no individual with a disability shall, on the basis of the disability, be excluded from participation in this Contract or from activities provided for under this Contract. As a condition of accepting and executing this Contract, the Contractor agrees to comply with the *General Prohibitions Against Discrimination*, 28 C.F.R. § 35.130, and all other regulations promulgated under Title II of *The Americans With Disabilities Act* which are applicable to the benefits, services, programs, and activities provided by the Commonwealth of Pennsylvania through Contracts with outside Contractors.

(i) The Contractor shall be responsible for and agrees to indemnify and hold harmless the Commonwealth of Pennsylvania from losses, damages, expenses claims, demands, suits, and actions brought by any party against the Commonwealth of Pennsylvania as a result of the Contractor's failure to comply with the provisions of subsection (a) above.

54. NONDISCRIMINATION CLAUSE/SEXUAL HARASSMENT CLAUSE

The Contractor agrees:

(a) In the hiring of any employee(s) for the manufacture of supplies, performance of work, or any other activity required under the contract or any subcontract, the Contractor, each subcontractor, or any person acting on behalf of the Contractor or subcontractor shall not, by reason of gender, race, creed, or color, discriminate against any citizen of this Commonwealth who is qualified and available to perform the work to which the employment relates.

(b) Neither the Contractor nor any subcontractor nor any person on their behalf shall in any manner discriminate against or intimidate any employee involved

in the manufacture of supplies, the performance of work, or any other activity required under the contract on account of gender, race, creed, or color.

(c) The Contractor and each subcontractor shall establish and maintain a written sexual harassment policy and shall inform their employees of the policy. The policy must contain a notice that sexual harassment will not be tolerated and employees who practice it will be disciplined.

(d) The Contractor and each subcontractor shall not discriminate by reason of gender, race, creed, or color against any subcontractor or supplier who is qualified to perform the work to which the contracts relates.

(e) The Contractor and each subcontractor shall, within the time periods requested by the Commonwealth, furnish all necessary employment documents and records and permit access to their books, records, and accounts by the contracting agency and the Bureau of Small Business Opportunities (BSBO), for purpose of ascertaining compliance with provisions of this Nondiscrimination/Sexual Harassment Clause. Within fifteen (15) days after award of any contract, the Contractor shall be required to complete, sign and submit Form STD-21, the "Initial Contract Compliance Data" form. If the contract is a construction contract, then the Contractor shall be required to complete, sign and submit Form STD-28, the "Monthly Contract Compliance Report for Construction Contractors", each month no later than the 15th of the month following the reporting period beginning with the initial job conference and continuing through the completion of the project. Those contractors who have fewer than five employees or whose employees are all from the same family or who have completed the Form STD-21 within the past 12 months may, within the 15 days, request an exemption from the Form STD-21 submission requirement from the contracting agency.

(f) The Contractor shall include the provisions of this Nondiscrimination/Sexual Harassment Clause in every subcontract so that those provisions applicable to subcontractors will be binding upon each subcontractor.

(g) The Commonwealth may cancel or terminate the contract and all money due or to become due under the contract may be forfeited for a violation of the terms and conditions of this Nondiscrimination/Sexual Harassment Clause. In addition, the agency may proceed with debarment or suspension and may place the Contractor in the Contractor Responsibility File.

55. CONTRACTOR INTEGRITY PROVISIONS

It is essential that those who seek to contract with the Commonwealth of Pennsylvania observe high standards of honesty and integrity. They must conduct themselves in a manner that fosters public confidence in the integrity of the Commonwealth procurement process.

In furtherance of this policy, Contractor agrees to the following:

(a) Contractor shall maintain the highest standards of honesty and integrity during the performance of this contract and shall take no action in violation of state or federal laws or regulations or any other applicable laws or regulations, or other requirements applicable to Contractor or that govern contracting with the Commonwealth.

(b) Contractor shall establish and implement a written business integrity policy, which includes, at a minimum, the requirements of these provisions as they relate to Contractor employee activity with the Commonwealth and Commonwealth employees, and which is distributed and made known to all Contractor employees.

(c) Contractor, its affiliates, agents and employees shall not influence, or attempt to influence, any Commonwealth employee to breach the standards of ethical conduct for Commonwealth employees set forth in the *Public Official and Employees Ethics Act, 65 Pa.C.S. §§1101 et seq.*; the *State Adverse Interest Act, 71 P.S. §776.1 et seq.*; and the *Governor's Code of Conduct, Executive Order 1980-18, 4 Pa. Code §7.151 et seq.*, or to breach any other state or federal law or regulation.

(d) Contractor, its affiliates, agents and employees shall not offer, give, or agree or promise to give any gratuity to a Commonwealth official or employee or to any other person at the direction or request of any Commonwealth official or employee.

(e) Contractor, its affiliates, agents and employees shall not offer, give, or agree or promise to give any gratuity to a Commonwealth official or employee or to any other person, the acceptance of which would violate the *Governor's Code of Conduct, Executive Order 1980-18, 4 Pa. Code §7.151 et seq.* or any statute, regulation, statement of policy, management directive or any other published standard of the Commonwealth.

(f) Contractor, its affiliates, agents and employees shall not, directly or indirectly, offer, confer, or agree to confer any pecuniary benefit on anyone as consideration for the decision, opinion, recommendation, vote, other exercise of discretion, or violation of a known legal duty by any Commonwealth official or employee.

(g) Contractor, its affiliates, agents, employees, or anyone in privity with him or her shall not accept or agree to accept from any person, any gratuity in connection with the performance of work under the contract, except as provided in the contract.

(h) Contractor shall not have a financial interest in any other contractor, subcontractor, or supplier providing services, labor, or material on this project, unless the financial interest is disclosed to the Commonwealth in writing and the Commonwealth consents to Contractor's financial interest prior to Commonwealth execution of the contract. Contractor shall disclose the financial interest to the Commonwealth at the time of bid or proposal submission, or if no bids or proposals are solicited, no later than Contractor's submission of the contract signed by Contractor.

(i) Contractor, its affiliates, agents and employees shall not disclose to others any information, documents, reports, data, or records provided to, or prepared by, Contractor under this contract without the prior written approval of the Commonwealth, except as required by the *Pennsylvania Right-to-Know Law, 65 P.S. §§ 67.101-3104*, or other applicable law or as otherwise provided in this contract. Any information, documents, reports, data, or records secured by Contractor from the Commonwealth or a third party in connection with the performance of this contract shall be kept confidential unless disclosure of such information is:

(1) Approved in writing by the Commonwealth prior to its disclosure; or

(2) Directed by a court or other tribunal of competent jurisdiction unless the contract requires prior Commonwealth approval; or

(3) Required for compliance with federal or state securities laws or the requirements of national securities exchanges; or

(4) Necessary for purposes of Contractor's internal assessment and review; or

(5) Deemed necessary by Contractor in any action to enforce the provisions of this contract or to defend or prosecute claims by or against parties other than the Commonwealth; or

(6) Permitted by the valid authorization of a third party to whom the information, documents, reports, data, or records pertain: or

(7) Otherwise required by law.

(j) Contractor certifies that neither it nor any of its officers, directors, associates, partners, limited partners or individual owners has been officially notified of, charged with, or convicted of any of the following and agrees to immediately notify the Commonwealth agency contracting officer in writing if and when it or any officer, director, associate, partner, limited partner or individual owner has been officially notified of, charged with, convicted of, or officially notified of a governmental determination of any of the following:

(1) Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements or receiving stolen property.

(2) Commission of fraud or a criminal offense or other improper conduct or knowledge of, approval of or acquiescence in such activities by Contractor or any affiliate, officer, director, associate, partner, limited partner, individual owner, or employee or other individual or entity associated with:

i. obtaining;

ii. attempting to obtain; or

iii. performing a public contract or subcontract.

Contractor's acceptance of the benefits derived from the conduct shall be deemed evidence of such knowledge, approval or acquiescence.

(3) Violation of federal or state antitrust statutes.

(4) Violation of any federal or state law regulating campaign contributions.

(5) Violation of any federal or state environmental law.

(6) Violation of any federal or state law regulating hours of labor, minimum wage standards or prevailing wage standards; discrimination in wages; or child labor violations.

(7) Violation of the *Act of June 2, 1915 (P.L.736, No. 338),* known as the *Workers' Compensation Act*, 77 P.S. 1 *et seq.*

(8) Violation of any federal or state law prohibiting discrimination in employment.

(9) Debarment by any agency or department of the federal government or by any other state.

(10) Any other crime involving moral turpitude or business honesty or integrity.

Contractor acknowledges that the Commonwealth may, in its sole discretion, terminate the contract for cause upon such notification or when the Commonwealth otherwise learns that Contractor has been officially notified, charged, or convicted.

(k) If this contract was awarded to Contractor on a non-bid basis, Contractor must, (as required by *Section 1641* of the *Pennsylvania Election Code*) file a report of political contributions with the Secretary of the Commonwealth on or before February 15 of the next calendar year. The report must include an itemized list of all political contributions known to Contractor by virtue of the knowledge possessed by every officer, director, associate, partner, limited partner, or individual owner that has been made by:

(1) Any officer, director, associate, partner, limited partner, individual owner or members of the immediate family when the contributions exceed an aggregate of one thousand dollars ($1,000) by any individual during the preceding year; or

(2) Any employee or members of his immediate family whose political contribution exceeded one thousand dollars ($1,000) during the preceding year.

To obtain a copy of the reporting form, Contractor shall contact the Bureau of Commissions, Elections and Legislation, Division of Campaign Finance and Lobbying Disclosure, Room 210, North Office Building, Harrisburg, PA 17120.

(l) Contractor shall comply with requirements of the *Lobbying Disclosure Act, 65 Pa.C.S. § 13A01 et seq.*, and the regulations promulgated pursuant to that law. Contractor employee activities prior to or outside of formal Commonwealth procurement communication protocol are considered lobbying and subjects the Contractor employees to the registration and reporting requirements of the law. Actions by outside lobbyists on Contractor's behalf, no matter the procurement stage, are not exempt and must be reported.

(m) When Contractor has reason to believe that any breach of ethical standards as set forth in law, the Governor's Code of Conduct, or in these provisions has occurred or may occur, including but not limited to contact by a Commonwealth officer or employee which, if acted upon, would violate such ethical standards, Contractor shall immediately notify the Commonwealth contracting officer or Commonwealth Inspector General in writing.

(n) Contractor, by submission of its bid or proposal and/or execution of this contract and by the submission of any bills, invoices or requests for payment pursuant to the contract, certifies and represents that it has not violated any of these contractor integrity provisions in connection with the submission of the bid or proposal, during any contract negotiations or during the term of the contract.

(o) Contractor shall cooperate with the Office of Inspector General in its investigation of any alleged Commonwealth employee breach of ethical standards and any alleged Contractor non-compliance with these provisions. Contractor agrees to make identified Contractor employees available for interviews at reasonable times

and places. Contractor, upon the inquiry or request of the Office of Inspector General, shall provide, or if appropriate, make promptly available for inspection or copying, any information of any type or form deemed relevant by the Inspector General to Contractor's integrity and compliance with these provisions. Such information may include, but shall not be limited to, Contractor's business or financial records, documents or files of any type or form that refers to or concern this contract.

(p) For violation of any of these Contractor Integrity Provisions, the Commonwealth may terminate this and any other contract with Contractor, claim liquidated damages in an amount equal to the value of anything received in breach of these provisions, claim damages for all additional costs and expenses incurred in obtaining another contractor to complete performance under this contract, and debar and suspend Contractor from doing business with the Commonwealth. These rights and remedies are cumulative, and the use or non-use of any one shall not preclude the use of all or any other. These rights and remedies are in addition to those the Commonwealth may have under law, statute, regulation, or otherwise.

(q) For purposes of these Contractor Integrity Provisions, the following terms shall have the meanings found in this Section (q).

(1) "Confidential information" means information that a) is not already in the public domain; b) is not available to the public upon request; c) is not or does not become generally known to Contractor from a third party without an obligation to maintain its confidentiality; d) has not become generally known to the public through an act or omission of Contractor; or e) has not been independently developed by Contractor without the use of confidential information of the Commonwealth.

(2) **"**Consent" means written permission signed by a duly authorized officer or employee of the Commonwealth, provided that where the material facts have been disclosed, in writing, by pre-qualification, bid, proposal, or contractual terms, the Commonwealth shall be deemed to have consented by virtue of execution of this contract.

(3) **"**Contractor" means the individual or entity that has entered into this contract with the Commonwealth, including those directors, officers, partners, managers, and owners having more than a five percent interest in Contractor.

(4) "Financial interest" means:

i. Ownership of more than a five percent interest in any business; or

ii. Holding a position as an officer, director, trustee, partner, employee, or holding any position of management.

(5) "Gratuity" means tendering, giving or providing anything of more than nominal monetary value including, but not limited to, cash, travel, entertainment, gifts, meals, lodging, loans, subscriptions, advances, deposits of money, services, employment, or contracts of any kind. The exceptions set forth in the *Governor's Code of Conduct, Executive Order 1980-18*, the *4 Pa. Code §7.153(b)*, shall apply.

(6) "Immediate family" means a spouse and any unemancipated child.

(7) "Non-bid basis" means a contract awarded or executed by the Commonwealth with Contractor without seeking bids or proposals from any other potential bidder or offeror.

(8) "Political contribution" means any payment, gift, subscription, assessment, contract, payment for services, dues, loan, forbearance, advance or deposit of money or any valuable thing, to a candidate for public office or to a political committee, including but not limited to a political action committee, made for the purpose of influencing any election in the Commonwealth of Pennsylvania or for paying debts incurred by or for a candidate or committee before or after any election.

56. RIGHT-TO-KNOW LAW

(a) The Pennsylvania Right-to-Know Law, 65 P.S. §§ 67.101-3104, ("RTKL") applies to this Contract.

(b) If the Commonwealth requires the Contractor's assistance in any matter arising out of the RTKL related to this Contract, it shall notify the Contractor using the legal contact information provided in this Contract. The Contractor, at any time, may designate a different contact for such purpose upon reasonable prior written notice to the Commonwealth.

(c) Upon written notification from the Commonwealth that it requires the Contractor's assistance in responding to a request under the RTKL for information related to this Contract that may be in the Contractor's possession, constituting, or alleged to constitute, a public record in accordance with the RTKL ("Requested Information"), the Contractor shall:

(1) Provide the Commonwealth, within ten (10) calendar days after receipt of written notification, access to, and copies of, any document or information in the Contractor's possession arising out of this Contract that the Commonwealth reasonably believes is Requested Information and may be a public record under the RTKL; and

(2) Provide such other assistance as the Commonwealth may reasonably request, in order to comply with the RTKL with respect to this Contract.

(d) If the Contractor considers the Requested Information to include a request for a Trade Secret or Confidential Proprietary Information, as those terms are defined by the RTKL, or other information that the Contractor considers exempt from production under the RTKL, the Contractor must notify the Commonwealth and provide, within seven (7) calendar days of receiving the written notification, a written statement signed by a representative of the Contractor explaining why the requested material is exempt from public disclosure under the RTKL.

(e) The Commonwealth will rely upon the written statement from the Contractor in denying a RTKL request for the Requested Information unless the Commonwealth determines that the Requested Information is clearly not protected from disclosure under the RTKL. Should the Commonwealth determine that the Requested Information is clearly not exempt from disclosure, the Contractor shall provide the Requested Information within five (5) business days of receipt of written notification of the Commonwealth's determination.

(f) If the Contractor fails to provide the Requested Information within the time period required by these provisions, the Contractor shall indemnify and hold the Commonwealth harmless for any damages, penalties, costs, detriment or harm that the Commonwealth may incur as a result of the Contractor's failure, including any statutory damages assessed against the Commonwealth.

(g) The Commonwealth will reimburse the Contractor for any costs associated with complying with these provisions only to the extent allowed under the fee schedule established by the Office of Open Records or as otherwise provided by the RTKL if the fee schedule is inapplicable.

(h) The Contractor may file a legal challenge to any Commonwealth decision to release a record to the public with the Office of Open Records, or in the Pennsylvania Courts, however, the Contractor shall indemnify the Commonwealth for any legal expenses incurred by the Commonwealth as a result of such a challenge and shall hold the Commonwealth harmless for any damages, penalties, costs, detriment or harm that the Commonwealth may incur as a result of the Contractor's failure, including any statutory damages assessed against the Commonwealth, regardless of the outcome of such legal challenge. As between the parties, the Contractor agrees to waive all rights or remedies that may be available to it as a result of the Commonwealth's disclosure of Requested Information pursuant to the RTKL.

(i) The Contractor's duties relating to the RTKL are continuing duties that survive the expiration of this Contract and shall continue as long as the Contractor has Requested Information in its possession.

57. ENVIRONMENTAL PROTECTION

In carrying out this Contract, the Contractor shall minimize pollution and shall strictly comply with all applicable environmental laws and regulations, including the *Clean Streams Law,* Act of June 22, 1937, as amended; the *Pennsylvania Solid Waste Management Act,* Act of July 7, 1980 (P.L. 380, No. 97), as amended; and the *Dam Safety and Encroachment Act,* Act of November 26, 1978 (P.L. 1375, No. 325), as amended.

58. ASSIGNABILITY

(a) This Contract may not be assigned by Contractor, either in whole or in part without the prior written consent of the Commonwealth, which consent shall not be unreasonably withheld, conditioned, or delayed. Transfer of the majority of the stock or the majority of the assets of a corporation, or other change of ownership will be deemed an assignment. In the event that Contractor requests the right to assign this Contract, including an assignment to an affiliate or subsidiary, Contractor will provide the Commonwealth with copies of the following documents (to the extent they exist): most recent audited financial statements and such other documents as Commonwealth reasonably deems necessary. Within thirty (30) days of such notice, the Commonwealth shall provide its written decision regarding the requested assignment.

(b) Subject to the terms and conditions of this *Section 58* (Assignability), the Contract is binding upon the parties and their respective successors and assigns.

(c) Any assignment consented to by the Commonwealth shall be evidenced by a written assignment agreement executed by the Contractor and its assignee in which the assignee agrees to be legally bound by all of the terms and conditions of the Contract and to assume the duties, obligations, and responsibilities being assigned. In addition, the assignee must execute a contract with the Commonwealth in the same form as this Contract.

(d) Notwithstanding the foregoing, the Contractor may, without the consent of the Commonwealth, assign its rights to payment to be received under the Contract, provided that the Contractor provides written notice of such assignment to the Commonwealth together with a written acknowledgement from the assignee that any such payments are subject to all of the terms and conditions of the Contract.

(e) A change of name by the Contractor, following which the Contractor's federal identification number remains unchanged, is not considered to be an assignment. The Contractor shall give the Commonwealth written notice of any such change of name.

59. INDEPENDENT CAPACITY OF CONTRACTOR

(a) The parties to this Contract agree that the Services performed by the Contractor under the terms of this Contract are performed as an independent contractor and nothing contained in this Contract shall be construed to make either Contractor or Commonwealth partners, joint venturers, principals, agents or employees of the other, except only to the extent that Contractor is expressly appointed under the Contract to act as the agent of Commonwealth and, in those cases, only to the limited extent of such express appointment. No officer, director, employee, agent, affiliate or contractor retained by Contractor to perform work on Commonwealth's behalf hereunder shall be deemed to be an employee, agent or contractor of Commonwealth. Neither party shall have any right, power or authority, express or implied, to bind the other. As between Contractor and Commonwealth, Contractor is solely responsible for payment of all income, disability, withholding and other employment taxes, and all medical benefit premiums, vacation pay, sick pay and other fringe benefits resulting from Contractor's retention of any such officers, directors, employees, agents or contractors.

(b) Except as otherwise provided by the terms of this Contract, the Commonwealth shall have no control over the manner in which the contractual Services are performed by the Contractor, or any subcontractor. Any job specifications or standards of work attached to or incorporated into this Contract or any subcontracting restrictions contained in this Contract shall not be construed as the Commonwealth's direction or control over the manner of the performance of Services provided by the Contractor.

60. THIRD PARTY BENEFICIARIES

Each party intends that this Contract shall not benefit, or create any right or cause of action in or on behalf of, any person or entity other than Commonwealth and Contractor.

61. CERTIFICATION REGARDING SUSPENSION

Contractor certificates that it is not currently under suspension or debarment by Commonwealth, any other state, or the Federal government.

62. SUSPENSION OF SUBCONTRACTORS

If Contractor enters into any subcontracts or employs under this Contract any subcontractor's individuals who are currently suspended or debarred by Commonwealth or the Federal government or who become suspended or debarred by Commonwealth or the Federal government during the term of this Contract or any extensions or renewals thereof, Commonwealth shall have the right to require Contractor to terminate such subcontracts or employment.

63. ASSIGNMENT OF RIGHTS UNDER THE ANTITRUST LAWS

It is recognized that in actual economic practice, overcharges by Contractor's suppliers resulting from violations of state and federal antitrust laws are in fact borne by the Commonwealth. As part of the consideration for the award of this Contract, and intending to be legally bound, the Contractor assigns to the Commonwealth all rights, title, and interest in and to any claims Contractor now has or may hereafter acquire under state and federal antitrust laws relating to the goods and services which are provided by the Contractor under this Contract.

64. SIGNIFICANT EVENTS

Commonwealth requires the right to adjust the scope or volume of Services to be provided in response to an event, or series of events taken together, that have or will have a significant and sustained impact on Commonwealth's demand for the Services, and requires Contractor to equitably adjust the price for the Services to reflect any such changes to the scope or volume of the Services.

65. FORCE MAJEURE

No failure or delay by Contractor in the performance of its obligations pursuant to this Contract shall be deemed a default of this Contract or a ground for termination hereunder (except as provided in this *Section 65* (Force Majeure) to the extent such failure or delay is due to a Force Majeure Event and such Force Majeure Event could not have been prevented by Contractor's reasonable precautions or efforts to mitigate damage. The occurrence of a Force Majeure Event does not limit or otherwise affect Contractor's obligation to provide normal recovery procedures and any disaster recovery services described in *Section 15* (Disaster Recovery and Business Continuity) to the extent such obligations are not directly precluded by the occurrence of that Force Majeure Event. The occurrence of a Force Majeure Event in respect of another customer of Contractor does not constitute a Force Majeure Event under this Contract, except to the extent such customer and Commonwealth experience the same Force Majeure Event at a site shared by Commonwealth and such other customer. The party delayed by a Force Majeure Event shall immediately orally notify the other party (to be confirmed in a written notice within three (3) business days after the inception of such delay) of the occurrence of a Force Majeure Event and describe in reasonable detail the nature of the Force Majeure Event. From and after becoming aware of a Force Majeure Event, the party delayed thereby shall undertake all commercially reasonable measures (including the use of alternative sources for products and services and workaround plans) to mitigate the impact and duration of the Force Majeure Event, and such party shall consistently and diligently prosecute such measures until the Force Majeure Event is relieved. If Contractor does not fulfill its obligations under the immediately preceding sentence and, as a result thereof, such Force Majeure Event precludes Contractor from delivering the Services for more than forty five (45) days, Commonwealth may terminate this Contract for cause under *Section 32(c)*, but without regard to any additional cure periods provided for therein. In any other case in which a Force Majeure Event precludes Contractor from delivering the Services for more than forty-five (45) days (without consideration of any such Services performed from a business recovery center under *Section 15* (Disaster Recovery and Business Continuity)), Commonwealth may

terminate this Contract for convenience under *Section 32(a)*, but without regard to any notice period or additional cure periods provided for therein. In the event of a Force Majeure Event, Contractor shall not increase the Fees under this Contract or charge Commonwealth usage fees in addition to the Fees except for applicable disaster recovery declaration and usage fees in accordance with the provisions of *Section 15* (Disaster Recovery and Business Continuity).

66. CONFLICT OF INTEREST

Contractor, by signing this Contract, covenants that it has no undisclosed public or private interest, direct or indirect, and shall not acquire directly or indirectly any such interest, and that Contractor has no association, direct or indirect, which interest or association does or may conflict in any manner with the performance of the Services or any other obligations of Contractor under this Contract. Any such conflicts shall be disclosed to Commonwealth, and Commonwealth shall determine whether such conflict is cause for termination of this Contract. Contractor further covenants that, in the performance of this Contract, no person having such interest shall be employed by or associated with Contractor.

67. OFFICIALS NOT TO BENEFIT

No official or employee of the Commonwealth and no member of its General Assembly who exercises any functions or responsibilities under this Contract shall participate in any decision relating to this Contract which affects their personal interest or the interest of any corporation, partnership, or association in which they are, directly or indirectly, interested; nor shall any such official or employee of the Commonwealth or member of its General Assembly have any interest, direct or indirect, in this Contract or the proceeds thereof.

68. CONSENTS, APPROVALS, NOTICES AND REQUESTS

Unless otherwise specified in this Contract, all consents, approvals, notices and requests, acceptances or similar actions to be given by either party under this Contract shall not be unreasonably withheld, delayed or conditioned and each party shall make only reasonable requests under this Contract.

69. REQUIRED CONSENTS

The Commonwealth, with reasonable assistance at no additional cost by Contractor and its agents shall obtain all consents, approvals, authorizations, notices, requests and acknowledgements necessary to allow Contractor to use the Commonwealth Software, the Commonwealth Machines and the services under Commonwealth's third party service contracts, all to the extent necessary to enable Contractor to provide the Services to Commonwealth. Commonwealth shall be responsible for all costs and expenses imposed by third parties in connection with obtaining any such consents. Contractor shall obtain all consents, approvals, authorizations, notices, requests and acknowledgements necessary to allow (1) Contractor to use the Contractor Software, the Developed Software and the

Contractor Machines to provide the Services to Commonwealth, and (2) Commonwealth to use the Contractor Software in accordance with the terms of this Contract upon the expiration or termination for any reason of Contractor's obligation to provide the Services or of this Contract. Contractor shall be responsible for all costs and expenses imposed by a third party in connection with any such consents described in the foregoing clause (1). Commonwealth's costs and expenses under the foregoing clause (2) shall be governed by the terms of *Section 40(b).02*. Each party shall cooperate with and assist the other party in obtaining the consents contemplated in this *Section 69* (Required Consents).

70. REQUIREMENTS FOR INFORMATION IN LEGAL PROCEEDINGS

(a) If the Commonwealth notifies Contractor, or Contractor is otherwise aware, that particular Commonwealth Confidential Information may be within attorney-client or work-product privileges of the Commonwealth, then regardless of any applicable exclusions, Contractor (i) shall not disclose such the Confidential Information or take any other action that would result in waiver of such privileges and (ii) shall instruct all Contractor Personnel who may have access to such communications to maintain privileged material as strictly confidential and otherwise protect the Commonwealth privileges.

(b) To the extent requested by the Commonwealth, Contractor shall comply with the Commonwealth's litigation response plan, including policies and procedures to prepare for and respond to discovery requests, subpoenas, investigatory demands, and other requirements for information related to legal and regulatory proceedings, as such plan may be revised from time to time, including preparing for and complying with requirements for preservation and production of data in connection with legal and regulatory proceedings and government investigations. Upon receipt of any request, demand, notice, subpoena, order or other legal information request relating to legal proceedings or investigations by third parties relating to any Materials, the Confidential Information or related Systems in Contractor possession, Contractor shall immediately notify the Commonwealth and provide the Commonwealth with a copy of all documentation of such legal information request, to the extent Contractor legally may do so and shall cooperate with the Commonwealth in responding to such request, demand, notice, subpoena, order or other legal information request.

(c) Contractor's cost of complying with this section shall be at no additional charge to the Commonwealth.

71. EXAMINATION OF RECORDS

The Commonwealth may, at reasonable times and places, audit the books and records of Contractor or its subcontractors to the extent that the books and records relate to the performance of the contract. Contractor shall maintain books and records related to the Contract for a period of three years from the date of final payment under the Contract.

Contractor shall include a requirement in agreements with subcontractors that requires the subcontractor to maintain its records for the same length of time.

72. SURVIVAL

Sections 4, 33, 35, 36, 37, 38, 38, 40, 41, 47, 48, 49, 52, 53, 72 shall survive the expiration or termination of the Contract.

73. SEVERABILITY

If any provision of this Contract is held by a court of competent jurisdiction to be contrary to law, then the remaining provisions of this Contract or the application of such provision to persons or circumstances other than those as to which it is invalid or unenforceable shall not be affected thereby, and each such provision of this Contract shall be valid and enforceable to the extent permitted by law.

74. WAIVER

No delay or omission by either party to exercise any right or power it has under this Contract shall impair or be construed as a waiver of such right or power. A waiver by any party of any breach or covenant shall not be construed to be a waiver of any succeeding breach or any other covenant. All waivers must be in writing and signed by the party waiving its rights.

75. PERIOD OF PERFORMANCE

The Contractor, for the life of this Contract, shall complete all Services as specified under the terms of this Contract. In no event shall the Commonwealth be responsible or liable to pay for any Services provided by the Contractor prior to the Effective Date, and the Contractor hereby waives any claim or cause of action for any such Services.

76. SPECIAL REQUIREMENTS

The Commonwealth reserves the right to purchase Services covered under this Contract through other procurement methods whenever the Commonwealth deems it to be in its best interest.

77. GOVERNING LAW

This Contract shall be interpreted in accordance with and governed by the laws of the Commonwealth of Pennsylvania, without giving effect to its conflicts of law provisions. Except as set forth in *Section 34* (Contract Controversies), Commonwealth and Contractor agree that the courts of the Commonwealth of Pennsylvania and the federal courts of the Middle District of Pennsylvania shall have exclusive jurisdiction over disputes under this Contract and the resolution thereof. Any legal action relating to this Contract must be brought in Dauphin County, Pennsylvania, and the parties agree that jurisdiction and venue in such courts is appropriate.

78. COMPLIANCE WITH LAWS

(a) The Contractor shall comply with all federal, state, and local laws applicable to its work, including, but not limited to, all statutes, regulations and rules that are in effect as of the Effective Date of the Contract and shall procure at its expense all licenses and all permits necessary for the fulfillment of its obligation.

(b) If any existing law, regulation or policy is changed or if any new law, regulation or policy is enacted that affects the Services provided under this Contract, the parties to the Contract shall modify this Contract, via *Section 27* (Change Control), to the extent reasonably necessary to:

(1) Ensure that such Services will be in full compliance with such laws, regulations and/or policies; and

(2) Modify the rates applicable to such Services; and

(3) Address any schedule impacts.

79. SMALL DIVERSE BUSINESS COMMITMENT

Contractor shall meet and maintain the commitments to small diverse businesses in the Small Diverse Business ("SDB") portion of its Proposal. Any proposed change to a SDB commitment must be submitted to the DGS Bureau of Small Business Opportunities ("BSBO"), which will make a recommendation as to a course of action to the Commonwealth Contracting Officer. Contractor shall complete the Prime Contractor's Quarterly Utilization Report and submit it to the Commonwealth Contracting Officer and BSBO within ten (10) workdays at the end of each calendar quarter that the Contract is in effect.

80. ACKNOWLEDGEMENT

Commonwealth and Contractor each acknowledge that the limitations and exclusions contained in this Contract have been the subject of active and complete negotiation between the parties and represent the parties' Contract based upon the level of risk to Commonwealth and Contractor associated with their respective obligations under this Contract and the payments to be made to Contractor and credits to be issued to, and Services to be provided to, Commonwealth pursuant to this Contract. The parties agree that the terms and conditions of this Contract shall not be construed in favor of or against any party by reason of the extent to which any party or its professional advisors participated in the preparation of this Contract.

81. COVENANT OF FURTHER ASSURANCES

Commonwealth and Contractor covenant and agree that, subsequent to the execution and delivery of this Contract and without any additional consideration, each of Commonwealth and Contractor will execute and deliver any further legal instruments and perform any commercially reasonable acts which are or may become necessary to effectuate the purposes of this Contract.

82. COVENANT OF GOOD FAITH

Each Party agrees that, in its respective dealings with the other Party under or in connection with this Contract, it shall act in good faith.

83. AMENDMENTS

No amendment to, or change, waiver, or discharge of, any provision of this Contract shall be valid unless in writing and signed by an authorized representative of the party against which such amendment, change, waiver or discharge is sought to be enforced.

84. ENTIRE CONTRACT

This Contract is the entire Contract between the parties with respect to its subject matter, and there are no other representations, understandings or Contracts between the parties relative to such subject matter

APPENDIX A - BUSINESS ASSOCIATE APPENDIX LANGUAGE

COMMONWEALTH OF PENNSYLVANIA
BUSINESS ASSOCIATE AGREEMENT

WHEREAS, the ***[name of program and/or Department]*** (Covered Entity) and Contractor (Business Associate) intend to protect the privacy and security of certain Protected Health Information (PHI) to which Business Associate may have access in order to provide goods or services to or on behalf of Covered Entity, in accordance with the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191 (HIPAA), the Health Information Technology for Economic and Clinical Health (HITECH) Act, Title XIII of Division A and Title IV of Division B of the American Recovery and Reinvestment Act of 2009 (ARRA), Pub. L. No. 111-5 (Feb. 17, 2009), the HIPAA Privacy Rule (Privacy Rule), 45 C.F.R. Parts 160 and 164, and the HIPAA Security Rule (Security Rule), 45 C.F.R. Parts 160, 162 and 164, and all other applicable laws; and

WHEREAS, Business Associate may receive PHI from Covered Entity, or may create or obtain PHI from other parties for use on behalf of Covered Entity, which PHI can be used or disclosed only in accordance with this Agreement and the standards established by applicable laws; and

WHEREAS, Business Associate may receive PHI from Covered Entity, or may create or obtain PHI from other parties for use on behalf of Covered Entity that is in electronic form, which PHI must be handled in accordance with this Agreement and the standards established by HIPAA and the Security Rule and other applicable laws; and

NOW, THEREFORE, the parties to this Agreement set forth the following as the terms and conditions of their understanding.

1. Definitions.

a) "Breach" shall have the meaning assigned to such term at 42 USCS § 17921 and HIPAA regulations at 45 C.F.R. § 164.402.

b) "Business Associate" shall have the meaning given to such term under the Privacy and Security Rules, including but not limited to, 45 C.F.R. §160.103.

c) "Covered Entity" shall have the meaning given to such term under the Privacy and Security Rules, including, but not limited to, 45 C.F.R. §160.103.

d) "HIPAA" shall mean the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191.

e) "Privacy Rule" shall mean the standards for privacy of individually identifiable health information in 45 C.F.R. Parts 160 and 164.

f) "Protected Health Information" or "PHI" shall have the meaning given to such term under HIPAA and the HIPAA Regulations in 45 C.F.R. Parts 160, 162 and 164, including, but not limited to 45 C.F.R. §160.103.

g) "Security Rule" shall mean the security standards in 45 C.F.R. Parts 160, 162 and 164.

h) Terms used, but not otherwise defined, in this Agreement shall have the same meaning as those terms in the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191 (HIPAA), the Health Information Technology for Economic and Clinical Health (HITECH) Act, Title XIII of Division A and Title IV of Division B of the American Recovery and Reinvestment Act of 2009 (ARRA), Pub. L. No. 111-5 (Feb. 17, 2009), the HIPAA Privacy Rule (Privacy Rule), 45 C.F.R. Parts 160 and 164, and the HIPAA Security Rule (Security Rule), 45 C.F.R. Parts 160, 162 and 164.

2. Stated Purposes For Which Business Associate May Use Or Disclose PHI. The Parties hereby agree that Business Associate shall be permitted to use and/or disclose PHI provided by or obtained on behalf of Covered Entity for purposes state in Attachment 1 , except as otherwise stated in this Agreement.

NO OTHER USES OR DISCLOSURES OF PHI ARE PERMITTED.

3. BUSINESS ASSOCIATE OBLIGATIONS:

i) Security and Privacy Provisions Applicable to Business Associate. Business Associate shall abide by the security and privacy provisions applicable to Covered Entities which are made applicable to the Business Associate by 42 USCS § 17931 and 17934.

j) Limits On Use And Further Disclosure Established By Agreement And Law. Business Associate hereby agrees that the PHI provided by, or created or obtained on behalf of Covered Entity shall not be further used or disclosed other than as permitted or required by this Agreement or as Required by Law.

k) Appropriate Safeguards. Business Associate shall establish and maintain appropriate safeguards to prevent any use or disclosure of PHI other than as provided for by this Agreement. Appropriate safeguards shall include implementing administrative, physical, and technical safeguards that reasonably and appropriately protect the confidentiality, integrity, and availability of the electronic PHI that is created, received, maintained, or transmitted on behalf of the Covered Entity.

l) Reports Of Improper Use Or Disclosure. Business Associate hereby agrees that it shall report to the Covered Entity's Privacy Officer, or his designee**,** and the Covered entity's legal office, within two (2) days of discovery any Breach or use or disclosure of PHI not provided for or allowed by this Agreement (unless some more stringent standard applies under this Agreement). Business Associate agrees to conduct reasonable diligence to discover improper use or disclosure of PHI.

Such notification shall be written and shall include the identification of each individual whose unsecured PHI has been, or is reasonably believed by the Business Associate to have been, accessed, acquired, or disclosed during the improper use or disclosure or Breach. An improper use or disclosure or Breach shall be treated as discovered by the Business Associate on the first day on which it is known to the Business Associate (including any person other than the person committing the Breach, that is an employee,

officer, or other agent of the Business Associate) or should reasonably have been known to the Business Associate (or such person) to have occurred.

d) Reports Of Security Incidents. In addition to following the Breach notification requirements in section 13402 of the HITECH Act and related regulations and guidance, Business Associate shall report to Covered Entity's Privacy Officer, or his designee, within two (2) days of discovery any Security Incident of which it becomes aware.

e) Subcontractors And Agents. Business Associate hereby agrees that any time PHI is provided or made available to any subcontractors or agents, Business Associate shall provide only the minimum necessary PHI for the purpose of the covered transaction and shall first enter into a subcontract or contract with the subcontractor or agent that contains the same terms, conditions and restrictions on the use and disclosure of PHI as contained in this Agreement.

f) Right Of Access To PHI. Business Associate hereby agrees to allow an individual who is the subject of PHI maintained in a designated record set, to have access to and copy that individual's PHI within five (5) business days of receiving a written request from the Covered Entity or individual. Business Associate shall provide PHI in the format requested, unless it cannot readily be produced in such format, in which case it shall be provided in standard hard copy. If any individual requests from Business Associate or its agents or subcontractors access to PHI, Business Associate shall notify Covered Entity of same within two (2) business days. Business associate shall further conform with and meet all of the requirements of 45 C.F.R. §164.524, 42 USCS § 17936(e), and other applicable laws.

g) Amendment And Incorporation Of Amendments. Within five (5) business days of receiving a request from Covered Entity for an amendment of PHI maintained in a designated record set, Business Associate shall make the PHI available and incorporate the amendment to enable Covered Entity to comply with 45 C.F.R. §164.526 and other applicable laws. If any individual requests an amendment from Business Associate or its agents or subcontractors, Business Associate shall notify Covered Entity within five (5) business days.

h) Provide Accounting Of Disclosures. Business Associate agrees to maintain a record of all disclosures of PHI in accordance with 45 C.F.R. §164.528, 42 USCS § 17935(c), and other applicable laws. Such records shall include, for each disclosure, the date of the disclosure, the name and address of the recipient of the PHI, a description of the PHI disclosed, the name of the individual who is the subject of the PHI disclosed, the purpose of the disclosure, and shall include disclosures made on or after the date that is six (6) years prior to the request or April 14, 2003, whichever is later. Business Associate shall make such record available to the individual or the Covered Entity within five (5) business days of a request for an accounting of disclosures, or within such other time as may be dictated by applicable law.

i) Access To Books And Records. Business Associate hereby agrees to make its internal practices, books, and records relating to the use or disclosure of PHI received from, or created or received by Business Associate on behalf of the Covered Entity, available to the Secretary of Health and Human Services or designee for purposes of determining compliance with the HIPAA Privacy Regulations.

j) Return Or Destruction Of PHI. At termination of this Agreement, Business Associate hereby agrees to return or destroy all PHI provided by or obtained on behalf of Covered Entity. Business Associate agrees not to retain any copies of the PHI after termination of this Agreement. If return or destruction of the PHI is not feasible, Business Associate agrees to extend the protections of this Agreement to limit any further use or disclosure until such time as the PHI may be returned or destroyed. If Business Associate elects to destroy the PHI, it shall certify to Covered Entity that the PHI has been destroyed.

k) Maintenance of PHI. Notwithstanding Section 5(j) of this Agreement, Business Associate and its subcontractors or agents shall retain all PHI throughout the term of the Agreement and shall continue to maintain the information required under §5(h) of this Agreement for a period of six (6) years after termination of the Agreement, unless Covered Entity and Business Associate agree otherwise.

l) Mitigation Procedures. Business Associate agrees to establish and to provide to Covered Entity upon request, procedures for mitigating, to the maximum extent practicable, any harmful effect from the use or disclosure of PHI in a manner contrary to this Agreement or the Privacy Rule. Business Associate further agrees to mitigate any harmful effect that is known to Business Associate of a use or disclosure of PHI by Business Associate in violation of this Agreement or the Privacy Rule.

m) Training. Business Associate will train all members of its workforce on its policies and procedures with respect to PHI as necessary and appropriate for the workforce members to carry out the functions required by this contract.

n) Sanction Procedures. Business Associate agrees that it shall develop and implement a system of sanctions for any employee, subcontractor or agent who violates this Agreement or other applicable laws.

o) Grounds For Breach by Covered Entity. Upon Business Associate's knowledge of a material breach by Commonwealth of this Business Associate Agreement, Business Associate shall notify Commonwealth of such breach and Commonwealth shall have at least thirty (30) days to cure such breach. In the event Commonwealth does not cure the breach~~,~~ Business Associate shall have the right to report the violation to the Secretary. Notwithstanding any other language in this Agreement, the parties agree that termination by the Business Associate is infeasible.

p) Grounds For Breach. Any non-compliance by Business Associate with this Agreement or the Privacy or Security Rules will automatically be considered to be a breach of the Agreement, if Business Associate knew or reasonably should have known of such non-compliance and failed to immediately take reasonable steps to cure the non-compliance. Business Associate shall have thirty (30) days to cure such breach from the date of notice to cure by the Commonwealth. In the event Business Associate does not cure the breach, the Commonwealth shall have the right to immediately terminate this Agreement and the underlying agreement. If termination is infeasible, the Commonwealth shall report the violation to the Secretary.

q) Termination by Commonwealth. Business Associate authorizes termination of this Agreement by the Commonwealth if the Commonwealth determines, in its sole discretion, that the Business Associate has violated a material term of this Agreement.

r) Failure to Perform Obligations. In the event Business Associate fails to perform its obligations under this Agreement, Covered Entity may immediately discontinue providing PHI to Business Associate. Covered Entity may also, at its option, require Business Associate to submit to a plan of compliance, including monitoring by Covered Entity and reporting by Business Associate, as Covered Entity in its sole discretion determines to be necessary to maintain compliance with this Agreement and applicable law.

s) Privacy Practices. The Department will provide and Business Associate shall immediately begin using any applicable form, including but not limited to, any form used for Notice of Privacy Practices, Accounting for Disclosures, or Authorization, upon the effective date designated by the Program or Department. The Department retains the right to change the applicable privacy practices, documents and forms. The Business Associate shall implement changes as soon as practicable, but not later than 45 days from the date of notice of the change.

4. OBLIGATIONS OF COVERED ENTITY:

a) Provision of Notice of Privacy Practices. Covered Entity shall provide Business Associate with the notice of privacy practices that the Covered Entity produces in accordance with applicable laws, as well as changes to such notice.

b) Permissions. Covered Entity shall provide Business Associate with any changes in, or revocation of, permission by individual to use or disclose PHI of which Covered Entity is aware, if such changes affect Business Associate's permitted or required uses and disclosures.

c) Restrictions. Covered Entity shall notify Business Associate of any restriction to the use or disclosure of PHI that the Covered Entity has agreed to in accordance with 45 C.F.R. §164.522 and other applicable laws, to the extent that such restriction may affect Business Associate's use or disclosure of PHI.

5. MISCELLANEOUS:

a) Regulatory References. A reference in this Appendix to a section in the Privacy or Security Rules means the section as in effect or as amended as reasonably determined by the Covered Entity.

b) Amendment. The Parties agree to take such action as is necessary to amend this Appendix from time to time as is necessary for the Covered Entity to comply with the requirements of the Privacy and Security Rules and the Health Insurance Portability and Accountability Act of 1996, Pub. L. No. 104-191.

c) Survival. The respective rights and obligations of Business Associate under section 5(i) of this Appendix shall survive the termination of the Agreement.

d) Interpretation. Any ambiguity in this Appendix shall be resolved to permit Covered Entity to comply with the Privacy and Security Rules as reasonably determined by the Covered Entity.

e) Changes in Law. Business Associate shall comply with all applicable privacy and security rules and regulations, including but not limited to HIPAA regulations and the HITECH Act and HITECH regulations which are now in effect or which take effect during the term of this contract.

APPENDIX D

DOMESTIC WORKFORCE UTILIZATION CERTIFICATE

DOMESTIC WORKFORCE UTILIZATION CERTIFICATION FOR MULTIPLE AWARD CONTRACTS (07/24/09)

To the extent permitted by the laws and treaties of the United States, this certification will be used by the Agency in making a best value selection for each particular assignment. Each quote will be evaluated for its commitment to use the domestic workforce in the fulfillment of the contract. Maximum consideration will be given to those suppliers who will perform the contracted direct labor exclusively within the geographical boundaries of the United States or within the geographical boundaries of a country that is a party to the World Trade Organization Government Procurement Agreement. Those who propose to perform a portion of the direct labor outside of the United States and not within the geographical boundaries of a party to the World Trade Organization Government Procurement Agreement will receive a correspondingly smaller score for this criterion. In order to be eligible for any consideration for this criterion, suppliers must complete and sign the following certification. This certification will be included as a contractual obligation when the contract is executed. Failure to complete and sign this certification will result in no consideration being given to the supplier for this criterion.

I, _____**[title]** of _____**[name of Contractor]** a _____ **[place of incorporation]** corporation or other legal entity, ("Contractor") located at _____ **[address],** having a Social Security or Federal Identification Number of _____, do hereby certify and represent to the Commonwealth of Pennsylvania ("Commonwealth") (Check **one** of the boxes below):

☐ All of the direct labor performed within the scope of services under the contract will be performed exclusively within the geographical boundaries of the United States or one of the following countries that is a party to the World Trade Organization Government Procurement Agreement: Aruba, Austria, Belgium, Bulgaria, Canada, Chinese Taipei, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hong Kong, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Latvia, Liechtenstein, Lithuania, Luxemburg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Singapore, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, and the United Kingdom

OR

☐ _____ **percent** (_____**%**) **[Contractor must specify the percentage]** of the direct labor performed within the scope of services under the contract will be performed within the geographical boundaries of the United States or within the geographical boundaries of one of the countries listed above that is a party to the World Trade Organization Government Procurement Agreement. Please identify the direct labor performed under the contract that will be performed outside the United States and not within the geographical boundaries of a party to the World Trade Organization Government Procurement Agreement and identify the country where the direct labor will be performed:

NON-DISCLOSURE AGREEMENT

NON-DISCLOSURE AGREEMENT

1. _____ (Company) wishes to receive certain trade secrets, confidential and proprietary information (hereinafter collectively "Information") pertaining to the **Data Center Computing Services RFP 6100022698** (the "RFP"). This exchange includes all communication of Information between the parties in any form whatsoever, including oral, written and machine readable form, pertaining to the above.

2. Company wishes to receive the Information for the sole purpose of submitting a proposal in response to the Commonwealth's RFP.

3. Disclosure of Information by the Commonwealth is in strictest confidence and thus Company understands that it will:

   a) Not disclose to any other person the Information

   b) Use at least the same degree of care to maintain the Information secret as the Company uses in maintaining as secret its own secret information, but always at least a reasonable degree of care;

   c) Use the Information only for the above purposes;

   d) Restrict disclosure of the Information solely to those employees of Company having a need to know such Information in order to accomplish the purpose stated above;

   e) Advise each such employee, before he or she receives access to the Information, of the obligations of Company under this Agreement, and require each such employee to maintain those obligations;

   f) Within fifteen (15) days following request of the Commonwealth, return to the Commonwealth all documentation, copies, notes, diagrams, computer memory media and other materials containing any portion of the Information, or confirm to the Commonwealth, in writing, the destruction of such materials; and

   g) Immediately upon sale of Company or merger of Company with a third party, return to the Commonwealth all documentation, copies, notes, diagrams, computer memory media and other materials containing any portion of the Information, or confirm to the Commonwealth, in writing, the destruction of such materials.

4. This Agreement imposes no obligation on Company with respect to any portion of the Information received from the Commonwealth which (a)(1) was known to the Company prior to disclosure by the Commonwealth and (2) as to which the Company has no obligation not to disclose or use it, (b) is lawfully obtained by the Company from a third party under no obligation of confidentiality, (c) is or becomes generally known or available other than by unauthorized disclosure, (d) is independently developed by the Company or (e) is generally disclosed by the Commonwealth to third parties without any obligation on the third parties.

5. The Information shall remain the sole property of the Commonwealth or the originating agency.

6. In the event of a breach or threatened breach or intended breach of this Agreement by Company, the Commonwealth, in addition to any other rights and remedies available to it at law or in equity, shall be entitled to preliminary and final injunctions, enjoining and restraining such breach or threatened breach or intended breach.

7. Company understands that the Commonwealth may not own the intellectual property rights in all of the information that it provides to Company.

8. The validity, construction, and performance of this Agreement are governed by the laws of the Commonwealth of Pennsylvania.

9. The rights and obligations of the Company under this Agreement may not be sold, assigned or otherwise transferred.

This Agreement is binding upon the Company, and upon the directors, officers, employees and agent of the Company. This Agreement is effective as of the date of execution by the Company and will continue indefinitely, unless terminated on thirty (30) days written notice by either party. However, Company's obligations of confidentiality and restrictions on use of the Information disclosed by Commonwealth shall survive termination of this Agreement.

Signature and Certification by Company

I certify that I have the authority to bind the Company to this Agreement. I have read and understand the certifications and understanding set out in this document. I further understand that I, by signing this document, I make the acknowledgement and certifications and confirm the understandings herein subject to the provisions and penalties of *18 Pa.C.S. Section 4904 (unsworn falsification to authorities).*

Trade Secret/Confidential Proprietary Information Notice

Instructions:

The Commonwealth may not assert on behalf of a third party an exception to the public release of materials that contain trade secrets or confidential proprietary information unless the materials are accompanied, at the time they are submitted, by this form or a document containing similar information.

It is the responsibility of the party submitting this form to ensure that all statements and assertions made below are legally defensible and accurate. The Commonwealth will not provide a submitting party any advice with regard to trade secret law.

Name of submitting party:

Contact information for submitting party:

Please provide a brief overview of the materials that you are submitting (e.g. bid proposal, grant application, technical schematics):

Please provide a brief explanation of why the materials are being submitted to the Commonwealth (e.g. response to bid #12345, application for grant XYZ being offered by the Department of Health, documents required to be submitted under law ABC)

Please provide a list detailing which portions of the material being submitted you believe constitute a trade secret or confidential proprietary information, and please provide an explanation of why you think those materials constitute a trade secret or confidential proprietary information. Also, please mark the submitted material in such a way to allow a reviewer to easily distinguish between the parts referenced below. (You may attach additional pages if needed)

Note: The following information will not be considered a trade secret or confidential proprietary information:

- Any information submitted as part of a vendor's cost proposal
- Information submitted as part of a vendor's technical response that does not pertain to specific business practices or product specification
- Information submitted as part of a vendor's technical or disadvantaged business response that is otherwise publicly available or otherwise easily obtained
- Information detailing the name, quantity, and price paid for any product or service being purchased by the Commonwealth

Page Number	Description	Explanation

Acknowledgment

The undersigned party hereby agrees that it has read and completed this form, and has marked the material being submitted in accordance with the instructions above. The undersigned party acknowledges that the Commonwealth is not liable for the use or disclosure of trade secret data or confidential proprietary information that has not been clearly marked as such, and which was not accompanied by a specific explanation included with this form.

The undersigned agrees to defend any action seeking release of the materials it believes to be trade secret or confidential, and indemnify and hold harmless the Commonwealth, its agents and employees, from any judgments awarded against the Commonwealth in favor of the party requesting the materials, and any and all costs connected with that defense. This indemnification survives so long as the Commonwealth has possession of the submitted material, and will apply to all costs unless and until the undersigned provides a written statement or similar notice to the Commonwealth stating that it no longer wishes to exempt the submitted material from public disclosure.

The undersigned acknowledges that the Commonwealth is required to keep all records for at least as long as specified in its published records retention schedule.

The undersigned acknowledges that the Commonwealth reserves the right to reject the undersigned's claim of trade secret/confidential proprietary information if the Commonwealth determines that the undersigned has not met the burden of establishing that the information constitutes a trade secret or is confidential. The undersigned also acknowledges that if only a certain part of the submitted material is found to constitute a trade secret or is confidential, the remainder of the submitted material will become public; only the protected information will be removed and remain nonpublic.

If being submitted electronically, the undersigned agrees that the mark below is a valid electronic signature.

APPENDIX H

Lobbying Certification Form

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress , an officer or employee of Congress, or an employee of a member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.

(2) **If any** funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with this federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance is placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed under Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than **$100,000** for such failure.

[DATE]

[SDB Contact Name
Title
SDB Company Name
Address
City, State, Zip]

Dear [SDB Contact Name]:

This letter serves as confirmation of the intent of [Offeror] to utilize [Small Diverse Business (SDB)] on RFP [RFP number and Title] issued by the [Commonwealth agency name].

If [Offeror] is the successful vendor, [SDB] shall provide [identify the work, goods or services the SDB will perform, and the timeframe during the term of the contract and any option/renewal periods when the work, goods or services will be performed or provided].

These services represent [identify fixed numerical percentage commitment] of the total amount [Offeror] will be paid under the initial term of the contract. The dollar value that the fixed percentage commitment represents will depend on the final negotiated contract pricing and actual contract usage or volume.

[SDB] represents that it meets the small diverse business requirements set forth in the RFP and all required documentation has been provided to [Offeror] for its SDB submission.

We look forward to the opportunity to serve the [Commonwealth agency name] on this project. If you have any questions concerning our small diverse business commitment, please feel free to contact me at the number below.

Sincerely,

Acknowledged,

DEFINITIONS

The following defined terms shall have the meanings specified below:

Term	Definition
24 x 7 x 365	A continuous, non-stop period of time.
Acceptance Criteria	The list of predetermined objectives that define the minimum capabilities or work results that is acceptable to the Commonwealth.
Acceptance Testing Plan	A mutually agreed plan that includes the testing of application infrastructure performance characteristics prior to migrating each of the current application workloads to the Offeror's infrastructure.
Agency Agencies	One or more administration division(s) of the Commonwealth of Pennsylvania.
Application Development and Maintenance (ADM)	The work needed to create, update and maintain software applications.
Application Infrastructure Availability	A Service Level that measures the percentage of time the Applications is available during the applicable Measurement Window. Availability is determined by whether the application residing on any of the associated server instances is available to users as defined within the CMDB.
Assistance Event	A single necessary and appropriate action to accomplish a complete, timely, and seamless transition of any Terminated Services from Offeror to the Commonwealth, or to any replacement provider designated by the Commonwealth, without material interruption of or material adverse impact on the Terminated Services or any other services provided by third-parties or Services that Offeror shall continue to provide
At Risk Amount	The amount that the Offeror will have at risk for all Service Level Credits in each month.
Availability	The time a service or application is fully functional (available) to perform the functions it is designed to produce.
Baseline Data	The actual data measured during a Measurement Period or applicable historical data of the Commonwealth.

Term	Definition
Baseline Security Risk and Vulnerability Assessment	The assessment of must include a roadmap and project plan to make any required security modifications.
Benchmark Results	The details of the Benchmarking Process intended to ensure that Offeror provides Commonwealth with technology and Services at Service Levels equal to or greater than other organizations receiving similar services.
Benchmark Review Period	The period to review such Benchmark Reports to assess the Benchmark Results.
Benchmarker	An independent third-party that undertakes Benchmarking.
Benchmarking	The objective measurement and comparison process (utilizing resource baselines and industry standards) utilized by a Benchmarker to benchmark the quality of the Services and the Fees by Statement of Work or Statement of Works.
Benchmarking Price Protection	The process of an objective measurement and comparison process utilizing baseline methods and industry standards to determine pricing as more fully set forth within Section 25 of Appendix A (Terms and Conditions).
Bureau of Small Business Opportunities (BSBO)	A Bureau within the Commonwealth's Department of General Services responsible for certifying a small diverse businesses as a DGS-certified minority-owned business, woman-owned business, service-disabled veteran-owned business or veteran-owned business, or United States Small Business Administration-certified 8(a) small disadvantaged business concern, that qualifies as a small business.
Business Continuity Plan	The plan set out to continue business operations of the Commonwealth in the event of a declared disaster.
Business Partner	A third party entity that does business with the Commonwealth.
Capacity On Demand	A type of Service that its capacity can be modified in an automated process with a short implementation time.
Card Holder Data	Credit card records or record systems containing cardholder data including credit card numbers.

Term	Definition
Change	An alteration in specifications, services, delivery point, rate of delivery, period of performance, price, or other provisions of the Contract changes accomplished by mutual action of the parties to the Contract.
Change Advisory Board	A group of individuals authorized to approve or reject individual service and infrastructure changes and to set and guide the Change process.
Change Control Procedures	The procedures used to modify sections of the Contract or modify the configuration of an infrastructure component of a Service.
Change Management	The process responsible for controlling the lifecycle of all changes, enabling beneficial changes to be made with minimum interruption to the Services.
Change Order	The documentation used to request, validate, negotiate and approve a change to the sections of the Contract.
Change Proposal	The document presented to the Commonwealth by the Offeror to start the Change Control Procedures.
Change Request	The type of request created and processed within the Commonwealth's ITSM system to request authorization to modify an infrastructure component of a Service.
Co-location	The capability to provide space, power, and cooling to an asset that is not owned by the Offeror.
Comma Separated Values (CSV)	A type of Text file where the values are delineated with a comma.
Commonwealth	The Commonwealth of Pennsylvania.
Commonwealth Computing Procedures Manual (CCPM)	A date detailed description of all processes and procedures used to support the computing needs of the Commonwealth via the Offerors Knowledge/Service Portal. The CCPM contains specific sections dedicated to the operational procedures for each Commonwealth datacenter customer.
Commonwealth Computing Services	The centralized computing capabilities of the Commonwealth that includes Mainframe, Midrange and x86 based servers and the supporting infrastructure.

Term	Definition
Commonwealth Contracting Officer	The person authorized to administer this Contract for the Commonwealth and to make written determinations with respect to the Contract.
Commonwealth Customers	The end users deriving benefits from the services provided from this contract.
Commonwealth Project Manager	The individual within the Commonwealth that is responsible for managing the Contract.
Commonwealth Proprietary Software	The software owned by the Commonwealth.
Commonwealth Technology Center (CTC)	The Commonwealth's datacenter and adjacent offices located at 1 Technology Park Drive, Harrisburg, PA 17110. Also known as "1 Tech Park" or the EDC.
Commonwealth Third Party Software	Third Party Software for which the Commonwealth has a valid license and current maintenance agreement.
Confidential Information.	With regard to the Commonwealth, the data and other information of the Commonwealth or any private individual, organization or public agency, in each case to the extent such information and documentation is not permitted to be disclosed to third parties under local, Commonwealth or Federal laws and regulations or pursuant to any policy adopted by the Commonwealth or pursuant to the terms of any third-party agreement to which Commonwealth is a party. With regard to the Contractor, all Contractor Software and all Contractor documentation and manuals not made available in the ordinary course of business (except those items developed by Contractor specifically to deliver Services to the Commonwealth pursuant to this Contract), and any other information identified in writing by Contractor as confidential or proprietary to Contractor, its subcontractors or licensors.
Confidential Proprietary Information	All Contractor Software and all Contractor documentation and manuals not made available in the ordinary course of business (except those items developed by Contractor specifically to deliver Services to the Commonwealth pursuant to this Contract), and any other information identified in writing by Contractor as confidential or proprietary to Contractor, its subcontractors or licensors.

Term	Definition
Configuration Items (CI)	The database record(s) indicating the interrelationships and configuration of a service, hardware component, application, and software
Configuration Management Database (CMDB)	The repository of configuration information related to all the components of the Offeror's datacenter services solution. It contains the details of each of the configuration items (CI) in the IT infrastructure. The CMDB helps provide the relationships between these components (e.g. Application Infrastructure) and track their configuration. The CMDB is a fundamental component of the ITIL framework's Configuration Management process.
Contract	Means the agreement for provision of Services executed on [ ] between Offeror and Commonwealth of which this document is a part of.
Contractor	*The Offeror awarded the Contract.*
Contractor Software	The software owned by the Contractor.
Contractor Tools	All Tools owned or licensed by Contractor or its agents and used by Contractor or its agents to provide the Services.
COPANET	The Commonwealth's private Fiber network.
Criminal History Record Information Act (CHRIA)	Chapter 91 of the Crimes Code of Pennsylvania and Pennsylvania Consolidated Statues Annotated, 18 Pa. C.S.A. 9101 et. seq.
Criminal Justice Information Services (CJIS)	The policy that provides Criminal Justice Agencies and Noncriminal Justice Agencies with a minimum set of security requirements for the access to Federal Bureau of Investigation Criminal Justice Information Services (CJIS) Division systems and information and to protect and safeguard Criminal Justice Information.
Critical Application	Those applications designated as "Critical Applications" in the Commonwealth Compute Process Manual (CCPM)
Critical Measurements (CM)	Performance measurements defined for the most important service areas

Term	Definition
Critical Services	Those services designated as "Critical Services" in a Commonwealth Compute Process Manual (CCPM)
Data Gathering	The work effort of collecting information to discover and document a process, a procedure, or the configuration of a Service.
Data Power House (DPH)	The Commonwealth accepted term encompassing the current managed datacenter contract, Services, and location.
Database Administration (DBA)	The function of implementing, configuring, monitoring, and troubleshooting structured data in a common platform/application.
Datacenter Architecture	The resulting equipment and associated network infrastructure viewed as an entire collection of services.
Days	Calendar days, unless specifically indicated otherwise.
Degraded Condition	A Service that tests as fully operational but is degraded below user expectations across a significant segment of the user population as determined by the Commonwealth.
Deliverable	A Milestone or Service that is subject to acceptance testing in the Acceptance Testing Plan.
Developed Documentation	Documentation developed by Contractor specifically for the Commonwealth in connection with its performance under this Contract as more fully set forth in Section 40 of Appendix A (Terms and Conditions).
Developed Materials	All literary works, or other works of authorship (such as application programs, listings, programming tools, documentation, reports, drawings, procedure manuals and similar works) developed under the Contract, as more fully set forth in Section 40 of Appendix A (Terms and Conditions)
Disaster Recovery Plan	The plan created to restore Services to the Commonwealth in the event of a declared disaster.
Disaster Recovery (DR)	A series of events to restore a service or equipment in the advent of a major system or network failure, or a natural or man-made event that denies service for an extended period of time.

Term	Definition
Documentation	All written materials, work papers, configurations and manuals (including the CCPM) prepared by or on behalf of the Contractor or any of the Contractor's Agents pursuant to the Contract as more fully set forth in Section 40 of Appendix A (Terms and Conditions)..
Downtime	The duration a service or equipment is not fully functional based on the requirements of the service or equipment.
Earn Back	The Offeror's opportunity to earn back Service Level Credits on Required Service Level Defaults, in accordance with Schedule J.1 (Datacenter Service Level Management)
Effective Date	The date the Commonwealth and the Offeror complete the approval and signature of the resulting Contract for this Procurement, as more fully set forth in Section 1 of Appendix A (Terms and Conditions).
Enterprise Data Center (EDC)	The Commonwealth's datacenter and adjacent offices located at 1 Technology Park Drive, Harrisburg, PA 17110.
Enterprise Remedy	The Commonwealth's ITSM system that manages and tracks the workflows and approvals for Incidents, Changes, Problems, CMDB and SLA's.
Equipment	All computing, networking, telecommunications and other equipment (hardware and firmware) procured, provided, operated, supported, or used by Offeror in connection with the Services, including but not limited to: a) mainframe, midrange, server and distributed computing equipment and associated attachments, features, accessories, peripheral devices and cabling, b) personal computers, laptop computers, workstations and personal data devices and associated attachments, features, accessories, printers, multi-functional printers, peripheral or network devices and cabling, and c) voice, data, video and wireless telecommunications and network and monitoring equipment and associated attachments, features, accessories, cell phones, peripheral devices and cabling.

Term	Definition
ERP systems	Systems that integrate internal and external management information across an entire organization, typically including finance, accounting, sales, service, and customer relationship management, etc.
Expiration Date	The end of the Contract Term, as more fully set forth in Section 1 of Appendix A (Terms and Conditions).
Federal Information Processing Standards (FIPS)	Standards and guidelines that are developed by the National Institute of Standards and Technology (NIST) for Federal computer systems. Under the Information Technology Management Reform Act (Public Law 104-106), the Secretary of Commerce approves standards and guidelines that are developed by the National Institute of Standards and Technology (NIST) for Federal computer systems. These standards and guidelines are issued by NIST as Federal Information Processing Standards (FIPS) for use government-wide. NIST develops FIPS when there are compelling Federal government requirements such as for security and interoperability and there are no acceptable industry standards or solutions.
Fees	The fees and any other amounts payable by Commonwealth to Offeror.
Force Majeure Event	An event or effect that cannot be reasonably anticipated or controlled, as more fully set forth in Section 65 of Appendix A (Terms and Conditions).
High Level Estimate (HLE)	Used when the Commonwealth has a clear technical direction and needs rough estimates on the cost of implementing the Service. HLEs may be used to attach a cost estimate to a prior conceptualization or technical opinion produced by the Offeror.
Hybrid Third Party Software	Third Party Software for which the Commonwealth has a valid license, and except for the cost of the license, the contractor shall have financial, administration, operational and maintenance responsibility.
Improved Technology	Any new commercially available information processing technology developments, including new software and hardware developments, that could reasonably be expected to have a positive impact on the Services in terms of increased efficiency or reduced cost.

Term	Definition
Incident	An ITIL term use to describe a failure or loss of capabilities of a Service where a temporary work around is not available or not in place.
Information Technology Infrastructure Library (ITIL)	A cohesive set of best practices, drawn from the public and private sectors internationally.
Information Technology Service Management (ITSM)	A best practice approach driven both by technology and organizational environments on managing IT services as a whole.
IT Bulletins	Information Technology (IT) bulletins which are issued by the Governor's Office of Administration to set IT policy.
Key Measurements (KMs)	Performance target measurements for non-critical service areas.
Key Personnel	The Offeror's named staff that the Commonwealth determined to be critical to the success of the Project and require the Offeror to provide as defined and governed in Schedule G – Staffing Plan and Key Positions.
Key Positions	The positions that the Commonwealth determined to be critical to the success of the Project and require the Offeror to provide as defined and governed in Schedule G – Staffing Plan and Key Positions
Knowledge/Service Management Portal (KMP)	A software recording tool the Offeror uses to record all incidents, problems, service requests, change requests, and configuration information. All updates to the records, contacts with clients or vendors, and resolutions will be recorded in a real-time and consistent manner.
Management Committee	A committee comprised of ten members, five of whom shall be appointed by Commonwealth and five of whom shall be appointed by Offeror from Offeror's executive management staff.
Market Rate	The average of amounts paid by the reference group for comparable services.

Term	Definition
Measurement Period	The nine (9) consecutive months of measurements during which Baseline Data will be measured, which may be used by the Commonwealth and the Offeror to determine Service Level Target and/or Minimum Service Levels. The Offeror will measure, collect and report to the Commonwealth the relevant measurements during such period.
Measurement Window	Shall mean the periodic evaluation and reporting frequency for each individual Service Level as specified in Schedule J.2 (Datacenter Service Level Matrix) (*e.g.*, monthly, quarterly, semi-annually, annually).
Milestone	A Transition Milestone, Transformation Milestone or Critical Milestone
Milestone Credit	The invoice credits due the Commonwealth if the Offeror fails to attain a Milestone defined in Schedule D - Transition Milestones.
Milestone Credit	The credit to be paid by Offeror for missing a Transition Milestone, as set out in Schedule D (Transition Milestones).
Milestone Due Date	The date the Offeror will not exceed as specified within Schedule D (Transition Milestones).
Monitoring System	The hardware and software used to monitor the performance, capacity, and other events occurring around or within a service provided to the Commonwealth.
OA Service Desk	The department responsible for Tier I troubleshooting support to the end users by taking requests from end-users and performing triage on the request and escalate as necessary
Offeror Personnel	The personnel of Offeror and its Subcontractors who provide or are involved in the provision of the Services.
Offeror Services Locations	The service locations owned, leased or under the control of Offeror or its subcontractors that are set forth in Schedule E (Datacenter Locations).
Offeror's Proposal	The proposal submitted by the selected Offeror in response to the RFP.

Term	Definition
Office of Administration	An organization within the Commonwealth that provides information technology, human resource, records management, and continuity of government services
Office of Attorney General (OAG)	The office of Pennsylvania's top law enforcement official, which has a wide range of responsibility to protect and serve the citizens and agencies of the Commonwealth.
Office of Inspector General	An organization within the Commonwealth that works to prevent or find fraud, waste, and abuse in the Commonwealth's programs, operations, and contracts.
Outage	Any service interruption that is or may be experienced by the end-users of the service, application, or equipment.
P Series Servers	A general reference to the IBM collection of servers that typically operate on the AIX operating system.
Payment Card Industry Data Security Standard (PCI DSS)	An actionable framework for developing a robust payment card data security process -- including prevention, detection and appropriate reaction to security incidents.
Pennsylvania	The Commonwealth of Pennsylvania.
Pennsylvania Election Code	The act of June 3, 1937 (P.L.1333, No.320), known as the Pennsylvania Election Code.
Pennsylvania Right-to-Know Law ("RTKL")	The Pennsylvania Right-to-Know Law, 65 P.S. §§ 67.101-3104.
Power Usage Effectiveness ratio (PUE)	A ratio that represents the amount of power consumption of compute versus the total power consumption of a facility as defined by the Green Grid consortium.
Prevailing Wage Act	The Pennsylvania Prevailing Wage Act (43 P.S. §§ 165-1 through 165-17).
Problem	An ITIL term use to describe a failure or loss of capabilities of a Service where a temporary work around is in place.
Program Management Office (PMO)	The organization with governance, implementation, and management of the overall engagement.

Term	Definition
Project	This Data Center Computing Services procurement and resulting program supporting the Contract that is the results of this procurement.
Protected Health Information (PHI)	The meaning given to such term under HIPAA and the HIPAA Regulations in 45 C.F.R. Parts 160, 162 and 164, including, but not limited to 45 C.F.R. §160.103
Purchase Order	Orders made in accordance with the ordering process set forth in Section 2 of Appendix A (Terms and Conditions).
Regulatory Entity	Any supervisory or governmental agency, body or authority having regulatory or supervisory authority over the Commonwealth, its agencies, the Offeror and subcontractor's assets, resources or business and over the Services, including any organization reporting to such bodies.
Remote Hands Support	Shall mean the Time and Material effort by the Offeror to provide technical support to the Commonwealth in the support of the equipment in co-location
Request for Criminal Record Check	The form and procedure for looking up and compiling criminal records, commercial records and financial records of an individual, a more fully set forth at Section 44 of Appendix A (Terms and Conditions).
Request for Service	The process used by the Commonwealth to order an addition, modification, or removal of a Service component or configuration using the Service Catalog.
Required Service Level	The expected level of performance for a CM or a KM, as applicable, as set forth in Schedule J.1 (Service Level Methodology).
Required Service Level Default	A recurring failure of the Offeror to meet the Required Service Level for the same CM or KM three (3) times, and each subsequent failure thereafter, during a Service Level Reporting Period
Reserve Account	A capital improvement fund into which Offeror shall deposit quarterly as specified in Section 13 of Appendix A (Terms and Conditions).
RFP	The Request for Proposal (RFP 6100022698) issued by the Commonwealth for Data Center Computing Services.

Term	Definition
Run Book	A book containing all of the information needed to perform day-to-day operations and to respond to emergency situations. This information must include the following: •Resource information about the data center and its hardware and software •Process information, including step-by-step procedures for operational and emergency processes
SAP Vendor Number	A vendor identification number for the Commonwealth's SAP ordering and payment processing systems.
Service Catalog	A listing of Services with pricing and descriptions that are available to the Commonwealth for delivery by the Offeror.
Service Desk	The organization that interfaces with end-users on service requests and trouble reporting.
Service Level	The quality and response standards set for the Offeror's performance of the Services delivered and are defined in Schedules Schedule J.1 - Datacenter Service Level Management, Schedule J.2 - Datacenter Service Level Matrix, and Schedule J.3 - Datacenter SLA Definitions.
Service Level Agreements (SLA's)	A collection of Service Level commitments provided by the Offeror with associated cures.
Service Level Credit	The credits due the Commonwealth in the even the Offeror fails to meet the SLA objectives defined in Schedules Schedule J.1 - Datacenter Service Level Management, Schedule J.2 - Datacenter Service Level Matrix, and Schedule J.3 - Datacenter SLA Definitions.
Service Level Default	A single failure of the Offeror to meet the applicable Minimum Service Level for a specific CM or KM in the applicable Measurement Window (*e.g.*, monthly).
Service Level Default	Failure to meet the Required Service Level.
Service Level Termination Event	Multiple failures over time of a single Service Level or a pattern of failure over time across multiple Service Levels.

Term	Definition
Service Outage	Any event that unexpectedly denies a service's full functionality to the end-users.
Service(s)	The services, function and responsibilities described in the Contract, including the Services set forth in (Services Catalog) and Schedule F (Statement of Work).
Services Locations	The Commonwealth Services Locations and the Offeror Services Locations as agreed upon by the parties as listed in Schedule E (Datacenter Locations).
Small Diverse Business (SDB)	A minority, woman, veteran or service-disabled veteran business enterprise as determined by BSBO.
Software	A collection of one or more programs, databases or microprograms fixed in any tangible medium of expression that comprises a sequence of instructions (source code) to carry out a process in, or convertible into, a form executable by an electronic computer (object code).
SSAE 16	A service organization reporting standard for performing an examination of a service organization's controls and processes. (Statement on Standards for Attestation Engagements (SSAE) No. 16)
Standard Service Request	A service request that is routine in nature and not requiring extensive engineering or solutioning to develop the request.
Statement of Work	The Services, function and responsibilities described in the Agreement, including the services set forth in Schedule F (COPA Datacenter Statement of Work).
Subcontractors	A third party (including an affiliate of Offeror) to which Offeror subcontracts or otherwise delegates its obligations to perform the Services.
Systems Development Life Cycle (SDLC)	A methodology used to create or modify a software application or system.

Term	Definition
Targeted Application Infrastructure	Used to describe a particular Offeror's application's infrastructure related components or configuration items (CIs) When measuring actual application infrastructure related availability it is important to look at all the components that make up the application infrastructure such as all Servers, Storage, Networking, Firewalls, etc. components as defined in the CMDB.
Term	The duration the Contact between the Commonwealth and the Contractor, as more fully set forth in Appendix A (Terms and Conditions).
Terminated Services	Any Service(s) terminated by the Commonwealth.
Termination Assistance Services	All necessary and appropriate actions to accomplish a complete, timely, and seamless transition of any Terminated Services from Offeror to the Commonwealth, or to any replacement provider designated by the Commonwealth.
Termination for Convenience Fees	A fee due to the Contractor in the event the Commonwealth terminates the Contract for convenience, as more fully set forth in Section 32(a) of Appendix A (Terms and Conditions).
Text	A data format that information can be stored that is usable by a standard personal computer
Third Party Software	All Software products (and all modifications, replacements, upgrades, enhancements, documentation, materials and media related thereto) that are provided under license or lease by a third party to Contractor or Commonwealth.
Tier III Datacenter Rating	Uptime Institute Tier Standard: Topology, TIA-942 Telecommunications Infrastructure Standard for Data Centers, and BICSI 002-2011 Data Center Design and Implementation Best Practices.
Tiered Disaster Recovery	A Disaster Recovery plan that allows for multiple Return to Operation (RTO) timeframes to satisfy varying Commonwealth requirements.
Time	Eastern Time (Standard or Daylight Savings time, as applicable)

Term	Definition
Tools	Any tools, either in object code or source code form, which Offeror has previously developed, or which Offeror independently develops or licenses from a third party, excluding any tools that Offeror creates pursuant to this Contract. Offeror Tools includes but is not limited to, methodologies, information, concepts, toolbars for maneuvering between pages, search engines, JAVA applets, and ActiveX controls.
Transition Milestone	Those tasks and associated completion dates set forth in Schedule D (Transition Milestones).
Transition Orders	The orders for existing Commonwealth services that will be placed to transition those services into the contract.
Transition Plan	The plan set out and agreed to by the parties in Schedule M – Detailed Transition Plan detailing the activities, timescales and responsibilities for transitioning the services from Commonwealth to Offeror, including Transition Milestones.
Transition Program Management Office (TPMO)	The organization responsible for transitioning services to the Offeror's control. The TPMO will provide program management Services to deliver architecture, transition plan integration, and organizational change management, as well as quality assurance, verification of testing, financial oversight, and operational readiness for the Mainframe and Server transition/consolidation program.
Transition Services	Means the transition activities, functions and deliverables described in the Detailed Transition Plan and such other tasks as are necessary to enable Offeror to provide the Services.
Vulnerability Analyses	A security analysis to determine the possibility of an unauthorized intrusion, loss of data, denial of service or other security breach.
x86	A series of computer microprocessor instruction set architectures based on the Intel 8086 CPU.
XML	A data format standard allowing computing systems to exchange information over a data connection.

SCHEDULE B

GOVERNANCE

1. **Management Meetings**. There shall be weekly meetings of the Management Committee during the Transition Period and monthly meetings thereafter. The purpose of such meetings shall be to (1) track the progress of the Transition and Transformation Plan, (2) review Contractor's performance of the Services Levels, (3) resolve disputes, (4) track the progress of the Services and other projects, (5) coordinate and plan for any new hardware or software acquisitions and service deployments, and (6) address any other matters properly brought before the Management Committee.

2. **Management Committee**. "*Management Committee"* shall be a committee comprised of ten members, five of whom shall be appointed by Commonwealth and five of whom shall be appointed by Contractor from Contractor's executive management staff. Commonwealth and Contractor shall each have one (1) vote with respect to matters that are brought before the Management Committee for resolution. Commonwealth shall designate one of its members on the Management Committee to act as the chairperson of the Management Committee. Both Commonwealth and Contractor can change the individuals on the Management Committee on an as-needed basis. The Management Committee shall be authorized and responsible for (1) generally overseeing the performance of this Contract, (2) providing input and advise to the Governor's Office of Administration regarding Commonwealth's strategic and tactical decisions in respect of the Services, the Systems and any other aspect of the business relationship between Commonwealth and Contractor under this Contract, and (3) monitoring and attempting to resolve disputes regarding the provision of the Services and the Services Levels.

3. **Commonwealth Computing Procedures Manual**. For each Commonwealth Agency and as part of the Services, Contractor shall establish procedures pursuant to which Contractor proposes that policies of Commonwealth and Contractor will be adhered to during the Term for the Commonwealth, and shall deliver to Commonwealth, not later than thirty (30) days prior to the commencement of the activities contemplated under the Transition Plan for the Commonwealth's approval or comment, a draft Commonwealth Computing Procedures Manual generally summarizing (1) the Services, (2) the computer hardware and software environments in which, and the various Services Locations at which, the Services will be performed, (3) the documentation, if any, which provides further details regarding the Services, (4) the procedures Contractor intends to use, and the activities Contractor proposes to undertake, in order to manage the Services, and (5) the procedures of a management reporting system that Contractor will use to manage this Contract and communicate to and with Commonwealth. Commonwealth may, at its request, participate to whatever degree it desires in the preparation of the draft Commonwealth Computing Procedures Manual. Contractor may periodically propose and, at the request of Commonwealth, shall promptly propose updates of the Commonwealth Computing Procedures Manual to reflect any changes in the operations or procedures described therein, all of which proposed changes shall be subject to Commonwealth's approval or comment. Reference Schedule H - Commonwealth Computing Procedures Manual for additional details.

SCHEDULE C

SERVICES CATALOG

The Service Catalog in this Schedule C is identical to Schedule I Configuration Definitions, Tab 3 (Technical Rate Card), Tab 4 (Catalog of Services) and Tab 5 (Software), excluding the pricing information. Schedule C is for reference only and an Offeror's proposal shall not include alterations to this schedule.

Schedule I Configuration Definitions

(1) Fully Managed and (2) Managed Only

Servers and Storage Services (x86, p-Series, i-Series)

Servers and Storage services should include the server, disk and backup devices, as well as hardware supplies; software, including operating and data management systems; the facilities, including raised floor and office space; and facilities management.

Unit Prices should include all services costs associated with providing, managing, operating, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work;

3.1 Establish Datacenter Architecture
- 3.1.1 Multi Datacenter Environment (2+ Architecture)
- 3.1.2 Network and Security Architecture
- 3.1.3 Datacenter Architecture and Technology

3.2 Enable Common Service Portfolio

3.2.1 Program & Service Management
- 3.2.1.1 PMO & Contract Management
- 3.2.1.2 Availability/SLA Management
- 3.2.1.3 Change & Release Management
- 3.2.1.4 Service Desk
- 3.2.1.5 Technical Architecture
- 3.2.1.6 Account Management
- 3.2.1.7 Configuration Management
- 3.2.1.8 3rd Party License Management

3.2.2 Technical Services
- 3.2.2.1 Transition Management (New Customer and/or Services)
- 3.2.2.2 Infrastructure Architecture
- 3.2.2.3 Capacity Management
- 3.2.2.4 DR Planning & Testing
- 3.2.2.5 Security Management
- 3.2.2.6 Performance Monitoring & Management

3.2.3 Facilities Management

3.2.3.1 Facilities Architecture / Maintenance
3.2.3.2 Site Operations
3.2.4 Managed Hosting Services
3.2.4.1 Windows Support
3.2.4.2 Storage Management
3.2.4.3 ERP Hosting – SAP / Oracle
3.2.4.4 UNIX Support – AIX / Linux
3.2.4.6 Security & Firewall
3.3 Transition Services
3.3.1 Transition Services – Guiding Principals
3.3.2 Transition Planning/Governance
3.3.2.1 Transition Program Management
3.3.2.2 Security Transition Activities

- Fully Managed Infrastructure is fully owned and managed by the Offeror
- Managed Only Infrastructure is managed by the Service Provider but owned by the Commonwealth and/or a 3rd Party

(3) Limited Co-Lo

Limited Co-Lo is infrastructure that is located in the Service Provider managed datacenter(s). Either owned or managed by the Commonwealth; or 3rd Party.

Limited Co-Lo Services Unit Prices should include all services costs associated with providing, managing, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work Unit Prices should include all services costs associated with providing, managing, operation, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work;

3.1 Establish Datacenter Architecture
3.1.1 Multi Datacenter Environment (2+ Architecture)
3.1.2 Network and Security Architecture
3.1.3 Datacenter Architecture and Technology
3.2 Enable Common Service Portfolio
3.2.1 Program & Service Management
3.2.1.1 PMO & Contract Management
3.2.1.2 Availability/SLA Management
3.2.1.3 Change & Release Management
3.2.1.4 Service Desk
3.2.1.5 Technical Architecture
3.2.1.6 Account Management

3.2.1.7 Configuration Management
3.2.1.8 3rd Party License Management
3.2.2 Technical Services
3.2.2.1 Transition Management (New Customer and/or Services)
3.2.2.2 Infrastructure Architecture
3.2.2.3 Capacity Management
3.2.2.4 DR Planning & Testing
3.2.2.5 Security Management
3.2.2.6 Performance Monitoring & Management
3.2.3 Facilities Management
3.2.3.1 Facilities Architecture / Maintenance
3.2.3.2 Site Operations
3.2.4 Managed Hosting Services
3.2.4.8 Limited-Use Colocation Services
3.3 Transition Services
3.3.1 Transition Services – Guiding Principals
3.3.2 Transition Planning/Governance
3.3.2.1 Transition Program Management
3.3.2.2 Security Transition Activities

(4) Mainframe Services - Include both IBM and Unisys Mainframe services

Mainframe services should include the hardware for the mainframe processing units; disk and backup devices, as well as hardware supplies; software, including operating and data management systems; the facilities, including raised floor and office space; and facilities management in addition to the services described below.

Mainframe Services Unit Prices should include all services costs associated with providing, managing, operating, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work;

3.1 Establish Datacenter Architecture
3.1.1 Multi Datacenter Environment (2+ Architecture)
3.1.2 Network and Security Architecture
3.1.3 Datacenter Architecture and Technology
3.2 Enable Common Service Portfolio
3.2.1 Program & Service Management
3.2.1.1 PMO & Contract Management

3.2.1.2 Availability/SLA Management
3.2.1.3 Change & Release Management
3.2.1.4 Service Desk
3.2.1.5 Technical Architecture
3.2.1.6 Account Management
3.2.1.7 Configuration Management
3.2.1.8 3rd Party License Management

3.2.2 Technical Services
3.2.2.1 Transition Management (New Customer and/or Services)
3.2.2.2 Infrastructure Architecture
3.2.2.3 Capacity Management
3.2.2.4 DR Planning & Testing
3.2.2.5 Security Management
3.2.2.6 Performance Monitoring & Management

3.2.3 Facilities Management
3.2.3.1 Facilities Architecture / Maintenance
3.2.3.2 Site Operations

3.2.4 Managed Hosting Services
3.2.4.2 Storage Management
3.2.4.5 Mainframe Services
3.2.4.6 Security & Firewall

3.3 Transition Services
3.3.1 Transition Services – Guiding Principals
3.3.2 Transition Planning/Governance
3.3.2.1 Transition Program Management
3.3.2.2 Security Transition Activities

- Offerors must also use exhibit B1 DPH Asset List for configuration requirements for mainframe services.

(5) On-Demand (IaaS) Services

On-Demand Unit Prices should include all services costs associated with providing, managing, operating, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work;

3.1 Establish Datacenter Architecture
3.1.1 Multi Datacenter Environment (2+ Architecture)

3.1.2 Network and Security Architecture
3.1.3 Datacenter Architecture and Technology
3.2 Enable Common Service Portfolio
3.2.1 Program & Service Management
3.2.1.1 PMO & Contract Management
3.2.1.2 Availability/SLA Management
3.2.1.3 Change & Release Management
3.2.1.4 Service Desk
3.2.1.5 Technical Architecture
3.2.1.6 Account Management
3.2.1.7 Configuration Management
3.2.1.8 3rd Party License Management
3.2.2 Technical Services
3.2.2.1 Transition Management (New Customer and/or Services)
3.2.2.2 Infrastructure Architecture
3.2.2.3 Capacity Management
3.2.2.4 DR Planning & Testing
3.2.2.5 Security Management
3.2.2.6 Performance Monitoring & Management
3.2.3 Facilities Management
3.2.3.1 Facilities Architecture / Maintenance
3.2.3.2 Site Operations
3.2.5 Capacity on Demand Services
3.2.5.1 Server Capacity on Demand
3.2.5.2 Storage Capacity on Demand
3.2.5.3 DR Infrastructure on Demand
3.2.5.4 Additional Technical Services
3.3 Transition Services
3.3.1 Transition Services – Guiding Principals
3.3.2 Transition Planning/Governance
3.3.2.1 Transition Program Management
3.3.2.2 Security Transition Activities

Schedule I Tab 3. Technical Staff Rate Card

Technical Staff Rate Card
Resource Description
Infrastructure (mainframe, mid-range and x86) Architects/Engineers
Microsoft Product Specialists (e.g. Exchange, SharePoint)
Basis and SAP Oracle support
Performance Specialists
Mainframe Systems Programmers
Batch Administrators
3rd Party Software Product Specialists
System Administrator (Windows, AIX, Linux)
System Administrator (Middleware support)
Storage Administrator
Data Backup Administrator
Database Administrator
Database Architects
Database Analysts
Project Management Support
Network Administrator
Facilities Administrator
Security Administrator
Security Architects
Security Analysts
Asset Management Administrator
Quality Assurance Support
Remedy Support Specialist
IT Service Continuity Specialist

Schedule I Tab 4. Catalog of Services

Field Name ==>	**Product Name**	**Unit**
Description / Use *==>*	*Unique Identifier*	*Unit*
Server - Fully Managed (1)		
x86 Server Configurations (Windows)		
Windows pConfig - 1	2-way Quad-Core 2.0 GHz	Per Server
Windows pConfig - 2, 4, 5	2-way Six-Core 2.4 GHz	Per Server
Windows pConfig - 3	4-way Six-Core 2.0 GHz	Per Server
Windows pConfig - 1, 2, 3, 4, 5	GB RAM	Per GB
Windows pConfig - 1, 2, 4, 5	Mirrored 146 15K Hard Drives	Per Primary + Mirror drive
Windows pConfig - 3	SAN Attached Storage	Per GB
Windows pConfig - 1, 2, 3, 4, 5	Windows Server 2008 R2	Per License
Windows pConfig - 4	Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization Site's Local SAN Storage from hourly data synchronization	Per Service
Windows pConfig - 5	Disaster Recovery Server with a Restoral Interval of 72 hours via Backup Restoral from off-site tape Backups	Per Service

Request for Proposal

RFP # 6100022698

Commonwealth of Pennsylvania
Office of Administration
Office for Information Technology

Data Center Computing Services

Schedule D

Transition Milestones

Milestones include the completion of all tasks, deliverables and interim milestones associated with such Milestone as set forth in the Transition Plan. The Earn Back period is thirty (30) calendar days from the Transition Milestone Due Date and applies to those Milestones indicated with "Y" in the Earn Back column. The Acceptance Criteria for each Milestone includes criteria described in Schedule F and Schedule K of the contract.

Note: If a Milestone is dependent on another Milestone and the first Milestone is missed, the subsequent Milestones remain in effect. An example is: if M-3 is missed, M-5 is still enforced.

Milestone Number	Transition Milestone	Milestone Due Date	Acceptance Criteria	Milestone Credit	Earn Back	Dependency on Commonwealth
M-1	Key Staffing	30 calendar days from Contract Effective Date	• Key Personnel team completed per Schedule G • staffing plan approved • detailed project organizational chart approved • resumes for each key personnel listed on the team submitted • staff contingency plan approved	$50,000 One-time	N	• Commonwealth review and approval
M-2	Contract Management Plan	60 calendar days from Contract Effective Date	• Delivery and acceptance of the following Deliverables from Schedule K: o D-11.01 o D-11.02	$50,000 One-time	Y	• Commonwealth review and approval
M-3	Datacenter Architecture Plan and Roadmap	90 calendar days from Contract Effective Date	• Delivery and acceptance of the following Deliverables from Schedule K: o D-01.01 o D-01.02 (Initial Deliverable Approval) o D-01.03 (Initial Deliverable Approval) o D-01.04 (Initial Deliverable Approval) o D-01.05 (Initial Deliverable	$150,000 One-time	Y	• Commonwealth review and approval

Milestone Number	Transition Milestone	Milestone Due Date	Acceptance Criteria	Milestone Credit	Earn Back	Dependency on Commonwealth
			Approval) o D-01.07 o D-03.01 o D-03.04 o D-03.08 o D-04.01 o D-04.05			
M-4	Detailed Transition Plan	180 calendar days from Contract Effective Date	• Completion of Data Gathering o All data gathering checklists completed, validated, reviewed and approved • Completion, submittal and acceptance of data gathering report on B2B interface to Commonwealth's ITSM system that includes interfaces for the following: o Incident Management o Change Management o Problem Management o Known Errors o Request Management o Invoicing Process • Completion and acceptance of the Detailed Transition Plan using Schedule M – Detailed Transition Plan • Delivery and acceptance of the following Deliverables from Schedule K: o D-05.01 o D-05.04 o D-05.10	$250,000 One-time	N	• Commonwealth review and approval

Milestone Number	Transition Milestone	Milestone Due Date	Acceptance Criteria	Milestone Credit	Earn Back	Dependency on Commonwealth
			o D-10.01 • The Detailed Transition plan must contain: o An **overall (master) plan** which includes but is not limited to: ▪ transition governance plan ▪ transition risk and mitigation plan ▪ due diligence timeline ▪ configuration / testing verification ▪ operational readiness o A **plan by Datacenter** which includes but is not limited to: ▪ transition governance plan ▪ transition risk and mitigation plan ▪ due diligence timeline ▪ configuration / testing verification ▪ operational readiness o A **plan by Agency** which includes but is not limited to: ▪ transition governance plan ▪ transition risk and mitigation plan ▪ due diligence timeline ▪ configuration / testing verification ▪ operational readiness o A **plan by Application** which includes but is not limited to:			

Milestone Number	Transition Milestone	Milestone Due Date	Acceptance Criteria	Milestone Credit	Earn Back	Dependency on Commonwealth
			▪ transition governance plan ▪ transition risk and mitigation plan ▪ due diligence timeline ▪ configuration / testing verification ▪ operational readiness			
M-5	Commonwealth Compute Process Manual (CCPM)	180 calendar days from Contract Effective Date	• Delivery and acceptance of the following Deliverables from Schedule K: o D-02.01 o D-02.04 o D-02.09 o D-02.15 o D-02.17 o D-02.18 o D-02.23 o D-02.26 o D-02.29 o D-02.32 o D-02.37 o D-02.42 o D-02.47 o D-02.52 o D-02.57 o D-02.62 o D-02.67 o D-02.70 o D-02.75 o D-02.81 • Completion and Acceptance of final	$75,000 One-time	Y	• Commonwealth review and approval

Milestone Number	Transition Milestone	Milestone Due Date	Acceptance Criteria	Milestone Credit	Earn Back	Dependency on Commonwealth
			CCPM as listed within Schedule L of this contract. This includes but is not limited to: o Incident (including Security) o Problem o Change o Order/Request o Billing o Service Level			
M-6	Network Connectivity	120 calendar days from Contract Effective Date	• Completion and Acceptance of the Network Connectivity to the Commonwealth	$250,000 One-time	N	• Commonwealth review, testing and approval
M-7	Security	180 calendar days from Contract Effective Date	• Completion and acceptance of security architecture, solution, policies and procedures which included but is not limited to: o Delivery and acceptance of the following Deliverables from Schedule K: ▪ D-07.01 ▪ D-07.06 ▪ D-01.03 (Initial Deliverable Approval) ▪ D-09.01 ▪ D-09.02 o Implement security management plan o Implement security and firewall plan o Policies and procedures are in place	$250,000 One-time	N	• Commonwealth review and approval

Milestone Number	Transition Milestone	Milestone Due Date	Acceptance Criteria	Milestone Credit	Earn Back	Dependency on Commonwealth
			for physical security o Policies and procedures are in place for data and network security o Policies and procedures are in place for personnel security, such as annual background checks o Security assessment is conducted to ensure data safety and confidentiality			
M-8	ITSM System Integration	180 calendar days from Contract Effective Date	• Completion and Acceptance of Integration between Commonwealth's ITSM system and Offeror's ITSM System including but is not limited to: o Incident connectivity has been tested and incidents created and updated on either side flow back and forth between systems o Problem connectivity has been tested and problems created and updated on either side flow back and forth between systems o Change requests connectivity has been tested and requests created and updated on either side flow back and forth between systems o Configuration items in both system CMDBs are reconciled o Test Invoices have been processed through the ITSM system to the Commonwealth's AP system o Reporting from Offeror's ITSM system is available to	$100,000 One-time	Y	• Commonwealth review and approval

Milestone Number	Transition Milestone	Milestone Due Date	Acceptance Criteria	Milestone Credit	Earn Back	Dependency on Commonwealth
			Commonwealth			
M-9	Financial Management	180 calendar days from Contract Effective Date	• Completion and acceptance of billing process and form of invoice approved • Schedule K Deliverable D-02.01 completed • Process implemented, tested and accepted providing an enterprise bill providing the details required by the Commonwealth	$75,000 One-time	Y	• Commonwealth review and approval
M-10	Operational Readiness	240 calendar days from Contract Effective Date	• Completion and acceptance of an Operational Readiness Report indicating Offeror is "Ready" to transition the Commonwealth's Applications and Services to other Datacenters. This report must include but is not limited to the following: o Delivery and acceptance of the following Deliverables from Schedule K: ▪ D-01.01 ▪ D-01.02 ▪ D-01.03 ▪ D-01.04 ▪ D-01.05 ▪ D-01.06 ▪ D-01.07 o Transition Project Office established and fully staffed o Program plan and architecture developed and approved by the Commonwealth	$150,000 One-time	N	• Commonwealth review and approval

Milestone Number	Transition Milestone	Milestone Due Date	Acceptance Criteria	Milestone Credit	Earn Back	Dependency on Commonwealth
			o Processes and Tools implemented to support the transition change control, schedule, quality, communications, risk and issue management o Datacenter environment configured , tested and acceptance			
M-11	SSAE 16 Audits of EDC	On the July 31st following the Commonwealth's acceptance of Milestone M-14	• Completion and Issuance of a SSAE-16 Audit Reports as detailed with the Appendix A (Terms and Conditions) on the Commonwealth's EDC Datacenter • Schedule K Deliverable D-08.02	$100,000 One-time	Y	• Commonwealth review and approval

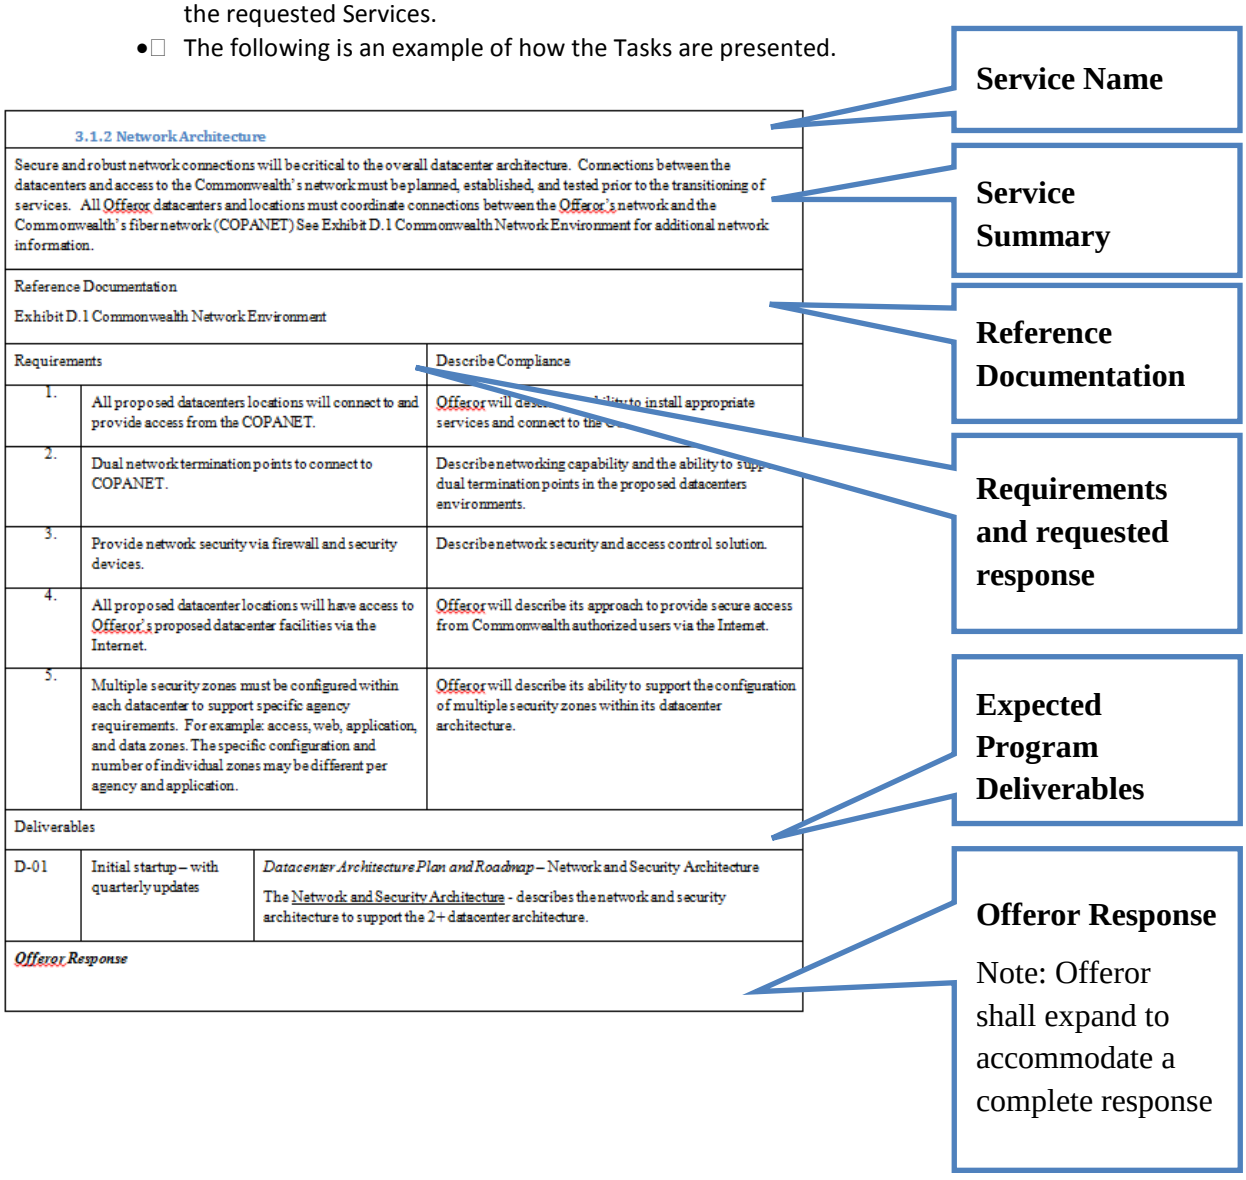
1 Offeror Guidelines

This Schedule contains the primary scope of Services required to support the Commonwealth's Enterprise Datacenter Services program. The Offeror must respond to the requirements contained in this Schedule according to the instructions provided below.

1.1 Offeror Instructions

- The Offeror's response to the RFP must reflect and comply with the information contained in this Schedule and any Referenced Schedules and Exhibits.
- The Offeror must provide responses to the section 3 Tasks. After reviewing each of the service requirement tables, the Offeror should provide its response. Responses must address the stated requirements as well the additional information on Offeror's approach and how it would deliver the requested Services.
- The following is an example of how the Tasks are presented.



3.1.2 Network Architecture

Secure and robust network connections will be critical to the overall datacenter architecture. Connections between the datacenters and access to the Commonwealth's network must be planned, established, and tested prior to the transitioning of services. All Offeror datacenters and locations must coordinate connections between the Offeror's network and the Commonwealth's fiber network (COPANET) See Exhibit D.1 Commonwealth Network Environment for additional network information.

Reference Documentation

Exhibit D.1 Commonwealth Network Environment

Requirements		Describe Compliance
1.	All proposed datacenters locations will connect to and provide access from the COPANET.	Offeror will desc… ability to install appropriate services and connect to the …
2.	Dual network termination points to connect to COPANET.	Describe networking capability and the ability to supp… dual termination points in the proposed datacenters environments.
3.	Provide network security via firewall and security devices.	Describe network security and access control solution.
4.	All proposed datacenter locations will have access to Offeror's proposed datacenter facilities via the Internet.	Offeror will describe its approach to provide secure access from Commonwealth authorized users via the Internet.
5.	Multiple security zones must be configured within each datacenter to support specific agency requirements. For example: access, web, application, and data zones. The specific configuration and number of individual zones may be different per agency and application.	Offeror will describe its ability to support the configuration of multiple security zones within its datacenter architecture.

Deliverables

D-01	Initial startup – with quarterly updates	*Datacenter Architecture Plan and Roadmap* – Network and Security Architecture The Network and Security Architecture - describes the network and security architecture to support the 2+ datacenter architecture.

Offeror Response

2 Program Objectives and Summary Solution Requirements

2.1 Program Objectives

The Commonwealth is seeking to implement a new datacenter service model that will provide various infrastructures/computing platforms to service the needs of the Commonwealth in a secure and flexible manner. This initiative will realize the following objectives:

- Provide a reliable, flexible, secure, and robust IT infrastructure to support the transformation of the Commonwealth into an information-focused organization.
- Provide a multiple datacenter architecture utilizing the Offeror's proposed datacenter assets that will support the current and future capacity and service level demands.
- Include primary support for the Commonwealth's Enterprise Datacenter (EDC) operations and its computing assets including but not limited to datacenter facilities operations and infrastructure support (see **Exhibits D.1 through D.7** EDC Exhibits for description of the facility, servers, storage and tape equipment).
- Leverage Offeror's established processes and tools necessary to ensure consistent and predictable pricing to facilitate accurate and timely budget projections.
- Provide engineering support that will anticipate changes in business and technical requirements and make recommendations for staying current with industry best practices.
- Ensure that the Offeror's datacenters adhere to the Commonwealth's contractual, regulatory, and policy compliance requirements for security, architecture, and systems development life cycle (SDLC) standards.
- Establish a tiered service/capability to support high-availability hosting, backup, and disaster recovery (DR) Services to maintain continuity of government operations.
- Provide multiple environments and instances to support the enterprise application portfolio. For example; Development, Integration, System / User Acceptance Test (SAT/UAT), Training, load Testing, Pre-Production and Production.
- Continue to consolidate Commonwealth datacenters to achieve cost savings, energy consumption reductions, optimal space utilization, and improvements in IT asset utilization in accordance with the government-wide datacenter consolidation initiative currently underway.

Currently, Commonwealth datacenter resources are decentralized, owned and operated under multiple datacenter service catalogs, processes and procedures. At times, this presents the Commonwealth with barriers to establishing interoperability between datacenters, implementing standard processes and procedures for datacenter oversight, and ensuring compliance with the same standards for datacenter operations. To resolve these issues, the Commonwealth intends, under this single procurement vehicle, to contract with a service provider that currently owns, maintains and operates a group of geographically dispersed world-class datacenters (meeting or exceeding Tier 3 standards) located in the continental United States.

To satisfy the Commonwealth diverse datacenter requirements, the Offeror must be capable of providing the necessary infrastructure for the following critical purposes:

- Provide production, development and hosting of new and legacy business applications and databases that run on mainframes (IBM and Unisys), mid-ranges and distributed platforms
- Support options for high-availability, backup/recovery, and multiple levels of DR Services in support of the Commonwealth.

The Offeror's datacenter architecture must consist of multiple geographically dispersed datacenters, referred below as a 2+ (two-plus) architecture. The Offeror must utilize the EDC as one of its datacenters and propose a minimum of one additional datacenter to meet the 2+ architecture requirement. It is the Offeror's option to utilize the EDC as one of its primary datacenters within its proposed solution. It is the Commonwealth's requirement that the Offeror datacenters will have the ability to provide multiple levels of DR Services in the event of a disaster, which must also include an option to support high availability (HA) application infrastructures.

The Offeror is responsible for ensuring successful delivery of IT infrastructure Services, providing the Commonwealth with visibility into (performance, capacity, security, SLA's etc.), as well as, working in partnership with the Commonwealth as required to ensure seamless operations. In turn, the Commonwealth's role will be to provide oversight to ensure that the Offeror is delivering agreed-upon Services and that the business requirements are clearly communicated and satisfied, and provide timely feedback on contractor performance. Commonwealth agencies, OA/OIT and the Offeror will work together on IT planning, including service and capacity planning, strategic and tactical planning, and IT resource and budget planning. The Commonwealth believes that this combination of industry knowledge, government oversight, and collaboration will result in successful partnership between the private sector and the Commonwealth.

The datacenter approach must provide a computing infrastructure that delivers reliable, effective and technologically current Services seamlessly to the Commonwealth in a cost-effective manner. The cost for those Services must remain less than the cost the Commonwealth would have incurred for providing the same infrastructure itself. Applications hosted in the Offeror's datacenters must meet Quality of Service (QoS) requirements as determined by the Commonwealth agency application owners. The Commonwealth will avoid capital expenditure by acquiring Services through Capacity on Demand. The Commonwealth agencies will consume resources as a service and pay only for those resources that it uses. The Commonwealth and Offeror must engage in proactive oversight of datacenter operations. The Commonwealth requires visibility into the Offeror's management practices and effective monitoring channels that include the following:

- Program and project progress reports that track milestones, deliverables, risks, and financial data.

- Commonwealth Computing Procedures Manual (CCPM) that provides up-to-date detailed description of all processes and procedures used to support the computing needs of the Commonwealth via the Offeror's Knowledge/Service Management Portal (KMP). The CCPM must contain specific sections dedicated to the operational procedures for each Commonwealth datacenter customer.
- Scheduling and tracking of ticket-based tasks and incidents.
- Operations dashboards with status and alerts based on real-time and historic data collected by instruments, agents, scanners, and logs that monitor the hosted applications, batch operations, network, security, and service performance measures.
- Other configuration, monitoring and management status reports as needed.
- Recommendations and offerings by the Offeror for improved processes and procedures for delivery of Services that are based on a program of continuous quality and process improvement as implemented by the Offeror.

2.2 Service Level Agreements

The Commonwealth has proposed a baseline set of Service Levels which the Offeror is required to consider when developing its proposed solution. The Offeror is expected to provide multiple service tiers and associated service levels within each service offered. The Offeror is also required to have or implement a quality and process improvement program that focuses not on just meeting minimum requirements but on meeting or exceeding the target requirements.

2.3 Target Solution Requirements Overview

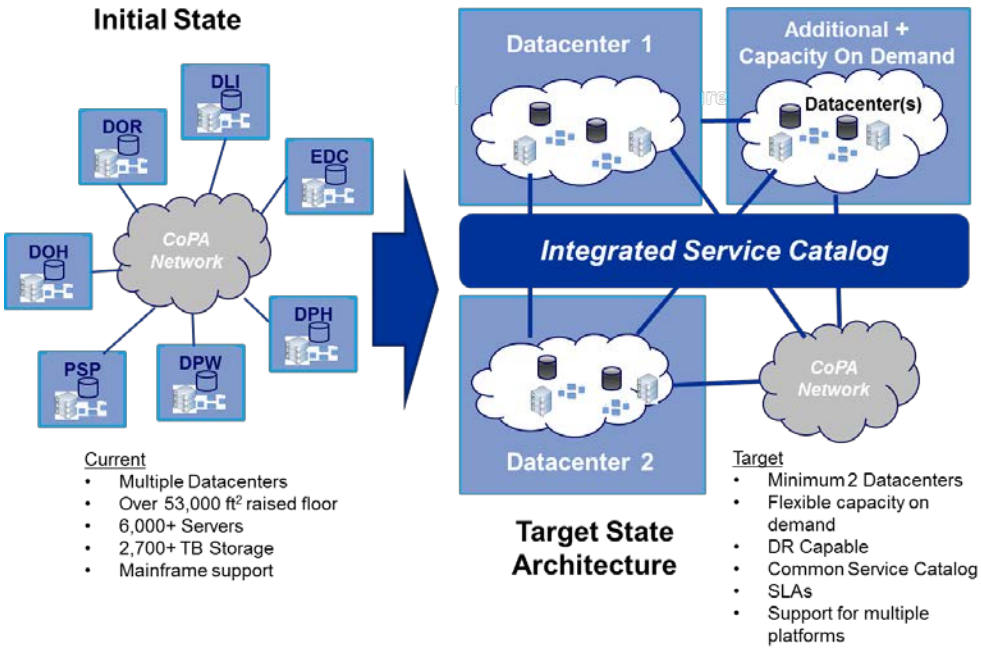
A key outcome of the Commonwealth datacenter strategy is to transition from the current individually managed datacenters with different levels of service to enterprise level datacenter architecture with a common set of basic Services combined with available specialized Services dependent upon specific customer requirements. To facilitate this request for Services, the Commonwealth has structured the solution requirements into three areas, as follows:

- Transition Services;
- Target Datacenter 2+ Architecture (includes operations support for the Commonwealth's EDC); and
- Common Services Portfolio

2.3.1 Target Datacenter 2+ Architecture

The target architecture must leverage a minimum of two geographically separated datacenters located in the continental United States that would allow for enhanced disaster recovery capabilities as well as leverage excess capacity (virtual capacity on demand). The Commonwealth requires that the architecture include operations support for the EDC. The Offeror must explain how it can leverage additional capacity from other datacenter resources within its provider network to satisfy the needs of the Commonwealth. The architecture will include support for multiple computing platforms including but not limited to x86 (physical and

virtual), midrange, mainframes, and storage systems. All of the Commonwealth computing workloads must be transitioned from the current state to the new target state architecture.



The 2+ datacenter architecture must include secure redundant network connections to the Commonwealth's network and the Internet. Offeror network connections must terminate at different end points within the Commonwealth's network. The Offeror is expected to implement a multi DR solution to limit the impact of any disruptive event at any datacenter location. This requirement is targeted for all systems that are currently covered by a DR solution. The solution must also have the capability to support future disaster recovery requirements by providing tiered DR capability within its datacenters.

Each datacenter must have the ability to support multiple security and network zones to support specific agency requirements. For example: access, web, application, and data zones. The specific configuration and number of individual zones may be different per agency and application.

To support the potential of future demand and Services beyond the capacity of the two datacenters, the Offeror must explain how it can leverage additional capacity from other datacenter resources within its provider network.

2.3.2 IP conversion strategy

The Offeror shall provide an IPv6 strategy which includes an enterprise migration plan to take the Commonwealth from the IPv4 address format to the IPv6 format.

The Offeror shall provide an infrastructure and equipment that supports IPv6 andIPv4, except were limited due to the requirement that the Initial transition approach of the Commonwealth's mainframe and SAP environments must be as close to the Commonwealth's current

configuration as possible. As technology refreshes replace this equipment, the infrastructure and equipment shall support IPv6 andIPv4

2.3.3 Common Services Portfolio

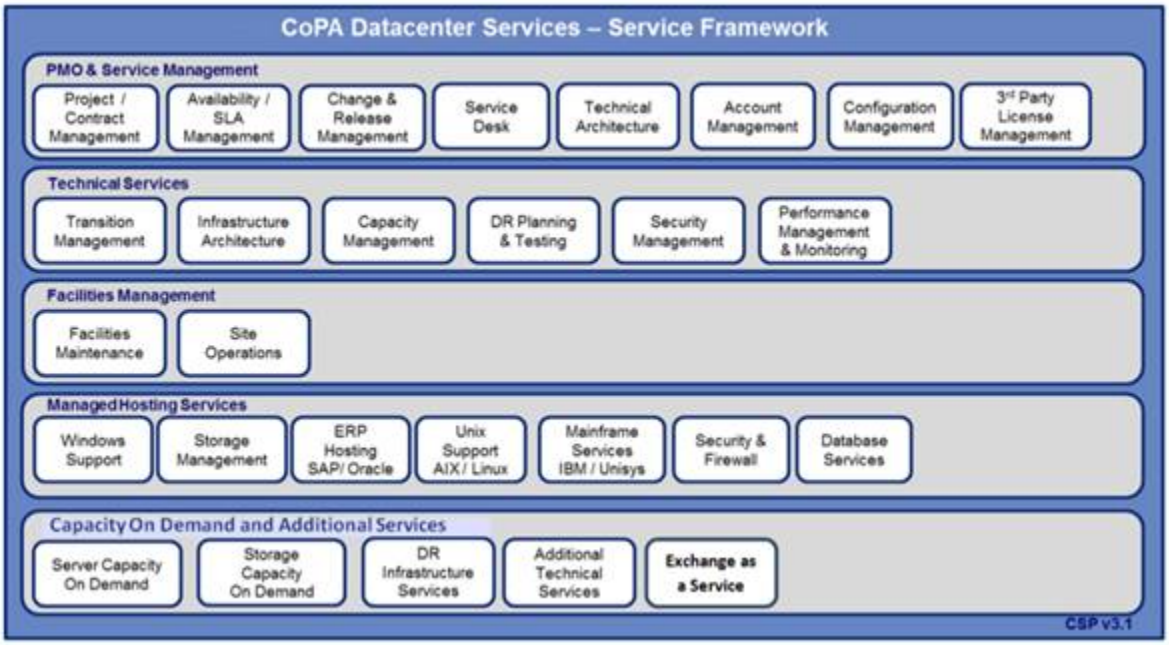
Based on the review of current and future requirements as well as industry offered Services; the following five (5) Key Services Areas will be used as a framework for the new datacenter common portfolio of Services.

Key Service Area Framework

	Key Service Area	Service Overview
1	Program Management Office (PMO) & Service Management	Provides for overall project management and operational service management (e.g. PMO, Account, Availability, Service Level Agreement (SLA))
2	Technical Services	Technical support services resources (e.g. Transition Management, Infrastructure Architecture, Capacity Planning)
3	Facilities Management	Facility operational support services (e.g. Facility Management, Operations Support)
4	Managed Hosting Services	Managed hosting/platform services for existing and future applications (e.g. Windows, Unix, SAP Hosting, Mainframe)
5	Capacity on Demand and Additional Services	Provides for additional capacity on demand offerings to support disaster recovery or increased demand for server and storage infrastructure (e.g. Cloud-centric offerings, Infrastructure as a Service (IaaS), Platform as a Service (PaaS)). Also access to additional skilled technology resources if required.

The Offeror is required to provide a complete set of Services within these service areas. The anticipated target Services are presented below and the requirements are further detailed in the Task section that follows.

Expanded Services Framework



2.3.4 Data Protection

The Offerors solution shall provide security of Commonwealth data. Offerors shall describe how they will ensure that all data (at rest and in transit) is kept secure and confidential. If Offerors proposed solution involves data residing or routing outside the continental United States; the Offeror shall disclose this in their proposal and describe how the data will be kept secure, confidential, and meet the security requirements as described in this RFP.

Offeror shall provide data protection Services including Data Loss Prevention (DLP) and Database Firewall (DBFW) Services to identify, monitor and protect sensitive and confidential Citizen Personal Identifiable Information (PII) in use, data in transit, and data at rest through deep content inspection and analysis of information exchange both at data storage locations and administrative/access endpoints.

Reference Documentation

Requirements	Describe Compliance

1.	DLP • Discover confidential data wherever it is stored, inventory sensitive data, and automatically manage data cleanup. • Monitor confidential data usage and provide enterprise visibility. • Enforce security policies to proactively secure data and prevent confidential data from leaving Commonwealth systems. • Manage policies across the enterprise, remediate and report on incidents, and detect content from centralized management platform.	Offeror must describe their approach to discover, manage, monitor, and enforce security for confidential data to meet Data Loss Prevention requirements.
2.	DBFW • Alert or block database attacks and abnormal access requests, in real time to protect against database attacks including SQL injection, Buffer overflow, Denial of Service. • Detect and patch database software vulnerabilities • Provide both agent based and network based database activity monitoring. • Audit all access to sensitive data by privileged and application users, and enforce corporate policies on data usage • Provide centralized management and advanced analytics • Discover new databases and database objects in scope for security and compliance projects and automatically apply appropriate protection and audit policies	Offeror must describe their approach to alert, detect, audit, monitor, manage, and discover attacks to meet Database Firewall requirements.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

2.3.5 Transition Services

Transition to the new baseline datacenter architecture and common Services portfolio must be carefully planned and executed. The Offeror is required to provide a proven methodology and plan to establish the target environment and then conduct an orderly transition of existing infrastructure and Services to the new environment.

The Offeror must transition Services from the incumbent contractor where there is an incumbent contractor, as well as, transitioning Services located at the Commonwealth managed datacenters. The Offeror must identify critical success factors and risk mitigation strategies, and describe how it will coordinate and manage other Commonwealth contractor related activities impacting the Offeror's plan. The Offeror must provide an estimate of any required Commonwealth resources, including the skills needed and the duration required for each of the resources required in order for the Offeror to implement its solution. The Commonwealth expects to provide limited resources.

The Offeror must thoroughly plan, evaluate and propose comprehensive and realistic activities and timeframes for accomplishment of transition activities given identified parameters within the Commonwealth's requirements as described in Schedule K - Key Program Deliverables and Schedule D - Transition Milestones.

3 Tasks

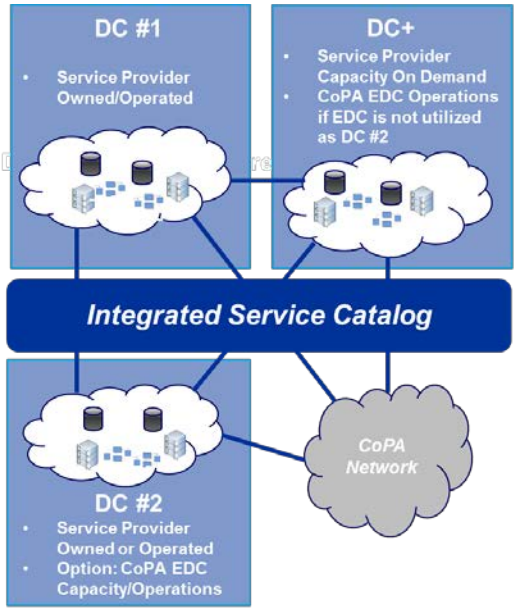
The Commonwealth has provided detailed information on the current environment for computing (mainframe, mid-range, x86, etc.), data storage, data backup (tape and other) and other datacenter related equipment in the referenced Exhibits. The Offeror shall utilize this information as the baseline requirement (in terms of Services, quantities and bandwidth) for developing its proposal.

3.1 Establish Datacenter Architecture

The Offeror must provide a multi-datacenter, multi-platform solution that will support the migration of all of the Commonwealth's current workloads. In order to support future Services, the Offeror must develop a proposal which will lead the Commonwealth into the future, and be able to address all current and future datacenter requirements. The Offeror must propose cost-effective, efficient, and forward-looking technologies for integrating Services and incorporate these technologies into its proposal. The Offeror must also address how it will allow for service updates and new technology offerings. The Offeror must describe how it will perform sizing exercises for different infrastructure to ensure the Commonwealth is getting a minimum of "like for like" or increased computing capabilities.

Baseline Architecture

In an effort to simplify the administration of IT assets, reduce IT costs, improve the provisioning of IT Services, and, in general improve the quality of IT Operations, the Commonwealth has established a preferred datacenter baseline target state architecture.



Baseline Datacenter Architecture

- Minimum 2 Datacenters
- Manage the CoPA EDC within architecture
- Flexible capacity on demand
- Redundant Secure Network Links between Datacenters and CoPA Network
- DR Capable
- Common Service Catalog
- SLAs
- Support for multiple platforms

The datacenter baseline target state architecture is based on a shared Services model in which a minimum of two geographically-separate datacenters (includes operations support for the EDC) provide a wide range of common IT Services to the Commonwealth. While not necessarily mirror images of each other, each datacenter must be capable of supporting critical Commonwealth processing in the event the other datacenter goes offline (as, for example, in the event of a datacenter disaster). To address the need for additional capacity and new Services over time the Offeror may propose additional capacity beyond the two datacenters with secure connections to other Offeror capacity.

Initially, this target datacenter combination would host the Commonwealth's existing collection of shared information systems and currently outsourced Services. Over a prescribed period of time, the new datacenter architecture must support the transition of additional IT workloads presently being processed at a variety of datacenters owned and operated by Commonwealth agencies, thus permitting these datacenters to be decommissioned.

3.1.1 Multi Datacenter Environment (2+ Architecture)

The Offeror must provide a multi datacenter environment. All datacenters will be managed and maintained by the Offeror, including the Commonwealth's EDC and may be either a standalone facility, or integrated into existing qualified facilities. The multi datacenter environment is to facilitate high availability, capacity on demand, and the recovery of applications and Services that are deemed critical to the Commonwealth. The multi datacenter requirement is to provide a minimum of two datacenters. The Offeror may propose additional capacity and Services utilizing additional facilities beyond the two required datacenters.

Reference Documentation

Schedule E – Datacenter Locations

Exhibit A - Commonwealth Network Environment

Exhibit(s) D.1 through D.15 – Enterprise Datacenter (EDC) Exhibits

	Requirements	Describe Compliance
1.	The Offeror's datacenter architecture must consist of multiple geographically disbursed datacenters. Any datacenters being used in a back-up function must be at least 50 miles apart from the associated primary location for the service.	Offeror must describe the process of establishing a multi datacenter environment, including facility management, resource sharing, operational coordination, and inter-datacenter communications. Provide proposed datacenter architecture and locations. Using **Schedule E – Datacenter locations**, the Offeror must list the address of all proposed Datacenter locations that will host the Commonwealth's applications and data.
2.	Tier III equivalent datacenter facilities proposed by the Offeror must have had consistent availability of 99.99% in the past six months as of December 31, 2011.	Offeror must provide current availability reports of its proposed datacenter(s) with its submittal.
3.	The EDC assets will be managed and maintained by the Offeror. The current maintenance contract for the EDC servers is scheduled to expire on June 30, 2014.	Offeror must describe its approach to transition operations and management of the EDC infrastructure from the Commonwealth to the Offeror's support Services and how it intend to address the server maintenance expiration issue.

4.	Each datacenters will have the capability to provide DR for the other, for identified critical applications.	Offeror must describe the process of providing DR for critical applications from one datacenter to the other. Also, describe additional DR Services if included in the overall proposed offering.
5.	Datacenter sustainability.	Offeror must describe its methods of achieving datacenter sustainability, such as realizing a low Power Usage Effectiveness (PUE) ratio.
6.	Robust physical security, including biometric access control, video surveillance, and routine security officer patrols.	Offeror must describe its security methods and techniques that will be used to protect Commonwealth computing assets and ensure compliance with Commonwealth security requirements.
7.	In a datacenter environment that hosts both Commonwealth and non-Commonwealth clients, segregation of Commonwealth data, and computing resources from other clients' data and computing resources. The Offeror is required to provide system and data segregation between different agency application environments. Note: The Offeror may not use the EDC to provide services to Non-Commonwealth clients. The Commonwealth may permit the Offeror to provide services to COSTARS members if written permission is granted by the Commonwealth.	Offeror must describe its approach to provide Services in the event a datacenter will be shared with a non-Commonwealth client, describe how segregation of resources will be achieved and maintained. Offeror must describe how systems and data segregation can be maintained between different agency application infrastructure environments.
8.	Elastic datacenter infrastructures to accommodate variable workloads.	Offeror must describe its computing and networking capabilities that will accommodate the growth or contraction of workloads.

9.	24/7/365 staffing.	Offeror must describe the staffing model used to provide 24/7/365 staffing. Operations staff, technical support staff, security staff, and management. Offeror must address how it plan to manage security/background checks, monitoring and reporting on employees and how it will coordinate those requirements with Criminal Justice agencies.
10.	Common work and meeting space.	Offeror must describe its capabilities to accommodate meeting and workspace for Commonwealth and Offeror IT staff and management.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.1.2 Network and Security Architecture

Secure and robust network connections are critical to the overall datacenter architecture. Connections between the datacenters and access to the Commonwealth's network must be planned, established, and tested prior to the transitioning of Services. All Offeror datacenters and locations must coordinate connections between the Offeror's network and the Commonwealth's fiber network (COPANET).

Reference Documentation

Exhibit A - Commonwealth Network Environment

Exhibit P – Enterprise Internet Bandwidth Utilization

Requirements		Describe Compliance
1.	All proposed datacenter locations will connect to and provide access from COPANET.	Offeror must describe its approach to connect to COPANET.

2.	Dual network termination points to connect to COPANET.	Offeror must describe its networking capability and the ability to support dual termination points in the proposed datacenters environments.
3.	Provide network security via firewall and security devices.	Offeror must describe its network security and access control solution.
4.	All proposed Offeror's datacenter facilities will have secure Internet access capabilities. Internet access must provide virus and intrusion protection systems with reporting capabilities.	Offeror must describe its approach to providing secure access from Commonwealth authorized users via the Internet. The Offeror must describe its approach to providing virus and intrusion protection and reporting.
5.	Multiple security zones must be configured within each datacenter to support specific agency requirements. For example: access, web, application, and data zones. The specific configuration and number of individual zones may be different per agency and application.	Offeror must describe its ability to support the configuration of multiple security zones within its datacenter architecture.
6.	Secure connections are required for traffic that may traverse between Datacenters and between Datacenters and Commonwealth. Encryption shall be a minimum of 128-bit and must be FIPS 140-2 certified to meet Criminal Justice Information Services (CJIS) requirements. (Refer to Pennsylvania State Police (PSP) Summary of CJIS Requirements and CJIS Security Policy.)	Offeror must describe its ability to provide secure network connectivity that meets the standards outlined in the requirement.

7.	Remote access to datacenters supporting CJIS systems must meet minimum security requirements identified in CJIS Security Policy. These requirements include but are not limited to identifying remote user's identity, IP address and connection must be FIPS 140-2 certified with a minimum of 128-bit encryption.	Offeror must describe its ability to comply with the security policies described in this requirement,

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.1.3 Datacenter Architecture and Technology

The Offeror must evaluate the Commonwealth computing infrastructure(s) and develop and implement an IT architecture that will support all current systems and applications, utilizing existing and/or underutilized technologies where appropriate, to provide a high level of quality computing Services to the Commonwealth, in a cost effective manner. An overall review of all Commonwealth computing Services is required, as the requirement is to consolidate all Commonwealth based computing Services into the Offeror's datacenter architecture. This architecture design is to include the current DR programs and structure and will be implemented along with the production and testing environments.

The Offeror must provide a multi-platform solution that will support the migration of all of the Commonwealth's current workloads. The Offeror must address in its design how it will create a target environment that will minimize application latency concerns.

The Offeror must also develop a proposed infrastructure environment, which will lead the Commonwealth into the future, and be able to address all current and future datacenter requirements.

Schedule J.1 - Datacenter Service Level Management

Exhibit(s) M.1 through M.7 - Department of Corrections (DOC) and Pennsylvania Board of Probation and Parole (PBPP) Exhibits

Exhibit(s) N.1 through N.2 - PennDOT Exhibits

Requirements		Describe Compliance
1.	Develop the architecture and define the technology that will be used in the target datacenter environment to support the Commonwealth computing systems.	Offeror must describe the overall architecture and technologies that will be required to run the computing requirements for the Commonwealth.
2.	Provide all technical system support and reporting including: • Multi-Platform Systems Support • Multi-Tiered Storage Management • Network Management • Security Management • Capacity planning • Performance analysis and tuning • Technology Refresh/Life Cycle Management • Annual Audits and Certifications	Offeror must describe overall strategy to provide these Services for each component of its supporting architecture.

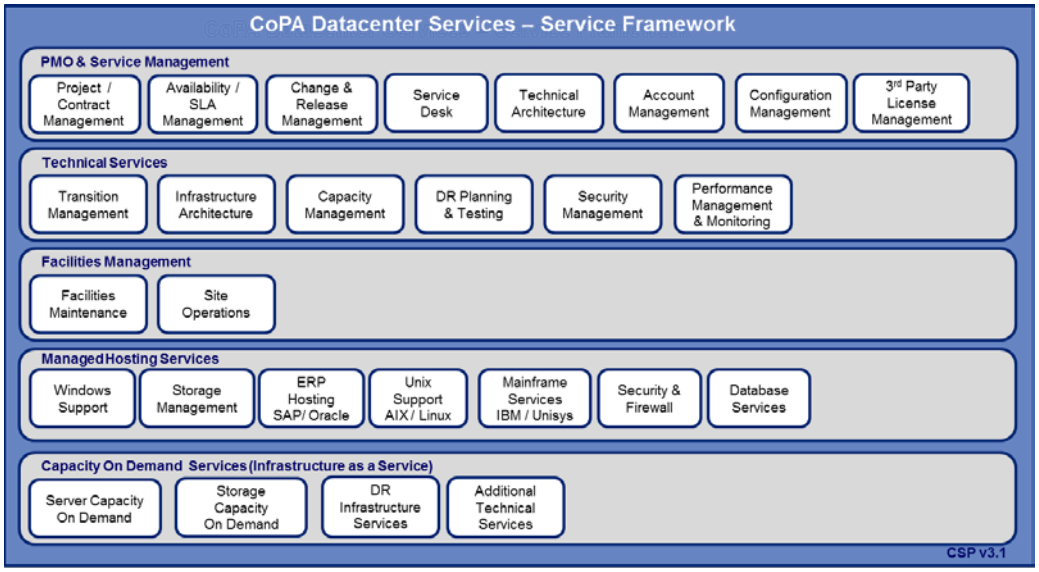
3.	Provide a storage management approach which meets the Commonwealth's needs. The storage management approach shall include, but not be limited to, the following: • **Basic** – based on Pay-As-You-Go allocation model with no upfront resource allocation and resources are reserved on demand per workload. (shared, multitenant) • **Committed** – based on Allocation Pool allocation model which gives a minimal initial commitment of resources plus the ability to burst above that minimum if additional capacity is needed – usually a percentage of resources reserved for agency with over-allocation. (shared, multitenant) • **Dedicated** – based on Reservation Pool allocation model – 100% of resources are reservation–guaranteed. (dedicated, single tenant)	Offeror must describe overall strategy to provide these Services for storage management.
4.	Provide real-time monitoring and monthly reporting of system availability, performance, utilization, and efficiency.	Offeror must describe its overall strategy to provide real-time scheduled system performance, operations, monitoring and capacity reporting for the entire datacenter architecture. Offeror must describe its strategy to support or provide real-time system and/or application monitoring

5.	Disaster Recovery - Design a tiered DR solution to ensure that applications and associated hardware that currently have an active DR plan will continue to have offsite Services available in the event of a primary system outage. The tiered DR solution must include an option to support high availability (HA) architectures. Include tiered DR solution in the overall datacenter architecture design.	Offeror must describe its tiered approach to supporting the Disaster Recovery needs of the Commonwealth.
6.	Configuration Item Reconciliation The Offeror must perform an initial asset review of the targeted inventory for all datacenter configuration items (CI) that will be managed. The Offeror must reconcile and validate that appropriate relationships exist for all datacenter configuration information in the Configuration Management Database (CMDB) system. Offeror must ensure that CIs are properly mapped in order to support the established Service Level Agreements (SLAs). The Offeror will be required to provide an automated interface between its CMDB and the Commonwealth's CMDB.	Offeror must describe its approach to gathering this configuration information.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2 Enable Common Service Portfolio

The Commonwealth currently bases its service management practices on the Information Technology Infrastructure Library (ITIL) v3, a worldwide recognized best-practice framework for the management and delivery of IT Services throughout their full life cycle. Accordingly, the Commonwealth requires that the Offeror's service management practices be based on the ITIL v3 framework and guidance. The Datacenter Architecture, which conforms to a service-oriented structure, is prescribed by the Commonwealth common service framework. The common service framework is comprised of 27 discrete IT Services divided into five (5) categories of service:

- **PMO & Service Management** – This category of service defines the overall datacenter management structure, including interactions with the Commonwealth and business partners.
- **Technical Services** – This category of service defines the datacenter architecture, and prescribes standards for datacenter continuity and security. This level also defines the workload transition process, for when Commonwealth Agencies migrate applications to the new datacenter computing Services model.
- **Facilities Management** – This category of service defines day-to-day datacenter operations and maintenance.
- **Managed Hosting Services** – This category of service defines a set of Commonwealth enterprise datacenter managed Services, each designed to accommodate the specific needs of the Commonwealth.
- **Capacity On Demand and Additional Services** – This category of service defines a set of infrastructure as a service (IaaS) offerings, each designed to provide just-in-time resources to the Commonwealth.



3.2.1 Program & Service Management

3.2.1.1 PMO & Contract Management

The PMO & Contract Management service is responsible for the overall program, projects, and contract elements, and will maintain an active working relationship with the Commonwealth project team. Offeror must assign an executive management team that will drive the processes to complete the due diligence required to make informed decisions and Services offerings that will meet the needs and requests of the Commonwealth. This executive team will also provide ongoing direction and leadership supporting the contract and designated Services, for the duration of the Contract.

The Offeror is required to provide and maintain operational, technical, and management staff contacts so that it is clear to the Commonwealth whom is the most direct contact for each operational area.

Reference Documentation

Schedule H - CCPM Commonwealth Computing Procedures Manual

Requirements		Describe Compliance
1.	Establish and maintain a program and project management framework, throughout the term of the contract.	Offeror must describe its proposed program and project management framework that will be used to support this contract.
2.	Establish and maintain a protocol for project estimation: ▪ Scope ▪ Hardware / Software ▪ Manpower to develop, test and implement ▪ All other resources required	Offeror must describe a project estimation protocol suitable for Commonwealth data-center migration projects.

3.	Collaboration meetings, technical exchanges, and forums – Through established procedures and meetings address in good faith all issues, needs, technical exchanges and forums with the Commonwealth team. Provide the technical knowledge, and knowledgeable staff, to effectively support and guide the Commonwealth's technology needs.	Offeror must describe how it will accomplish this.
4.	Translate the Datacenter contract requirements into measurable service level objectives, and codify those requirements by creating a set of service level agreements.	Offeror must provide examples of actual datacenter service level agreements, appropriately redacted to preserve client anonymity.
5.	Establish interim contract management procedures during the transition of datacenter Services. All interim contract management procedures must be negotiated in good faith and approved by both parties.	Offeror must describe an interim procedure to monitor and manage service delivery (conforming to Commonwealth policies and procedures) including but not limited to the following; Problem Management, Change Management, Service Level monitoring and reporting, physical and logical security, project management, etc. while the service is transitioned from the Commonwealth to the Offeror.
6.	Establish and maintain a process for change management for the Datacenter contract as requested or required. The final process developed must be coordinated with the Commonwealth contract compliance group and mutually agreed to by both parties.	Offeror must describe its proposed contract change management process.

7.	Subcontractor Relationship Management - Establish and enforce standards for ensuring subcontractor performance. The Offeror is responsible for all Services provided by subcontractors.	Offeror must describe its subcontractor relationship management process.
8.	Offeror must have experience in managing and supporting Managed Service Solutions for Datacenter Infrastructure Services.	Offeror must document its qualifications within its proposal.
9.	Offeror must have the capability to provide mainframe (IBM & Unisys) Services to support the current and future needs of the Commonwealth.	Offeror must document its qualifications within its proposal.
10.	Offeror must have experience managing and supporting SAP/Oracle ERP environments.	Offeror must document its qualifications within its proposal.
11.	Offeror must be an established firm which has provided hosted datacenter Services for a period exceeding three years	Offeror must document its qualifications within its proposal.
12.	Offeror must currently operate at least 3 Datacenters. Each of those datacenters have to have been operational for at least one (1) year and have a minimum five (5) clients hosted at each.	Offeror must document its qualifications within its proposal.

13.	Offeror must have experience handling comprehensive on-site operations and maintenance of Datacenter Physical Infrastructure Services. The Services must have been provided for a continuous period of at least one year during the last three years ending 2011. The Services may not have been terminated before completion of the relevant contract.	Offeror must document its qualifications within its proposal.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.1.1.1 Financial Management

The Offeror must provide financial management for Services to provide accurate and cost effective stewardship of IT assets and resources. Financial management will be used to plan, control, and recover costs expended in providing the Services. Overall, the goal of financial management is to offer a truly transparent analysis of the Commonwealth spending on Services. In many cases, this analysis of efficiency will be used to create intelligent, metric-based cost-reduction strategies.

Clear and transparent invoicing, both for the Commonwealth and for individual agencies, will be required to insure integrity and accountability of all invoices. It is expected that invoicing may vary somewhat on a monthly basis whenever Services are either increased or decreased.

The Offeror is expected to work with the Commonwealth to identify major investments as part of the budgetary planning process. The Commonwealth will review strategic and tactical objectives as indicated in the planning process to measure impact on its budget(s).

A significant percentage of the Commonwealth's funding comes from federal sources. Offeror's must be able to provide detailed service information necessary to ensure the uninterrupted flow of federal funds.

On a monthly basis, the Offeror must present the Commonwealth with a single enterprise invoice and multiple agency invoices for chargeback purposes. The agency's invoices must include sufficient detail to validate and accurately allocate charges to funding sources based on actual usage.

The Offeror is required to capture and provide information related to monthly volumes of work, counts, and utilization of specific infrastructure areas. The Offeror and the Commonwealth will develop a set of detailed, equitable and repeatable chargeback procedures for each provided Service based on either actual monthly utilization or allocation methods depending on which is most appropriate. The chargeback procedures will include the ability to map to discrete programs and funding sources identified by agencies with this requirement.

The Offeror must integrate its Financial Management tool with the Commonwealth's Enterprise ITSM system which currently is BMC Remedy Billing module and processes; which may change during the term of the resulting contract. The Offeror must leverage any current chargeback procedures and implementation configuration to accelerate the implementation of the new system. The Offeror must expand the chargeback system to capture all related computing related charges associated with the Datacenter project.

Reference Documentation

N/A

	Requirements	Describe Compliance
1.	Provide a uniform rate structure which charges the same rates for the same/similar Services.	Offeror must provide detailed descriptions on the type of Services included in its overall solution. Cost information must not be provided in the technical submittal.
2.	Monthly invoicing for Services will be provided to the Commonwealth. Invoicing will identify Services rendered, pricing, and agency specific service usage. Transparency in billing will identify service cost per agency. The Commonwealth does not have a common system for charge backs. Some current services are not charged back, and some are done manually. The selected Offeror must connect to the Commonwealth's ITSM system. The Commonwealth does not require a full charge back system. The agency invoices should provide billing detail so the agency has full transparency into the services it consumed. Billing details shall include all services procured by agency general ledger (GL) code. A service may be allocated across multiple GL codes. Identify method for adjusting agency level billing due to failing to meet SLAs.	Offeror must describe its process or policies that will address this requirement. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.

3.	Flexible pricing will be applied when Services are either increased or decreased.	Offeror must describe its process or policies that will address the flexible pricing requirements. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.
4.	Interim Financial Management Procedures will be required as the Commonwealth transitions its current architecture to the Offeror's Services.	Offeror must describe its approach and procedure(s) for providing invoices, invoice verification and charge back to datacenter customers including but not limited to the following; service components, asset management, asset transfer, forecasting, etc.
5.	During the term of the Contract, provide cost effective approaches and suggestions to improve Services while maintaining or lowering the cost for Services. For example as the industry costs for server and storage capacity are reduced over time, it is expected that there will be a continual cost reduction in like Services within this contract.	Offeror must describe its process or policies that will address this requirement. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.
6.	Integrate Financial Management with other service management processes, especially with SLA, Capacity and Configuration Management.	Offeror must describe how it will accomplish this.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.1.1.2 Governance & Policy Compliance

Major IT decisions related to this Contract will be reviewed and approved according to the Commonwealth's governance policy. These decisions are critical to the success of the Commonwealth. IT governance addresses compliance initiatives, and satisfies the need for greater accountability for decision-making.

Reference Documentation

Schedule B - Governance

	Requirements	Describe Compliance
1.	Major IT decisions will be made under the guidance of the Commonwealth governance organization.	Offeror must describe its overall compliance policy and enforcement measures. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.
2.	Design and architecture decisions will be made with a high level of integrity and advance the interests of the Commonwealth. All designs must be approved by the Commonwealth.	Offeror must describe the overall design and architecture methodology. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.
3.	All policies and procedures will be executed in a consistent manner to ensure the Services are completed as planned and consistent with specifications. Audits will be conducted on a yearly basis to verify and report on compliance with policies and procedures.	Offeror must describe its compliance and audit policy and enforcement measures. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.1.1.3 Subcontractor Management

The Offeror may provide some of its Services and offerings via subcontractors. The Offeror must be the prime provider of Commonwealth Services, and is responsible to contract with subcontractors, manage its subcontractors, and for Offeror's performance and the performance of its subcontractors throughout the term of the Contract.

Reference Documentation

N/A

	Requirements	Describe Compliance
1.	Obtain, manage, and be responsible for all Services or offerings provided by subcontractors. Subcontractors may change over the course of this contract. Offeror is required to notify the Commonwealth of the new subcontractor(s) and assure the Commonwealth that there will not be a conflict of interest, and that the new subcontractor meets or exceeds the qualifications of the replaced subcontractor. The Commonwealth must approve all subcontractors.	Offeror must describe / list all subcontractors that it will be utilize for this project. Describe process or policies that will address this requirement. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.
2.	CJIS Security Policy requires fingerprint based background checks and executing a Management Control Agreement (MCA) and Security Addendum with the Pennsylvania State Police (additional information is provided in the PSP exhibit material).	Offeror must describe its process or policies that will address this requirement.

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.1.1.4 Business Partners Management

The Commonwealth has business partners such as banks and insurance companies that require connections to its hosted systems and applications. The Offeror must coordinate with the Commonwealth to support any Commonwealth – Business Partner agreements that require a committed connection to its hosted systems.

Reference Documentation

N/A

	Requirements	Describe Compliance
1.	The Offeror must provide coordination and support of Commonwealth – Business Partner agreements that require connections and Services to the Offeror's datacenter Services to ensure that any committed connections and service levels are maintained.	Offeror must describe its process or policies that will address this requirement.

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.1.1.5 Additional Planning Services

The Commonwealth may use different/additional methods for requesting technical information and support. Depending on the type of request those methods could include but not be limited to:

- Statement of Objectives (SOO)
- Work Order
- Service Request
- Request for Technical Analysis
  - Cost-Benefit Analysis
  - Conceptualization
  - High Level Estimate (HLE)
  - Technical Opinion(s)

Reference Documentation

N/A

Requirements		Describe Compliance
1.	Statement of Objectives - Perform requested additional Services across various functional areas, where the work requires funding either because of materials needed or because the activity requested is not part of the base contract.	Offeror must describe its ability and timeframes to support these additional service requests.
2.	Work Orders - Perform work across various functional areas, where the work is considered part of the base contract and where no additional funding is required.	Offeror must describe its ability and timeframes to support these additional service requests.
3.	A Service Request will be used to request work within one functional area, where the work is considered part of the base contract and where no additional funding is required.	Offeror must describe its ability and timeframes to support these additional service requests.
4.	Requests for Technical Analysis will be used to seek information regarding	Offeror must describe its ability and timeframes to support these additional

	potential technical solutions. The documents generated by the Offeror must provide the Commonwealth with direction regarding a specific technology and possibly the estimated cost to implement the solution. Four types of requests for technical analysis may be made by the Commonwealth. These requests are described below: • Cost-Benefit Analysis - A cost-benefit analysis is requested when the Commonwealth wants to know not only the implementation cost of a solution, but also the cost-benefit ratio for Commonwealth implementation of the solution. It may be used to analyze a single solution against the status quo, or compare the relative costs of multiple solutions. • Conceptualization - A conceptualization is requested when the Commonwealth has an objective, but is unsure about the possible technical means of fulfilling it. The Offeror must examine multiple paths for achieving the objective, and provide the technical benefits and consequences of the possible solutions presented. Costs are not considered in a conceptualization. • High Level Estimate (HLE or sometimes referred to as a rough order of magnitude ROM) - A HLE is requested when the Commonwealth has a clear technical direction and needs	service requests.

	rough estimates on the cost of implementing it. HLEs may be used to attach a cost estimate to a prior conceptualization or technical opinion produced by the Offeror. • Technical Opinion(s) - A technical opinion is requested when the Commonwealth has a specific technology or set of technologies it wants the Offeror to analyze for both technical merits and suitability for deployment in the Commonwealth environment. While product and operational costs provided in Offeror's literature may be considered in a technical opinion, the Offeror's deployment and operational costs will not be calculated or presented.	

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.1.1.6 Continual Service Improvement

The purpose of the Continual Service Improvement is to reduce risk, improve service quality, improve client satisfaction, and ensure service transparency through a continuous cycle of evaluation and improvement.

Reference Documentation

N/A

	Requirements	Describe Compliance
1.	Reduce service risks.	Related to the project management and contract management role, Offeror must describe its methods for eliminating or mitigating service risks.
2.	Improve service quality.	Offeror must describe its methods for addressing continuous service improvement processes.
3.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
4.	Ensure service transparency.	Offeror must describe its methods for ensuring service transparency and providing visibility into service execution.
5.	Customer Satisfaction Surveys – Survey of Service Desk satisfaction is a key component of providing best in class customer service. Receive completed surveys of Service Desk satisfaction from the Commonwealth and tabulating results from such surveys	Offeror must describe its approach to perform surveys of Service Desk satisfaction for a subset of the problems, questions, or requests that are resolved by, or coordinated by, the Service Desk. Offeror must describe its approach to creating and advertising a web site for day-to-day feedback from datacenter customers which is accessible through the Offeror's KMP. Offeror must describe its approach to performing a customer satisfaction survey on a quarterly basis.

6.	Improve/reduce costs	Offeror must identify its methods for addressing continuous service improvement targeted at minimizing or reducing costs of Services and operations.

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.1.2 Availability/SLA Management

The purpose of the System Availability and SLA function is to ensure that each service is delivered within, or exceeds, the agreed availability service level, and prescribed credits are received by the Commonwealth when the service level has not been achieved. Availability Management provides a point of focus and management for all availability related issues, ensuring that availability targets are established, measured, and achieved. The basic requirement is to balance the value and quality of Services with the costs of the Services. Availability and SLA management will be responsible for establishing and reviewing the SLA's to meet the Commonwealth's requirements. Offeror should review referenced exhibits for a list of SLAs and associated descriptions, tools and methodologies.

Availability/SLA Management ensures that datacenter service availability standards, as prescribed in appropriate datacenter SLAs, are achieved.

Reference Documentation

Schedule J.1 - Datacenter Service Level Management

Schedule J.2 - Datacenter Service Level Matrix

Schedule J.3 - Datacenter SLA Definitions

Requirements		Describe Compliance
1.	Establish a formal Availability and SLA Management service. This service will include representatives from the Offeror and the Commonwealth for reviewing and	Offeror must describe its methodology and approach to Availability Management and Service Level Management.

	approving the availability and SLA metrics. Offeror must publish the formal Availability and SLA Management plan based on a Service Catalog. Identify key Services and the associated level of availability or capacity as appropriate. Identify the Services that will be measured by an SLA. Define the basis the SLA service levels will be monitored and obtained. Obtain approval from the Commonwealth.	
2.	Identify Service Level Measurement Tools	Offeror must provide a list of those Service Level measurement and monitoring tools that it will use to measure and report Offeror's performance of the Services at a level of detail sufficient, as determined by the Commonwealth, to verify Offeror's compliance with those Service Levels described in **Schedule J.3 Datacenter SLA Definitions**. Offeror must review and update the required sections within Schedule J.3 Datacenter SLA Definitions. Offeror must complete the following sections in each of the Critical Service Levels and Key Measurements: • Collection Process – identify how the measurement data will be collected • Reporting Tools – identify any tools, automated or manual, that will be used • Raw Data Storage (Archives) – identify where data will be stored and accessible by the Commonwealth for further analysis. • Reporting Format/s – identify the proposed reporting format

3.	Integrate Availability Management with other service management processes, such as SLA, Capacity Management, Problem Management and Service Desk.	Offeror must describe how its proposed Availability Management process is integrated with other service management processes such as SLA, Capacity Management, Problem Management and Service Desk.
4.	Establish automated non-compliance indicators. Automatically e-mail the designated Commonwealth contact when SLA service parameters are not met. Create email notification groups by major service. Utilize this, or a similar process for outage notification.	Offeror must describe its process for managing Services performance.
5.	Investigate all instances of non-compliance. Notify the Commonwealth of an outage as defined in the CCPM. Complete a root cause analysis (RCA) for all major outages, and provide a detailed report to the Commonwealth and impacted user. Completion of the Incident report must occur within 2 days of the incident and the RCA within 10 days of the incident.	Offeror must describe its process for root cause analysis and for meeting the required SLAs. Offeror must include definitions of outage types and how it will make reports available to the Commonwealth.
6.	Identify integrated tools, methods, and activities to be used for reporting service and component availability. Ensure proactive measures to improve availability of Services are implemented whenever it is cost justified.	Offer must identify tools, methods, and activities it will use for reporting service and component availability. Offeror must describe its offerings in this area.

7.	Integrate Agency Availability Management processes with SLA Management. On a monthly basis, consolidate all system SLA availability reports into a management operations report, summarizing availability, outages, and SLA compliance by platforms.	Offeror must describe its offering in this area.
8.	Develop and maintain a Portal/Website for agencies to view operational status, planned maintenance, and component level outages.	Offeror must describe its Portal/Website to view operational status, planned maintenance and component level outages.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.1.3 Change & Release Management

Change & Release Management ensures that all changes within the datacenter environment are planned, executed, monitored, documented, and that the change produced the intended effect. The Offeror must establish the overall Change & Release Management function and manage the daily operations of the functions. This will ensure that all changes are processed in a uniform manner that required documentation, approvals, and notifications are completed before the change is implemented within each of the lower infrastructure environments and then moved into the production environment. Post implementation review and approval will require that all steps have been completed as documented, and within the time frame allotted. All change and release documentation must be maintained in a manner that will facilitate random compliance auditing. On a yearly basis, random selections of changes will be audited for compliance purposes.

Reference Documentation

Schedule H - Commonwealth Computing Process and Procedures Manual (CCPM)

	Requirements	Describe Compliance
1.	Establish a formal Change & Release Management function. This function will include representatives from the Offeror and Commonwealth to support the review and approval of all changes. Offeror must publish the formal Change & Release Management plan. Identify key elements and roles; Request for Change Form & Process, Change Manager, Change Advisory Board, Emergency Change Advisory Board, Notification process, Change review process. The documentation and process will follow industry best practices. Train appropriate Commonwealth staff on the process as requested by the Commonwealth. The Offeror's Change Management & Release management process must consider and integrate with the Commonwealth's individual change management policies and procedures,	Offeror must described its proposed process and provide a sample overview of its process and procedures. Offeror must describe the system tool it will use to support the Change & Release Management processes. Offeror must describe how it will integrate its Change & Release Management tool with the Commonwealth's Enterprise ITSM solution. Offeror must describe its process and procedure for the Commonwealth to perform random audits.

	for example from January to May of each year, Department of Revenue (DOR) maintains a "no update policy" to DOR servers that have any production Tax-Related Applications running on them.	
2.	Institute a Change Advisory Board (CAB) The CAB members shall ensure that the requested changes are thoroughly checked and assessed from both a technical and business perspective.	Offeror must describe its proposed approach to creating a CAB and describe how members should be selected. Offeror must describe its approach to handling changes at an agency level. Offeror must provide a sample CAB organization and meeting schedule.
3.	Test infrastructure related changes & releases before implementation. This includes Offeror managed hardware and any Offeror managed software. Offeror must file a Pre-Change Test Plan, as part of the Change & Release request process, including results before final approval to proceed. Offeror must create and maintain test environments where testing will be conducted and evaluated prior to implementing any change into production environments.	Offeror must described its proposed process and provide a sample overview of process and procedures.
4.	Establish scheduled maintenance periods, and communicate the scheduled outages. Create a notification process for maintenance, emergency, and unplanned outages. Offeror must establish regular maintenance periods for each computing platform. Maintenance periods must be coordinated per agency due to different peak business requirements. Create mechanism to notify clients of	Offeror must describe its process for managing maintenance periods and system outages, with examples. The Offeror must provide an approach to managing multiple agency specific maintenance periods with different peak periods.

	expected and unexpected outages.	
5.	Notify affected Commonwealth agencies before and after any changes. Provide Change & Release Notifications prior to implementation via a central web site and e-mail.	Offeror must describe its proposed process and procedure related to notifications. Offeror must describe any other change notifications capabilities available to the Commonwealth.
6.	Validate all changes after implementation. Complete a post change review to validate the success or failure of the change or release, and post the information within the change record. Take follow up action as appropriate.	Offeror must describe its proposed process and procedure.
7.	Prepare back out procedures for all changes. As part of the Change & Release process, file a back out plan as appropriate to remove the change and restore Services to the prior level.	Offeror must describe its proposed process and procedure related to back out procedures.
8.	Track all (successes / failures) changes and produce Change & Release management statistics. Create and deliver a monthly Change & Release Management Report to the Commonwealth, detailing changes, implementation status, and outage time periods as compared to planned outage schedules.	Offeror must describe its proposed process and procedure.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.1.4 Service Desk

As part of the Services, Offeror shall provide telephone support (e.g., a "Service desk") to the Commonwealth to assist the appropriate end users in determining, tracking and resolving questions regarding the Services. Offeror shall provide telephone support through such telephone support infrastructure maintained by the Offeror. This telephone service desk is to augment the required “online” Service Desk capabilities as set forth in the RFP.

The Service Desk will be the single point of contact for authorized Commonwealth users regarding incidents, which include events that cause or may cause an interruption or reduction of service, as well as requests for information, and requests for Services relating to all of the Services provided within the Offeror’s catalog of Services. The Offeror’s Service Desk must have processes for Service Delivery and Service Management that are ITIL-conformant. The Service Desk process includes Service Management processes: Incident Management, Problem Management, Change Management, Configuration Management and Service Request Management.

Currently most Commonwealth agencies provide a local Help Desk function to support staff’s desktops, local printing systems, applications, and the general public users it serves. The Offeror must develop a process and electronic connection to these agency Help Desks. The majority of the agency Help Desks utilize the Commonwealth’s Enterprise ITSM. A connection between the Commonwealth’s Enterprise ITSM and the Offeror’s Service Desk will be required to keep Help Desk tools synchronized.

In addition, the Offeror must provide an Internet accessible KMP as a central repository for processes and procedures, communications plans, and other relevant documentation to be shared with the Commonwealth. Knowledge Management will be a function shared by the Commonwealth along with the Offeror. This will allow the Commonwealth to combine data from all Commonwealth agencies and the Offeror, reorganize it, make it understandable, and present it to the Commonwealth.

The Offeror must coordinate with the Commonwealth to provide feedback on the effectiveness and accuracy of KMP content. In addition, the Offeror must notify the Commonwealth when incorrect information is identified, reference material becomes outdated, or when the content is rendered inaccurate. At the Commonwealth’s discretion, the Offeror may be required to develop content, as needed, including answers to frequently asked questions, reference/educational materials, and other documents to be added at the Commonwealth discretion.

The Offeror must create and keep current a CPPM that documents the processes, procedures and timelines used to meet the requirements of this contract. The CPPM must provide detailed process descriptions to support the computing needs of the Commonwealth utilizing best practices and be made available (via Offeror’s Portal) to all Commonwealth agencies throughout the term of the contract.

Reference Documentation

Exhibit K - OA Enterprise ITSM System and Volumetrics

Schedule H - Commonwealth Computing Procedures Manual (CCPM)

Requirements		Describe Compliance
1.	Provide an integrated Service Desk process with the other Service Management processes, including Incident Management, Problem Management, Change Management, Configuration Management and Service Request Management. The final Service Desk processes and procedures must consider current Commonwealth service management policies and procedures.	Offeror must describe its Service Desk solution offering (processes, procedures, staffing, and technologies). Offeror must provide a sample of its KMP from a previous or current engagement of Offeror.
2.	Provide a Service Desk with processes and tools for Service Delivery and Service Management that are ITIL-conformant.	
3.	Seamlessly integrate the Service Desk (including tools, technology and processes) with the Service/Help Desk(s) of other identified Agency Service Desks as required. The Offeror must coordinate the integration of the proposed Service Desk with the Commonwealth's Enterprise ITSM System and other agency Help Desks as required. Integration with other agency ITSM systems is not required.	
4.	Analyze incident trends, and recommend and implement actions, with Commonwealth's approval, to reduce incidents.	
5.	Conduct random surveys of authorized users of the Service Desk in accordance	

	with the Commonwealth each month.	
6.	Develop and document processes regarding interfaces, interaction, and responsibilities between Level 1 Support personnel, Level 2 Support personnel, and any other internal or external persons or entities that may either submit notice of an incident or receive notice of an incident.	
7.	Ensuring staffing levels and work allocation remains appropriate to handle incident volumes and incident response targets.	
8.	Provide trained service desk personnel.	
9.	Ensure that the Service Desk is available at all times (i.e. 24 hours a day, 365 days a year).	
10.	Manage all Incidents and/or Service Requests from authorized users relating to Contracted Services.	
11.	Provide weekly reports to the Commonwealth on Service Desk activities, performance, and adherence to established SLAs. Service Desk reporting must include at a minimum: • Key issues relating to Service Desk processes, improvements, script development. • Status as to Service Desk staffing, training, and authorization. • Integration activities and issues with other Service Desks belonging to the Commonwealth. • Trend analysis shall include (13) most recent months. If the Service	

	has been in place less than thirteen months then trend analysis shall include all months of Service. • Calculate metrics and provide monthly reports. • Number of Contacts, to include all interactions (Calls, phone calls, electronic, automated or otherwise). • Number of calls abandoned, average call duration, average time to answer, average time to abandon. • Number and percentage of Contacts resolved. • Number and percentage of Contacts passed to other Service Desks. • Other pertinent information regarding Service Desk operation and performance.	
12.	Enable a KMP accessible by all authorized users. Content for the KMP will be approved by the Commonwealth.	
13.	Offeror must record all incidents, problems, service requests, change requests, and configuration information in the software recording tool. All updates to the record, contacts with clients or vendors, and resolutions will be recorded in a real-time and consistent manner. This recording tool will house the KMP.	
14.	Monitor reporting system to ensure incidents and problems are being addressed to meet agreed SLAs.	
15.	Transition must include the transfer of system and application monitoring alerts with the ability to turn-off the problem	Offeror must describe its approach to ensure alerts are transitioned successfully.

	alert process during maintenance windows and other scheduled outages.	
16.	Interim Support Desk Procedures will be required as the Commonwealth transitions from its current support architecture to the Offeror's Service Desk.	Offeror must describe an interim approach and procedure(s) for providing Service Desk operation throughout the transition to the Offeror's fully managed service.
17.	Incident Management - The Offeror's Incident Management process shall encompass Incident Management processes deployed across all Service Components that are designed to: restore service as quickly as possible, minimize disruption to the Commonwealth, aim for highest levels of availability and service quality, completely transparent and auditable delivery of service, and promote the highest level for user satisfaction.	Offeror must describe its Incident Management Process and how it will be applied to the overall IT Service Management Program for the Commonwealth.
18.	Problem Management - The Offeror's Problem Management Process must minimize the adverse effect on the business of Incidents and Problems caused by errors in the IT infrastructure, Applications, systems and supporting components, and proactively prevent the occurrence of Incidents and Problems by identifying and eliminating causes of failure.	Offeror must describe its Problem Management Process and how it will be applied to the overall IT Service Management Program for the Commonwealth.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.1.5 Technical Architecture

The Technical Architecture function will oversee the ongoing design of the various computing platforms that will support the Commonwealth's existing computing topologies, as well as plan for the approaching consolidation of the Commonwealth datacenters. The intent is to design an infrastructure which will ultimately utilize multiple datacenters for processing, tiered DR Services, and on-demand Services in a secure environment. At the conclusion of the design, and after approval by the Commonwealth, the Offeror must document the environment via a Service Catalog.

Offeror must design the technical architecture of the computing systems based on current best practices, to support the evolving technologies and business needs of the Commonwealth. The volume of computing and storage will vary during the term of the contract due to applications development, testing, certification, the retirement of existing production environments, as well as cyclical processing demands such as the various tax seasons. The Offeror must be able to expand and contract service offerings based on Commonwealth needs in a timely and cost effective manner.

Exhibit(s) M.1 through M.7 - Department of Corrections (DOC) and Pennsylvania Board of Probation and Parole (PBPP) Exhibits

Exhibit(s) N.1 through N.2 - PennDOT Exhibits

	Requirements	Describe Compliance
1.	Create a Service Catalog. Define the Services and platforms to be offered.	Offeror must describe the catalog of Services it proposes.

	Provide a detailed list of Services, via a common Service Catalog to be provided to the Commonwealth. Utilize an industry standard software product to ensure the detailed service offering is recorded.	Offeror must provide a sample of a Catalog of Services that includes both Services and platforms that it proposes.
2.	Design and build the IT architecture required to support the Services. Design and build the IT technical architecture to support the Services selected by the Commonwealth. Provide the design to the Commonwealth for review and approval prior to execution. All designs must be approved by the Commonwealth.	Offeror must describe its overall service design process.
3.	Design platform and support lifecycles. Provide a technical support staff structure for the Services and platforms to be offered. Support will consider all skills needed to plan, operate and support each technology platform.	Offeror must describe its proposed technical architecture team. Resumes for proposed key personnel must be provided as described in **Schedule G - Staffing Plan and Key Positions**.
4.	Define Technical Support Services. Provide the skills of and the size of the support staff to plan, manage, and operate the various IT infrastructure platforms.	Offeror must describe its proposed technical architecture team. . Resumes for proposed key personnel must be provided as described in **Schedule G - Staffing Plan and Key Positions**.
5.	Interoperability Strive to design architectures with system components that facilitate system data accessibility.	Offeror must describe its methodology and approach to designing technical architecture
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		

Offeror Response

3.2.1.5.1 Technology Refresh

Technology refresh will be an ongoing activity required of the Offeror. The Offeror will prepare technology impact statements that address the key technologies planned for refresh or technologies identified to be of interest to the Commonwealth. These impact statements will provide a wide range of information, including the following matters applicable to the Offeror's environment:

- Technology trends
- IT Infrastructure Offeror releases and offerings
- IT Infrastructure Offeror retirement of older versions of products
- Proposed scheduling of Offeror releases into the datacenter environment
- Potential impact of the new releases on business applications in the datacenter infrastructure
- Potential impact of the new releases on deployment and operational processes
- Risk analyses with recommendations for mitigation of risks

The Commonwealth and the Offeror will review the impact statements. Based on these reviews, the Offeror must recommend a plan and schedule for technology refresh to the Commonwealth. Since the expected usable life of any hardware approved for the datacenter environment is about 36 months, the plan shall project an 18-month window into the future, and include resource estimates for each recommended refresh activity. Software refresh will depend on software releases and the Offeror must ensure operational compatibility with existing Commonwealth applications and/or functionality or must provide upgrade alternatives and options. The Offeror must obtain Commonwealth approvals prior to implementing technology upgrades that will affect Commonwealth operations.

Reference Documentation

N/A

Requirements		Describe Compliance
1.	Update Technical Architecture approach and project plan including; Service Catalog, IT Architecture, and Technical support	Offeror must document its Technical Architecture approach and project plan including; Service Catalog, IT Architecture, and Technical support
2.	Technology refresh approach - describe methodology for reviewing and refreshing technology on a scheduled basis.	Offeror must describe its methodology for reviewing and refreshing technology on a scheduled basis.
3.	Technical Architecture Staffing	Offeror must identify its technical

		architecture organization and staff.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.1.5.2 IT Service Continuity Architecture

The Offeror's IT Service Continuity Architecture will provide tiered DR capabilities and Services for applications that have been identified by the Commonwealth. The Offeror must provide a Service Continuity solution that includes DR computing, storage, networking systems and recovery processes and will be included in the overall Commonwealth architecture design. Only critical applications and associated equipment identified by the Commonwealth will be addressed with DR systems. Additional information regarding Tiered Service Delivery and Tiered DR can be found in referenced supporting exhibits.

The Commonwealth will lead the Business Continuity effort with assistance from the Offeror.

Reference Documentation

Schedule J.1 - Datacenter Service Level Management

Requirements		Describe Compliance
1.	DR Architecture and Plan will be documented by the Offeror and approved by the Commonwealth.	Offeror must describe its infrastructure and service offering for a DR and Business Continuity Plan.
2.	IT Service Continuity Architecture and Plan - Backup hardware and software will be obtained, configured and available per an agreed to Service Level to process the identified critical applications. Where applicable, data will be electronically replicated (including disk-2-disk) to the backup systems (off site) to insure a successful recovery. Wherever data	Offeror must describe the design of its Tiered DR plan in the design of the Commonwealth technical architecture. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth. Offeror must describe its process for modifying the scope/service level for DR

	replication is not viable, backup tape data will be utilized.	coverage.
3.	Recovery systems must be available via network access. Routing must be configured and tested during initial system architecture design. Include the network requirements of the DR plan in the design of the network architecture.	Offeror must describe the network requirements of its DR plan in its proposed design of the network architecture.
4.	Recovery documentation for each identified system/ application will be required. Information will include the targeted backup hardware, software, networking changes, data location, restoration and access process, execution authorization, and notification to service owner when an application has been restored to service. Offeror must create recovery documentation for each system / application identified as a critical system where DR is required.	Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the tiered DR needs of the Commonwealth.
5.	A DR support plan must be created. The DR team must notify the Commonwealth when a recovery plan will be put into action, and must manage questions and issues that may arise after implementation. Create a DR team that will manage the execution of the DR plan from declaration to recovery when required.	Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the DR needs of the Commonwealth.
6.	For critical systems identified as having a current tested DR Plan within the DPH, the Offeror will update the associated DR test plans for the new	Offeror must provide its approach to creating and testing DR Plans.

	target environment. Successful testing of each revised DR Plan is required prior to Commonwealth acceptance.	

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.1.6 Account Management

The Account Management function is responsible to provide each Commonwealth agency with oversight of the contracted Services and support required to satisfy the Commonwealth's computing needs. The Account Manager will provide direct interface with the Commonwealth agencies ensuring daily operations and needs are provided, and create monthly operational summaries reporting to both the agencies and the Commonwealth. This report will address all operational events and issues that occurred during the month that would have effected service level attainments, problems and incidents, and recommendations for changes needed to provide continuous, secure computing Services. Each Commonwealth agency will interact with its assigned Account Manager to discuss needs, issues, problems or costs.

Reference Documentation

Schedule G - Staffing Plan and Key Positions

Requirements		Describe Compliance
1.	Assign an Account Manager to each identified agency. The Account Manager will be responsible for all Services provided, represent the Commonwealth agency's needs, and be the advocate for the agency throughout the Offeror's organization. Based on the size and application complexity of the Commonwealth	Offeror must identify its account management structure, roles, and responsibilities. The Offeror must provide resumes and qualifications for each of its proposed Account Managers and other key positions.

	agency, the Offeror must assign additional account management resources. Account Managers shall understand agencies line of business and business trend analysis. Offeror must assign a minimum of 6 dedicated account managers.	
2.	Account Managers will meet with assigned agency contacts on a regular basis. It is anticipated that this will be at minimum weekly during the initial program start and through transition.	Offeror must describe its approach to meet this requirement.
3.	Meet with Commonwealth teams on a monthly basis. It is anticipated that this will be at minimum weekly during the initial program start and transition to monthly meetings with the Commonwealth teams to address problems and assure continuous service improvements.	Offeror must describe its approach to meet this requirement.
4.	Participate in agency-sponsored IT planning sessions on a quarterly basis. Offeror must schedule quarterly computing capacity reviews to ensure sufficient processing capacity, needs, and issues are being addressed. Suggest changes when necessary.	Offeror must describe its approach to meet this requirement.
5.	Advocate for agency interests. Offeror's Account Management team will advocate for the Commonwealth's interests. For example, intervene with Service Desk personnel to resolve a major problem; problem escalation process, support root cause analyses process. Another example, coordinate with agency and service providers to ensure timing of	Offeror must describe its approach to meet this requirement.

	technology refreshes have the least impact on the agency.	
6.	Monthly status reports - Ensure The Commonwealth is aware of operational status and project update information on a monthly basis. Create and deliver a monthly status report, summarizing operational metrics as defined in the CCPM, by service platform, including highlights and exceptions, and project status.	Offeror must describe approach and provide a representative sample report.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.1.7 Configuration Management

The Offeror's Configuration Management system must ensure complete and accurate recordkeeping relative to datacenter assets; hardware, operating system software, firmware, and network. The Offeror's Configuration Management Database (CMDB) system must be synchronized with the proposed datacenter Change and Release Management processes. Also included will be associations of infrastructure configuration items (CIs) and Agency application infrastructure to support application infrastructure related SLAs.

At the end of the contract the Offeror will be responsible to provide the Commonwealth with a final electronic copy of the CMDB.

The following list identifies but does not limit the roles and responsibilities that the Offeror must perform:

- Define and document Configuration Management standards and procedures per ITIL v3 standards.
- Establish an electronic interface to the Commonwealth's CMDB(s) to keep current both the Commonwealth's CMDB and the Offeror's CMDB.
- Establish process for tracking configuration changes
- Establish process interfaces to Incident and Problem Management, Change Management,

technical support, maintenance and asset management processes

- Establish appropriate authorization controls for modifying configuration items
- Establish configuration baselines as reference points for rebuilds, and providing ability to revert to stable configuration states
- Establish process for verifying the accuracy of configuration items, adherence to Configuration Management process, identify process deficiencies and recommend corrective actions

The Commonwealth will require online access to configuration related information and reports to satisfy application updates and audit requirements.

Reference Documentation

Schedule H - Commonwealth Computing Procedures Manual (CCPM)

Requirements		Describe Compliance
1.	Provide a documented process to track configuration changes accordingly to ITIL V3 framework	Offeror must describe how its Configuration Management System addresses the list of requirements described above. Offeror must provide a toolset description and an example of a configuration management system from a prior or current engagement of the Offeror.
2.	Per agency request, provide specific application related infrastructure component configuration information.	Offeror must describe how its configuration management systems can support this requirement.
3.	Provide current configuration reports at an agency level by datacenter component.	Offeror must describe its process to request configuration management reports. Offeror must provide a sample of a Configuration Management report used by Offeror on a current or previous engagement.
4.	Continuous review and updates to the Offeror's and Commonwealth's CMDB	Offeror must describe its approach to maintaining the accuracy of the CMDBs (Offeror & Commonwealth).
5.	CMDB that constitutes the common repository created by the Offeror to include, but not be limited to, location	Offeror must describe its approach to meet this requirement.

	information, service information, configuration information, application information, billing data, inventory data, and performance data. This data will be provided to the Commonwealth via electronic interface in a format approved by the Commonwealth.	
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.1.8 3rd Party License Management

Currently the Commonwealth manages over 2,000 business applications that require numerous software platforms and products. The Offeror's 3rd Party License Management service must ensure accurate inventory and licensing compliance for all Offeror provided infrastructure software products. The Offeror will be solely responsible for the management of all infrastructure software products provided through this contract.

The Offeror must coordinate with the Commonwealth to ensure compatibility between Commonwealth provided applications related software, and the Offeror provided infrastructure software. The Offeror must provide a method for tracking and reporting on both Offeror provided and Commonwealth provided software that will reside on the managed infrastructure.

The Offeror must provide the ability to purchase the Third Party Software listed in Exhibit B.4 - DPH - Third Party Softwareand additional third party software if required to provide the contracted services. The Offeror shall be responsible for the licensing and maintenance and support for the Third Party Software. The Commonwealth at its sole discretion may procure third party software from appropriate contracts.

The Offeror must provide the ability to purchase maintenance and support for the Third Party Software listed in Exhibit B.10 - DPH – Hybrid Third Party Software. The Offeror shall be responsible for the maintenance and support for the Third Party Software. The Commonwealth at its sole discretion may procure third party software maintenance and support from appropriate contracts.

Reference Documentation

Exhibit B.3 - DPH - Commonwealth Software Asset Listing

Exhibit B.4 - DPH - Third Party Software

Exhibit B.10 - DPH – Hybrid Third Party Software

See each target datacenter exhibits for current applications supported.

Requirements		Describe Compliance
1.	Provide, as requested, current software license reports for in scope infrastructure. For example specific OS version and patch levels per service instance.	Offeror must describe its approach to providing 3rd party software inventory and tracking per agency related infrastructure.
2.	Improve service quality, efficiency, and effectiveness.	Offeror must describe its methods to address continuous service improvement process

		related to 3rd party software management.
3.	Improve/reduce cost of service.	Offeror must provide examples of 3rd Party Software Management initiatives it has implemented and which may be utilized to achieve reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.2 Technical Services

3.2.2.1 Transition Management (New Customer and/or Services)

The Transition Management service ensures the systematic planning, management, execution, and monitoring of major changes to the datacenter environment(s). This Services offering is to support new customers and/or new Services (i.e. remote file servers, remote databases, etc.). This service offering includes the phased migration of Commonwealth applications to the Offeror's managed service excluding initial transition.

Information and tasks pertaining to the transition of the initial Targeted Datacenters and Agencies can be found in Section 3.3 – Transition Services.

Reference Documentation

N/A

Requirements		Describe Compliance
1.	Transition Management Office - Create a Transition Management Office and team that will be responsible for the migration projects of hardware and applications from the Commonwealth's locations to the new target datacenter environments.	Offeror must describe its transition management approach and its proposed transition team. Provide resumes for key members of the proposed transition team.
2.	Create a computing environment;	Offeror must discuss its approach to

	hardware, software, network systems, peripherals, and devices as required to migrate the Services from the Commonwealth.	migrating the Commonwealth's computing platforms (mainframe, mid-range and x86) and associated infrastructure to the Offeror's proposed solution.
3.	Provide recommendations for the repurpose, replacement, or retirement of existing Commonwealth hardware, software, network systems, and peripheral devices as required after system migrations have been completed.	Offeror must discuss its approach.
4.	Optimize Current Process and Procedures – Coordinate with Commonwealth customer to review and plan for a transition of processes and procedures.	Offeror must describe its overall plan for optimization of the existing processes, procedures, tools, etc. to provide more efficient and effective Services. The description must include approach, plan, and methodologies.
5.	Develop detailed plans to migrate Commonwealth applications, and associated infrastructure from Commonwealth datacenters to the Offeror's datacenters. On a monthly basis, Offeror must create a report to detail the transition projects on the plan, status, risks, and the forecasted transition date.	Offeror must discuss its approach to support the migration of Commonwealth applications to the proposed solution including communicating and reporting on the migration plan, risks and schedule.
6.	Coordinate with Commonwealth applications project teams to plan and execute the application and infrastructure migration plans.	Offeror must discuss its approach.
7.	Revise datacenter disaster recovery plans on the occasion of major changes to the datacenter hardware, software, or network portfolio.	Offeror must discuss its approach.
Continual Process Improvement		
8.	Reduce service risks.	Offeror must provide examples of previous

		Offeror initiatives aimed at eliminating or mitigating service risks.
9.□	Improve service quality.	Offeror must provide examples of previous Offeror initiatives aimed at improving service quality.
10.□	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
11.□	Provide service transparency.	Offeror must provide examples of previous Offeror initiatives aimed at providing service transparency; in particular, visibility into the service execution process.
12.□	Ensure service sustainability.	Offeror must provide examples of previous Offeror initiatives aimed at ensuring service sustainability; in particular, efforts targeted at cost containment and cost reductions.
13.□	Improve/reduce cost of service	Offeror must provide examples of previous technology initiatives implemented by Offeror that achieved reduced costs of Services and that met or exceeded ROI (Return on Investment) analysis projections.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.2.2 Infrastructure Architecture

The Infrastructure Architecture service will define and manage the scope and design of the infrastructure architecture for the computing systems to support the evolving needs of the Commonwealth. This range of Services includes design of the mainframe, mid-range, x86 servers, (both physical and virtual), Local Area Network (LAN), storage, backup systems, and the DR systems. The design will also need to detail how the most current data will be restored to the targeted DR system.

Efforts are underway to re-write many of the Commonwealth business applications. For example, some of the mainframe applications are being migrated to newer server based systems. The Offeror must consider the planned retirement of some of the mainframe workload, and at the same time consider the offsetting growth in other server platform environments.

At the direction of the Commonwealth, the Offeror must transition Commonwealth based computing infrastructure to one of the datacenters. The Offeror must work with the Commonwealth agencies to understand the systems involved, and the timeframe of these migrations. Working with the Commonwealth agencies, the Offeror must provide the design, project management, hardware and technical support required to test and migrate these systems to the new production environment. At its discretion, each agency will provide the applications staff to support the migrations.

The Infrastructure Architecture service will review and recommend hardware, software, and the technical configurations required to build the requested infrastructure environments. Prior to migrating each of the current application workloads to the new target infrastructure, the Offeror must work with each Commonwealth agency to develop a mutually agreed to Acceptance Test Plan that includes the testing of application infrastructure performance characteristics.

Requirements		Describe Compliance
1.	Define the infrastructure technology Services to be offered. Provide a detailed list of Services and computer platforms to be provided to the Commonwealth.	Offeror must describe its ability to provide infrastructure technical Services across multiple computing platforms (mainframe, mid-range and x86). Include explanation of different service tiers (e.g. gold, silver and bronze).
2.	Design and build the IT infrastructure architecture to support the Services required by the Commonwealth. Design will provide as much interoperability and open standards as possible. All designs must be approved by the Commonwealth. Provide the design in a Visio format to the Commonwealth for review and approval prior to execution. This	Offeror must describe its methodology and approach to infrastructure architecture design Services. Offeror must describe the documentation requirements, timelines for both normal requests and emergency situations. Offeror must provide representative sample of infrastructure design documentation.

	diagram will be dated and maintained as Services are altered for the duration of the engagement.	
3.	Address CJIS and Criminal History Record Information Act (CHRIA) requirements for agency application infrastructure designs where required. Some agency application infrastructure designs (e.g. PSP) require additional security and encryption level requirements imposed by CJIS.	Offeror must provide examples of its experience in designing infrastructures that adhere to CJIS and CHRIA requirements.
4.	SAP Infrastructure Design The Offeror's proposed target infrastructure design for the Commonwealth's SAP environments must include a certified SAP sizing report prior to migration of the systems.	Offeror must provide examples of its experience in sizing and design of SAP infrastructures. All designs must be approved by the Commonwealth.
5.	Commonwealth Wide Area Net connectivity. Provide connectivity from the datacenter to the Commonwealth Network. Redundant network links are required.	Offeror must describe its capabilities to connect to and manage the requisite connections. Explain ongoing network support Services to manage these links including the ability to increase capacity as needed to support changes in the application infrastructure requirements.
6.	Develop Acceptance Test Plan. Prior to migrating each of the current application workloads to the new target infrastructure, the Offeror will work with each Commonwealth Agency to develop a mutually agreed to Acceptance Test Plan that includes the testing of application infrastructure performance characteristics.	Offeror must discuss its proposed approach to systems acceptance testing and include the approach to performance testing.

7.	Provide System Acceptance testing. The Offeror must conduct system acceptance testing, and provide the Commonwealth with written verification prior to declaring the system is fit for use. This acceptance test must include validation of infrastructure performance against system performance characteristics agreed to by both parties.	Offeror must discuss its proposed approach to systems acceptance testing.
8.	Ready for use certification	Offeror must provide the Commonwealth with written verification prior to declaring the Service is ready for use. The Service will not be considered ready for use until written acceptance is obtained from the Commonwealth.
9.	Support User Acceptance Testing.	Offeror must support the Commonwealth's user acceptance testing. The Commonwealth shall not be charged for Services until written acceptance is obtained from the Commonwealth.
10.	Provide Application Infrastructure environments. Provide non-production and production environments for each of the application computing platforms. The non-production environments will be used for testing new technologies and applications, updates and upgrades, prior to production implementations.	Offeror must describe its approach to the design and management of multiple application infrastructures. Identify proposed solution to individual or consolidated non-production environments for agencies.
11.	Design service lifecycle. Provide the infrastructure design for the Services and platforms to be offered. Provide ongoing evaluation and recommend new technologies to	Offeror must describe its approach to provide service lifecycle design for all Commonwealth computing platforms and associated infrastructures. Offeror must provide the Commonwealth and

	enhance, improve, and reduce the cost of Services.	its agencies the ability to request new technologies to be available.
12.	Define Technical Support functions.	Offeror must list Offeror's support staff levels required to plan, manage, and operate the IT infrastructure, based on the various service levels offered.
Continual Service Improvement		
13.	Reduce service risks.	Relative to the service in question, Offeror must provide examples of previous Offeror initiatives aimed at eliminating or mitigating service risks.
14.	Improve service quality.	Offeror must provide examples of previous Offeror initiatives aimed at improving service quality.
15.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
16.	Provide service transparency.	Offeror must provide examples of previous Offeror initiatives aimed at providing service transparency; in particular, visibility into the service execution process.
17.	Ensure service sustainability.	Offeror must provide examples of previous Offeror initiatives aimed at ensuring service sustainability; in particular, efforts targeted at cost containment and cost reductions.
18.	Improve/reduce cost of service	Offeror must provide examples of previous technology initiatives implemented by Offeror that achieved reduced costs of Services and that met or exceeded ROI (Return on Investment) analysis projections.
Deliverables		
Deliverables are defined in **Schedule K - Key Program Deliverables**		

Offeror Response

3.2.2.3 Capacity Management

The Capacity Management activity focuses on the planning and scheduling of the Commonwealth's infrastructure capacity and growth. Capacity planning includes consideration of data communications, networking, processing, storage, and other environmental variables. The Offeror must issue periodic reports showing usage, trends, capacity forecasts, and recommendations for upgrades.

Processor capacity planning focuses on estimating, measuring, and reporting on the central processing unit (CPU) and memory usage, including peak usage and average usage over time.

Forecasting of each agency's application-based processor and memory usage will be determined using projected transaction and user volumes supplied by the Commonwealth. The Offeror must track application-based processor and memory usage and report the usage and trends to the Commonwealth. The Offeror must make periodic recommendations for upgrading existing server capacity.

Data storage capacity planning focuses on estimating, measuring, and reporting on data storage used per application over time.

Forecasting of application-based data storage usage will be provided by the Commonwealth. The Offeror must track current data storage usages and report the usage and trends to the Commonwealth. The Offeror must make periodic recommendations for upgrading existing data storage capacity.

New application infrastructure capacity planning focuses on estimating, measuring, and reporting on network, server, and data storage usage over time per application. New processing requirements will be established during testing in test environments. The Offeror must track application-based infrastructure usage. The Offeror must make monthly recommendations for upgrading existing infrastructure capacity.

The following list identifies but does not limit the roles and responsibilities that the Offeror must perform:

- Establish comprehensive Capacity Management planning process
- Identify future business Commonwealth requirements that will alter capacity requirements
- Assess capacity impacts when adding, removing or modifying applications
- Capture trending information and forecast future agency infrastructure capacity requirements based on agency defined thresholds

- Recommend changes to capacity to improve service performance
- Assess impact/risk and any cost of capacity changes with agencies
- Maintain capacity levels to optimize use of existing IT resources and minimize agency costs
- Ensure adequate capacity exists within the IT environments

Reference Documentation

Schedule H - Commonwealth Computing Procedures Manual (CCPM)

	Requirements	Describe Compliance
1.	Working with each agency, develop the initial Capacity Management Plan based on an inventory and review of each of the agency applications and associated managed infrastructure. Develop the initial Capacity Management Plan and provide quarterly updates to the plan.	Offeror must discuss its approach to Capacity Management and provide a sample of a Capacity Management Plan.
2.	Meet with the Commonwealth and agency representatives on a monthly basis to assess the future datacenter resource requirements; processors, storage space, network (LAN & WAN), selected application transactions, and number of users, etc.	Offeror must discuss its approach to support the current and future needs of Commonwealth agencies. Offeror must provide a sample of a Capacity Management report that includes processor, storage, network and application metrics.
3.	Produce an annual datacenter Capacity Plan and Trend Analysis.	Offeror must discuss its approach to meet this requirement. Provide a sample Capacity Management Plan and Trend Analysis.
4.	Produce a monthly planned vs. actual resource usage report.	Offeror must discuss its approach. Provide a sample resource usage report.
5.	Recommend methods for reducing hardware “footprints”, e.g., replacing server storage with network attached storage and aggressive server virtualization.	Offeror must discuss its approach.

6.	Allow emergency or temporary orders for additional Services or capacity without a minimum service commitment.	Offeror must discuss its approach.
Continual Service Improvement		
7.	Reduce service risks.	Offeror must provide examples of previous Offeror initiatives aimed at eliminating or mitigating service risks.
8.	Improve service quality.	Offeror must provide examples of previous Offeror initiatives aimed at improving service quality.
9.	Improve client satisfaction.	Offeror must describe methods to continually improve client satisfaction.
10.	Provide service transparency.	Offeror must provide examples of previous Offeror initiatives aimed at providing service transparency; in particular, visibility into the service execution process.
11.	Ensure service sustainability.	Offeror must provide examples of previous Offeror initiatives aimed at ensuring service sustainability; in particular, efforts targeted at cost containment and cost reductions.
12.	Improve/reduce cost of service.	Offeror must provide examples of previous capacity initiatives implemented that achieved reduced costs of Services and that met or exceeded ROI (Return on Investment) analysis projections. If costs of Services increased due to increased required capabilities, so identify.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		

Offeror Response

3.2.2.4 DR Planning & Testing

The DR Planning & Testing service ensures that the Offeror provides expert assistance in developing, documenting, deploying, and testing tiered datacenter recovery strategies that includes access for Commonwealth end users. This service will protect the identified applications processing at the datacenters, Commonwealth employees and constituents who utilize the application.

The Commonwealth will provide the Offeror with a list of agency applications that require a DR solution and related DR plan after contract is awarded. The Offeror is expected to provide DR Planning and Testing Services for agency applications that require DR Services. For Commonwealth agency applications that do not currently have DR plans, these Services will be provided in the event the Commonwealth elects to order DR services for these applications.

Reference Documentation

Exhibit B.5 - DPH - Agency Disaster Recovery Matrix

Schedule J.1 - Datacenter Service Level Management

Requirements		Describe Compliance
1.	Meet with the Commonwealth and agency representatives on an annual basis and upon request to assess its DR requirements. Post contract award, Offeror must document the Tiered DR plans in an online software program that will be available to Commonwealth and Offeror staff. The documented plans must be made available at the time each individual critical application is transitioned to the Offeror's managed Services.	Offeror must discuss its approach to providing a Tiered DR service offering to meet the needs of the agencies. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the DR needs of the Commonwealth. Offeror must discuss the DR capabilities that are included in its proposed Architecture.
2.	Review and update Disaster Recovery	Offeror must describe an approach to

	Plans (DRPs) - Offeror must review existing Disaster Recovery Plans (DRPs) to determine gaps in existing or future DR Services, within the first 120 days after the Effective Date. The Offeror must at least annually review and update the disaster recovery plans. Assist the Commonwealth in identifying dependencies/limitations to DR testing due to non-Offeror infrastructure.	perform a gap analysis of the existing Disaster Recovery Plans (DRPs). Offeror must include a description of the process it will use to track and resolve all identified gaps.
3.	Provide the Commonwealth and agency representatives with access to an online DR planning tool.	Offeror must discuss its approach to meet this requirement. Identify and describe the proposed online DR planning tool.
4.	Provide the Commonwealth and agency representatives with access to an automated emergency notification system. This would be invoked on the occasion of a disaster or other emergency.	Offeror must discuss its approach to meet this requirement. Identify and describe the proposed emergency notification system that could be used to invoke a DR event.
5.	Assist the Commonwealth and agency representatives as requested to review agency identified critical business applications and related IT applications and infrastructure.	Offeror must discuss its approach to meet this requirement.
6.	Assist the Commonwealth and agency representatives as requested in developing, documenting, deploying, and exercising its tiered disaster recovery plans.	Offeror must discuss its approach and optional service offering. Offeror must describe its approach to perform a successful recovery test within 6 months of transition to the Offeror's Managed Service.
7.	Assist the Commonwealth and agency representatives as requested in coordinating disaster recovery exercises.	Offeror must discuss its approach and optional service offering.

	Frequency of DR exercises will be at the discretion of the Commonwealth. The Offeror must every six (6) months test the operability of the disaster recovery plan then in effect.	
8.	Assist the Commonwealth and agency representatives as requested in developing, documenting, deploying, and exercising its continuity of operations (COOP) and continuity of government (COG) plans.	Offeror must discuss its approach.
9.	Assist the Commonwealth and agency representatives as requested in integrating its disaster recovery plans into its COOP and COG plans.	Offeror must discuss its approach.
10.	As requested by the Commonwealth, evaluate the efficiency of business partner disaster recovery and/or business continuity plans.	Offeror must discuss its approach.
11.	In concert with the Commonwealth and agency representatives, lead the recovery operations as requested in the event of a disaster or other major disruption.	Offeror must discuss its approach and optional service offerings.
12.	Conduct disaster recovery planning and activities in accordance with the Business Continuity Institute Good Practice Guideline or similar standard.	Offeror must identify the standard and describe its approach to meet this requirement.
13.	Ensure DR Planning & Testing Services are documented in the Service Catalog.	Offeror must provide a prototype of this section of the Service Catalog.
Continual Service Improvement		
14.	Reduce service risks.	Relative to the service in question, Offeror

		must provide examples of previous Offeror initiatives aimed at eliminating or mitigating service risks.
15.	Improve service quality.	Offeror must provide examples of previous Offeror initiatives aimed at improving service quality.
16.	Improve client satisfaction.	Offeror must describe methods to continually improve client satisfaction.
17.	Provide service transparency.	Offeror must provide examples of previous Offeror initiatives aimed at providing service transparency; in particular, visibility into the service execution process.
18.	Ensure service sustainability.	Offeror must provide examples of previous Offeror initiatives aimed at ensuring service sustainability; in particular, efforts targeted at cost containment and cost reductions.
19.	Validate business case for cost of the service.	Offeror will provide examples to validate the projected cost savings or cost avoidance projected versus the cost of using this service.
20.	Improve/reduce cost of service.	Offeror must provide examples of previous disaster recovery initiatives implemented that achieved reduced costs of Services and that met or exceeded ROI (Return on Investment) analysis projections. If costs of Services increased due to increased required capabilities, so identify.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverable**		
Offeror Response		

3.2.2.5 Security Management

The Security Management service must ensure the confidentiality, integrity and availability of Commonwealth information and infrastructure systems. All support and implementation activities must be conducted in accordance with, but not limited to, leading industry and Commonwealth standards, which include, but are not limited to, ISO 27001:2005 and ISO 27002:2005. The Offeror must support all related system audits at the Offeror's expense. The Offeror must maintain current security ISO 27001, ISO 9001 and ISO/IEC 20000 certifications.

The Offeror must comply with Commonwealth IT policies and directives as well as federal and Commonwealth laws, regulations and policies, including but not limited to the Criminal History Record Information Act (CHRIA), Health Insurance Portability and Accountability Act (HIPAA), Criminal Justice Information Services (CJIS) regulations, The United States Social Security Administration (SSA)regulations, IRS (Internal Revenue Service) Publications, Commonwealth Information Technology Bulletins (ITBs) and the Payment Card Industry (PCI) standards. The Offeror must work with each agency to understand and ensure compliance with all laws, regulations, and policies as they pertain to each individual agency.

Reference Documentation

Exhibit J.1 through J.3 - Commonwealth Security and Compliance Requirements

Exhibit G.6 - PSP - CJIS Security Policy

Exhibit G.9 - PSP – CCHRI

Exhibit G.7 - PSP - Summary of CJIS Requirements

Exhibit G.12 - PSP - CHRIA Handbook

Requirements		Describe Compliance
1.	Develop an annual Security Management Plan.	Offeror must describe its approach to Security Management and provide a sample of a Security Management Plan. Highlight how stated security objectives align with Commonwealth business goals, IT policies, and regulatory requirements.
2.	Deploy complement of network security systems. Implement at minimum: spam filtering, anti-virus, malware protection, firewall (web, application), intrusion prevention and detection,	Offeror must describe its proposed solution including the following: • Processes and Procedures • Tools / Applications • End User Reports o Standard

	web content filtering, virtual private network, and data loss prevention systems.	o Custom • Escalation Procedures Offeror must describe its prior experience relative to providing datacenter management and support of CJIS, CCHRI, HIPAA and PCI systems.
3.	Perform quarterly (at the Offeror's expense) Vulnerability Analyses (VA) and penetration testing to identify new or emerging information security threats. Perform penetration testing (at the Offeror's expense) and present the results of each VA on a quarterly basis. Should exposures be identified, plan and remediate the exposure in accordance with Commonwealth IT policy guidelines. Report results to the Commonwealth within the time set out in an applicable SLA. The above requirement will be for all systems/subsystems that the Offeror is responsible for including managed servers/virtual servers, network devices, security devices including , but not limited to, the following: • Performing web application firewall administration and securing web applications behind it. • Ensuring and maintaining PCI level 1 compliance. • Implementing DLP for the data center server assets to avoid a breach. • Implementing Database Firewall to secure database assets from breach.	Offeror must describe its capabilities and approach to performing vulnerability analysis and penetrating testing on a quarterly basis. Provide sample reports for each.

4.	Review network and other security logs for evidence of attacks. Utilize enterprise grade intrusion detection tool(s) to systematically identify, stop, and report security threats. Produce a monthly Security Log Analysis as part of the monlthy status reports as described in RFP section IV-5 Reports and Project Control.	Offeror must describe its solution and approach.
5.	Apply operating system and other security patches. Implement a Patch Management Program to ensure the timely application of security updates on all infrastructure platforms in accordance with Commonwealth IT policy guidelines. The Patch Management Program must adhere to the Change Management process that includes Commonwealth approvals.	Offeror must describe its proposed Patch Management program.
6.	Restrict physical access to all network systems and equipment with biometric or other second factor access control systems.	Offeror must describe solution and approach to meet this requirement.
7.	Restrict access to all data in the Commonwealth network infrastructure. Restrict and control all data access right, groups and special permissions based on the data security program designed by the Commonwealth security team and/or specified by the agencies. Access level changes and exceptions will be executed only when	Offeror must describe solution and approach to meet this requirement.

	approved paperwork is complete and approved. A file of all access changes will be maintained by the Offeror for audit purposes. Offeror must support Commonwealth initiated security audits.	
8.	Evaluate the security standing of network-connected subcontractors. Conduct information security audits of prominent subcontractors on an annual basis.	Offeror must describe solution and approach to meet this requirement.
Continual Service Improvement		
9.	Reduce service risks.	Relative to the service in question, Offeror must provide examples of previous Offeror initiatives aimed at eliminating or mitigating service risks.
10.	Improve service quality.	Offeror must provide examples of previous Offeror initiatives aimed at improving service quality.
11.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
12.	Provide service transparency.	Offeror must provide examples of previous Offeror initiatives aimed at providing service transparency; in particular, visibility into the service execution process.
13.	Ensure service sustainability.	Offeror must provide examples of previous Offeror initiatives aimed at ensuring service sustainability; in particular, efforts targeted at cost containment and cost reductions.
14.	Improve/reduce cost of service.	Offeror will provide examples of Security Management initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to meet or

		exceeded ROI (Return on Investment) analysis projections.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.2.6 Performance Monitoring & Management

The Performance Monitoring & Management Service of the infrastructure components, databases, and applications provide the critical input for meeting service level commitments. Performance monitoring is a proactive method to identify and respond to system database, processor utilization, or environmental problems that may affect the Services, or might negatively affect Services in the near future. The selected performance monitoring tools will also provide one of the key inputs for calculating SLAs, and the associated monthly evaluation and reporting needs.

The Offeror must collect performance information and report on infrastructure and application performance status on a daily basis using performance management and monitoring tools.

All tracked performance information must be reported daily, including processing performance, network (LAN / WAN) performance, and storage performance data. The Offeror must determine trends in conjunction with the Commonwealth, and all trends will be reported to address, if necessary, any changes from an established baseline. Forecasts of future usage will be determined based on expected growth in application transaction volume and expected deployment of future applications.

The Offeror must provide a base level of performance monitoring for key infrastructure components such as server, storage, network, and security. Additional Performance Monitoring Services such as database and application monitoring will be offered to the Commonwealth as an additional level of service.

Agency applications may require additional application level monitoring provided and managed by the Commonwealth Agencies. The Offeror must allow additional Commonwealth based monitors to be installed and managed by individual Commonwealth Agencies.

Reference Documentation

Schedule J.3 - Datacenter SLA Definitions

Requirements		Describe Compliance
1.	Identify the performance monitor software tool(s) that will be used to monitor selected infrastructure Services. The selected infrastructure service will be presented to the Commonwealth for approval.	Offeror must describe its proposed performance management toolset.
2.	Create and maintain performance monitoring procedures for each	Offeror must describe its approach to monitoring performance across multiple

	platform to ensure each system is monitored in a consistent manner. All identified systems will be monitored under the parameters established in the CCPM.	platforms and environments including the following: • Process and Procedures • Tools / Applications • End User Reports o Standard o Custom • Escalation Procedures
3.	Performance information reporting - Collect and report on the performance data on a monthly basis. Offeror must utilize these reports to ensure SLA's are being achieved. A monthly report will be created to provide a review of how well the systems are performing. Also, provide daily reporting. Recommend system changes to correct over and under system utilization, as well as system upgrades as appropriate. These reports and recommendations will be shared with the Commonwealth. Daily performance reports summarizing incidents for the past 24-hours and immediate reports of incidents and routine status reports of incidents in progress for resolution such as a network or server outage that impacts Commonwealth Services. Examples of automated notifications include, but are not limited to, drive full (Warning, critical), unscheduled reboots, server instability, etc. and to be defined in the CCPM. Offeror must have to ability to provide performance information on a daily, weekly, and monthly basis.	Offeror must provide sample performance monitoring reports and approach to supporting daily, weekly and monthly reporting. Offeror must describe its approach to provide Commonwealth the ability to utilize Offeror's monitors (tools) as well as adding its own.

4.	Support the load testing of applications by providing additional targeted performance monitoring Services during the testing period. This service will be made available as an additional service. Provide load-testing performance monitoring as an add-on service.	Offeror must describe its monitoring capabilities and tools to support load-testing performance.
5.	Performance Monitoring training - Provide the Commonwealth with training on the use of performance management tools and reporting.	Offeror must describe its training approach to provide this training to Commonwealth users.
6.	Support for agency level monitors - agency applications may require additional application level monitoring to be provided and managed by the Commonwealth agencies. Support synthetic transactions in applications to create a “dashboard” view that applications are working properly. The Offeror must allow additional agency based monitors to be installed and managed by individual Commonwealth Agencies.	Offeror must describe its approach to meet these requirements.
Continual Service Improvement		
7.	Reduce service risks.	Relative to the service in question, Offeror must provide examples of previous Offeror initiatives aimed at eliminating or mitigating service risks.
8.	Improve service quality.	Offeror must provide examples of previous Offeror initiatives aimed at improving service quality.
9.	Improve client satisfaction.	Offeror must provide examples of previous

		Offeror initiatives aimed at continually improving client satisfaction.
10.	Provide service transparency.	Offeror must provide examples of previous Offeror initiatives aimed at providing service transparency; in particular, visibility into the service execution process.
11.	Ensure service sustainability.	Offeror must provide examples of previous Offeror initiatives aimed at ensuring service sustainability; in particular, efforts targeted at cost containment and cost reductions.
12.	Improve/reduce cost of service.	Offeror must provide examples of Performance Monitoring and Management initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.3 Facilities Management

3.2.3.1 Facilities Architecture / Maintenance

The Facilities Architecture and Maintenance service will provide and staff a minimum of two fully operational datacenter facilities in a multi datacenter mode. This service will require the integration and alignment of the non-core Services, including those relating to the premises, required to operate and maintain a datacenter that will fully support the core objectives of this project.

These datacenters will be geographically dispersed to provide protection from regional disruptions such as weather, power or other emergencies. The process of locating and managing these physical environments will include defining the physical site requirements, selecting appropriate facilities, and designing effective processes for monitoring and maintaining environmental Services and managing physical access. Effective management of the physical environment reduces the possibility of service interruptions due to unauthorized access and damage to computing equipment and personnel. Please review Exhibit D.7 - EDC Facility Summary for information regarding the EDC facilities.

Facilities Management includes all aspects of providing and managing the physical environment. For example; power and power distribution, cooling and ventilation, fire detection and suppression, building security and access control, and environmental monitoring are all required. Listed below are the basic Services required, but not inclusive of all Services needed, to manage an enterprise class datacenters required by the Commonwealth.

Reference Documentation

Exhibit D.7 - EDC Facility Summary

	Requirements	Describe Compliance
1.	Safe and secure datacenter. Two layers of authentication and appropriate clearances will be required. Provide datacenter environments which are secured to ensure that only authorized personal have physical access to the buildings, systems and all levels of data. This includes data storage within networked storage devices, servers, tapes, diskettes, optical and paper formats.	Offeror must describe its proposed facilities security program.

	Comply with the security requirements of the Commonwealth. Immediately inform the Commonwealth of any vulnerability or weakness in the Services, and recommend a solution or mitigation. Offeror must assess the EDC facilities and provide a report to the Commonwealth as it pertains to required security upgrades.	
2.	Provide fully redundant environmental Services. To include, but not limited to, HVAC, UPS conditioned power and distribution, generator backup, automated transfer switch, fire suppression system. Offeror must integrate its Facilities Management process with Service Management processes, especially Change Management, Incident Management, Service Continuity Management and Availability Management. Offeror must confirm its ability to provide, manage, maintain and operate multiple Tier 3 equivalent facilities. Offeror must assess the EDC facilities and provide a report to the Commonwealth as it pertains to required HVAC and power upgrades.	Offeror must describe solution and approach to meet this requirement. Offeror must provide details and supporting documentation on its proposed facilities and tier rating.
3.	Staff the datacenters with appropriate operational and management levels of personnel 24/7/365. Critical engineering and management staff will be available to the Commonwealth Monday through Friday, between 8am – 5pm Eastern time excluding Commonwealth observed holidays. Access to operational staff	Offeror must describe its proposed facilities staffing approach, including its staffing approach related to the EDC.

	will be available 24/7/365. Video surveillance system will be utilized at all entry points and throughout the datacenter and tape storage areas. Datacenter Staff will be required to adhere to the Commonwealth requirements for background checks and security clearances. Offeror shall be required to monitor the status of staff and to take appropriate action for staff found to subsequently have violated prescribed legal or ethical standards as described in **Schedule G –Staffing Plan and Key Positions**. Such violations shall be immediately reported and appropriate actions taken. Commonwealth verification of the requirements will be necessary prior to staff working on Commonwealth related systems.	
4.	Procurement Planning - Provide program and processes to alter the datacenter environment and to refresh the environmental Services at end-of-life, and as additional Services are needed.	Offeror must describe its facilities management processes, including those related to the EDC.
5.	Physical Access to Facilities- Coordinate with the Commonwealth to provide for physical access and facilitate inspections by government authorities (including the Commonwealth) for auditing the conduct of government business. Offeror must assess the EDC facilities and provide a report to the Commonwealth as it pertains to required physical access to the EDC facility.	Offeror must describe its facilities access policies and procedures.
6.	SLA Reporting - Identify and create environmental service level objectives in	Offeror must describe how it monitors and

	the form of SLAs, and report on the service availability, problems, and corrective actions on a monthly basis. Offeror must assess the EDC facilities and provide a report to the Commonwealth as it pertains to monitoring, maintain and reporting on EDC SLAs.	manages facility availability.
7.	The facilities must be designed and operated with environmentally friendly equipment and techniques, and be SSAE 16 compliant. Offeror must assess the EDC facilities and provide a report to the Commonwealth as it pertains to monitoring, maintaining and reporting on EDC SLAs.	Offeror must list all compliance ratings achieved at the proposed datacenters. Offeror must provide copies of annual SSAE 16 audits for all datacenters used to service the Commonwealth (and its agencies) at the Offeror's expense.
8.	Offeror must schedule (at its expense) a SSAE 16 audit of the EDC datacenter no more than 12 months after the effective date of the contract.	Offeror must provide proof of a valid (updated) SSAE16 certification in the form of audit findings report prior to implementing any Commonwealth service in any other proposed datacenter.
Continual Service Improvement		
9.	Reduce service risks.	Offeror must provide methods to eliminate or mitigate service risks.
10.	Improve service quality.	On a quarterly basis, Offeror must recommend to the Commonwealth team any facility changes that would be appropriate to maintained or improve SLA commitments.
11.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.

12.	Ensure service transparency.	Offeror must provide methods and practice to ensure service transparency, providing visibility into service execution.
13.	Improve/reduce cost of service.	Offeror must provide examples of Facilities Management initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.3.2 Site Operations

The Site Operation service will provide datacenter operations staff and management to operate and monitor the IT computing equipment and Services being provided. The staff will interface with Commonwealth staff to institute best practice datacenter Services. Datacenter operations include, but are not limited to, management of the computing platforms, storage, local area networking, security firewall, tape backup, and offsite tape rotation systems.

Reference Documentation

Exhibit – D.7 - EDC Facility Summary

Exhibit G.6 - PSP - CJIS Security Policy

Exhibit G.9 - PSP – CCHRI

Exhibit G.7 - PSP - Summary of CJIS Requirements

Requirements		Describe Compliance
1.	Monitor and operate the various computer systems, network, network and local disk storage and firewall security systems.	Offeror must describe its facilities site operations including monitoring and general upkeep of the facilities including the following:

	Provide datacenter operations staff to monitor the computer system platforms, associated disk systems, networking Services and firewall and security systems. Ensure proper equipment operations, timely batch jobs processing and appropriate response to any abnormal end and error conditions. The Offeror will support application specific operations as determined by the application owner. This includes executing the troubleshooting procedures required by the application owners as detailed within the CCPM. This may include operational activities and initial troubleshooting steps, contact and escalation lists (aka "Run Book"). This information will be maintained by the Offeror on an application by application basis and will be hosted within the Knowledge Management Portal. A daily operations batch schedule report will be created and used to log normal / abnormal conditions. Abnormal conditions will be investigated for problem determination and rerun. Any abnormal condition that cannot be corrected will be referred to technical support staff for resolution. Properly clean and maintain equipment to minimize problems and outages, at intervals established with the Commonwealth or in compliance with stated and written specifications. Offeror must assess the EDC facilities and provide a report to the Commonwealth as it pertains to monitoring, maintaining and operating	• Processes and Procedures • Tools / Applications • End User Reports o Standard o Custom • Escalation Procedures

	the installed infrastructure.	
2.	For the systems that utilize tape backup Services, Offeror must provide a structured tape management approach. For systems that utilize disk-2-disk backup approach Offeror must provide a structured disk-2-disk approach. Manage and maintain the tape backup system and Services. Rotate designated tapes to, and returned from approved offsite storage location. Maintain detailed audit log of tape movement. Some agency applications fall under additional CJIS and CCHRI security requirements for tape backups. Provide datacenter operations staff to manage and maintain the tape management system. Tapes will be rotated to, and returned from an approved offsite vaulting subcontractor. An automated software process will be utilized to report the completion status of backup processing, with electronic notification of failures sent to Offeror technical support, and identified Commonwealth staff for follow up and corrective action. Provide the facilities to Retrieve External Storage Media from on-site and off-site storage as requested by the Commonwealth or as required in an emergency. Wipe or erase the data and configuration information resident on the media prior to disposal or re-use, and in accordance with Commonwealth standards.	Offeror must describe its tape management approach and describe the process to work with the Commonwealth Agencies to provide a classification and categorize tapes per the type of data contained on the tapes. Offeror must describe its disk-2-disk backup approach. Offeror must assess the EDC tape backup facilities and provide a report to the Commonwealth as it pertains to manage and operated the installed tape backup systems and media operations.

	Dispose of retired media in an environmentally sound manner after purging any Commonwealth data using Commonwealth, and/or Federal guidelines/policies prior to disposing of media. Operate media libraries and library management systems as required to provide the Services. Maintain an existing inventory control system to properly manage External Storage Media in storage and prepare them for shipment to the contingency site.	
3.	Monitor physical access and security of the datacenter. Video surveillance is required. Staff the datacenter with appropriate level of staff and management 24/7/365. The Offeror must monitor physical access to the datacenter and respond to security incidents in a consistent and auditable manner. All breaches will be reported to the Commonwealth for review and follow up action as required. Monitoring of the video system for all entry points and throughout the datacenter and tape storage areas will be included in this responsibility. Offeror will be required to adhere to the Commonwealth requirements for background checks and security clearances. Commonwealth verification that the requirements have been met will be necessary prior to Offeror working on Commonwealth related systems.	Offeror must describe its physical access and security monitoring approach for proposed Offeror datacenters including staff roles, responsibilities and background check process. Offeror must assess the EDC current physical access and security plan and provide a report to the Commonwealth as it pertains to any required upgrades.

4.□	Manage and maintain equipment configuration inventory system. Provide staff to create and maintain a configuration record for all hardware and software components in the datacenter. This must be an accurate record of all software, computing, disk storage, tape, network, racking, cables, and environmental equipment.	Offeror must describe the proposed approach to managing the support of its datacenter technology.
5.□	Provide programs and processes to alter the operational environment, and to refresh the Services at asset end-of-life or implementation of new technology Services, as these Services are needed.	Offeror must describe solution and approach to meet this requirement.
6.□	Identify and create service objectives for the site operational Services in the form of SLAs, and report on the service availability, problems, and corrective actions on a monthly basis.	Offeror must describe how it monitors and manages facility operations to meet/exceed the agreed to availability service levels.
Continual Service Improvement		
7.□	Reduce service risks.	Offeror must provide methods to eliminate or mitigate service risks.
8.□	Improve service quality.	On a quarterly basis, Offeror must also recommend to the Commonwealth team any site operational changes that would be appropriate to maintained or improve SLA commitments.
9.□	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
10.□	Ensure service transparency.	Offeror must provide methods and practices to ensure service transparency, providing visibility into service execution.

11.	Integrate Continuous Improvement Program processes into Availability Management and Service Level Management.	Offeror must describe offering in this area including the projected impacts/benefits.
12.	Improve/reduce cost of service.	Offeror must provide examples of Site Operations initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.4 Managed Hosting Services

For all Managed Hosting Services, the Offeror must actively monitor the daily operations of the infrastructure used to provide the services. The Offeror must execute the troubleshooting procedures required by the application owners as detailed within the CCPM. This may include operational activities and initial troubleshooting steps, contact and escalation lists (aka "Run Book"). This information will be maintained by the Offeror on an application by application basis and will be hosted within the Knowledge Management Portal.

3.2.4.1 Windows Support

This service will provide hosting, operations and support Services for Microsoft Windows based servers (physical and virtual) located at the central datacenters. Offeror must support various hardware systems and various versions of the Microsoft operating systems, and support service software. The Offeror must provide support for both physical and virtual servers. Currently the Commonwealth utilizes virtualization technology from VMware and Microsoft's Hyper-V. See attached Exhibits for hardware and software details. The number and level of support staff members required to perform the below listed tasks will be determined by the Offeror, based on number of Commonwealth clients, hardware, software, and operating systems being serviced.

Listed below are the basic Services required, but not inclusive of all Services needed, to manage an enterprise class datacenter required by the Commonwealth. Offeror must include these Services within the base level of Services in this Offering. Change requests will be approved and authorized using the change management process.

Requirements		Describe Compliance
1.	Monitor local operations, troubleshoot and resolve operational issues. Actively monitor the daily operations of all MS Windows servers. Maintain a log for each server detailing hardware / software configuration and critical service operations. Document review of the system logs on a weekly basis to ensure critical system Services are processing without errors. Complete weekly server log indicating which logs were reviewed, date and	Offeror must describe its approach to supporting Windows based server environment including the following: • Processes and Procedures • Tools / Applications • End User Reports o Standard o Custom • Tiered Service/Support Levels • Escalation Procedures

	initial the log.	
2.	Monitor system backup processing on a daily basis. Review daily backup log for successful completion. Note failures, and correct the problems. Create problem record for any abnormal condition and any repairs that have been made, re-execute as appropriate. An automated software process will be utilized to report the completion status of backup processing, with electronic notification of failures sent to Offeror technical support, and identified Commonwealth staff for follow up and corrective action.	Offeror must describe its approach to performing an initial review and audit of the backup policies, procedures and reports, to ensure the accuracy of the backup schedules, retention periods, target directories, and recovery point objectives. Offeror must describe its approach to identify gaps and potential risks, and how those gaps and risks will be resolved. Offeror must describe how the authorized Commonwealth users will have online access to backup logs.
3.	Provide Microsoft Hyper-V and VMware trained staff holding manufacturer recognized certifications for hardware and software technical support. Post award; provide the Commonwealth a resume or CV for each operational staff member assigned to this engagement. A copy will be maintained on Offeror file including verified background clearances as required.	Offeror must submit a representative sample of staff resumes typically provided for these positions detailing their experience, education, and certifications.
4.	Provide cost effective operational and technical support for the Windows computing platform. Provide platform level operational and technical support for the computing platform. Provide Level 2 and Level 3 Support to the Service Desk and/or Commonwealth Users.	Offeror must describe its approach to providing and maintaining different tiered levels (i.e. Level 2 & Level 3 Technical Support) of support. Offeror must provide a representative sample of available tiered service support Services.

	Provide a tiered level of support Services (e.g. Gold, Silver, and Bronze). Provide technical advice and support to the Application Development and Maintenance (ADM) and Database Administration (DBA) staffs, as required. Post award; provide Commonwealth with a resume or CV for each operational staff member assigned to this engagement. A copy will be maintained on Offeror file.	
5.	Ensure network connectivity and consistent system response times. Utilize automated system management tool(s) to ensure real- time monitoring and notification of server availability and response times. Stop / Start times of servers will be a source of input for SLA measurements. Identify tool set(s).	Offeror must describe its real-time monitoring approach and its toolset for providing and maintaining network availability and performance. Offeror must identify tools it uses to support network availability and performance.
6.	Ensure server operating systems are maintained with the current patch level, based on the Services provided by the server. Analyze monthly service patches and determine which need to be applied, by server type. Create a change record, log the update in the server log, install based on server maintenance schedule and update the server configuration record. Notify impacted Commonwealth users immediately of any unscheduled service interruptions via email/web. The Offeror must be document normal	Offeror must describe its approach to patch management. Offeror must identify tools it uses to manage system patches. Offeror must describe its approach to testing and validating updates to the OS and 3rd Party software that it supports. Offeror must describe its approach to communicate unscheduled and scheduled outages, including escalation process.

	work hours and holiday schedules with each agency to determine the contact method and escalation process of each Commonwealth agency.	
7.□	Provide a review and analysis of system performance/capacity to determine if current performance/capacities are sufficient to support the needs of the stakeholders.	Offeror must perform an initial review and audit of the current usage, procedures and reports and provide an analysis of the current usage, processes and reports currently being supported. Offeror must document its review and audit findings and recommendations.
8.□	User Account Management - Provide certified operating system administration staff to create and maintain the registration of profiles, associated groups, and the security permissions required to service the approved client base of the operating systems.	Offeror must describe its approach to managing user accounts.
9.□	Procurement Planning Provide program and processes to refresh the hardware at asset end-of-life, and as upgrades are needed to meet anticipated growth in utilization.	Offeror must describe its programs and processes for procuring new or upgraded systems.
10.□	SLA Reporting Collect actual system availability, utilization and response time data. On a monthly basis, Offeror must create a Service Level Agreement report for the Commonwealth team.	Offeror must describe processes and toolsets it uses for monitoring and maintaining service levels. Offeror must provide a representative sample of an SLA report.
11.□	Installation of Windows updates/patches must be coordinated by Agency. For IES, windows version upgrades must be SAP certified. Coordinate at an agency level and account for any required patching as	Offeror must describe its programs and processes for applying system updates/patches.

	technology upgrades require.	
12.	The Offeror must provide Software License Management.	Offeror must describe solution and approach to meet this requirement.
Continual Service Improvement		
13.	Reduce service risks.	Offeror must provide methods to eliminate or mitigate service risks.
14.	Improve service quality.	On a quarterly basis, Offeror must also recommend to the Commonwealth team any system changes that would be appropriate to maintain or improve SLA commitments.
15.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
16.	Ensure service transparency.	Offeror must provide methods and practices to ensure service transparency, providing visibility into service execution.
17.	Improve/reduce cost of service.	Offeror must provide examples of Windows Support initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.

Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.4.2 Storage Management

The Storage Management service will provide hosting and operational support Services for storage management systems. Storage management systems must be maintained at current support levels for optimal performance, recoverability, and secure operations. Systems will be located in the Offeror's datacenters. The Offeror must support the hardware and software components of these systems.

The proposed storage management service and solution must address adherence to multiple security and compliance requirements relating to the storage and management of multiple types of data assets (e.g. CHRIA law, criminal history).

Offeror Response		

3.2.4.3 ERP Hosting – SAP / Oracle

ERP Hosting – SAP service will provide hosting and operational support Services for two SAP-ERP systems that are currently located at the DPH. One system Services the General Accounting System application, and the other Services the Integrated Tax System application for the Department of Revenue. Each application has associated development and testing environments support on segregated equipment. Offeror must support various production and non-production versions of the applications and the associated hardware. The roles and the number of staff members required to perform the below listed tasks will be determined by the Offeror.

Due to the critical and complex nature of these SAP environments, the Commonwealth requires an experienced SAP hosting provider. The Offeror's proposed target infrastructure design for the Commonwealth's SAP environments must include a certified SAP sizing report prior to migration of the systems.

The ERP Hosting – Oracle service will provide hosting and operational support Services for the current Oracle Enterprise system utilized by the Pennsylvania Liquor Control Board (PLCB). The application has associated development and testing environments support on segregated equipment. Offeror must support various production and non-production versions of the applications and the associated hardware.

3.2.4.5 Mainframe Services

The Mainframe Services will provide hosting and operational support Services for both IBM and Unisys mainframe systems. These mainframe systems run several Logical Partitions (LPAR's) and Integrated Facility for Linux (IFL) partitions. Offeror must support the mainframe operating systems and the management of the associated partitions. The number of support staff members required to perform the tasks listed below will be determined by the Offeror.

Listed below are the basic Services required to manage the Mainframe systems required by the Commonwealth. Offeror must include these Services in addition to the base level of Services in this Offering.

Exhibit B.6 - DPH - COPA NETWORK

	Requirements	**Describe Compliance**
1.	Provide Mainframe systems and operations (Unisys, IBM). Ability to purchase metered IBM & Unisys Million Instructions Per Second (MIPS). Monitor local operations, troubleshoot and resolve operational issues. Actively monitor the daily operations of all mainframe (current) systems.	Offeror must describe its approach to supporting the needs of the Commonwealth including the following: • Processes and Procedures • Tools / Applications • End User Reports o Standard o Custom • Tiered Service/Support Levels

	Assume responsibility for all master and subordinate console functions. Issue operator commands to control all In-Scope platforms throughout the organization. Provide all tools and apps that are currently being provided, for example MAPPER/APPMAP, browser based terminal emulation access, and middleware components (like OpenTI, IBM WBM & WMQ, etc.) that are critical to agency operations and application usage. Assume the responsibility for and perform all console operations. Monitor the performance of online interactive traffic and take appropriate action to resolve online-system-related incidents and/or problems, including escalating (as appropriate) the incident and/or problem to the proper Level 2 Support group. Monitor the transmission of files between the Commonwealth and any other parties as designated by the Commonwealth. Provide operational support for data transmission (send/receive), consistent with commercial or agency standards. Manage, maintain, monitor, and control online and batch process, both scheduled and unscheduled (including on-request processing). Maintain a log for each system detailing hardware / software configuration and critical service operations. Review the system logs on a weekly basis to ensure critical system Services are processing	• Escalation Procedures

	without errors. Maintain and update the operational documentation for all operations procedures and Services.	
2.	Provide a review and analysis of mainframe usage to determine if current usage is required to support the needs of the mainframe stakeholders. Offeror must perform an initial review and audit of the current mainframe usage, procedures and reports and provide an analysis of the current mainframe usage, processes and reports currently being supported. Offeror must document its review and audit findings and recommendations.	Offeror must describe solution and approach to meet this requirement.
3.	Production control and scheduling (including batch jobs) Provide a process of scheduling batch jobs within Commonwealth agency defined windows to achieve maximum performance as long as required batch completion times are met. Provide for automated scheduling of batch work and processes including backups. Provide the capability for agencies to schedule and monitor batch processing. Develop, maintain, and utilize an emergency contact list and escalation procedures to resolve abnormally ended jobs. Resolve abnormally ended jobs caused by conditions external to production	Offeror must describe solution and approach to meet this requirement.

	programs. Repair abnormally ended jobs when possible and perform job restarts in accordance with the Service Management Manual. Check job outputs and print queues, and change job priorities. Notify Commonwealth agency customers in accordance with the notification procedures in the event that applications and batch processing do not execute properly.	
4.	Batch Monitoring Actively monitor batch operations on all mainframe systems on a daily basis. Maintain a log for each batch system and review the system logs on a daily basis to ensure key batch Services are processing without errors. Document review of the system logs on a daily basis to ensure critical batch Services are processing without errors. Notify Commonwealth agencies in accordance with the notification procedures in the event that batch processing does not execute properly. Offeror must provide online monitoring of batch processing by the Commonwealth.	Offeror must describe its approach to supporting the needs of the Commonwealth. Offeror must describe its approach to allowing Commonwealth users to monitor the batch processing online.
5.	Monitor system backup processing on a daily basis. Process to review daily backup log for successful completion. Note any failures, initial and date the log, and correct the problem. Create problem	Offeror must describe its approach to performing an initial review and audit of the backup policies, procedures and reports, to ensure the accuracy of the backup schedules, retention periods, target directories, and recovery point objectives. Offeror must describe its approach to

	record for any abnormal condition and any repairs that have been made. Automated software process will be utilized to report the completion status of backup processing, with electronic notification of failures sent to Offeror technical support, and identified Commonwealth staff for follow up and corrective action.	identifying gaps and potential risks, and how those gaps and risks will be resolved.
6.	Provide cost effective, operational, and technical support for the computing platform. Provide platform level operational and technical support for computing platforms including Mainframe, Storage, AIX, LINUX, SAP, Oracle and Windows architects. Provide Level 2 and Level 3 Support to the Service Desk and/or Commonwealth Users. Provide technical advice and support to the Application Development and Maintenance (ADM) and Database Administration (DBA) staffs, as required. List the service levels for the various levels of service tiers that can be provided. See **Schedule J.1 Datacenter Service Level Management** for the definitions of the expected options.	Offeror must describe its approach to supporting the needs of the Commonwealth.
7.	Ensure network connectivity to COPANET, and consistent system response times. Utilize automated system management tool(s) to ensure real time monitoring and notification of system availability	Offeror must describe its real-time monitoring approach and toolset to provide and maintain network availability and performance. Offeror must identify tools it uses to support

	and response times. Stop / Start times of servers will be a source of input for SLA measurements	network availability and performance.
8.	Ensure operating systems are maintained with the current system patch level, based on the Services provided by the server. Analyze monthly service patches and determine which patches need to be applied. Create a change record, log the update in the system log, and install based on system availability schedule. Notify the Commonwealth of any scheduled or unscheduled service interruptions with consideration to Commonwealth scheduled holidays and standard workweek. Implement a Patch Management Program to ensure the timely application of updates on all infrastructure platforms in accordance with Commonwealth IT policy guidelines.	Offeror must describe its approach to supporting the needs of the Commonwealth. Offeror must describe its approach for testing and validating updates to the OS and 3rd Party software that it supports. Offeror must describe its approach to communicate unscheduled and scheduled outages, including escalation process.
9.	User Account Management Provide certified system administration staff to create and maintain the registration of profiles, associated groups, and the security permissions (including password management) required to service the approved client base of the system and application.	Offeror must describe its approach to supporting the needs of the Commonwealth.
10.	Procurement Planning Provide a program and process to refresh the hardware at asset end-of-life, and when upgrades are needed to	Offeror must describe its approach to supporting the needs of the Commonwealth.

	meet anticipated growth in utilization	
11.	SLA Reporting Collect actual system availability, utilization and response time data. Create a SLA report on a monthly basis, for the Commonwealth and Offeror.	Offeror must describe its approach to supporting the needs of the Commonwealth.
12.	The Offeror must provide Software License Management.	Offeror must describe solution and approach to meet this requirement.
13.	Coordinate at an agency level and account for any required patching as technology upgrades require.	Offeror must describe its approach to supporting the needs of the Commonwealth.
Continual Service Improvement		
14.	Reduce service risks. Methods to eliminate or mitigate service risks.	Offeror must describe its approach to supporting the needs of the Commonwealth
15.	Improve service quality. On a quarterly basis, make recommendations to the Commonwealth team any system changes that would be appropriate to maintain or improve SLA commitments.	Offeror must describe its approach to supporting the needs of the Commonwealth.
16.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
17.	Ensure service transparency. Methods and practice to ensure service transparency, providing visibility into service execution.	Offeror must describe its approach to supporting the needs of the Commonwealth.
18.	Improve/reduce cost of service.	Offeror must provide examples of Mainframe Support initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to

		meet or exceeded ROI (Return on Investment) analysis projections.

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.4.6 Security & Firewall

The Security & Firewall service will provide hosting and operational support Services for security products and firewalls located at the datacenters. These security devices and Services protect the equipment and applications in the datacenters from malicious attempts to penetrate the computing environment with worms, phishing, Trojan horse malware, and unlawful data access. Offeror must install and maintain mainstream security hardware and software utilizing current industry best practices sufficient to protect the enterprise class datacenter environments with a significant volume of sensitive class data (e.g. HIPAA, CJIS, CHRIA, PCI, PII, etc.). The number of support staff members required to perform the tasks listed below will be determined by the Offeror.

Listed below are the basic Services required to manage the security & firewall systems required by the Commonwealth. Offeror must include these Services in addition to the base level of Services in this Offering.

Reference Documentation

Exhibit A - Commonwealth Network Environment

Exhibit J.1 through J.3 - Commonwealth Security and Compliance Requirement

Exhibit G.6 - PSP - CJIS Security Policy

Exhibit G.9 - PSP - CCHRI

Exhibit G.7 - PSP - Summary of CJIS Requirements

Exhibit G.12 - PSP - CHRIA Handbook

Requirements		Describe Compliance
1.	Monitor local security operations, troubleshoot and resolve operational issues.	Offeror must describe its approach to supporting the needs of the Commonwealth including the following:

	Actively (normal daily process) monitor the operations of all security, firewall systems and security zones. Maintain a log for each server/appliance/system and review the system logs on a daily basis to ensure key system Services are processing without errors. Provide the ability to import data to agency SIEM or enterprise SIEM tool for correlation and reporting purposes. Provide the ability for Commonwealth agencies to request security modifications (firewall changes) as documented in the CCPM. Document review of the system security logs on a weekly basis to ensure critical system Services are processing without errors. Complete weekly server log indicating which logs were reviewed, date and initial the log.	• Processes & Procedures • Tools / Applications • End User Reports o Standard o Custom • Tiered Service/Support Levels • Escalation Procedures Offeror must describe prior experience relative to providing datacenter management and support of CJIS, CCHRI, HIPAA and PCI compliant systems.
2.	Provide security training to Commonwealth personnel specific to the security Services being delivered. Provide the Commonwealth with a resume or CV for each operational staff member assigned to this engagement. Comply with agency background checks and clearances as defined in Appendix A - Terms and Conditions.	Offeror must describe its approach to supporting the needs of the Commonwealth. Offeror must submit a representative sample of staff resumes typically provided for these positions and describe the process to ensure compliance of background checks and clearances.
3.	Achieve cost effective 24/7 security operational coverage for this critical system. Provide dedicated security support staff onsite during scheduled business days, and automated log and notification	Offeror must describe its security operations coverage and how it will be applied.

	systems to alert security team of possible intrusion events in real time mode. Provide Level 2 and Level 3 Support to the Service Desk and/or Commonwealth Users. Security staff must be available to respond and evaluate the severity of the event 24/7/365.	
4.	Ensure network connectivity, and ensure consistent system response times. Utilize automated system management tool(s) to ensure real-time monitoring and notification of server availability and response times.	Offeror must describe its real-time monitoring approach and toolset to provide and maintain network availability and performance. Offeror must identify tools it uses to support network availability and performance.
5.	Ensure server/appliance operating systems are maintained with the current system patch level. Implement a Patch Management Program to ensure the timely application of security updates on all infrastructure platforms in accordance with Commonwealth IT policy guidelines. Ensure signature and threat analysis files are updated on a regular basis, and conform to industry best practices. Analyze monthly service patches and determine which patches need to be applied, by server type. Create a change record, log the update in the server log, and install based on server availability schedule. Notify the Commonwealth of any scheduled or unscheduled service interruptions.	Offeror must describe its approach to supporting the needs of the Commonwealth. Offeror must describe its approach for testing and validating updates to the OS and 3rd Party software that it supports. Offeror must describe its approach to communicating unscheduled and scheduled outages, including escalation process.

6.	Provide active security operations, corrective action, and reporting by utilizing Offeror software to monitor inbound and outbound traffic for malicious patterns and content, and take appropriate protective measures. The ability to utilize security management software to detect threats and analyze firewall logs, to proactively detect and protect from malicious events. Comply with agency specific security requirements. Comply with all agency and OA/OIT security policies and ITBs. On a quarterly schedule, run appropriate penetration testing, and report results to Commonwealth and Offeror. Create monthly report on events, incidents and corrective activities. Report that indicates systems not in compliance with security standards. Real time reporting of security breaches.	Offeror must describe its Security Operations Process and how it will be applied.
7.	SLA Reporting including but not limited to collecting actual system availability, utilization and response time data. Create a Service Level Agreement report for the Commonwealth and Offeror on a monthly basis.	Offeror must describe its approach to supporting the needs of the Commonwealth.
8.	Software License Management	Refer to 3rd Party Software Management service.

Continual Process Improvement		
9.	Reduce service risks.	Offer methods to eliminate or mitigate service risks.
10.	Improve service quality. Make recommendations to the Commonwealth team any system changes that would be appropriate to maintain or improve SLA commitments on a quarterly basis.	Offeror must describe its approach to supporting the needs of the Commonwealth.
11.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
12.	Ensure service transparency using documentation methods to ensure service transparency, by providing visibility into service execution.	Offeror must describe its approach to supporting the needs of the Commonwealth.
13.	Improve/reduce cost of service.	Offeror must provide examples of Security and Firewall Support initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.4.7 Database Management Services

The Database Management Service will provide the Commonwealth with a "managed database" service offering. The service must include the database platform (Hardware/Software) and the ongoing database management administration Services. The Offeror must provide a multi-tiered level of service (e.g. Gold, Silver, and Bronze) across multiple database platforms. While the Commonwealth's application portfolio (over 2,000 applications) currently utilizes numerous database technologies, the majority of the applications that are utilizing database technologies are using Oracle, Microsoft SQL, IMS, Sybase, or DB2.

It is anticipated the Database Management Services will be an optional service that can be utilized by the Agencies beyond the basic infrastructure Services.

Reference Documentation

N/A

Requirements		Describe Compliance
1.	Design, manage, and administer database environments that support multiple business applications.	Offeror must describe proposed approach to designing and supporting enterprise level database platforms and Services that support multiple agency business applications.
2.	Provide Level 2 and Level 3 Support to the Service Desk and/or Commonwealth Users.	Offeror must describe its approach to supporting the needs of the Commonwealth including the following: • Processes & Procedures • Tiered Service/Support Levels • Tools / Applications • Escalation Procedures • End User Reports o Standard o Custom
3.	Monitor database backup and recovery processing on a daily basis. Review daily backup log for successful completion. Note any failures, initial and date the log, and correct the problem. Create problem	Offeror must describe its approach to perform an initial review and audit of the backup and recovery policies, procedures and reports, to ensure the accuracy of the backup schedules, retention periods, target directories, and recovery point objectives. Offeror must describe its approach to

	record for any abnormal condition and any repairs that have been made. Automated software process will be utilized to report the completion status of backup processing, with electronic notification of failures sent to Offeror technical support and identified Commonwealth staff for follow up and corrective action.	identifying gaps and potential risks, and how those gaps and risks will be resolved.
4.	Provide a multi-tiered level of service (e.g. Platinum, Gold, Silver, Bronze, and Basic) for Oracle, Sybase, Microsoft SQL, IMS or DB2 database platforms. Provide Level 2 and Level 3 Support to the Service Desk and/or Commonwealth Users.	Offeror must describe its approach to providing multi-tiered Services level.
5.	Utilize the proposed service management Services (e.g. Incident, Service Request, Change, Configuration) to manage database management Services with multiple agency customers.	Offeror must describe how its proposed database management Services will support multiple agency service requests.
6.	Provide a review and analysis of system performance/capacity to determine if current performance/capacities are sufficient to support the needs of the stakeholders.	Offeror must perform an initial review and audit of the current usage, procedures and reports and provide an analysis of the current usage, processes and reports currently being supported. Offeror must document its review and audit findings and recommendations.
7.	Monitor system backup processing on a daily basis. Review daily backup log for successful completion. Note failures, and correct the problem. Create problem record for any abnormal condition and any repairs that have	Offeror must describe it approach to performing an initial review and audit of the backup policies, procedures and reports, to ensure the accuracy of the backup schedules, retention periods, target directories, and recovery point objectives. Offeror must describe its approach to identifying gaps and potential risks, and how

	been made. An automated software process will be utilized to report the completion status of backup processing, with electronic notification of failures sent to Offeror technical support, and identified Commonwealth staff for follow up and corrective action.	those gaps and risks will be resolved.
Continual Process Improvement		
8.	Reduce service risks.	Offeror must provide methods to eliminate or mitigate service risks.
9.	Improve service quality.	On a quarterly basis, Offeror must also recommend to the Commonwealth team any system changes that would be appropriate to maintain or improve SLA commitments.
10.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
11.	Ensure service transparency.	Offeror must provide methods and practices to ensure service transparency, providing visibility into service execution.
12.	Improve/reduce cost of service.	Offeror must provide examples of Database Management Support initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.4.8 Limited-Use Colocation Services

While the Commonwealth's goal is to move to a fully managed infrastructure Services model, it is anticipated that there will be a need for the Offeror to provide some limited co-location Services within its proposed datacenter Services solution. Some examples of where colocation Services may be required are:

- Support for existing systems in the EDC prior to transformation to a fully managed service.
- 3rd Party Vendor Equipment that requires co-location with the primary systems for performance and/or security reasons.

The Offeror must provide datacenter co-location Services with the following options:

- Co-location Service Option 1: Datacenter Only (Rackspace, power, network connectivity, basic infrastructure Services)
- Co-location Service Option 2: Datacenter with Managed Services Option (Bronze, Silver, Gold Tiers) – Technology owned maintained by 3rd Party or Commonwealth
- Co-location Service Option 3: Remote Hands Support

Currently there are 3 areas within the Commonwealth EDC that are supporting co-location Services. EDC facility summary is provided as **Exhibit D.7**. While many of these systems will be migrated to a fully managed service over time, the Offeror shall plan for co-location space in its Datacenter Architecture.

Reference Documentation

Exhibit D.1 through D.15 Series - Enterprise Datacenter (EDC) Exhibits

Requirements		Describe Compliance
1.	Provide colocation Services within each of the datacenters. One of those centers will be the Commonwealth EDC.	Offeror must describe how each of the datacenters will support its co-location offering within its proposed datacenter architecture.
2.	Provide Colocation Service Option 1: Datacenter Only (Rackspace, power, network connectivity, basic infrastructure Services)	Offeror must describe how it will support this colocation service option.

3.□	Provide Co-location Service Option 2: Datacenter with Managed Services Option (Bronze, Silver, Gold Tiers) – Technology owned maintained by 3rd Party or Commonwealth	Offeror must describe how it will support this co-location service option.
4.□	Provide Co-location Service Option 3: Remote Hands Support	Offeror must describe how it will support this co-location service option.
Continual Process Improvement		
5.□	Reduce service risks.	Offeror must provide methods to eliminate or mitigate service risks.
6.□	Improve service quality.	On a quarterly basis, Offeror must also recommend to the Commonwealth team any system changes that would be appropriate to maintain or improve SLA commitments.
7.□	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
8.□	Ensure service transparency.	Offeror must provide methods and practices to ensure service transparency, providing visibility into service execution.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.5 Capacity on Demand Services

3.2.5.1 Server Capacity on Demand

The Server Capacity On Demand is an Infrastructure as a Service (IaaS) offering that ensures the ready availability of server and mainframe capacity to accommodate cyclical, and seasonal, processing requirements, sudden or unplanned production demands, and short-term application development needs. Server capacity may be physical or virtual as requested by the Commonwealth.

The Server Capacity On Demand would include support for the following system platforms:

- X86
  - Windows
  - Linux
- I Series
  - i5/OS
- P Series
  - Linux
  - AIX
- Mainframe
  - IBM
  - Unisys

Reference Documentation

N/A

	Requirements	Describe Compliance
1.	Provide a provisioning capability to support on-demand requests for server resource capacity. The Commonwealth will require access to additional capacity on demand for the following platforms: X86 • Windows • Linux IBM I Series • i5/OS IBM P Series	Offeror must describe its request and provisioning process for each of the anticipated platform systems. Offeror must describe its approach to supporting the needs of the Commonwealth including the following: • Infrastructure/Capacity • Tiered Service/Support Levels • Tools / Applications to manage and maintain capacity • End User Reports

	• Linux • AIX Mainframe • IBM • Unisys	o Standard o Custom Offeror must describe its experience operating and managing mixed computing environments such as the Commonwealth.
2.	Maintain an adequate inventory of Windows/Linux, mid-range, and Mainframe server capacity that will be sufficient to satisfy forecasted informal, ad hoc, and cyclical Commonwealth requests.	Offeror must describe its approach to supporting the needs of the Commonwealth.
3.	As a function of ongoing account management, meet with the Commonwealth/Agencies to assess future server requirements.	Offeror must describe its approach to supporting the needs of the Commonwealth.
4.	Encourage Commonwealth server conservation via server virtualization when appropriate.	Offeror must describe its approach to supporting the needs of the Commonwealth.
5.	Provide expedited service, when requested, to satisfy urgent requirements.	Offeror must describe its approach to supporting the needs of the Commonwealth.
6.	Provide a self-provisioning tool to be used by the agencies to order and configure servers.	Offeror must describe its approach to supporting the needs of the Commonwealth.
Continual Process Improvement		
7.	Reduce service risks.	Offeror must describe its approach and provide examples of previous Offeror initiatives aimed at eliminating or mitigating service risks.
8.	Improve service quality.	Offeror must describe its approach and provide examples of previous Offeror initiatives aimed at improving service quality.

9.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
10.	Provide service transparency.	Offeror must describe its approach and provide examples of previous Offeror initiatives aimed at providing service transparency; in particular, visibility into the service execution process.
11.	Ensure service sustainability.	Offeror must describe its approach and provide examples of previous Offeror initiatives aimed at ensuring service sustainability; in particular, efforts targeted at cost containment and cost reductions.
12.	Improve/reduce cost of service.	Offeror must provide examples of On-Demand Server initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.2.5.2 Storage Capacity on Demand

The Storage Capacity On Demand service is an Infrastructure as a Service (IaaS) offering that ensures the ready availability of storage capacity to accommodate cyclical, or seasonal, storage requirements, sudden or unplanned production demands, short-term application development needs, and storage access for web enabled devices.

Reference Documentation

N/A

Requirements		Describe Compliance
1.	Maintain an adequate access to, or supply of storage area equipment, to satisfy forecasted informal, ad hoc, and cyclical Commonwealth requests.	Offeror must describe its approach to supporting the needs of the Commonwealth including the following: • Infrastructure/Capacity • Tiered Service/Support Levels • Tools / Applications to manage and maintain capacity • End User Reports o Standard o Custom
2.	Meet with the Commonwealth on a annual basis, or as requested, to assess future storage requirements.	Offeror must describe its approach to supporting the needs of the Commonwealth.
3.	Encourage data storage conservation via data de-duplication, compression, and other industry techniques.	Offeror must describe its approach to supporting the needs of the Commonwealth.
4.	Provide expedited data storage service to satisfy urgent requirements, as requested.	Offeror must describe its approach to supporting the needs of the Commonwealth.
5.	Provide online storage capabilities (Centralized Private Cloud Storage), which includes web service, browser, and mobile device accessibility, that are fully secure, (compliant with ISO 27000, NIST 800-53, and Secure	Offeror must describe its approach to supporting the needs of the Commonwealth.

	SDLC). This service must provide file-level encryption, multiple hierarchical permission levels, account level dynamic storage-sizing, and anti-virus capability.	
6.	Storage solution must include the capability to make quick copies of databases (SNAPS, Flash copies). Storage backup proposals must include disk-2-disk solutions.	Offeror must describe its approach to supporting the needs of the Commonwealth.
Continual Service Improvement		
7.	Reduce service risks.	Offeror must describe its approach and provide examples of previous Offeror initiatives aimed at eliminating or mitigating service risks.
8.	Improve service quality.	Offeror must describe its approach and provide examples of previous Offeror initiatives aimed at improving service quality.
9.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
10.	Provide service transparency.	Offeror must describe its approach and provide examples of previous Offeror initiatives aimed at providing service transparency; in particular, visibility into the service execution process.
11.	Ensure service sustainability.	Offeror must describe its approach and provide examples of previous Offeror initiatives aimed at ensuring service sustainability; in particular, efforts targeted at cost containment and cost reductions.
12.	Improve/reduce cost of service.	Offeror must provide examples of On-Demand Storage initiatives that have been implemented or can be utilized to achieve

		reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.5.3 DR Infrastructure on Demand

The DR Infrastructure On Demand service is an infrastructure as a service (IaaS) offering that ensures the ready availability of DR infrastructure; servers, storage systems, networking capabilities, etc. This infrastructure will enable Commonwealth datacenters to recover critical business applications and data in the event of a disaster.

Reference Documentation

N/A

	Requirements	Describe Compliance
1.	Maintain an adequate inventory of servers, storage systems, and networking capacity sufficient to satisfy forecasted informal, ad hoc, and cyclical Commonwealth requests.	Offeror must describe its approach to supporting the needs of the Commonwealth including the following: • Processes and procedures for developing and testing DR Plans • Capacity (servers, storage, etc.) • Tiered Service/Support Levels • Tools / Applications to manage and maintain capacity • End User Reports

		o Standard o Custom
2.	Meet with the Commonwealth on a annual basis and as requested to assess its future DR requirements.	Offeror must describe its approach to supporting the needs of the Commonwealth.
3.	Revise datacenter and disaster recovery plans, upon request of the Commonwealth.	Offeror must describe its approach to supporting the needs of the Commonwealth.
4.	Provide support for the Commonwealth with identifying and establishing DR or Continuity of Government (CoG) capabilities and plans.	Offeror must describe its approach to supporting the needs of the Commonwealth.
Continual Process Improvement		
5.	Reduce service risks.	Offeror must describe its process and provide examples of previous Offeror initiatives aimed at eliminating or mitigating service risks.
6.	Improve service quality.	Offeror must describe its process and provide examples of previous Offeror initiatives aimed at improving service quality.
7.	Improve client satisfaction.	Offeror must provide examples of previous Offeror initiatives aimed at continually improving client satisfaction.
8.	Provide service transparency, in particular, visibility into the service execution process.	Offeror must describe its process and provide examples of previous Offeror initiatives aimed at providing service transparency.
9.	Ensure service sustainability, in particular, efforts targeted at cost containment and cost reductions.	Offeror must describe its process and provide examples of previous Offeror initiatives aimed at ensuring service sustainability.

10.	Improve/reduce cost of service.	Offeror must provide examples of On-Demand Infrastructure initiatives that have been implemented or can be utilized to achieve reduced costs of Services and to meet or exceeded ROI (Return on Investment) analysis projections.

Deliverables

Deliverables are defined in **Schedule K – Key Program Deliverables**

Offeror Response

3.2.5.4 Additional Technical Services

The Commonwealth may require additional technical support beyond the standard service level based infrastructure Services. The availability and access to skilled resources would complement the standard hosting offerings. The Offeror is expected to provide these additional resources for both short and longer-term engagements.

Reference Documentation

N/A

	Requirements	Describe Compliance
1.	Provide access to skilled technology resources. Additional technology support Services categories include but are not limited to: • Infrastructure (mainframe, mid-range and x86) Architects/Engineers • Performance Specialists • Database Architects • Database Analysts • Security Architects	Offeror must describe its ability to support both short and long-term assignments for a variety of technology skill sets. Offeror must provide representative resumes within each skill category. Offeror must provide a rate card for each resource category in the Cost Matrix.

	• Security Analysts • Unix (AIX, Linux) Administrators • Windows Server Administrators • Mainframe Systems Programmers • Batch Administrators • Microsoft Product Specialists (e.g. Exchange, SharePoint) • 3rd Party Software Product Specialists • Basis and SAP Oracle support	
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.3 Transition Services

3.3.1 Transition Services – Guiding Principals

At present, the Commonwealth's information technology Services are hosted at a variety of Commonwealth datacenters, including:

- Shared enterprise facilities - (EDC and DPH) and;
- Agency facilities, for example those managed and maintained by DPW, DOR, DOH, PSP and DLI.

The Commonwealth datacenter locations are identified in Exhibit S - Datacenter locations.

In an effort to reduce datacenter costs, simplify datacenter administration, and provide more robust and reliable information Services to the Commonwealth, the Commonwealth datacenter modernization initiative calls for the phased migration or transition of Commonwealth information Services to the newly-established Offeror managed multi datacenter environment.

The Guiding Principles associated with the transition to the new datacenter environment are:

- Transition approach must meet the milestone objectives as described in **Schedule D**.
  - Based on the Commonwealth's number of licenses, additional licenses may be needed for the transition of Services. The Offeror shall be responsible for any additional licenses needed for the transition of service.
  - The Commonwealth, at its sole discretion, may procure the software licenses through existing statewide contract.
- Initial transition approach of the Commonwealth's mainframe and SAP environments requires that the results be as close to the Commonwealth's current configuration as technically possible.
  - Any deviations from current environments must be approved by the Commonwealth.
- Customized approach developed to meet the needs of the Commonwealth
  - The selected Offeror's transition approach shall account for Commonwealth specific needs such as the Transition Considerations and Critical Configuration Considerations as described in Exhibits R and T.
  - The selected Offeror shall implement a discovery process during transition planning to acquire information required to develop a Detailed Transition Plan.
  - The selected Offeror shall include application level transformation models. Transformation models must take into account the initial transition approach that the Commonwealth's mainframe and SAP environments must be as close to the Commonwealth's current configuration as possible.

- Transformation project managers experienced in projects of similar size and complexity.
- Strong governance model, which includes:
  - Clearly defined roles and responsibilities
  - Jointly developed processes
  - Effective meetings and reporting framework to minimize resource requirements while achieving goals
  - Mechanisms in place to identify and address risks and issues
  - Compliance with applicable policies, standards, processes, and procedures
- Effective communication, which includes:
  - Consistent delivery of key messages through well-defined communication plans
  - Tailored communications to target audiences and stakeholders
  - Communications to meet the needs of the Commonwealth.
- Collaboration and teamwork, which includes:
  - Detailed upfront project planning and feedback
  - Agreement on status for reporting purposes
  - Plans scaled to address Commonwealth agency differences in size and complexity
  - Establishment and support for successful deliverable review process
  - Feedback on deliverables throughout the life of the project.

3.3.2 Transition Planning/Governance

The Offeror's Transition Program Management Office (TPMO) will contain a dedicated consolidation specific program team. The team will be responsible to jump-start the consolidation program by bringing respective stakeholders together for a series of transition workshops. The transition workshops will work to align the stakeholders, and produce the following deliverables:

- Overall transition approach and strategy for Server and Mainframe consolidation
- Transition and consolidation governance plan
- Transition risk assessment plan
- Consolidation cost/benefit analysis
- Consolidation stakeholder transition agreements
- Consolidation transition planning guidelines

The TPMO will provide program management Services to deliver architecture, transition plan integration, and organizational change management, as well as quality assurance, verification of testing, financial oversight, and operational readiness for the Mainframe and Server transition/consolidation program. The TPMO will exist under the overall Offeror's PMO office and will include a combination of resources dedicated to the effort full time, plus resources that participate in the program on an as needed basis. The program plan and architecture will be developed by the Offeror and approved by the Commonwealth. The Offeror must ensure processes and tools are implemented to support Transition change control, schedule, quality, communications, risk and issues management.

Proposed Transition Plan

The Commonwealth anticipates the following high-level sequence of transition activities. The Offeror must develop an initial transition plan and present with its proposal. At minimum, the Offeror's proposed Transition Plan must reference these activities and project timeframes.

Transition Activities

The high level transition milestones and deliverables are described in **Schedule D - Transition Milestones** and **Schedule K - Key Program Deliverables**.

Target Datacenter Transitions

The following table includes the target datacenter facilities that are to be initially transitioned by the Offeror. The target datacenter facilities are defined as the physical Commonwealth facilities that are selected to be transitioned to the Offeror's control and/or facilities. The Offeror must coordinate with each Commonwealth agency or datacenter representative to create a *Facility Specific Transition Plan* for each targeted facility. The Offeror must include target datacenter transitions in its proposed Transition Timeline to be included in its proposal. The Offeror must include a "pilot" transition approach to ensure successful transitions of Commonwealth applications and infrastructure. This approach will demonstrate to the agencies that Offeror's approach will be successful before moving forward with additional transition phases.

Offeror must establish a high-speed direct link (not via COPANet) with the current DPH location to enable "systems" connectivity that would facilitate the ability to effect smoother transition of data.

The selected Offeror shall not charge the Commonwealth for completion of a Transition Milestone. All transition costs must be included in the selected Offeror's unit prices for the Services.

	Target Datacenter Facilities		Transition Requirement Notes
	Group1 Transitions		
1	**DPH** (All Agency Mainframe – Unisys/IBM; IES SAP, and all other Agency hosted environments)		• The DPH operation and all of its supported agency application workloads must be successfully migrated out of the current facility to the Offeror's Datacenter. • Operations support will be assumed by the Offeror once the workloads are successfully moved to the new provider's datacenter environment. • Key Transition Milestone(s): o Refer to **Schedule D - Transition Milestones**
1	**EDC**		• Offeror must assume operations support of the EDC datacenter • Key Transition Milestone(s): o Refer to **Schedule D - Transition Milestones**
Group 2 Transition			
2	**DLI**		• The DLI datacenter operations and all of its supported application workloads must be successfully migrated out of the DLI facility to the Offeror's Datacenter. • Key Transition Milestone(s): o Refer to **Schedule D - Transition Milestones**
Group 3 Transitions			
3	**DPW** – Rm. 105, 106 (Lower Environments, PACSES)		• The DPW Rooms 105, 106 datacenter operation and all supported application workloads must be successfully migrated out of the current DPW facility to the Offeror's Datacenter architecture. • Key Transition Milestone(s): Refer to **Schedule D - Transition Milestones**
3	**DOR**		• The DOR datacenter operation and all of its supported application workloads must be successfully migrated out of the current DOR facility to the Offeror's Datacenter architecture.

	Target Datacenter Facilities		Transition Requirement Notes
			• Key Transition Milestone(s): o Refer to **Schedule D - Transition Milestones**
3	**DOH**		• The DOH datacenter operation and all of its supported application workloads must be successfully migrated out of the current DOH facility to the Offeror's Datacenter architecture. • Key Transition Milestone(s): o Refer to **Schedule D - Transition Milestones**
3	**PSP**		• The PSP datacenter operation (Headquarters) and all of its supported application workloads must be successfully migrated out of the current PSP facilities to the Offeror's Datacenter architecture. • Key Transition Milestone(s): o Refer to **Schedule D - Transition Milestones**

3.3.2.1 Transition Program Management

The TPMO function ensures the non-disruptive migration of Commonwealth information Services from current Commonwealth host locations, to the Offeror provided multi datacenter environments.

The Offeror must establish a TPMO and develop the requisite transition plans.

A transition approach and detailed transition plan for each of the Commonwealth's existing Datacenters must be developed by the Offeror and approved by the Commonwealth. The Commonwealth has over 2,000 business applications with over 50% designated mission critical. The Offeror must work with each agency to determine its application environment within each facility. The Offeror's target datacenter environment must be configured and tested prior to migration of the application.

Requirements		Describe Compliance
1.	Establish a TPMO to manage all information service transition	Offeror must describe the proposed TPMO, and discuss the mission, goals and objectives, and the roles and responsibilities of the

	activities. The Office will be jointly administered by Offeror and Commonwealth staff. Provide a communication plan that will provide an information vehicle for all interested parties.	Offeror. Offeror must provide at least one sample where Offeror has successfully created an office similar to the required TPMO.
2.	Provide a functional organization chart for the TPMO, including an estimate of the type and number of full time Offeror resources that will be required to ensure the successful transition of Services from current multiple datacenters to the Offeror's datacenter Services.	Offeror must describe the TPMO structure including but not limited to the number of full time resources and the role of the TPMO in the transition.
3.	Analyze applications and design the required computing architecture to migrate Commonwealth datacenters to Offeror datacenter environments. Hardware, software, network, etc. Work with Commonwealth technical staff to ascertain the requirements to successfully migrate processing to Offeror datacenter environments	Offeror must describe solution and approach to meet this requirement. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.
4.	Optimize Current Process and Procedures – Coordinate with Commonwealth agencies to review and plan for a transition of processes and procedures.	Offeror must describe its overall plan for optimization of the existing processes, procedures, tools, etc. to provide more efficient and effective Services. The description must include approach, plan, and methodologies.
5.	Revise datacenter DR plans on the occasion of major changes to the datacenter hardware, software, or network portfolio to reflect those major changes.	Offeror must describe solution and approach to meet this requirement.
6.	Establish an IT infrastructure that	Offeror must describe solution and approach

	meets all application processing requirements. The Offeror must confirm that the target IT infrastructure meets or exceeds current computing requirements. Work with Commonwealth technical staff to design and build the infrastructure required to support the applications being migrated to the Offeror multi datacenter environment.	to meet this requirement. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.
7.	A multi-faceted Transition Strategy will be required: • Comprehensive; • Non-disruptive; and • Compliant with Commonwealth requirements. The Strategy will address the transition of: • Shared infrastructure elements, as appropriate; and • Specific information Services. • Disparate Agency application architectures and impacts to move to the new environment(s) The Strategy must also address the following: • Cost/Benefit for the Agency • Risks and Risk Mitigation Plan The migration order of the Commonwealth datacenters will be provided by the Commonwealth.	Offeror must describe the transition (interim and steady state strategies) and transition plans that it has employed during other similar size engagements.
8.	Identify mandatory requirements and critical success factors that will have a direct impact on developing a	Offeror must describe the 3-5 characteristics, conditions, or variables it believes will have a direct and critical impact on the effectiveness, efficiency, and viability of the

	successful transition plan	Offeror's solution. Offeror must describe its approach to mitigating risks and ensuring these critical factors are successfully addressed.
9.	Create a Transition Timeline that outlines the overall timeline starting at effective date and continues through delivering transition Services for each of the targeted datacenters.	Offeror must describe the overall timeline from the start of pre-Transition activities through the point at which the Offeror expects it will be delivering predictable, repeatable Managed Service Results that meet the requirements of the RFP. The schedule must include a description of the critical milestones related to Transition efforts for each targeted Commonwealth datacenter. Any critical milestones identified must be included in the Transition Project Plan.
10.	Create a generic Infrastructure Element Transition Plan that may be readily adapted to accommodate specific infrastructure element transitions. Create a prospective Infrastructure Element Transition Plan. Appropriate EDC, DPH and other Agency Datacenter hardware elements may be re-purposed wherever possible.	Offeror must describe a realistic Transition Project Plan to transition the Commonwealth's datacenters to the proposed architecture.
11.	The EDC Managed Services datacenter assets must be managed and maintained by the Offeror until they are transitioned to the Offeror's managed Services. The current maintenance contract for the EDC servers is scheduled to expire on June 30, 2014.	Offeror must describe its transition approach to address the transition of operations and management of the EDC infrastructure from the Commonwealth to the Offeror's support Services and how it intends to address the server maintenance expiration issue.
12.	Create, manage and execute an application / infrastructure migration	Offeror must describe solution and approach to meet this requirement. Offeror must

	plan. The Offeror has the primary responsibility for planning and executing the transition of infrastructure elements, with support of Commonwealth technical and business support staff. The Offeror must provide adequate tools and techniques for moving and migrating Commonwealth data to the new target storage environment. The Offeror must ensure that critical applications are not decoupled from key infrastructure components causing system latency.	provide at least one sample where it has successfully migrated application and hardware. Offeror must describe its proposed tools and techniques for moving and migrating Commonwealth data to the new target storage environment.
13.	Create a generic Information Service Transition Plan that may be readily adapted to accommodate specific information service transitions.	Offeror must outline a prospective Information Service Transition Plan to take over support of migrated Commonwealth systems and applications. Offeror must provide at least one sample where it has successfully completed application and hardware migrated.
14.	Meet with Commonwealth to produce and execute specific Information Service Transition Plans. Select cut over windows that minimize system unavailability and coordinate approval with the affected agency. Communicate to the Commonwealth cut over date and times. Setup a special call number and support staff to take calls concerning the migration, these Services must be made available to transitioned users until the transition is officially signed off as completed. .	Offeror must describe solution and approach to meet this requirement. Offeror must provide at least one relevant example from a prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.
15.	Work with Commonwealth to create testing, business acceptance and	Offeror must describe solution and approach to meet this requirement. Offeror must provide at least one relevant example from a

	fallback plans.	prior engagement, in which it was engaged, that is similar to the needs of the Commonwealth.
16.	Service Management Systems – Offeror must transition all agency system management platforms currently in place to the Offeror, consolidating all system management responsibilities. The Offeror must make available all system management platforms and tools that are currently supporting the Commonwealth infrastructure.	Offeror must describe solution and approach to meet this requirement.
17.	CMDB – Work with the Commonwealth to acquire asset information to support the asset management system and configuration management system.	Offeror must describe its approach to capturing, validating and storing all configuration information required to perform the Services within 120 days of the Effective Date of the Contract. In particular, the Offeror must address how it will identify and relate critical associations (e.g. Application to Server, Server Tier to Application, Application to Disaster Recovery Time Objective, software to server, etc.) for the enterprise. Offeror must describe its approach to transitioning the data and related processes from the existing CMDB or equivalent system/database to the Offeror's solution and how the Offeror must ensure accuracy of data across Service Management areas to ensure accurate and timely invoicing and chargeback to the Commonwealth.
18.	Chargeback – Work with the Commonwealth to interface with the Commonwealth's billing processing and validation ITSM system to provide a chargeback system for new and	Offeror must describe its transition approach to Chargeback Management. Offeror must describe its approach to assisting the Commonwealth in transitioning Commonwealth customers from the existing Chargeback system. The description must

	existing Services available on the Offeror's Service Catalog.	include an expected analysis of the current billing system environment, expected termination assistance, communications plans, strategy for testing and major milestones.
19.	Identify Options and Costs – List the appropriate different options that will satisfy the requirements of the transition scope. Communicate options with the Commonwealth and obtain approval on selected option(s) to proceed.	Offeror must describe proposed approach.
20.	Expand/reconfigure datacenter facilities to accommodate growth in Commonwealth information and information systems.	Offeror must discuss its approach; the expansion/reconfiguration plans must include the EDC.
21.	Produce weekly reports on the progress of the information service transition initiatives.	Offeror must describe its proposed approach to providing weekly transition progress reports.
Deliverables		
Deliverables are defined in **Schedule K – Key Program Deliverables**		
Offeror Response		

3.3.2.2 Security Transition Activities

To maintain continuity of Services, Offeror must provide training to Offeror's employees and subcontractors on security policies during initial phase of the Transition.

Exhibit(s) N.1 through N.2 - PennDOT Exhibits

	Requirements	Describe Compliance
1.	Baseline Security Risk and Vulnerability Assessment Conduct a security risk assessment, which includes a penetration test on the In-Scope systems, an architecture review, and a vulnerability assessment. This assessment must result in a report with recommendations for meeting the Commonwealth's baseline security standard.	Offeror must describe its proposed approach to conducting a security risk assessment including penetration test, which must result in a report with recommendations.

2.	Security Training The Offeror's security team will meet with the Commonwealth's Security teams (OA & Agency) to participate in creating a comprehensive Security Program strategy. The Offeror and the Commonwealth Security teams will develop security awareness training content consisting of the Offeror's Security Plan documentation, Commonwealth OA and agency security policy guidelines. Security training will be mandatory for employees, contractors and subcontractors assigned to work on the Commonwealth's Datacenter project. Appropriate levels of training will be designated and tracked for compliance based on the specific area the employee will be working in. Both an individual's current training status and overall attainment of group training goals must be tracked and reported in the security clearance database. These levels will range from general security awareness that all employees will participate in to task-specific security and governance requirements targeted at operations, specialist, Commonwealth agency specific regulations, or working rules needed for compliance with Commonwealth or federal mandates unique to certain Commonwealth agencies and programs. This training will be delivered both during the new hire process, and on a regular schedule to be determined during Transition as new updates become necessary.	Offeror must describe its proposed approach to developing and implement a comprehensive Security Program.

3.	Initial Security Plan During the initial phase of the Transition the Offeror's security team will work with the Commonwealth's Security Team to create a Security Plan. Begin work on draft policy and procedure documents collectively known as the Security Plan during the start of the Transition Risk and Vulnerability Assessment, which will be completed one (1) month prior to Transition activities. Use best practice security standards (as outlined in the Requirements section of the RFP) along with past engagement experience to provide an outline that will address but will not be limited to the following: security strategy and technology roadmaps, security operations procedures, standard hardware and software security configurations, physical security policies and procedures, security incident management, private and protected data use standards, and audit procedures and reporting standards. This set of documents will be used as the foundation of the Offeror's master security plan for Datacenter operations which will be reviewed and updated on an annual basis.	Offeror must describe its proposed approach to performing the following: • Create a comprehensive Security Plan • Complete a Vulnerability Assessment (at the Offeror expense) • Document the agreed upon security strategy and roadmap • Document security procedures and standards • Document the security incident Management approach including o Standards o Processes o Reporting o Escalation
4.	On-boarding and off-boarding Conduct required background checks for its employees working on the Commonwealth Datacenter project. Where appropriate, use identity management tools to manage access to the systems requiring access by its	Offeror must describe its proposed approach to conducting required background checks for Offeror staff.

	employees. For systems where the Offeror is unable to use its identity management system, assign staff to manage the access. Train Offeror employees on his or her responsibilities within the contract. For logical and physical access to Commonwealth Co-location facilities and environments not managed by the Offeror, the Commonwealth's security access request process will be followed. For off-boarding, update security clearance database with the status of Offeror employee and concurrently update its identity management tool to ensure the access is revoked. Provide a monthly report describing personnel actions including but not limited to; new hires, terminations, any change in employee status/duties, etc.,	
5.	Complete DR Transition Activities Conduct knowledge transfer during the initial phase of the Transition, including review of Commonwealth DR plans and review of Third Party DR contracts. The Offeror must also update the DR plan contact information and any changes made in the first six (6) months of Transition.	Offeror must describe proposed approach to support the Tiered DR Services.

Project Organization Plan

Instructions: The Offeror must describe the integrated staffing organizational plan required to execute the proposed datacenter computing (architecture, build, transition and maintain) approach. This section includes details regarding the Offeror's team, proposed use of subcontractors, and the Offeror's expectations of Commonwealth resources.

The Offeror must provide a staffing plan detailing the number of personnel, level, role and responsibilities. The staffing plan must also detail the team reporting relationships and identify the approach to integration and communication between Offeror, Commonwealth, and Commonwealth designee. This plan must show proposed Offeror personnel by phase (architecture, build, transition and maintain), by personnel level, and by role for the entire project.

<Response>

1. Project Organization Chart

Instructions: Offerors must provide a proposed organization chart showing the Offeror staff including all sub-contractors. The organization chart must include all the key Offeror personnel for each phase of the project and a summary of each key member's high level responsibilities (see Key Positions section below).

<Response>

2. Offeror Key Personnel

This schedule lists the Key Personnel. For the purposes of this schedule and the Contract, the following Offeror roles/titles have the following responsibilities:

a) **Engagement Executive** - The Engagement Executive is responsible for overall accountability of the Commonwealth business relationship and the success of the project. Serves as the primary contact for the management of the contract and assist Commonwealth customers with all facets of services, including assisting in building strong customer teaming relationships and delivering the highest level of customer service and satisfaction.

b) **Program Manager (Offeror Project Manager)** - The Program Manager has overall responsibility for delivery of the Services to the Commonwealth and exercises day-to-day supervision of the Program Management Office (PMO). The PMO Manager will manage the overall relationship ensuring that the Offeror fulfills all of its obligations under the Contract by working with the Commonwealth Management Committee to establish, manage, and meet commitments, requirements, and expectations to ensure operational compliance with the Contract. The PMO Manager will have a detailed knowledge and understanding of the Service Levels structure and credits, billing formats, hierarchies and credits, and Services being provided to ensure that Offeror fulfills its obligations under the Contract, including all obligations relating to deliverables. There will be one PMO Manager 100% dedicated to the Commonwealth

for the Term. The PMO Manager will be located at the Offeror's Harrisburg, Pennsylvania location.

c) **PMO Transition Manager(s)** – The PMO Transition Manager provides technical expertise and leadership during the transition of the current state datacenter services to the steady state managed datacenter services (i.e. the Commonwealth's new datacenter structure and services to be provided by Offeror pursuant to the Contract), and provides continuing engineering support through the remainder of the Term. In conjunction with the Commonwealth, the PMO Transition Manager develops plan(s) (inclusive of a detailed schedule(s) for performing associated tasks) for Offeror's implementation and transition of the Commonwealth from its legacy providers, cooperating with the Commonwealth to obtain the Commonwealth's approval and acceptance of the Transition Plan, and identifying the Transition Plan roles, responsibilities, and performance contingencies.

There will be two (2) PMO Transition Managers 100% dedicated to the Commonwealth for the entire Ramp-up Period. After the Ramp-up Period, the number of Transition Managers is reduced to one for the Term. The Transition Managers will be located at the Offeror's Harrisburg, Pennsylvania location during transition period.

d) **Availability Manager** – The Availability Manager is responsible for the overall service level management program for all of the Datacenter Services delivered.

e) **Service Level Management Analyst** – The PMO Service Level Management Analyst will prepare and package mutually agreed to operational reports, SLA reports, maintains Operations Manual, and oversees the Governance performance reporting. The Service Level Management Analyst will be located at the Offeror's Harrisburg, Pennsylvania location.

f) **Sr. Enterprise Infrastructure Architect** – The Enterprise Infrastructure Architect is responsible for the overall technology management program for the Datacenter Services delivered. The Enterprise Architect will provide executive level technology oversight to the Program. The Enterprise Architect will provide leadership in the forecasting and outlook for new technologies and services to be added during the term of the Program. The Enterprise Architect must have deep understanding of infrastructure, application deployment, and web and software applications.

g) **Incident Management Manager** - The PMO Incident Manager will provide technical and operational escalations management and resolution by working with the help desk and Operations Centers to provide escalation oversight and back up support for Program Manager. The PMO Incident Manager will provide SLA review, compliance, and management; facilitate chronic issue management and resolution; and address operational and delivery issues and adherence to performance; assist with incidents, issues, and escalations; and provide root cause analysis and resolution.

h) **Change Manager and Change Analyst** – The Change Manager and Change Analyst will provide oversight and overall coordination of standard change management, process across products and services, and provide change management for future strategy and planning.

i) **Finance Manager and Finance Analyst** – The Finance Manager and Finance Analyst will provide billing support and facilitation of the consolidated billing process support for the one single invoice to the Commonwealth.

j) **Agency Account Managers** – Offeror will provide a minimum of five (5) dedicated Agency Account Managers responsible for understanding all of the services provided by Offeror and providing guidance to the agencies in understanding their datacenter business needs. Offeror must assign an Agency Account Manager to each agency that purchases services through the contract. Not all Agency Account Managers must be assigned to a single agency. Offerors shall identify the number of Agency Account Managers that will be assigned to this project as part of their proposal. Agency Account Managers will act as a liaison between Offeror and the agency; strengthen the strategic relationship between Offeror and the Commonwealth; maintain overall responsibility for sales, support, and operations; ensure that agreements are finalized and signed by all parties; provide periodic briefings to the Commonwealth on new services and technologies that may be of interest/use and provide the Commonwealth with pricing information on request. The Agency Account Managers will be located at the Offeror's Harrisburg, Pennsylvania location.

k) **Agency Infrastructure Architects (Service Area Leads) -** Offeror will provide a minimum of five (5) Infrastructure Architects responsible for the detailed design engineering of the Commonwealth's specific datacenter services designs and quotes and for coordinating Commonwealth related requests. There will be at least five (5) Infrastructure Architects dedicated to the Commonwealth for the Term.

l) **Security Manager** – Offeror will provide a Security Manager to oversee all aspects of the project to ensure compliance with all security standards and requirements.

3. Offeror Key Personnel Instructions

The Offeror must identify key personnel for the project including:

- Name
- Position in organization
- Proposed role on project
- Experience in the proposed role
- Qualifications for the proposed role
- Role in the last three projects
- Percentage of time the person is committed for the entire project (if not, start and end dates must be provided)

Note: The Offeror may submit additional key personnel in addition to those listed in Schedule G.

4. Offeror Key Personnel Table

Name	Title/Account Role	Experience in Proposed Role (Years)	Qualifications for Proposed Role	Primary work location	% Committed for Entire Project?
	Agency Account Managers				
	Agency Infrastructure Architects				
	Availability Manager				
	Change Analyst				
	Change Manager				
	Security Manager				
	Engagement Executive				
	Finance Analyst				
	Finance Manager				
	Incident/Problem Manager				
	PMO Transition				

	Managers				
	Program Manager				
	Service Level Management Analyst				
	Sr. Enterprise Infrastructure Architect				

5. Sub-Contractors (If Applicable) Instructions

The Offeror must identify the subcontractor's key staff for the project including:

- Name
- Proposed role on project
- Experience in the proposed role
- Qualifications for the proposed role
- Role in the last three projects
- Percentage of time the person is committed for the entire project (if not, start and end dates must be provided)

6. Sub-Contractor Key Staff

Name	Title/Account Role	Experience in Proposed Role (Years)	Qualifications for Proposed Role	Primary work location	% Committed for Entire Project?

Offeror acknowledges that certain of the Offeror employees are critical to the provision of the Services hereunder ("Key Positions"). With respect to Key Positions, the Parties agree as follows:

- Each individual in a Key Position shall be dedicated to the Commonwealth account in accordance with the requirements set out in this schedule;

- Before assigning an individual to a Key Position, whether as an initial assignment or as a replacement, Offeror shall:
  - Notify the Commonwealth of the proposed assignment;
  - Introduce the individual to appropriate representatives of the Commonwealth;
  - Provide the Commonwealth with a resume and any other information regarding the individual that may be reasonably requested by the Commonwealth;
  - Allow the Commonwealth to interview the individual; and
  - Obtain the Commonwealth's approval for such assignment, which approval will not be unreasonably withheld.
  - Offeror shall only assign an individual to a Key Position who is mutually agreed upon by the Commonwealth and Offeror; Offeror retains exclusive direction and control as to hiring, termination, and right to discipline or reward such individuals in connection with their employment.
- Offeror shall not replace or reassign individuals in Key Positions (except as a result of voluntary resignation, involuntary termination for cause, serious illness, disability or death) for the applicable time period set out in this Schedule following the date of his or her assignment to the Commonwealth account unless the Commonwealth consents in writing to such reassignment or replacement or such individual in such Key Position.
- If the Commonwealth decides that any individual in a Key Position should not continue in that position, then the Commonwealth may, in its sole discretion and upon notice to Offeror, require removal of such individual in the Key Position from the Offeror Personnel in accordance with the following:
  - Offeror shall, as soon as reasonably practicable, replace such individual in the Key Position with another person of suitable ability and qualifications in accordance with procedures set forth above; and
  - In the event that an individual in a Key Position is convicted of criminal conduct or is in breach of Offeror's obligations, Offeror shall immediately remove and replace such individual with another person of suitable ability and qualifications in accordance with the procedures set forth above.
  - Offeror must notify the Commonwealth Agency\Criminal Justice Sponsor immediately of becoming aware of any employee deemed not compliant with the PA CHRIA or FBI CJIS policies\regulations and the

Offeror will adhere to any guidance/requirements of those standards with regard to actions to take regarding the employee's physical/logical access and/or employment.

- Offeror shall not without the Commonwealth consent replace or reassign greater than twenty percent (20%) of individuals in Key Positions in any rolling six (6) month period.

7. Staff Contingency Plan

Instructions: The Offeror must provide a contingency plan that shows the ability to add more staff if needed to ensure meeting the Project's due date(s) and milestones as outlined in the Offerors proposal.

<Response>

8. Staff Management

Instructions: Describe internal standards, policies and procedures regarding hiring, professional development and human resource management.

<Response>

9. Training Policies and Procedures

Instructions: Describe Offeror's policies and processes for training and ongoing education of its personnel.

<Response>

10. Staff Retention

Instructions: Please describe Offeror's process and methodology for retaining Offeror personnel.

Commonwealth Computing Procedures Manual (CCPM)

Contents

1 PURPOSE 3
1.1 Organizational Overview 3
1.2 Transition and Support Activities and Responsibilities 4
1.3 IT Service Management Procedures 5
1.4 Financial Management Procedures 10
1.5 Contract Management Procedures 12
1.6 Relationship Management Procedures 14
1.7 Offeror Operational Procedures 16
1.8 The Commonwealth Customer Operations Manuals 18

Content	Description
1 PURPOSE	The Offeror should describe the purpose of the Commonwealth Computing Procedures Manual. This section should address who should use the Manual, how the Manual is organized, how the initial version and updates will be distributed, version control procedures for the Manual, when updates will occur, and procedures for authorizing and implementing updates. It is intended that the structure of the Manual will require that the individual compliance requirements and business rules of each participating Commonwealth Customer are separately identified where applicable for each section or component part of the Manual.
1.1 Organizational Overview	
1. Offeror Governance Organization	Include organization charts, description of functions performed, contact information.
2. Offeror Management and Delivery Organization	Include organization charts, description of functions performed, contact information.
3. Key Contacts - Offeror	A list of contacts that are key users of the Services and/or perform a liaison function in regard to the Services (by Commonwealth and Commonwealth Agencies, by location).

Content	Description
4. Key Contacts – Third Parties	A list of key Third Parties (maintenance providers, software providers, telecom carriers, etc).
1.2 Transition and Support Activities and Responsibilities	
1. Overall Management and Reporting Process	A description of Offeror management structure, reporting, and review process associated with Transition Services and Transformation Services.
2. Critical Deliverables and Milestones	A list of Critical Deliverables, milestones and timeline for the Transition Services and Transformation Services periods.
3. Interim Performance Management Procedures	A description of interim procedures to monitor and coordinate Service delivery, including Problem Management, Change Management, Service Level monitoring and reporting, physical and Logical Security, project management, work authorization, etc. A description of the responsibilities of both Parties.

Content	Description
4. Interim Financial Management Procedures	A description of interim procedures for invoicing, invoice verification, charge back to the Commonwealth Customers, determining Resource Unit volume by Service Component, asset management, asset transfers, forecasting, Commonwealth Customer support, etc. A description of the responsibilities of both Parties.
5. Interim Contract Management Procedures	A description of interim procedures for managing and administering the Agreement including proposed changes to the Agreement, interpretation procedures, issue-escalation process, and disputes. A description of the responsibilities of both Parties.
6. Other Transition and Support Procedures and Responsibilities	Any other pertinent procedures and responsibilities.
1.3 IT Service Management Procedures	
1. Service Desk	The facilities, associated technologies, and fully trained staff who respond to Calls, coordinate all Incident Management, Problem Management and Request Management activities, and act as a single point of contact for Authorized Users in regard to the Services.

Content	Description
2. Incident Management	The use of people, processes and technology with the primary goal to restore normal Service operations as quickly as possible and minimize the adverse impact on business operations, thus ensuring that the best achievable levels of service quality and availability are maintained.
3. Problem Management	The process, software, techniques and procedures that aid in identification, tracking, communication, and resolution of Problems arising in Customer's IT Environment, and resolving those Problems arising from or related to the Services. The goal of Problem Management is to minimize the adverse impact of Incidents and Problems on the business that are caused by errors within the IT infrastructure, and to prevent recurrence of Incidents related to these errors. In order to achieve this goal, Problem Management seeks to get to the root cause of Incidents and then initiate actions to improve or correct the situation.
4. Change Management	The processes relating to planning and performing all changes in IT environment pertaining to the Services, including changes to individual components and coordination of changes across all components. The Change Management processes will support and include checkpoints to determine any potential or required Change Control Procedures and includes a process of controlling changes to the infrastructure or any aspect of Services, in a controlled manner, enabling approved changes with minimum disruption.

<table>
<tr><th>Content</th><th>Description</th></tr>
<tr><td>5. Configuration Management</td><td>The process of identifying and defining CIs in a system, recording and reporting the status of CIs and RFCs, and verifying the completeness and correctness of the CIs.

The following data fields are required as a minimum for Asset/Configuration Management (any number of these may require that auditing be enabled.):

<table>
<tr><th>Physical Attributes</th><th>Logical Attributes</th></tr>
<tr><td>CI Name</td><td>System Role</td></tr>
<tr><td>Serial Number</td><td>Primary Capability</td></tr>

Content	Description
6. Release Management	The process responsible for planning, scheduling and controlling the movement of Releases to Test and Live Environments. The primary objective of Release Management is to ensure that the integrity of the Live Environment is protected and that the correct Components are released. Release Management works closely with Configuration Management and Change Management.
7. Request Management and Fulfillment	The process responsible for managing the lifecycle of all Service Requests.
8. Availability Management	The process responsible for defining, analyzing, Planning, measuring and improving all aspects of the Availability of IT services. Availability Management is responsible for ensuring that all IT Infrastructure, Processes, tools, roles etc. are appropriate for the agreed Service Level targets for Availability.
9. Capacity Management	The process responsible for ensuring that the Capacity of IT Services and the IT Infrastructure are able to deliver agreed Service Level targets in a cost effective and timely manner. Capacity Management considers all Resources required to deliver the IT Service, and plans for short, medium and long term business requirements.

Content	Description
10. Service Level Management (SLM)	The process responsible for negotiating SLAs, and ensuring that these are met. SLM is responsible for ensuring that all IT Service Management Processes, OLAs, and Underpinning Contracts, are appropriate for the agreed Service Level targets. SLM monitors and reports on Service Levels, facilitates Service Delivery Failure actions with the appropriate Governance Committee and holds regular Commonwealth Customer reviews.
11. IT Service Continuity Management (ITSCM)	The process responsible for managing risks that could seriously impact IT Services. ITSCM ensures that the IT Offeror can Always provide minimum agreed Service Levels, by reducing the risk to an acceptable level and Planning for the recovery of IT Services. ITSCM should be designed to support Business Continuity Management.
12. IT Financial Management	The process responsible for managing the Budgeting, Accounting, Invoicing and Chargeback requirements).
13. Information Security Management	The process that ensures the confidentiality, integrity and Availability of an organization's Assets, information, data and IT Services. Information Security Management usually has a wider scope than the Offeror. It normally includes handling of paper, building access, phone calls etc., for the entire organization.

Content	Description
14. Project Management and Support	Project Management and Support will align projects to Commonwealth requirements and deliver projects from request through end-to-end solutioning including turnover to the Commonwealth Customers and validation that project requirements were met in terms of timing, quality, and cost.
15. Service Catalog	A database or structured Document with information about select Services, including those available for Deployment. The Service Catalog is the only part of the Service portfolio published to Commonwealth Customers, and is used to support the request and delivery of select Services. The Service Catalog may include information about Deliverables, prices, contact points, ordering and request processes.
1.4 Financial Management Procedures	
1. Invoicing	The Offeror should describe procedures for invoicing. The content should include procedures for calculating Resource Unit volumes for pricing (per Service Component, as applicable), invoicing of Projects, etc. The content should include procedures regarding disputed invoice amounts.

Content	Description
2. Chargeback	The Offeror should describe procedures for charge back of costs related to the Services and the overall Agreement to the Commonwealth Customers (to include responsibilities and support by both the Offeror and the Commonwealth).
3. Budgeting	The Offeror should describe how it would assist the Commonwealth with the annual budgeting cycle. Process should include estimation of Resource Unit volumes (by Service Component and Commonwealth Customer as appropriate), potential Projects, review cycle, etc. The content should include the responsibilities of Offeror, the Commonwealth, and Commonwealth Agencies.
4. Forecasting	The Offeror should describe procedures for forecasting cost versus budget.
5. Procurement	The Offeror should describe procedures for procurement Services (where Offeror performs procurement on behalf of the Commonwealth, as applicable). The content should include responsibilities and process for both the Commonwealth staff and Offeror.

Content	Description
6. Service Level Credits and Earnback	The Offeror should describe procedures for calculating Service Level Credits on invoices and Earnback calculations.
1.5 Contract Management Procedures	
1. Contract Change Control	The Offeror should describe procedures regarding changes to the Agreement, including changes to any Exhibit or Attachment. Content should include procedures to classify services as a New Service, and resulting process to change the Agreement (including pricing). Content should include notification period and process, authority levels, and escalation procedures for changes to the Agreement.
2. Reporting	The Offeror should describe procedures and activities regarding key standard Reports and requests for ad hoc reports from the Commonwealth and The Commonwealth Agencies.
3. New Service Levels	The Offeror should describe procedures for determining new Service Levels (based on continuous improvement and/or Commonwealth request).

Content	Description
4. Benchmarking	The Offeror should describe procedures for Benchmarking exercises, including determination and agreement of benchmark firm, sample peer group and process used for benchmark, payment for benchmark, review of results, and potential outcome. Content should include dispute resolution process.
5. Auditing	The Offeror should describe procedures for operational and/or financial audits (as required by the Commonwealth auditing and/or regulatory agencies). The Offeror should describe notification process and procedures to resolve audit findings.
6. Offeror Key Personnel and Subcontractors	The Offeror should describe procedures for Commonwealth approval regarding replacement or removal of Offeror Key Personnel and major Subcontractors to Offeror.
7. Dispute Resolution	The Offeror should describe procedures regarding formal dispute resolution process.

Content	Description
1.6 Relationship Management Procedures	
1. Customer Satisfaction Surveys	The Offeror should describe the process to be used for conducting customer satisfaction surveys. Content should include procedures regarding action items and attempts to resolve customer issues.
2. Commonwealth Agencies	The Offeror should describe procedures and responsibilities regarding the relationship between the Commonwealth, the Commonwealth Agencies and the Offeror. Content should include procedures regarding communication and coordination regarding work requests, Service delivery issues, budgeting and financial issues, etc.
3. Authorized Users	The Offeror should describe procedures and responsibilities regarding responding to Authorized Users (including listing of Authorized Users) problems, requests, and questions.

Content	Description
4. Third Party Vendors	Offeror to describe procedures for relationship regarding Third Party Vendors which may provide services, Equipment, and/or Software that are ancillary to (or support) the overall delivery of Services. Procedures and coordination with key Third Party Vendors should be documented.
5. Other Third Parties	The Offeror should describe procedures for any other contact or requests from other Third Parties in regard to the Agreement.

Content	Description
1.7 Offeror Operational Procedures	
1. Operating Level Agreements (OLA)	OLAs are internal "back-to-back" agreements that define how two different Service Component Providers will work together to support the delivery of defined IT Services to the Commonwealth and Commonwealth agencies. The OLAs will define how Service Component Providers will work together to meet the Service Requirements documented in SOWs and Service Level Requirements documented in formal SLAs for the DCS initiative. The OLAs are a set of operational processes that supplements the IT Service Management section of the Commonwealth Computing Procedures Manual providing the second level detail required for individual Service Components to interoperate. Simply stated, the OLA "bolts" multiple Service Components together operationally.
2. Operational Procedures (by Service Component, as applicable)	The Offeror should describe the activities that the Offeror proposes to undertake in order to provide the Services, including those directions, supervision, monitoring, staffing, reporting, Planning and oversight activities normally undertaken by the Offeror which shall be consistent with those Offeror activities used to provide services similar to the Services.

Content	Description
3. Service Responsibility Matrix (SRM)	A map of the Functional Service Areas which potentially overlap Offeror responsibility and Commonwealth responsibility required to deliver business solutions to the business units. A Service Responsibility Matrix will be developed for each such area to delineate which party is responsible for performing select service elements and/or providing assistance or input.

Content	Description
1.8 The Commonwealth Customer Operations Manuals	
1. Individual Commonwealth Customer Operations Manual	The Commonwealth Computing Procedures Manual will also contain specific sections dedicated to operational procedures for Services provided to individual The Commonwealth Customers (each a "**The Commonwealth Customer Operations Manual**"). Each The Commonwealth Customer Operations Manual will address unique operational requirements of the respective The Commonwealth Customer, including operational areas such as the following: • Runbooks • Data safeguarding, use and release restrictions • Data security policies • Disaster Recovery requirements • Notification levels and procedures (e.g. problems and initial Severity Level procedures)

Request for Proposal

RFP # 6100022698

Commonwealth of Pennsylvania

Office of Administration
Office for Information Technology

Datacenter Computing Services

Schedule I

Offeror Pricing Forms

Description of Exhibit and Instructions

This Schedule I - Offeror Pricing Forms sets forth the following:

Configuration Definitions

- This tab contains the descriptions of the defined configurations which are used on the Volumetrics and Catalog of Services tabs.
- No entry is required on this tab.

1. Volumetrics

- This tab includes the resource unit categories and target quantities that the Offeror's will use to determine their price.
- Offerors should not assume that these are a guaranteed minimum units over the contract period.
- No entry is required on this tab.

2. Total Charges

- Summary of all Services Charges.
- No entry is required on this tab

3. Technical Staff Rate Card

- Offerors should use this tab to provide their staffing rates for the optional support services
- Offeror should only input in highlighted (yellow) cells.
- This rate card will become part of the service catalog at the Effective Date of the contract.

4. Catalog of Services

- Offerors should use this tab to include their Catalog of Services with pricing.
  See "Configuration Definitions" Tab for detail on what is included in each service catalog item.
- Offeror should only input in highlighted (yellow) cells.
- Only provide costs within the highlighted (yellow) cells; no additional services will be accepted here.
- All costs for services must be included in the item cost in the catalog of services. No additional costs should be incurred by the Commonwealth for the services requested by this RFP.

5. Software

- Offerors should use this tab to include their pricing of the required Third Party Software and Hybrid Third Party Software.
- Offeror should only input in highlighted (yellow) cells.
- Only provide costs within the highlighted (yellow) cells; no additional software products will be accepted here.
- Offerors should price software titles listed or equivalent.
- Offerors must provide a catalog of monthly single unit prices as part of its proposal. a single unit could be a single MIP, a single core, a single user, a single server, etc. The configuration will be determined as part of transition planning.
- Offerors are required to provide all of the listed software within this table. The Commonwealth will assume if there is no price indicated for a particular requested software item; that item will be provided at no cost to the Commonwealth.

6. Termination Fees

- This tab identifies the Termination for Convenience Fees.
- No entry is required on this tab.

Additional Notes

a.) All input tabs (3, 4, 5) should be filled out completely.

b.) Total Charges (tab 2): Information is linked with input tabs and will calculate automatically.

c.) Any cost field left blank will indicate the item will be available to the Commonwealth at no cost.

d.) Formulas are imbedded in all tabs. Offeror must verify that all calculations, subtotal costs and grand total costs are accurate.

e.) Please contact the Issuing Officer with any questions or concerns.

f.) Payment for services under this contract are unit-based. The total units (volumetrics) listed are for informational purposes only and will not be binding on the Commonwealth

g.) All Transition costs must be included in the service prices as included in the Catalog of Services tab over years 1 thru 7. Any change to transition plans shall not alter the costs as included in Offeror's completed Schedule I - Offeror Pricing Form. No additional costs will be incurred by the Commonwealth for changes to Offeror's proposed Transition Plan.

h.) All DC architecture costs must be included in the service prices as included in the Catalog of Services tab over years 1 thru 7.

i.) All pricing must not include any assumptions of a minimum commitment for services from the Commonwealth.

j.) Offerors must include in the base unit pricing for all configurations the components and services required to meet the security requirements of the RFP for all compute services, to include but not limited to Schedule F Sections 3.2.4.6 and 3.2.2.5.

Configuration Definitions (**)

The below definitions and configurations are referenced throughout Schedule I - Offeror Pricing Forms.

(1) Fully Managed and (2) Managed Only

Servers and Storage Services (x86, p-Series, i-Series)

Servers and Storage services should include the server, disk and backup devices, as well as hardware supplies; software, including operating and data management systems; the facilities, including raised floor and office space; and facilities management.

Unit Prices should include all services costs associated with providing, managing, operating, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work;

3.1	Establish Datacenter Architecture
3.1.1	Multi Datacenter Environment (2+ Architecture)
3.1.2	Network and Security Architecture
3.1.3	Datacenter Architecture and Technology
3.2	Enable Common Service Portfolio
3.2.1	Program & Service Management
3.2.1.1	PMO & Contract Management
3.2.1.2	Availability/SLA Management
3.2.1.3	Change & Release Management
3.2.1.4	Service Desk
3.2.1.5	Technical Architecture
3.2.1.6	Account Management
3.2.1.7	Configuration Management
3.2.1.8	3rd Party License Management
3.2.2	Technical Services
3.2.2.1	Transition Management (New Customer and/or Services)
3.2.2.2	Infrastructure Architecture
3.2.2.3	Capacity Management
3.2.2.4	DR Planning & Testing
3.2.2.5	Security Management
3.2.2.6	Performance Monitoring & Management
3.2.3	Facilities Management
3.2.3.1	Facilities Architecture / Maintenance
3.2.3.2	Site Operations
3.2.4	Managed Hosting Services
3.2.4.1	Windows Support
3.2.4.2	Storage Management
3.2.4.3	ERP Hosting – SAP / Oracle
3.2.4.4	UNIX Support – AIX / Linux
3.2.4.6	Security & Firewall
3.3	Transition Services
3.3.1	Transition Services – Guiding Principals
3.3.2	Transition Planning/Governance
3.3.2.1	Transition Program Management
3.3.2.2	Security Transition Activities

Fully Managed Infrastructure is fully owned and managed by the Offeror

Managed Only Infrastructure is managed by the Service Provider but owned by the Commonwealth and/or a 3rd Party

(3) Limited Co-Lo

Limited Co-Lo is infrastructure that is located in the Service Provider managed datacenter(s). Either owned or managed by the Commonwealth; or 3rd Party.

Limited Co-Lo Services Unit Prices should include all services costs associated with providing, managing, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work Unit Prices should include all services costs associated with providing, managing, operation, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work;

3.1	Establish Datacenter Architecture
3.1.1	Multi Datacenter Environment (2+ Architecture)
3.1.2	Network and Security Architecture
3.1.3	Datacenter Architecture and Technology
3.2	Enable Common Service Portfolio
3.2.1	Program & Service Management
3.2.1.1	PMO & Contract Management
3.2.1.2	Availability/SLA Management
3.2.1.3	Change & Release Management
3.2.1.4	Service Desk
3.2.1.5	Technical Architecture

Configuration Definitions (**)

3.2.1.6 Account Management
3.2.1.7 Configuration Management
3.2.1.8 3rd Party License Management
3.2.2 Technical Services
3.2.2.1 Transition Management (New Customer and/or Services)
3.2.2.2 Infrastructure Architecture
3.2.2.3 Capacity Management
3.2.2.4 DR Planning & Testing
3.2.2.5 Security Management
3.2.2.6 Performance Monitoring & Management
3.2.3 Facilities Management
3.2.3.1 Facilities Architecture / Maintenance
3.2.3.2 Site Operations
3.2.4 Managed Hosting Services
3.2.4.8 Limited-Use Colocation Services
3.3 Transition Services
3.3.1 Transition Services – Guiding Principals
3.3.2 Transition Planning/Governance
3.3.2.1 Transition Program Management
3.3.2.2 Security Transition Activities

(4) Mainframe Services - Include both IBM and Unisys Mainframe services

Mainframe services should include the hardware for the mainframe processing units; disk and backup devices, as well as hardware supplies; software, including operating and data management systems; the facilities, including raised floor and office space; and facilities management in addition to the services described below.

Mainframe Services Unit Prices should include all services costs associated with providing, managing, operating, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work;

3.1 Establish Datacenter Architecture
3.1.1 Multi Datacenter Environment (2+ Architecture)
3.1.2 Network and Security Architecture
3.1.3 Datacenter Architecture and Technology
3.2 Enable Common Service Portfolio
3.2.1 Program & Service Management
3.2.1.1 PMO & Contract Management
3.2.1.2 Availability/SLA Management
3.2.1.3 Change & Release Management
3.2.1.4 Service Desk
3.2.1.5 Technical Architecture
3.2.1.6 Account Management
3.2.1.7 Configuration Management
3.2.1.8 3rd Party License Management
3.2.2 Technical Services
3.2.2.1 Transition Management (New Customer and/or Services)
3.2.2.2 Infrastructure Architecture
3.2.2.3 Capacity Management
3.2.2.4 DR Planning & Testing
3.2.2.5 Security Management
3.2.2.6 Performance Monitoring & Management
3.2.3 Facilities Management
3.2.3.1 Facilities Architecture / Maintenance
3.2.3.2 Site Operations
3.2.4 Managed Hosting Services
3.2.4.2 Storage Management
3.2.4.5 Mainframe Services
3.2.4.6 Security & Firewall
3.3 Transition Services
3.3.1 Transition Services – Guiding Principals
3.3.2 Transition Planning/Governance
3.3.2.1 Transition Program Management
3.3.2.2 Security Transition Activities

Offerors must also use exhibit B1 DPH Asset List for configuration requirements for mainframe services.

(5) On-Demand (IaaS) Services

On-Demand Unit Prices should include all services costs associated with providing, managing, operating, and transitioning to each technology unit per the RFP requirements Schedule F COPA Datacenter Statement of Work;

3.1 Establish Datacenter Architecture
3.1.1 Multi Datacenter Environment (2+ Architecture)
3.1.2 Network and Security Architecture
3.1.3 Datacenter Architecture and Technology
3.2 Enable Common Service Portfolio

Configuration Definitions (**)

3.2.1	Program & Service Management
3.2.1.1	PMO & Contract Management
3.2.1.2	Availability/SLA Management
3.2.1.3	Change & Release Management
3.2.1.4	Service Desk
3.2.1.5	Technical Architecture
3.2.1.6	Account Management
3.2.1.7	Configuration Management
3.2.1.8	3rd Party License Management
3.2.2	Technical Services
3.2.2.1	Transition Management (New Customer and/or Services)
3.2.2.2	Infrastructure Architecture
3.2.2.3	Capacity Management
3.2.2.4	DR Planning & Testing
3.2.2.5	Security Management
3.2.2.6	Performance Monitoring & Management
3.2.3	Facilities Management
3.2.3.1	Facilities Architecture / Maintenance
3.2.3.2	Site Operations
3.2.5	Capacity on Demand Services
3.2.5.1	Server Capacity on Demand
3.2.5.2	Storage Capacity on Demand
3.2.5.3	DR Infrastructure on Demand
3.2.5.4	Additional Technical Services
3.3	Transition Services
3.3.1	Transition Services – Guiding Principals
3.3.2	Transition Planning/Governance

Configurations (**)

Limited Co-Lo (Data Center Only Charge)

Limited Co-Lo Configurations	Minimum Specifications	Unit
Co-Lo Config - 1	1/4 Rack Configuration includes: 10U Cabinet Space; 5,000 GB Network Bandwidth; 100Mb/s Uplink; 6 IP Addresses; 5 -110V AC Circuits	Monthly Per Config
Co-Lo Config - 2	1/2 Rack Configuration includes: 21U Cabinet Space; 10,000 GB Network Bandwidth; 100Mb/s Uplink; 14 IP Addresses; 10 -110V AC Circuits	Monthly Per Config
Co-Lo Config - 3	Full Rack Configuration includes: 42U Cabinet Space; 20,000 GB Network Bandwidth; 100Mb/s Uplink; 30 IP Addresses; 20 -110V AC Circuits	Monthly Per Config

Server Configurations (Fully Managed)

x86 Server Configurations	Minimum Specifications	Unit
Windows pConfig - 1	2-way Quad-Core 2.0 GHz; 4 GB RAM; Mirrored 146 15K Hard Drives; Windows Server 2008 R2	Physical Server
Windows pConfig - 2	2-way Six-Core 2.4 GHz; 16 GB RAM; Mirrored 146 15K Hard Drives; Windows Server 2008 R2	Physical Server
Windows pConfig - 3	4-way Six-Core 2.0 GHz; 64 GB RAM; 500 GB SAN Attached Storage; Windows Server 2008 R2	Physical Server

Configuration Definitions (**)

Windows pConfig - 4	2-way Six-Core 2.4 GHz; 16 GB RAM; Mirrored 146 15K Hard Drives; Windows Server 2008 R2; Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	Physical Server
Windows pConfig - 5	2-way Six-Core 2.4 GHz; 16 GB RAM; Mirrored 146 15K Hard Drives; Windows Server 2008 R2; Disaster Recovery Server with a Restoral Interval of 72 hours via Backup Restoral from off-site tape Backups	Physical Server
Linux pConfig - 1	2-way Quad-Core 2.0 GHz; 4 GB RAM; Mirrored 146 15K Hard Drives; RedHat or SUSE	Physical Server
Linux pConfig - 2	2-way Six-Core 2.4 GHz; 16 GB RAM; Mirrored 146 15K Hard Drives; RedHat or SUSE	Physical Server
Linux pConfig - 3	4-way Six-Core 2.0 GHz; 64 GB RAM; 500 GB SAN Attached Storage; RedHat or SUSE	Physical Server
Linux pConfig - 4	2-way Six-Core 2.4 GHz; 16 GB RAM; Mirrored 146 15K Hard Drives; RedHat or SUSE; Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	Physical Server
Linux pConfig - 5	2-way Six-Core 2.4 GHz; 16 GB RAM; Mirrored 146 15K Hard Drives; RedHat or SUSE; Disaster Recovery Server with a Restoral Interval of 72 hours via Backup Restoral from off-site tape Backups	Physical Server
Windows vConfig - 1	2vCPU; 4 GB Ram; Windows Server 2008 R2; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
Windows vConfig - 2	4vCPU; 16 GB Ram; Windows Server 2008 R2;~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
Windows vConfig - 3	8vCPU; 64 GB Ram; Windows Server 2008 R2; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
Windows vConfig - 4	4vCPU; 16 GB Ram; Windows Server 2008 R2; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~; Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	Virtual Server Instance

Configuration Definitions (**)

Windows vConfig - 5	4vCPU; 16 GB Ram; Windows Server 2008 R2; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~; Disaster Recovery Server with a Restoral Interval of 72 hours via Backup Restoral from off-site tape Backups	Virtual Server Instance
Linux vConfig - 1	2vCPU; 4 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
Linux vConfig - 2	4vCPU; 16 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
Linux vConfig - 3	8vCPU; 64 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
Linux vConfig - 4	4vCPU; 16 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN;~~ Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	Virtual Server Instance
Linux vConfig - 5	4vCPU; 16 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN;~~ Disaster Recovery Server with a Restoral Interval of 72 hours via Backup Restoral from off-site tape Backups	Virtual Server Instance

P-Series Server Configurations		
AIX Config - 1	3.0GHz POWER7; 0.5 Cores; 6 GB RAM; AIX	LPAR
AIX Config - 2	3.0GHz POWER7; 1.0 Cores; 12 GB RAM; AIX	LPAR
AIX Config - 3	3.0GHz POWER7; 1.5 Cores; 18 GB RAM; AIX	LPAR
AIX Config - 4	3.0GHz POWER7; 1.0 Cores; 12 GB RAM; AIX; Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	LPAR
AIX Config - 5	3.0GHz POWER7; 1.0 Cores; 12 GB RAM; AIX; Disaster Recovery Server with a Restoral Interval of 72 hours via Backup Restoral from off-site tape Backups	LPAR

Mainframe Configurations (*)		
IBM Mainframe Configurations	**Minimum Specifications**	**Unit**
IBM Mainframe Config - 1	IBM System zEnterprise Processor z/OS	MIP
IBM Mainframe Config - 2	IBM System zEnterprise Processor Virtual Linux Prod IFL	MIP

Configuration Definitions (**)

IBM Mainframe Config - 3	IBM System zEnterprise Processor Virtual Linux Prod IFL; Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	MIP
IBM AS400 Config 1	IBM i Series / AS400	CPW
IBM AS400 Config 2	IBM i Series / AS400; Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	CPW
Unisys Mainframe Configurations	**Minimum Specifications**	**Unit**
Unisys Mainframe Config - 1	Unisys (Clearpath / Dorado)	MIP
Unisys Mainframe Config - 2	Unisys (Clearpath / Libra)	MIP
Unisys Mainframe Config - 3	Unisys (Clearpath / Dorado); Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	MIP
Unisys Mainframe Config - 4	Unisys (Clearpath / Libra) ; Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	MIP

On-Demand (IaaS) Configurations		
IaaS x86 Server Configurations	**Minimum Specifications**	**Unit (per month)**
IaaS Windows vConfig - 1	2vCPU; 4 GB Ram; Windows Server 2008 R2; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
IaaS Windows vConfig - 2	4vCPU; 16 GB Ram; Windows Server 2008 R2; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
IaaS Windows vConfig - 3	8vCPU; 64 GB Ram; Windows Server 2008 R2; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
IaaS Windows vConfig - 4	4vCPU; 16 GB Ram; Windows Server 2008 R2; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN;~~ Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	Virtual Server Instance
IaaS Windows vConfig - 5	4vCPU; 16 GB Ram; Windows Server 2008 R2; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN;~~ Disaster Recovery Server with a Restoral Interval of 72 hours via Backup Restoral from off-site tape Backups	Virtual Server Instance
IaaS Linux vConfig - 1	2vCPU; 4 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance

Configuration Definitions (**)

IaaS Linux vConfig - 2	4vCPU; 16 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
IaaS Linux vConfig - 3	8vCPU; 64 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN~~	Virtual Server Instance
IaaS Linux vConfig - 4	4vCPU; 16 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN;~~ Disaster Recovery Server with a Restoral Interval of 24 hours via Backup Restoral from Backup Site's Local SAN Storage from hourly data synchronization	Virtual Server Instance
IaaS Linux vConfig - 5	4vCPU; 16 GB Ram; RedHat or SUSE; ~~Firewall/IDS; Site-Site VPN; VPN Client; VLAN;~~ Disaster Recovery Server with a Restoral Interval of 72 hours via Backup Restoral from off-site tape Backups	Virtual Server Instance
IaaS Storage Configurations		
IaaS Storage Config - 1	SAN attached storage; Raid 5; 10K - 15K RPM discs	Monthly per GB
IaaS Storage Config - 2	SAN attached storage; Raid 10; 10K - 15K RPM discs	Monthly per GB
IaaS Storage Config - 3	Network Attached Storage	Monthly per GB

IaaS Backup Configurations		
IaaS Backup Config - 1	Remote Offsite backup per GB	Monthly per GB

Notes:
(*) Offerors must use exhibit B1 DPH Asset List for configuration requirements for mainframe services.

Baseline Units - Volumetrics

Note: The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all inclusive representation of every service desired by the Commonwealth.

Baseline Units - Volumetrics

Note: The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all inclusive representation of every service desired by the Commonwealth.

Notes:

For purposes of submitting a proposal, Offerors should assume that tapes are equivalent in capacity to LTO4 tapes.

* For purposes of submitting a proposal, Offerors should assume that the slower Tier1 RAID5 uses 10K drives and the Tier2 RAID10 uses 15K drives.

** The volume is expressed as native.

*** For purposes of evaluation DASD is expressed in Usable (not Raw)

1 General

The Commonwealth has adopted the ITIL framework and has established Service Level Management to maintain and improve IT Service quality, through a constant cycle of agreeing, monitoring, measuring, and reporting upon IT Service achievements and the instigation of actions to eradicate poor service.

The Service Level Performance Measures and their targets that are described in this Schedule J.1 Datacenter Service Level Management have been specifically designed to support the Service Level Agreements set forth in Schedule J.2.

The methodology set out in this Schedule J.1 supports the Service Level Management cycle of agreeing, monitoring, measuring, reporting and improving the delivery of the services to the Commonwealth.

As of the Effective Date (or as otherwise specified in this Schedule J.1), the Offeror will perform the Services to which Service Levels apply, so that the Service Level Performance will, in each month of the Term, meet or exceed, the Service Levels.

New Service Levels (Critical Measurements, Key Measurements) may be added or substituted by the Commonwealth as specified in this Schedule J.1 during the Term. For example, such additions or substitutions may occur in conjunction with changes to the environment and the introduction of new Equipment or Software to support a new or additional catalog service. However, where such Equipment or Software or such means of Service delivery is a replacement or upgrade of existing technology to support an existing catalog service, there shall be a presumption of equivalent or improved performance.

The achievement of the Service Levels by the Offeror may require the coordinated, collaborative effort of the Offeror with other third party contractors. The Offeror shall provide a single point of contact for the prompt resolution of all Service Level Defaults and all failures to provide high quality Services to the Commonwealth, regardless of whether the reason for such Service Level Defaults, or failure to provide high quality Services to the Commonwealth, was caused by the Offeror.

2 Service Level Measurement Descriptions

2.1 Application Infrastructure Availability

The Service Level for "Applications Infrastructure Availability" measures the percentage of time an Application is Available and not in a Degraded Condition as defined in **Schedule A - Defined Terms**. This measurement is by application, not by server instance. Availability is defined by whether the application residing on any of the associated server instances is available to users. Server Instances and related configuration items (CIs) supporting Applications are identified in the CMDB.

2.2 Measuring Incident and Problem Resolution

The Service Level for "Incident and Problem Resolution" measures the percentage of Incident events with resolution times (commonly known as "Mean-Time-To-Restore" – MTTR) within the limits specified within the appropriate Commonwealth Compute Procedures Manual based on the Incident Priority/Severity. These incidents are either user reports or monitoring system generated events indicating a service issue.

2.3 Measuring Other Service Management and Service Delivery

The Service Level for "Other Service Management and Service Delivery" measure the percentage of Requests, Projects, Backups, Recoveries, Renewals and Proposals that are delivered within the limits specified within the appropriate Commonwealth Compute Procedures Manual based on the request.

3 Reporting

Unless otherwise specified in this Schedule J.1, each Service Level (Critical Measurement, Key Measurement), Critical Deliverable, Recurring Deliverable, and Transition Milestone shall be measured and reported on a monthly basis. The format, layout and content of such monthly report shall be as directed by the Commonwealth. The Offeror's monthly performance reports are due by the 5th Business day of each month and shall include a set of soft-copy reports such that the Commonwealth is able to verify the Offeror's performance and compliance with the Service Level (Critical Measurement, Key Measurement), Critical Deliverable (until all Critical Deliverables are received and approved by the Commonwealth), Recurring Deliverable, and Transition Milestone.

The Offeror shall provide detailed supporting information for each report to the Commonwealth in a format suitable for use on a personal computer. The data and detailed supporting information shall include the methodology used by Offeror to calculate the service level performance based on the data measured and reported by the measurement tool such that the Commonwealth is able to reproduce the calculations made by Offeror and validate the results reported in the monthly Service Level Performance reports. All detailed supporting information shall be the Commonwealth's Confidential Information, and the Commonwealth may access such information online and in real-time, where feasible, at any time during the Term. In addition, Offeror shall provide the Commonwealth with direct, unaltered access to review and audit all raw data collection related to Service Levels.

The Offeror will create, maintain, and provide to the Commonwealth detailed procedure documentation of its Service Level measurement process used to collect Service Level data and calculate Service Level attainment. The process documentation must include quality assurance reviews and verification procedures. The measurement process must be automated to the extent possible, and any manual data collection steps must be clearly documented, verified and auditable. All methods, codes and automated programs must be documented and provided to the Commonwealth for validation and approval. The Offeror must ensure it tests and validates the accuracy and currency of the documentation and measurement process on a quarterly basis.

4 Notice Requirements for Additions, Deletions & Modifications

The Commonwealth will send notice to the Offeror at least ninety (90) days prior to the date that additions or deletions to Performance Categories, or additions or deletions to Service Levels

(which include the movement of Critical Measurements to Key Measurements and Key Measurements to Critical Measurements), or modifications to Service-Level Pool Percentage Allocation for any Critical Measurements or additions or deletions to Recurring Deliverables are to be effective. The Commonwealth may send only one such notice (which notice may contain multiple changes) each calendar quarter. Movement of Critical Measurements to Key Measurements and Key Measurements to Critical Measurements does not constitute creation of new service levels.

5 Service-Level Credits

In the event of a Service Level Default, the Offeror shall provide the Commonwealth credits as defined below:

5.1 Schedule J.2 and Schedule J.3 set forth the information required to calculate whether the Service Level has met a Service Level Default level and how the Service Level is calculated and reported. For each Service Level Default, the Offeror shall provide credits to the Commonwealth, subject to Section 6 below, a Service Level Credit that will be computed in accordance with the following formula:

Service Level Credit = 100% of the effected month's invoicing for the service that experienced a Service Level Default to a maximum credit not to exceed the At-Risk Amount as defined in **Schedule A - Defined Terms**.

For example, assume that the Offeror fails to meet a Critical Measurement Service Level, the Offeror's Monthly Invoice Amount for the month in which the Service-Level Default occurred was $100,000. The credit would be $100,000.

If the event occurs where the total monthly credit amount exceeds the At-Risk-Amount, each Service Level Default will be calculated based on the percentage of the total credit Amount and applied to the At-Risk-Amount. An Example is if the At-Risk Amount is $100,000 and there are three Service Level Defaults (#1 = $50,000, #2=30,000 and #3=$80,000 for a total of $160,000) then the credit for Defaults would be calculated as follows:

Default 1		Default 2		Default 3		Total Credits Due
$50,000	+	$30,000	+	$80,000	=	$160,000

Default 1		Total Credits Due		Default 1Proration
$50,000	/	$160,000	=	31.25%

At-Risk Amount		Default 1 Proration		Credit Due for Default 1
$100,000	X	31.25%	=	$31,250

If more than one Service-Level Default has occurred in a single month, the sum of the corresponding Service-Level Credits shall be credited to the Commonwealth.

5.2 In no event shall the amount of Service-Level Credits credited to the Commonwealth with respect to all Service-Level Defaults occurring in a single month exceed, in total, the At-Risk Amount.

5.3 The Offeror shall notify the Commonwealth in writing if the Commonwealth becomes entitled to a Service-Level Credit, which notice shall be included in the standard monthly reporting for Critical Measurements and Key Measurements as described in Section 3 above. The monthly reports shall also describe any failure to meet Key Measurements for the month.

5.4 The total amount of Service-Level Credits that the Offeror will be obligated to pay to the Commonwealth, with respect to Service-Level Defaults occurring each month, shall be credited on the invoice that contains charges for the month during which the Service-Level Default(s) giving rise to such credit(s) occurred. For example, the amount of Service-Level Credits payable with respect to Service-Level Defaults occurring in August shall be set forth in the invoice for the August Monthly Invoice Amount issued in September.

5.5 The Offeror acknowledges and agrees that the Service-Level Credits shall not be deemed or construed to be liquidated damages or a sole and exclusive remedy or in derogation of any other rights and remedies the Commonwealth has hereunder or under the Contract.

6 Earnback

The Offeror shall have Earnback opportunities with respect to Service-Level Credits as follows:

6.1 The Service Level must be identified as Earnback Eligible per Schedule J.2 with a "Y" in the column titled "Earnback Eligible"

6.2 Within fifteen (15) days after the first anniversary of the month in which any Service Level Default occurs, the Offeror shall provide a report to the Commonwealth that will include, with respect to each Critical Measurement for which there was a Service-Level Default, the following:

6.2.1 Statistics on the Offeror's average monthly performance during the preceding twelve (12) months

6.2.2 The amount of Service Level Credit imposed for Service Level Default

6.2.3 The total amount of Service Level Credits imposed for Service Level Defaults

6.3 If the Offeror fails to meet the "Earnback Minimum" objective, Service Level Credits will be calculated and applied on the next Billing Cycle.

6.3.1 Earn-back WILL NOT be available to the Offeror if it fails to meet the "Earnback Minimum" objective (Credit applied on the next Billing Cycle).

6.4 If the Offeror fails to meet the "Required" objective, Service Level Credits will be calculated and applied in twelve (12) months if an Earnback is not earned or immediately upon failure of a "Required" objective.

6.4.1 Earn-back WILL be available to the Offeror if they fail to meet the "Required" objective. If the Offeror meets the "Required" objective for the following (consecutive) 12 months, the Offeror will not be required to issue the credit.

6.4.2 If, during a rolling 12-Month Review Period, the Commonwealth deletes the Critical Measurement (including demotion of a Critical Measurement to a Key Measurement) that corresponds to the Service Level Default giving rise to such 12-Month Review Period, Offeror shall continue to track its performance for such former Critical Measurement and shall be entitled to an Earnback if and to the extent, and at the time, it would have otherwise been entitled to such Earnback in accordance with the procedures described in Section 6.4.1 above had the Critical Measurement not been so deleted or demoted to a Key Measurement during such 12-Month Review Period.

6.5 If the Contract is terminated for default all service credits are due upon notice of termination.

7 Additions, Modifications, and Deletions of Service Levels

The Commonwealth may add, modify or delete Critical Measurements or Key Measurements as described below by sending written notice in accordance with Section 4 above.

7.1 Additions

The Commonwealth may add Service Levels in accordance with this Section 7.1 and by providing written notice in accordance with Section 4. Service Level commitments associated with added Service Levels will be computed as follows:

7.1.1 Where at least nine (9) consecutive months of verifiable service measurements exist for a particular Service that is being provided by the Offeror, the Parties agree that the Service Level shall be defined as the average of such service measurements for the Nine-Month Measurement Window , or

7.1.2 Where no measurements exist for a particular Service that is being provided by the Offeror, the Parties shall attempt in good faith to agree on a Service Level commitment using industry standard measures or third party advisory services (for example, Gartner Group, Yankee Group, etc.), or

7.1.3 Where less than nine (9) months or no measurements exist for a particular Service that is being provided by the Offeror, and the Parties fail to agree on a Required Service Level and an Earnback Minimum Service Level commitment using industry-standard measures as described in Item 2 of Section 7.1 of this Schedule, the Parties shall do the following:

7.1.3.1 The Offeror shall begin providing monthly measurements within ninety (90) days after the Offeror's receipt of the Commonwealth's written request and subject to agreement on such measurements in accordance with the Change Control Procedures.

7.1.3.2 After nine (9) or more actual Service Level attainments have been measured (or should have been measured per Section 7.1.3.1 of this Schedule J.1 and if

not so measured; constructed as described in Section 7.1.3.2.1 of this Schedule J.1), the Commonwealth may at any time in writing request that Section 7.1.1 above be used to establish the Service Level commitments:

7.1.3.2.1 If the Offeror is responsible for measuring actual service-level attainments for nine (9) consecutive months and fails to provide one (1) or more measurements during the Six-Month Measurement Window such that nine (9) consecutive measurements are not available, the missing measurement(s) shall be constructed according to the following:

(i) if one measurement is missing, the missing measurement shall be constructed by using the highest of the eight (8) actual measurements, or

(ii) if two (2) or more measurements are missing, the first missing measurement shall be constructed by using the highest of the actual measurements and adding to that measurement twenty percent (20%) of the difference between that measurement and one hundred percent (100%) and each of the remaining missing measurements shall be constructed by using the highest of the actual measurements and adding to that measurement thirty-five percent (35%) of the difference between that measurement and one hundred percent (100%).

For example, if there were four measurements for a particular Service, and the highest of the four measurements were 95%, then the measurements for the missing two months would be deemed to be 96.00% (representing 95.00% plus (20% of 5%)) and 96.75% (representing 95.00% plus 35% of 5%)), respectively.

7.1.3.2.2 If the Offeror has provided twenty-four (24) actual service-level attainment measurements for any particular Service provided by the Offeror, and the Commonwealth has not used Item 1 of Section 7.1 of this Schedule to establish Service Level commitments, then continued provision of actual service-level attainment measurements shall be subject to the Parties' mutual agreement in accordance with the Change Control Procedures.

7.2 Deletions

The Commonwealth may delete Critical Measurements or Key Measurements by sending written notice in accordance with Section 4 herein.

8 Service Delivery Failure

If either (i) three (3) Service Level Defaults occur in any six (6) month period, or (ii) the Problem Management Process, as defined in the Commonwealth Computing Procedures Manual (CCPM), has identified a Major recurring Problem not directly reflected in SLA performance and there is no formal Chronic Service Issue project underway to address such Problem (each a "Service Delivery Failure" or “SDF”) , then within thirty (30) days of the occurrence of such Service Delivery

Failure, Offeror will provide the Commonwealth with a written plan (the "SD (Service Delivery) Service Improvement Plan") for improving the Offeror's performance to address the Service Delivery Failure, which plan will include a specific implementation timetable. The SD Service Improvement Plan will be subject to the Commonwealth's approval. Within 30 days of the Commonwealth's approval, or such other timeframe agreed to by the Commonwealth, Offeror will implement the SD Service Improvement Plan, which will include making timely and appropriate investments in people, processes and technology. In addition, the Offeror will demonstrate to the Commonwealth's reasonable satisfaction, that the changes implemented by Offeror have been made in normal operational processes to sustain compliant performance results in the future.

If Offeror fails to implement the SD Service Improvement Plan in the specified timetable, or if after the implementation of the SD Service Improvement Plan performance has not consistently improved, Offeror will be liable for a Service Level Credit in an amount equal to 10 percent (10%) of the then-current monthly invoice (the "SDF Credit"). The SDF Credit will be applied to the monthly invoice until such time as Offeror has demonstrated, for three (3) consecutive months, effective Service delivery, as evidenced by satisfying the criteria specified in the Problem Management RCA process related to the Service and/or no reoccurrence of the Service Level Defaults which triggered the applicable Service Delivery Failure. The SDF Credit will not be subject to Earnback. Under no circumstances shall the imposition of the SDF Credit described above or the Commonwealth's exercise of any other rights hereunder be construed as the Commonwealth's sole or exclusive remedy for any failures described hereunder. SDF Credits are not to be considered a part of the At-Risk Amount calculation in relation or Service Levels and are a separate commitment from the Offeror indicating the Offeror’s commitment to delivering service.

Further, the Offeror will work with the Commonwealth to define and document a repeatable Chronic Service Issue Resolution process in the Problem Management section of the Service Management Manual to be effective on the Effective Date. At a minimum, the process should address:

8.1 Establishment of a project team to drive and manage the process improvement

8.2 Approach to development of an Improvement Plan which will include milestones, resources and dependencies

8.3 Approach to Program Management of Plan implementation including integration of improvements/changes into daily operational processes

8.4 Implementation of Progress Reporting within the Offerors management structure, the Commonwealth and the Commonwealth Customers

8.5 Closure process to transition solution into normal operations including alignment of processes defined in the Service Management Manual

9 Commencement of Obligations

The obligations set forth herein shall commence on the first full month of service delivery in accordance with provisions set forth in Section 7.1 above.

10 Cooperation

The achievement of the Service Levels by the Offeror may require the coordinated, collaborative effort of the Offeror with other Third Parties. The Offeror will provide a single point of contact for the prompt resolution of all Service-Level Defaults and all failures to provide high quality Services to the Commonwealth, regardless of whether the reason for such Service-Level Defaults, or failure to provide high-quality Services to the Commonwealth, was caused by the Offeror.

11 Improvement Plan for Key Measurements

If the Offeror fails to satisfy any Key Measurement for three (3) months in any rolling six (6) month period, the Offeror shall provide the Commonwealth with a written plan for improving the Offeror's performance to satisfy the Key Measurement within thirty (30) days of the third (3rd) failure to meet the Service Level for the Key Measurement. At Offeror's sole cost and expense, the Offeror shall promptly implement such plan. If Offeror fails to implement the plan in the specified timetable, or if after ninety (90) days after any such implementation of the plan, the Key Measurement has not consistently improved, then the Commonwealth may at its option declare that such failure will constitute a Service Delivery Failure and Offeror will comply with the requirements of Section 8 above.

12 Measuring Tools

As of the Effective Date, the measuring tools and methodologies set forth in Schedule J.3 Datacenter SLA Definitions represent acceptable measuring tools and methodologies for the Critical Measurements and Key Measurements designated.

If there are any Critical Measurement Service Levels for which the measuring tools and methodologies have not been agreed upon by the Commonwealth and the Offeror and for which measuring tools are not included in Schedule J.3, and the Offeror fails to propose a measuring tool for such Critical Measurement that is acceptable to the Commonwealth prior to the date upon which the Offeror shall be responsible for Service Level performance and Service-Level Credits due for Service-Level Default, such failure shall be deemed a Service-Level Default for the Critical Measurement until the Offeror proposes and implements such acceptable measuring tool. The Commonwealth will not unreasonably withhold approval for the Offeror's recommendation for an alternate tool.

Tools for new Critical Measurement Service Levels will be implemented according to the Change Control Procedures. Upon the Commonwealth's written notice approving a proposed alternate or new measurement tool, such tool shall be deemed automatically incorporated into Schedule J.3 as of the date for completion of implementation set forth in the Commonwealth's notification without requirement for an additional written amendment of this Agreement.

If, after the Effective Date or the implementation of tools for new Critical Measurements, the Offeror desires to use a different measuring tool for a Critical Measurement, the Offeror shall provide written notice to the Commonwealth, in which event the Parties will reasonably adjust the measurements as necessary to account for any increased or decreased sensitivity in the new measuring tools; provided that, if the Parties cannot agree on the required adjustment, the Offeror will continue to use the measuring tool that had been initially agreed to by the Parties.

It is not anticipated that changes in the measuring tools will drive changes in Service Levels; rather, the need to collect and accurately reflect the performance data should drive the development or change in performance monitoring tools. Offeror will configure all measuring tools to create an auditable record of each user access to the tool and any actions taken with respect to the data measured by or residing within the tool. All proposed measuring tools must include functionality enabling such creation of an auditable record for all accesses to the tool.

13 Times

Unless otherwise set forth herein, all references in this Schedule to times shall refer to definition as described in **Schedule A – Defined Terms**.

14 Single Incident/Multiple Defaults

If a single incident results in the failure of the Offeror to meet more than one Service Level, the Offeror shall issue Service Level Credits for every failure not to exceed the At-Risk Amount.

An example would be if a network component experienced a failure that denies access to ten subscribed services. The CMDB would identify in impacted service and Service Level Credits would be due on all ten services.

15 Exclusions

For purposes of calculating Actual Uptime and Availability, the Scheduled Uptime and Downtime shall not include any period of Downtime that is the result of scheduled time required to perform system maintenance (for example, preventive maintenance, system upgrades, etc.), provided that such time has been mutually agreed between the Parties and is scheduled so as to minimize the impact to the Commonwealth's business. The Offeror shall maintain Availability during such periods to the extent reasonably practicable.

16 Percentage Objectives

Both parties understand that certain Service Levels may not be measured against an objective of one hundred percent (100%), for example, Time (days, hours, etc.), defects, etc. where zero (0) hours/days and zero percent (0%), respectively, are the appropriate objectives. The calculations described in this Section will be modified when appropriate to reflect these objectives. For example, if the Service Level involved defects in lines of code where zero percent (0%) is the objective, lowest would be changed to highest in Item 1 of Section 7.1 herein, highest would be changed to lowest in Item 3.2.1 of Section 7.1 herein and one hundred percent (100%) would be changed to zero percent (0%) in Item 3 of Section 7.1.

Schedule J.2

Datacenter Service Level Matrix

Description of Exhibit

This Schedule J.2 (Service Level Matrix) sets forth the following:

1. For Critical Measurements (CMs)

- the numeric measurements for Minimum Service Levels and Expected Service Levels;
- the timing regarding the commencement of obligations for each Critical Service Level
- a cross-reference to Schedule J.3 Datacenter SLA Definitions where the qualitative description of the Performance Category and the associated Critical Service Level can be found

2. For Key Measurements (KMs)

- the numeric measurements for Minimum Service Levels and Expected Service Levels;

Service Level Matrix

Ref [a]	Service Level Categories	Required	Earnback Minimum	Earnback Eligible	Measurement Window	SLA Class[b]	Default Remedy Type[c]

SL30	Reports Delivered On Time	10.00	5.00	Y	Monthly	KM	$10,000.00 Credit on Invoice
SL31	Off-Site Media Management	95.000%	90.000%	Y	Monthly	KM	Monthly Invoice Amount for Impacted Service

Notes:

(a) Ref- See Schedule J.3 Datacenter SLA Definitions for detailed description of the Service Level metrics.

(b) SLA Class as defined in Schedule J.1.

-- SLA Class "CM" means "Critical Measurement"

-- SLA Class "KM" means "Key Measurement"

(c) Amount listed for Key Measurements to be used in the event the Key Measurement becomes a Critical Measurement through the Change Management Process. While the Service Level remains a Key Measurement no Default Remedies are due.

4. ADDITIONAL DEFINITIONS....47

1. Offeror Guidelines

This Schedule contains specific service level requirements that the Offeror must meet in order to perform the requested Services. The Offeror must respond to the requirements contained in this Schedule according to the instructions provided below.

1.1. Offeror Instructions

- The Offeror's response to the RFP should reflect and comply with the information contained in this Schedule.
- The Offeror will complete the following sections in each of the Critical Measurements and Key Measurements:
  - Collection Process – identify how the measurement data will be collected
  - Reporting Tools – identify any tools, automated or manual, that will be used
  - Raw Data Storage (Archives) – identify where data will be stored and accessible by the Commonwealth for further analysis
  - Reporting Format/s – identify the proposed reporting format

1.2. Service Level Class Definitions

There are two classes of Service Level performance metrics used, Critical Measurements (CMs) and Key Measurements (KMs).

- **Critical Measurements (CMs)** are performance measurements defined for the most important service areas. CMs will have associated fees, e.g. Performance Credits, payable by the Offeror to Commonwealth for missed CMs according to the terms of the negotiated contract.

- **Key Measurements (KMs)** are performance target measurements for non-critical service areas. KMs are not eligible for Performance Credits. Key Measures cover less critical service deliverables, sub processes or interim activities that are related to CM performance, and are reflective of overall effective and efficient service performance management. Based on periodic contractual SLA reviews, adjustments may be negotiable and KMs may be promoted to CMs.

Service Level measurement and reporting normally begins immediately following the Service Commencement Date. However, to allow for stabilization where appropriate, application of Performance Credits may be reduced or waived for some period of time (to be negotiated) after the Service Commencement Date.

2. Service Level Details

The following pages describe each Service Level, its calculation, and other details relevant to the Service Level.

SL01 Application Infrastructure Availability – Platinum

Service Level Reference	Description
Application Infrastructure Availability– Platinum	
Service Category	Availability
Metric Description	This Service Level measures the percentage of time the Applications are Available during the applicable Measurement Window. This measurement is by application, not by server instance. Availability is defined by whether the application residing on any of the associated server instances is available to users. Targeted Applications will be determined by the Commonwealth based on the critical nature of the Agency Application.
Metric Inclusions	Server Instances and related CIs supporting Targeted Applications are identified in the CMDB. Scheduled hours of operations and maintenance windows for each infrastructure element related to the Targeted Applications will be maintained in the Commonwealth Computing Procedures Manual.
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** The Service Level calculation for "Targeted Applications Infrastructure Availability" is the sum of Actual Uptime for the individual Applications divided by the sum of expected, scheduled Uptime for the Applications, with the result expressed as a percentage. • = 1 – ((Sum of Minutes the Application is not Available) / ((1440 Minutes Per Day) X (Calendar Days In Month))) expressed as a percentage
Collection Process	*[Offeror to Complete]*
Reporting Tools / Data Source(s)	*[Offeror to Complete]*
Data Storage (Archives)	*[Offeror to Complete]*
Reporting Format/s	*[Offeror to Complete]*
Service Level Reporting Window	Monthly

SL02 Application Infrastructure Availability – Gold

Service Level Reference	Description
Application Infrastructure Availability – Gold	
Service Category	Availability
Metric Description	This Service Level measures the percentage of time the Applications are Available during the applicable Measurement Window. This measurement is by application, not by server instance. Availability is defined by whether the application residing on any of the associated server instances is available to users. Targeted Applications will be determined by the Commonwealth based on the critical nature of the Agency Application.
Metric Inclusions	Server Instances and related CIs supporting Targeted Applications are identified in the CMDB. Scheduled hours of operations and maintenance windows for each infrastructure element related to the Targeted Applications will be maintained in the Commonwealth Computing Procedures Manual.
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** The Service Level calculation for "Targeted Applications Infrastructure Availability" is the sum of Actual Uptime for the individual Applications divided by the sum of expected, scheduled Uptime for the Applications, with the result expressed as a percentage. • = 1 – ((Sum of Minutes the Application is not Available) / ((1440 Minutes Per Day) X (Calendar Days In Month))) expressed as a percentage

SL04 Application Infrastructure Availability – Bronze

Service Level Reference	Description
Application Infrastructure Availability– Bronze	
Service Category	Availability
Metric Description	This Service Level measures the percentage of time the Applications are Available during the applicable Measurement Window. This measurement is by application, not by server instance. Availability is defined by whether the application residing on any of the associated server instances is available to users. Targeted Applications will be determined by the Commonwealth based on the critical nature of the Agency Application.
Metric Inclusions	Server Instances and related CIs supporting Targeted Applications are identified in the CMDB. Scheduled hours of operations and maintenance windows for each infrastructure element related to the Targeted Applications will be maintained in the Commonwealth Computing Procedures Manual.
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** The Service Level calculation for "Targeted Applications Infrastructure Availability" is the sum of Actual Uptime for the individual Applications divided by the sum of expected, scheduled Uptime for the Applications, with the result expressed as a percentage. • = 1 – ((Sum of Minutes the Application is not Available) / ((1440 Minutes Per Day) X (Calendar Days In Month))) expressed as a percentage

Service Level Reporting Window	Monthly

SL05 Application Infrastructure Availability – Basic

Service Level Reference	Description
Application Infrastructure Availability - Basic	
Service Category	Availability
Metric Description	This Service Level measures the percentage of time the Applications are Available during the applicable Measurement Window. This measurement is by application, not by server instance. Availability is defined by whether the application residing on any of the associated server instances is available to users. Targeted Applications will be determined by the Commonwealth based on the critical nature of the Agency Application.
Metric Inclusions	Server Instances and related CIs supporting Targeted Applications are identified in the CMDB. Scheduled hours of operations and maintenance windows for each infrastructure element related to the Targeted Applications will be maintained in the Commonwealth Computing Procedures Manual.
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** The Service Level calculation for "Targeted Applications Infrastructure Availability" is the sum of Actual Uptime for the individual Applications divided by the sum of expected, scheduled Uptime for the Applications, with the result expressed as a percentage. • = 1 – ((Sum of Minutes the Application is not Available) / ((1440 Minutes Per Day) X (Calendar Days In Month))) expressed as a percentage
Collection Process	*[Offeror to Complete]*
Reporting Tools / Data Source(s)	*[Offeror to Complete]*
Data Storage (Archives)	*[Offeror to Complete]*
Reporting Format/s	*[Offeror to Complete]*
Service Level Reporting Window	Monthly

SL06 Resolution Time - Severity Level 1 Incidents

Service Level Reference	Description
Resolution Time - Severity Level 1 Incidents	
Service Category	Incident and Problem Resolution
Metric Description	This Service Level measures the percentage of time Offeror resolves Severity Level 1 events within the applicable time period. Also known as "Mean Time To Resolve" (MTTR) for Severity Level 1 Incidents.
Metric Inclusions	Includes all Applications Infrastructure components as defined by the CMDB and Severity Level 1 events that are assigned to the appropriate Service Level. The time limits for the resolution of each are as listed below. Time frame for resolution shall be based on the Tier designation for the highest mainframe, server or instance associated with the respective incident. For incidents not associated with a specific Mainframe, Server, or Instance, the resolution timeframe shall be measured as a Silver Tier. Platinum < 90 minutes Gold < 120 minutes Silver < 180 minutes Bronze < 240 Minutes
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** The Service Level calculation for "Resolution Time – Severity Level 1" is the total number of Incidents that are or become Severity Level 1 that are Resolved within the relevant Resolution Time specified, divided by the total number of Incidents that are or become Severity Level 1 during the applicable Measurement Window, with the result expressed as a percentage. • = (Number of Severity Level 1 Incidents Resolved within Limit) / (Total Number of Severity Level 1 Incidents) expressed as a percentage
Collection Process	*[Offeror to Complete]*
Reporting Tools / Data Source(s)	*[Offeror to Complete]*

Data Storage (Archives)	*[Offeror to Complete]*
Reporting Format/s	*[Offeror to Complete]*
Service Level Reporting Window	Monthly

SL07 Resolution Time - Severity Level 2

Service Level Reference	Description
Resolution Time - Severity Level 2	
Service Category	Incident and Problem Resolution
Metric Description	This Service Level measures the percentage of time Offeror resolves Problems within the applicable time periods. Also known as "Mean Time To Resolve" (MTTR) for Severity Level 2 Incidents.
Metric Inclusions	Includes all Mainframes, Servers, and Instances associated with Targeted Applications and other Severity Level 2 events not associated with Servers or Instances. The time limits for the resolution of each mainframe, server or instance are as listed below. Time frame for resolution shall be based on the Tier designation for the highest mainframe, server or instance associated with the respective incident. For incidents not associated with a Mainframe, Server, or Instance, resolution shall be measured as Silver Tier (< 360 minutes). Platinum < 90 minutes Gold < 180 minutes Silver < 360 minutes Bronze < 960 Minutes
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** The Service Level calculation for "Resolution Time – Severity Level 2" is the total number of Incidents that are or become Severity Level 2 that are Resolved within the relevant Resolution Time specified, divided by the total number of Incidents that are or become Severity Level 2 during the applicable Measurement Window, with the result expressed as a percentage. • = (Number of Severity Level 2 Incidents Resolved within Limit) / (Total Number of Severity Level 2 Incidents) expressed as a percentage
Collection Process	*[Offeror to Complete]*
Reporting Tools / Data Source(s)	*[Offeror to Complete]*
Data Storage (Archives)	*[Offeror to Complete]*

Reporting Format/s	*[Offeror to Complete]*
Service Level Reporting Window	Monthly

SL08 Resolution Time - Severity Level 3/4

Service Level Reference	Description
Resolution Time - Severity Level 3/4	
Service Category	Incident and Problem Resolution
Metric Description	This Service Level measures the percentage of time Offeror resolves Incidents within the applicable time periods. Also known as "Mean Time To Resolve" (MTTR) for Severity Level 3 and Severity Level 4 Incidents.
Metric Inclusions	Severity Level 3 - For all Severity Level 3 Incidents , the incident shall be resolved within 3,780 Business Minutes (i.e. 63 hours) Severity Level 4 - For all Severity Level 4 Incidents, the incident shall be resolved within 4,860 Business Minutes (i.e. 81 hours or 9 business days) Total Business Minutes shall be measured during only those minutes between 8:00 AM and 5:00 PM inclusive, Monday through Friday inclusive (1 Business day = 9 Business hours = 540 Business minutes); (1 Business Week = 2,700 minutes)
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	8:00AM – 5:00 PM
Days of Measurement	Monday through Friday
Calculation	• **Summary:** The Service Level calculation for "Resolution Time – Severity Level 3/4" is the total number of Incidents that are or become Severity Level 3 or 4 that are Resolved within the relevant Resolution Time specified, divided by the total number of Incidents that are or become Severity Level 3 or 4 during the applicable Measurement Window, with the result expressed as a percentage. • = ((Number of Severity Level 3 Incidents Resolved within Limit) +(Number of Severity Level 4 Incidents Resolved within Limit)) / ((Total Number of Severity Level 3 Incidents) + (Total Number of Severity Level 4 Incidents)) expressed as a percentage

Service Level Reporting Window	Monthly

SL09 Solution Request Fulfillment

Service Level Reference	Description
Solution Request Fulfillment	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror successfully implements a Solution Request within the timeframe committed to the requester as measured in the applicable Measurement Window. All phases of the Solution implementation process from the Commonwealth Customer approval of the Solution Proposal through implementation and the Commonwealth Customer acceptance into production are included in this measure.
Metric Inclusions	For purposes of calculating this Service Level, only those requests which require a solution proposal that has been accepted by the State will be included in the calculation. Solution Requests without a production date established by the time the order is received will be counted as a "missed" expectation.
Metric Exclusions	None
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of projects that are successfully completed during the applicable Measurement Window on are before the due date specified in the applicable Solution Proposal and/or a subsequent project plan, divided by the total number of projects that should have been completed during the applicable Measurement Window, with the result expressed as a percentage. • = (Number of Solution Requests Completed within Limit) / (Total Number of Solution Requests) expressed as a percentage
Collection Process	*[Offeror to Complete]*
Reporting Tools / Data Source(s)	*[Offeror to Complete]*
Data Storage (Archives)	*[Offeror to Complete]*
Reporting Format/s	*[Offeror to Complete]*
Service Level Reporting Window	Monthly

SL10 Standard Service Request Fulfillment

Service Level Reference	Description
Standard Service Request Fulfillment	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror successfully completes Standard Service Requests that do not require a purchase or a solution proposal to be approved by the State. Specific target timeframes are either established in the CCPM or a specific commitment date outside of the standard timeframe may be established at the State's discretion. Examples of these types of requests are provision of ID access, upgrade to a new OS version, run a special batch job, etc.
Metric Inclusions	Included as Standard Service Requests shall be an agreed upon set of service requests as specified in the Commonwealth Computing Procedures Manual.
Metric Exclusions	• Elapsed time waiting for the Commonwealth or a Commonwealth Customer's required approval or hold shall be excluded. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of Standard Service Requests successfully completed by Offeror during the applicable Measurement Window and within the required timeframes specified in Commonwealth Compute Procedure Manual (CCPM) or other agreed to date, divided by the number of Standard Service Requests that should have been completed by Offeror during the applicable Measurement Window, with the result expressed as a percentage. • = (Number of Standard Requests Completed within Limit) / (Total Number of Standard Requests) expressed as a percentage
Collection Process	*[Offeror to Complete]*
Reporting Tools / Data Source(s)	*[Offeror to Complete]*
Data Storage (Archives)	*[Offeror to Complete]*
Reporting Format/s	*[Offeror to Complete]*
Service Level Reporting Window	Monthly

SL11 Completion of Project/Solution Phase

Service Level Reference	Description
Completion of Project/Solution Phase	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror successfully completes a phase (e.g. procurement, floor prep, network prep, physical install, turn-up and test, production) milestone no later than the committed timeframe. All phases of the Solution implementation process following the Commonwealth Customer approval of the Solution Proposal through implementation and the Commonwealth Customer acceptance into production are included in this measure.
Metric Inclusions	For purposes of calculating this Service Level, only those requests which require a solution proposal or project plan that has been accepted by the State and a production date established will be included in the calculation. If a milestone is missed, the rescheduled milestone will also be included in the measurement
Metric Exclusions	All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of Project or Solution Requests successfully completed by Offeror during the applicable Measurement Window and within the required timeframes specified in Commonwealth Compute Procedure Manual (CCPM) or other agreed to date, divided by the number of Project and Solution Requests that should have been completed by Offeror during the applicable Measurement Window, with the result expressed as a percentage • = (Number of Project/Solution Requests Completed within Limit) / (Total Number of Project/Solution Requests) expressed as a percentage
Collection Process	*[Offeror to Complete]*
Reporting Tools / Data Source(s)	*[Offeror to Complete]*
Data Storage (Archives)	*[Offeror to Complete]*
Reporting Format/s	*[Offeror to Complete]*
Service Level Reporting Window	Monthly

SL12 Solution and Procurement Proposals Delivered

Service Level Reference	Description
Solution and Procurement Proposals Delivered	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror provides a viable proposal to the State, in response to a solution or procurement request, within the timeframe established in the Commonwealth Computing Procedures Manual for commodity and standard requests or a jointly agreed to commitment date for custom requests.
Metric Inclusions	Each proposal submitted to the State will be considered a measurable event. If there are multiple proposals for one request due to requirements changes then subsequent iterations will be counted as another event. Each will count as an event and an opportunity to succeed or fail.
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of viable proposals submitted to the State during the applicable Measurement Window on or before the due date determined from the Commonwealth Computing Procedures Manual for Standard and Commodity Requests or jointly agreed for custom requests, divided by the total number of proposals that should have been submitted during the applicable Measurement Window, with the result expressed as a percentage. • = (Number of Solution and Procurement Proposal Requests Completed within interval) / (Total Number of Solution and Procurement Proposal Requests) expressed as a percentage

Service Level Reporting Window	Monthly

SL13 CMDB Content Accuracy and Timeliness

Service Level Reference	Description
CMDB Content Accuracy and Timeliness	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of an audited statistically valid sample of Inventory Records (as defined below) during the Measurement Window that is determined to be Accurate (as defined below) by such audits.
Metric Inclusions	The audited sample for this Service Level must contain a number of randomly selected CMDB Inventory Records that is reasonably acceptable to the Commonwealth. The random selection shall be a statistically significant stratified random sampling representing all Commonwealth Customers each month. **Definitions for purposes of this Service Level:** "Accurate" means all Critical Inventory Attributes are correctly and completely populated in the CMDB Inventory of Record. "Critical Inventory Attributes" means those database fields in an Inventory Record that are essential for Offeror's successful delivery of Service and necessary for CoPA's successful performance of retained responsibilities, including architecture, IT planning, and reconciliation of invoices. Critical Inventory Attributes that shall be audited are set out in Commonwealth Computing Procedures Manual and may be modified over time in accordance with the Commonwealth Computing Procedures Manual. "CMDB Inventory of Record" means the inventory of CIs, including all Equipment and Software, to be created and maintained by Offeror in accordance with the CCPM. "Inventory Record" means the record for a single item of Equipment or Software in the Inventory of Record, including all of the Critical Inventory Attributes for that item.
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of CMDB Inventory Records that are audited during the applicable Measurement Window and that are Accurate, divided by the total number of Inventory Records that are audited during the applicable Measurement Window, with the result expressed as a percentage.

	• = ((Number of Valid Records Found) / (Total Number of Records Audited)) expressed as a percentage

SL14 Software License Renewal Timeliness

Service Level Reference	Description
Software License Renewal Timeliness	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the timeliness of all license and maintenance renewals for software managed by Offeror.
Metric Inclusions	This SLA includes the renewal of software licenses included in the Agreement and hardware maintenance agreements included in Hardware Service Charges (HSC) to a the Commonwealth Customer (e.g. renewal of SSL certificates, Application Utility software, custom solution hardware (covered by a maintenance agreement) charged to the Commonwealth Customer through the HSC).
Metric Exclusions	• Renewals for software or maintenance purchased outside of this contract by the Commonwealth or the Commonwealth Customers and not included in Offeror's charges to the Commonwealth are excluded. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	This Service Level measures the timeliness of all license and maintenance renewals for software managed by Offeror.
Days of Measurement	N/A
Calculation	• **Summary:** Renewals are routinely expected to be installed ten (10) or more Business Days prior to the renewal due date for the item or service. (Renewal due date is the date when the current license or maintenance contract expires.) The Service Level calculation for "Software License Renewal Timeliness" is a percentage derived from the total number of all renewals processed divided by the total number due for the month that were renewed before the renewal expiration date without disruption in service. • = ((Successful Software Renewals implemented within Time Frame) / (Total Software License Renewals Completed)) expressed as a percentage

SL15 Successful Backups

Service Level Reference	Description
Successful Backups	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror completes backup jobs successfully during the applicable Measurement Window in accordance with the relevant criteria specified in the Commonwealth Computing Procedures Manual.
Metric Inclusions	Backup jobs include all registered backup clients (including but not limited to all file systems, databases, application files, operating systems, applications and respective data).
Metric Exclusions	• If there is an appropriate tool available and in use that captures open files, then the backup of open files are included as part of the backup. If there is not an appropriate tool available and in use for the capture of open files, then open files are skipped and not counted against this Service Level. Any batch jobs related to infrastructure backups, or other functionality exclusively for Offeror would be excluded. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level is the sum of the number of times Offeror completes backup jobs successfully and complete on time during the applicable Measurement Window divided by the of the sum of the number of times Offeror began or should have begun backup jobs within the applicable measurement window, with the result expressed as a percentage. • = ((Number of Successful Backups) / (Total Number of Backups Attempted)) expressed as a percentage

SL16 Successful Recoveries

Service Level Reference	Description
Successful Recoveries	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror completes data recoveries successfully and on time during the applicable Measurement Window in accordance with the relevant criteria specified in the Commonwealth Computing Procedures Manual.
Metric Inclusions	Recoveries include all registered recovery clients (including but not limited to all file systems, databases, application files, operating systems, applications and respective data).
Metric Exclusions	• Any batch jobs related to infrastructure recoveries, or other functionality exclusive for the Offeror would be excluded. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of data recovery jobs that are completed successfully and on time in accordance with the relevant criteria set forth in the Commonwealth Computing Procedures Manual during the applicable Measurement Window, divided by the total number of data recovery jobs that were attempted or scheduled to be completed during the applicable Measurement Window, with the result expressed as a percentage. • = ((Number of Successful Recoveries) / (Total Number of Recoveries Attempted)) expressed as a percentage

SL17 Security Incident Notification Timeliness

Service Level Reference	Description
Security Incident Notification Timeliness	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror completes identifying and notifying CoPA of detected security incidents in accordance with ITB-SEC024.
Metric Inclusions	Time required receiving and analyzing reactive and/or proactive incidents from any and all managed sources including, but not limited to, firewalls, intrusion detection/prevention devices, VPN appliances, switches, routers, and all other equipment over which Commonwealth traffic traverses. Time required contacting CoPA and reporting the incident in accordance with ITB-SEC024.
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of Security Incidents reported in accordance with ITB SEC-024 using the procedure set forth in the Commonwealth Computing Procedures Manual, divided by the total number of detected security incidents, with the result expressed as a percentage. • = [(number of incidents reported in accordance with ITB SEC-024) / number of detected incidents)] expressed as a percentage

SL18 Security Update Timeliness

Service Level Reference	Description
Security Update Timeliness	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror completes Security Updates successfully and on time during the applicable Measurement Window in accordance with the relevant criteria specified in the Commonwealth Computing Procedures Manual.
Metric Inclusions	Security Updates include all updates and changes designated as a Security Update at the time or request/order. These updates includes, but are not limited to, Security Patches, Firewall configuration changes, Proxy updates and changes, and Identity Management Changes.
Metric Exclusions	• Any batch jobs related to infrastructure recoveries, or other functionality exclusive for the Offeror would be excluded. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of Security update requests that are completed successfully and on time in accordance with the relevant criteria set forth in the Commonwealth Computing Procedures Manual during the applicable Measurement Window, divided by the total number of Security update requests that were requested to be completed during the applicable Measurement Window, with the result expressed as a percentage. • = ((Number of Security Updates) / (Total Number of Requested Security Updates)) expressed as a percentage

SL19 Incident Management Communication – for Severity 1 Incidents

Service Level Reference	Description
Incident Management Communication – for Severity 1 Incidents	
Service Category	Incident & Problem Resolution
Metric Description	This Service Level measures the percentage of time the Offeror provides the notices to the applicable Authorized Users within the following timeframes with respect to Incidents that are or become Severity 1 Incidents and that are not Resolved in less than one (1) hour from the Start Time for such Incident. • First notice: Within one hour of incident ticket creation • Subsequent notices: every 30 minutes A "notice" is defined as : • Verbal communication to Authorized User, as documented in the ticket • Bridge call including Authorized User, as documented in the ticket • Email to Authorized User, as documented in the ticket Such notices shall not be deemed to have been provided unless (a) the Authorized User that reported the Incident has been contacted by the Offeror and such notice of status has been provided or (b) Offeror has left a voice mail (or if not possible because the Authorized User does not have a voice mail box, sent an email or attempted some other reasonable means of communication) for the Authorized User.
Metric Inclusions	Includes all Priority 1 Incidents
Metric Exclusions	• Priority 2, 3 and 4 Incidents • Duplicate Incident Reports for the incident • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of Incidents that are or become Severity 1 Incidents, that have Start Times during the applicable Measurement Window, that have actual Resolution Times of greater than one (1) hour and for which Offeror provided the applicable Authorized User the required notice(s) within the required timeframe(s) as set forth in this Section, divided by the total number of Incidents that are or become Severity 1 Incidents, that have Start Times during the applicable Measurement Window and that have actual Resolution Times of

	greater than one (1) hour, with the result expressed as a percentage. • = ((Number of Incidents with Communications within Established Intervals) / (Total Number of Severity 1 Incidents)) expressed as a percentage

SL20 Root Cause Analysis Delivery

Service Level Reference	Description
Root Cause Analysis Delivery	
Service Category	Incident & Problem Resolution
Metric Description	This Service Level measures the percentage of time Offeror reports the results of a Formal Root Cause Analyses for Service Restoral Incidents within the timeframes below during the Measurement Window: • RCA's due within ten (10) Business Days from the request of the RCA.
Metric Inclusions	An Authorized User may request a Formal RCA for incidents that require more in-depth analysis than required with the "normal" Root Cause Analysis process. The Formal RCA is documented and tracked within the Problem Management process, and upon completion, is presented by the Offeror Problem Management Team to the affected the Commonwealth Customer and the Commonwealth for review and approval. Offeror shall perform a "Formal" Root Cause Analysis with respect to any Service Restoral Incident, if requested by the Commonwealth, and that has a Start Time during the applicable Measurement Window.
Metric Exclusions	• Those Service Restoral Incidents for which the Commonwealth or the Commonwealth's Customer does not request a "Formal" Root Cause Analysis. • Duplicate Requests • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of written Formal Root Cause Analyses that are delivered to the Commonwealth within the timeframes specified in this Section during the applicable Measurement Window, divided by the total number of written Formal Root Cause Analyses that should have been delivered to the Commonwealth during the applicable Measurement Window, with the result expressed as a percentage. • = ((Number of Formal Root Cause Analyses Delivered within Established Interval) / (Total Number of Formal Root Cause Analyses Due)) expressed as a percentage

SL21 Chronic Problems

Service Level Reference	Description
Chronic Problems	
Service Category	Incident & Problem Resolution
Metric Description	A "Chronic Problem" means a problem which meets any of the following criteria: 1. The existence two or more incidents with the same root cause for the same software, service, process, or hardware for which Offeror, the Commonwealth, or the Commonwealth Customer, have designated as a problem requiring a Root Cause Analysis with a Corrective Action Plan. 2. The existence of three or more service failures or outages for the same software, service, process, or hardware within the same month for any two (2) months within any rolling six (6) months. 3. The existence of three (3) or more service failures or outages for the same software, service, process, or hardware within any rolling six (6) month period for which no root cause has been determined. Multiple Incidents that are opened contemporaneously for the same software, service, process, or hardware due to the same root cause shall be deemed to be a single incident for purposes of this Service Level.
Metric Inclusions	All incidents and Problem Investigation reports for all services covered by any service level metric.
Metric Exclusions	• Problems which have a published Root Cause Analysis with an associated action plan approved by the Commonwealth Customers and which has all agreed corrective actions on schedule (not exceeding their completion dates) and have had no reoccurrences of the same failure may be excluded at the Offeror's request and the Commonwealth's approval. • All items defined in Note 2 at the bottom of this Schedule J.3 • Duplicate Incident Reports for the same Incident
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** Offeror's performance shall be measured by determining the total number of Problem that are or become Chronic Problem during the applicable Measurement Window. • ((the number of Chronic Problems) / (the total number of problems)) expressed as a percentage
Collection Process	*[Offeror to Complete]*

Reporting Tools / Data Source(s)	*[Offeror to Complete]*

SL22 High Risk Security Patch Updates

Service Level Reference	Description
High Risk Security Patch Updates	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the timeliness in which high-risk security patches are applied. All high risk security patches must be applied within five (5) Business Days from the date the software vendor or applicable industry guiding entity provides notice to the Offeror or other date as agreed to by the Commonwealth or the Commonwealth Customer.
Metric Inclusions	Includes those security patches for which the vendor or applicable industry guiding entity indicates is "high" risk.
Metric Exclusions	• Excludes low and medium risk patches • All items defined in Note 2 at the bottom of this Schedule J.J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of high risk security patches released five (5) Business Days prior to the beginning and end of the measurement window that were installed within five (5) Business Days divided by the total number of high risk security patches released five (5) Business Days prior to the beginning and end of the measurement window, with the result expressed as a percentage. • = ((Number of High Risk Intrusion Protection Updates Installed within Established Interval) / (Total Number of High Risk Intrusion Protection Updates Installed)) expressed as a percentage

SL23 Change Management Effectiveness

Service Level Reference	Description
Change Management Effectiveness	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror successfully implements Changes to the Services.
Metric Inclusions	Changes are not successfully implemented if they: (i) do not comply with the Change Management procedures (including the Change Control Process), (ii) do not comply with the Change Management procedures detailed within the Commonwealth Computing Procedures Manual, (iii) cause Severity 1 Incidents or Severity 2 Incidents, within 168 hours of implementing the change, (iv) exceeds the reserved implementation or maintenance window as approved within the ITSM Change Request, or (v) are backed out.
Metric Exclusions	• Severity Level 1 and Severity Level 2 incidents that occur during the implementation window for the change and are resolved before the Implementation or Maintenance window ends. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the number of changes that are successfully implemented by Offeror during the applicable Measurement Window, divided by the number of changes that should have been implemented by Offeror during the applicable Measurement Window, with the result expressed as a percentage. • = ((Number of Successful Change Management Requests) / (Total Number of Change Management Requests Scheduled during the period)) expressed as a percentage

SL24 Service Desk – Call Answer Time

Service Level Reference	Description
Service Desk – Call Answer Time	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the elapsed time an Authorized User is placed on hold after leaving the Interactive Voice Response or Automatic Call Distribution System to the time the phone call is answered by a live support technician.
Metric Inclusions	All phone calls to the Service Desk shall be included in the calculation of this Service Level with no exceptions for phone calls to the Service Desk during any period of Downtime.
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3 • Excludes the time a caller is listening to a Menu of choices before being routed to a helpdesk agent.
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of seconds, for all phone calls to the Service Desk during the applicable Measurement Window, between the time the phone caller first selects a menu option on the IVR or Automatic Call Distribution System for assistance by a live support technician to the time the phone call is verbally answered by a live support technician ready to start working on the phone call, divided by the total number of all phone calls to the Service Desk during the applicable Measurement Window. • = (Average Time a Call takes to be answered by Service Desk Agent) expressed in seconds

SL25 Service Desk – Abandon Rate

Service Level Reference	Description
Service Desk – Abandon Rate	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of phone calls to the Service Desk that are abandoned by the Authorized User after the Authorized User selected a service option and prior to a live support technician answering the phone call.
Metric Inclusions	All phone calls to the Service Desk shall be included in the calculation of this Service Level with no exceptions for phone calls to the Service Desk during any period of Downtime.
Metric Exclusions	• Calls disconnected prior to an automated voice response system completing the Menu of choices for callers are not counted as abandoned. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of phone calls to the Service Desk during the applicable Measurement Window that are abandoned by the Authorized User (prior to an automated voice response system answers), divided by the total number of phone calls to the Service Desk during the applicable Measurement Window, with the result expressed as a percentage. • = ((Number Of Abandoned Telephone Calls) / (Total Number Of Telephone Calls)) expressed as a percentage

SL26 Incident Ticket Quality

Service Level Reference	Description
Incident Ticket Quality	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the quality and timeliness of the Offeror's incident management and communication of incident management activities (as defined in the Commonwealth Computing Procedures Manual Commonwealth Computing Procedures Manual). Offeror must update the incident tickets at a minimum on the following frequencies:
Metric Inclusions	Includes a statistically valid random sample of Service Restorals and Service Requests closed during the Measurement Window, all priorities.
Metric Exclusions	• Excludes Change Requests (CRQ), Solution Requests (REQ), and Problem Management (PBI) • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the number of sampled tickets in the Measurement Window which meet the defined quality and communication frequency criteria divided by the total number of sampled tickets in the Measurement Window, with the result expressed as a percentage. • ((Number of service restorals and requests that met the interval) / (the total number of service restorals and requests)) expressed as a percentage

SL27 Service Desk – Customer Satisfaction

Service Level Reference	Description
Service Desk – Customer Satisfaction	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the average scores of the customer satisfaction surveys taken on a random statistical sample of customers that had a service contact with the Offeror during the measurement period. The surveys will be conducted in accordance with the Commonwealth Computing Procedures Manual.
Metric Inclusions	Survey responses shall be on a five (5) point scale (with five (5) being the most satisfied) or shall reflect such other satisfaction criteria established pursuant to the survey design process.
Metric Exclusions	• All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** At the Commencement Date, This Service Level calculation is the sum of all scores for each response (question answered) for the Point of Service surveys that are returned during the applicable Measurement Window, divided by the total number of responses for all Point of Service surveys that are returned during the applicable Measurement Window. • = (Average Score of Surveys)

SL28 Batch Scheduling Launched on Time

Service Level Reference	Description
Batch Scheduling Launched on Time	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror starts the Batch job schedules defined in the standard scheduling tool or manually scheduled at the established start time associated with such schedules specified in the Commonwealth Computing Procedures Manual.
Metric Inclusions	Scheduled Batch jobs include normally scheduled and recurring production jobs, as well as production jobs that are run on an as-needed basis.
Metric Exclusions	• Any batch jobs related to infrastructure backups, or other functionality exclusive for Offeror would be excluded. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of Batch job schedules defined in the standard scheduling tool that are started during the applicable Measurement Window at the established start time associated with such schedules as set forth in the Commonwealth Computing Procedures Manual, divided by the total number of Batch job schedules that should have been started during the applicable Measurement Window, with the result expressed as a percentage. • = (Number Of Batches Launched On Time) / (Total Number Of Batches Scheduled) expressed as a percentage

SL29 Batch Processing Completed Successfully

Service Level Reference	Description
Batch Processing Completed Successfully	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the percentage of time Offeror completes Batch jobs successfully and on time during the applicable Measurement Window in accordance with the relevant specifications located in the Commonwealth Computing Procedures Manual.
Metric Inclusions	Batch jobs include normally scheduled and recurring production jobs, as well as production jobs that are run on an as-needed basis. To be considered Successful the Batch must complete within the schedule window for that particular Batch Job.
Metric Exclusions	• Any batch jobs related to infrastructure backups, or other functionality exclusive for Offeror would be excluded. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is the total number of Batch jobs that are completed successfully and on time in accordance with the relevant criteria set forth in the Online CCPM repository during the applicable Measurement Window, divided by the total number of Batch jobs that should have been completed during the applicable Measurement Window, with the result expressed as a percentage. • = ((Number Of Successful Batches) / (Total Number Of Batches Scheduled)) expressed as a percentage

SL30 Reports Delivered On Time

Service Level Reference	Description
Reports Delivered On Time	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level for Reports delivered on time as outlined in Schedule K - Reports measures the percentage of time Offeror delivers the Reports on time in accordance with the requirements. Each Report provided with respect to a Critical Service Level or Key Measurement shall be deemed an individual Report for the purposes of calculating this Service Level.
Metric Inclusions	Schedules as set forth in the Commonwealth Computing Procedures Manual.
Metric Exclusions	• Any reports identified as Critical Monthly Reports in the Commonwealth Computing Procedures Manual and measured in Critical Service Levels. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	24x7
Days of Measurement	365
Calculation	• **Summary:** This Service Level calculation is a count of the total number of Reports that were not successfully delivered (i.e. on time and in compliance with content and format requirements) during the applicable Measurement Window. • = ((Number Of Reports Delivered On Time) / (Total Number Of Reports Scheduled To Be Delivered)) expressed as a percentage

SL31 Off-Site Media Management

Service Level Reference	Description
Off-Site Media Management	
Service Category	Other Service Management and Delivery
Metric Description	This Service Level measures the accuracy of the Offeror's management of off-site media, specifically the physical location and electronic tracking accuracy of off-site media. The measure is intended to sample one-twelfth of the universe of off-site media such that each the Commonwealth Customer's complete environment is sampled at least once per year.
Metric Inclusions	All media for which Offeror receives an off-site storage resource unit charge.
Metric Exclusions	• Virtual tapes and tapes retained in the Consolidated Data Centers or Non-Consolidated Service Locations. • All items defined in Note 2 at the bottom of this Schedule J.3
Hours of Measurement	N/A
Days of Measurement	N/A
Calculation	• **Summary:** This Service Level calculation is based on a statistically valid random sample representing one-twelfth of the universe of off-site media and is the sum of the number of times a tape is either physically in the correct location or electronically listed in the correct location divided by the total number of tapes in the random sample, with the result expressed as a percentage. • = ((Number Of Correct Audits) / (Total Number Of Audits))expressed as a percentage

3. Notes

Note 1: Offeror's failure to achieve any Service Level will not constitute a Service Level Default or accrue toward a Service Level Termination Event to the extent such failure is directly attributable to any Force Majeure events as (as defined in Paragraph 65 of the Contract.

Note 2: Offeror's failure to achieve any Service Level will not constitute a Service Level Default or accrue toward a Service Level Termination Event to the extent such failure is directly attributable to any of the following:

(i) the failure or unavailability of equipment or other resources for which the Commonwealth is operationally and managerially responsible pursuant to the Contract,

(ii) changes made to the environment by the Commonwealth that were not communicated in accordance with the Change Control Procedure or other method agreed upon by the Parties, and

(iii) scheduled and approved maintenance windows.

4. Additional Definitions

1. "Accurate" means all Inventory Attributes are correctly and completely populated in the CMDB Inventory of Record.
2. "Bronze" is defined as a level of service that has a specific Availability value or Response time interval requirement.
3. "CMDB Inventory of Record" means the inventory of CIs, including all Equipment and Software, to be created and maintained by Offeror in accordance with the CCPM.
4. "Commonwealth Computing Procedures Manual" means the established procedural manual related to services offered within this procurement.
5. "Configuration Management Database" (CMDB) is defined as the complete database of all Hardware and software items that make up a service.
6. "Customer Request Date" means the customer requested due date (CRDD) in the Offeror's service management platform (SMP).
7. "Emergency Downtime" means downtime agreed by the Parties to enable maintenance and break fix
   i. necessary to address Service issues stemming from Force Majeure causes or
   ii. Otherwise agreed by the Commonwealth pursuant to the Emergency provisions of the Change Control Procedures.
8. "Gold" is defined as a level of service that has a specific Availability value or Response time interval requirement.
9. "Hold Time" or "Customer Time" is defined as a period of time when Offeror is prevented from progressing the investigation or repair of an incident (outage or degradation) due to Commonwealth required decisions or actions. Examples of this include, but are not limited to:

i. Not providing physical access to a facility pursuant to the Contract so that equipment can be tested or replaced

ii. Not releasing a Application or Server for testing

iii. Not providing accurate or complete information when opening an incident resulting in a Offeror inability to progress the resolution of the logged incident

iv. Not responding with necessary additional information upon request to enable the effective investigation or repair of a logged Service ID

v. related incident

vi. Commonwealth requested delays in the installation of required patches and/or upgrades

vii. Failure of user authentication services, unique end-user VPN client software issues, or other components managed by the Commonwealth. In every case in which Offeror intends to place an incident or ticket on Hold Time or Customer Time, Offeror will make the appropriate prior notification to the Commonwealth. Valid Hold Time and Customer Time is excluded as outage time in calculations of Service Level Availability and Time to Restore.

10. "Inventory Attributes" means those database fields in an Inventory Record that are essential for Offeror's successful delivery of Service and necessary for The Commonwealth's successful performance of retained responsibilities, including architecture, IT planning, and reconciliation of invoices. Inventory Attributes that shall be audited are set out in Commonwealth Computing Procedures Manual and may be modified over time in accordance with the Commonwealth Computing Procedures Manual.

11. "Inventory Record" means the record for a single item of Equipment or Software in the Inventory of Record, including all of the Inventory Attributes for that item.

12. "Major Degradation of Service" means a Service that tests as fully operational but is degraded below user expectations across a significant segment of the user population as determined by the Commonwealth.

13. "Non-Excluded Outage Minutes" is defined as a Minutes that are not considered Customer Time, Hold Time, Scheduled Downtime as defined within this Schedule J.3

14. "Resolution" is defined as removing a fault or degradation from the Commonwealth operational environment. Resolution is followed by notification to the Commonwealth and either performing further joint testing or receiving an approval to place the affected Service or Service ID back in operation.

15. "Response" or "Respond" is defined as Offeror taking and logging meaningful action to progress the testing and restoration of any Service ID, or, as the case may be, Security Services, that has an active Incident ticket opened in the Incident Management System as defined by the Incident and Problem Management Process which is part of the Process and Procedures Manual.

Examples of meaningful response actions include the following, all pursuant to the Policies and Procedures Manual:

- Calling the Commonwealth to obtain additional information to help progress the testing and restoration of the logged incident
- Requesting access to a facility
- Requesting release of a Service ID for testing

- Requesting contact information required to progress the incident management process
- Escalating the incident to technical support for additional testing and analysis

16. "Scheduled Availability" means 24/7/365, unless otherwise specified in a Service Level, minus Scheduled Downtime, Customer Time, Hold Time, and Emergency Downtime.

17. "Scheduled Downtime" means downtime expected and agreed by the Parties, expressed monthly, for which the underlying systems were taken off- line for routine or scheduled maintenance during the Measurement Window.

18. "Service ID" means the unique identifier assigned to a service by Offeror.

19. "Service Level Availability" shall mean the actual availability of access and all functionality of the Services described in a Service Level expressed as percentage of the Scheduled Availability for such Services.

20. "Severity Level" means a priority setting assigned to an incident or change that represents the impact the event has on service for the customer. This level is set by the person reporting the incident or requesting the change and may be adjusted by authorized personnel at the Commonwealth.

21. "Silver" is defined as a level of service that has a specific Availability value or Response time interval requirement.

22. "Standard Service Interval" means the corresponding period of time in the Standard Service Intervals in the Policy and Procedures Manual, including procedures regarding accuracy, completeness and changes to previously accepted orders. As of the Execution Date, the Standard Service Intervals are set forth in the document provided by the Offeror to the Commonwealth labeled [***to be completed by Offeror***].

23. For purposes of This Service Level Matrix, a "day" means a 24 hours period from the trigger for the measurement. For example, if a ticket is logged at 9:15am on Tuesday the 14th, a "day" ends at 9:15am on Wednesday day the 15th.

DELIVERABLE ACCEPTANCE CRITERIA MATRIX 25
EXAMPLE - DELIVERABLE ACCEPTANCE MATRIX 27

Introduction –Program Deliverables

This Schedule sets forth certain obligations of Offeror regarding Program Deliverables. The Offeror must deliver to the Commonwealth any Key Program Deliverables as described below, in format and content acceptable to the Commonwealth.

As specified below, Offeror shall provide each Key Program Deliverable on or before the date specified in this Schedule. The Key Program Deliverable Acceptance Criteria and the Commonwealth Sign-off Matrix will be developed prior to the Effective Date and will be in the format referenced below in this document.

Key Program Deliverables

D-01 Datacenter Architecture Plan and Roadmap

The Datacenter Architecture Plan and Roadmap will include the Offeror's proposed Datacenter Architecture that will be utilized to support the Project. The Datacenter Architecture Plan and Roadmap should include at minimum sections that support the following:

- 2+ Datacenter Architecture (with EDC) - describes the overall Datacenter Architecture used in the delivery of the Offeror's Enterprise Datacenter Services. This should include details on datacenter specifications, location, physical security, and capacity. The architecture will show how the Commonwealth's Enterprise Data Center (EDC) will be incorporated into the Offeror's overall datacenter capacity.

- Datacenter Network Architecture - describes the required network connectivity between each of the datacenters. Included are connection requirements to the Commonwealth's network COPANET. The Offeror will also describe its Internet connection to the proposed Datacenter(s).

- Datacenter Security Architecture - describes the security architecture used to ensure the confidentiality, integrity and availability of Commonwealth information and infrastructure systems. The Security Architecture will describe the security technology components such as firewalls, intrusion detection devices, virus detection, etc. that will be utilized in the Offerors solution. Datacenter Security implementation activities must be conducted in accordance with, but not limited to, leading industry and Commonwealth standards such as ISO 27001:2005 and ISO 27002:2005.

- Datacenter Technology Environment - describes the Datacenter technology used in the delivery of the Offeror's Enterprise Datacenter Services. A summary of the planned allocation of platforms within each of the proposed datacenters should be included. Note: more detailed technology specifications shall be provided in the *D-03 Technology Architecture and Refresh Approach* deliverable.

- Datacenter Implementation Roadmap – presents the detailed implementation plan for the enablement of the overall Datacenter Architecture. The Datacenter Implementation Roadmap shall Reference roles and responsibilities, as well as critical dates and timelines.

EDC Assessment		
D-01.01	Effective Date + 45 days	Offeror must assess the EDC facilities and provide a report to the Commonwealth as it pertains to: • Required security upgrades • Required HVAC and power upgrades • Required physical access to the EDC facility • Monitoring, maintain and reporting on EDC SLAs • Monitoring, maintaining and operating the installed infrastructure
Multi Datacenter Environment (2+ Architecture)		
D-01.02	Effective Date + 60 days – with quarterly updates	*Datacenter Architecture Plan and Roadmap* Datacenter Architecture Plan and Roadmap includes: • 2+ datacenter architecture (with/plus EDC) • Datacenter Network Architecture • Datacenter Security Architecture • Datacenter Technology Environment • Datacenter Implementation Roadmap Offeror must publish quarterly updates to the Datacenter Architecture Plan and Roadmap to include proposed updates to the technical architecture and implementation plan
Network and Security Architecture		
D-01.03	Effective Date + 60 days – with quarterly updates	*Datacenter Architecture Plan and Roadmap – Network and Security Architecture* The Network and Security Architecture - describes the network and security architecture to support the 2+ datacenter architecture.
Datacenter Architecture and Technology		
D-01.04	Effective Date +60 days– with quarterly updates	*Datacenter Architecture Plan and Roadmap* – Datacenter Technology The Datacenter Technology describes the technology used in the delivery of the Offeror's Enterprise Datacenter Services.
D-01.05	Effective Date +90 days – with quarterly updates	*Datacenter Architecture Plan and Roadmap* – Datacenter Technology Roadmap The Datacenter Technology Roadmap will identify specific, short-term steps and schedules for project of changes with estimated timings and cost impact to Commonwealth datacenter customers.

D-01.06	Effective Date + 180 days	*Datacenter Architecture Plan and Roadmap – Configuration Item Reconciliation* *The Configuration Item Reconciliation is the validation and update of the CMDB of record with the Offeror's configuration information including the EDC assets and CI's.*
Limited-Use Colocation Services		
D-01.07	Effective Date + 30 days	*Datacenter Architecture Plan and Roadmap*

D-02 Commonwealth Computing Procedures Manual (CCPM)

Offeror will develop documentation in accordance with the requirements in **Schedule H** - **Commonwealth Computing Procedures Manual (CCPM)**. This comprehensive services management manual will include, but not be limited to, the following sections as described in **Schedule H**:

- Organizational Overview
- Transition and Support Activities and Responsibilities
- IT Service Management Procedures
- Financial Management Procedures
- Contract Management Procedures
- Relationship Management Procedures
- Offeror Operational Procedures
- Commonwealth Customer Operations Manuals

Additional Planning Services		
D-02.01	Effective Date + 14 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide the initial version of the Commonwealth Computing Procedures Manual (CCPM) (see Schedule H CCPM Commonwealth Computing Procedures Manual) that includes Offeror's overall program and service management processes and procedures. The comprehensive manual includes the following sections: • Organizational Overview • Transition and Support Activities and Responsibilities • IT Service Management Procedures • Financial Management Procedures • Contract Management Procedures • Relationship Management Procedures • Offeror Operational Procedures • The Commonwealth Customer Operations Manuals PMO & Contract Management will focus on the bolded sections of the CCPM.

D-02.02	As needed during transition	After review and approval from the Commonwealth, Offeror must provide ongoing updates to the CCPM during the startup and transition phase
D-02.03	Yearly or as required	Offeror must provide CCPM updates as required as new services are added and yearly after the transition phase.
Availability/SLA Management		
D-02.04	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document the Availability and SLA Management approach and providing updates to the CCPM.
D-02.05	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the Availability and SLA Management approach and project plan with Commonwealth stakeholders.
D-02.06	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* SLA Achievement Report, detailing system availability, SLA attainment, and reason for outages.
D-02.07	As Needed	*Commonwealth Computing Procedures Manual (CCPM)* Root Cause Analysis (RCA) report for all major outages within SLA (e.g. hours/days of outage).
D-02.08	As requested	*Commonwealth Computing Procedures Manual (CCPM)* Ad hoc – Availability and SLA Reports
Change & Release Management		
D-02.09	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document the Change and Release Management approach and project plan updating appropriate sections to the CCPM.
D-02.10	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the Change and Release Management approach and project plan with Commonwealth stakeholders.
D-02.11	Weekly	*Commonwealth Computing Procedures Manual (CCPM)* Weekly Change Management Meeting with the Change Advisory Board
D-02.12	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Monthly Change & Release Management summary report containing the number of changes, by platform, by Commonwealth organization, and status.

D-02.13	Yearly	*Commonwealth Computing Procedures Manual (CCPM)* On a yearly basis, randomly select completed Changes & Releases for detail auditing to determine compliance to policies. Create a summary report of the finding and make recommendations for improvements where appropriate.
D-02.14	Per Change Event	*Commonwealth Computing Procedures Manual (CCPM)* Complete Change Control & Release Management process for each change event adhering to the letter and spirit of the policy and process. Maintain a complete copy of the change / release for possible future audit.
Service Desk		
D-02.15	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document the Service Desk approach, organization, schedule and project plan.
D-02.16	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the Service Desk approach and project plan with Commonwealth stakeholders
D-02.17	Effective Date + 60 days	*Knowledge Management Portal (KMP)* Offeror must provide a Knowledge/Service Management portal that describes the Offeror's contract information, pricing schedules, service offerings and operating procedures (operational, service delivery processes, SLAs, service ordering, etc.)
D-02.18	Effective Date +60 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Commonwealth Computing Procedures Manual (CCPM) including but not limited to the following: Datacenter Operations, Change Management, Service Desk Operations, Security Management, Backup Management, Disaster Recovery, Performance Management, Asset Management, Service Level Management and Configuration Management. The Offeror must make the CCPM available on the Offeror's Knowledge/Service portal. See Schedule H Commonwealth Computing Procedures Manual (CCPM) for additional detail.
D-02.19	Effective Date +180 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must describe the process to keep separate and current specific sections of the CCPM dedicated to the operations of individual Commonwealth customers.
D-02.20	Effective Date +90 days	Knowledge Management Portal Offeror must provide Knowledge/Service portal training to authorized Commonwealth stakeholders

D-02.21	Weekly	*Commonwealth Computing Procedures Manual (CCPM)* Weekly summary report containing the type of incidents and problems being reported to the Service Desk. Identify measures being taken to reduce or eliminate stated incidents and problems.
D-02.22	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Monthly summary report containing the type of incidents and problems being reported to the Service Desk. Identify measures being taken to reduce or eliminate stated incidents and problems.
Account Management		
D-02.23	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document their Account Management approach and project plan.
D-02.24	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the Account Management approach and project plan with Commonwealth stakeholders
D-02.25	Monthly	Monthly summary report containing the operational availability report on all systems in service, events and issues that occurred during the month. Report shall contain operational metrics by service platform, highlights and exceptions, and project status updates.
Configuration Management		
D-02.26	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document their Configuration Management approach, tool(s) and project plan.
D-02.27	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the Configuration Management approach, tool(s) and project plan with Commonwealth stakeholders
D-02.28	As Requested	Offeror must provide Agency / Commonwealth level Configuration Management Reports
3rd Party License Management		
D-02.29	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document their 3rd Party License Management approach, tool(s) and project plan.
D-02.30	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the 3rd Party License Management approach, tool(s) and project plan with Commonwealth stakeholders

D-02.31	Per request	Offeror must provide Software License Reports
Capacity Management		
D-02.32	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document their Capacity Management approach, tool(s) and project plan.
D-02.33	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must review the Capacity Management approach, tool(s) and project plan with Commonwealth stakeholders
D-02.34	Effective Date + 240 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must present the baseline Capacity Management Plan
D-02.35	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must issue periodic reports showing usage, trends, capacity forecasts, and recommendations for upgrades.
D-02.36	Annual	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide technology usage report (i.e. MIPS, vcpu, storage, etc.) by stakeholder and overall usage by the Commonwealth. The report must show monthly technology growth patterns by stakeholder.
Windows Support		
D-02.37	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must present their roadmap and project plan to address the Windows Operations and Management including but not limited to the following; windows servers, backups, network connectivity, technical support, staffing, etc.
D-02.38	Effective Date + 45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must present plan to address the assessment recommendations identified in the Windows Operations and Management project plan.
D-02.39	Effective Date +60 days	*Commonwealth Computing Procedures Manual (CCPM)* Present a report describing the methodology the Offeror will follow to perform a Windows backups audit finding and recommendation to the Commonwealth Stakeholders, the audit report will include findings, recommendations, project plan and cost estimates.
D-02.40	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide SLA report(s). Provide a report detailing system availability, SLA attainment, reason for outages, and recommendations for improvements.

D-02.41	Quarterly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Continuous Improvement Report. Provide a report detailing system availability and SLA attainment. Recommend system and cost improvements as appropriate.
Storage Management		
D-02.42	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must present their roadmap and project plan to address Storage Management including but not limited to the following; data storage, backups, network connectivity, technical support, staffing, etc.
D-02.43	Effective Date + 45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must present plan to address the assessment recommendations identified in the Storage Management project plan.
D-02.44	Effective Date +60 days	*Commonwealth Computing Procedures Manual (CCPM)* Present a report describing the methodology the Offeror will follow to perform a system backups audit finding and recommendation to the Commonwealth Stakeholders, the audit report will include findings, recommendations, project plan and cost estimates.
D-02.45	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide SLA report(s). Provide a report detailing system availability, SLA attainment, reason for outages, and recommendations for improvements.
D-02.46	Quarterly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Continuous Improvement report(s). Provide a report detailing system availability and SLA attainment. Recommend system and cost improvements as appropriate.
ERP Hosting – SAP / Oracle		
D-02.47	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must present their roadmap and project plan to address ERP Hosting including but not limited to the following; data storage, backups, network connectivity, technical support, staffing, etc.
D-02.48	Effective Date + 45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must present plan to address the assessment recommendations identified in the ERP Hosting project plan.

D-02.49	Effective Date +60 days	*Commonwealth Computing Procedures Manual (CCPM)* Present a report describing the methodology the Offeror will follow to perform a system backup audit finding and recommendation to the Commonwealth Stakeholders, the audit report will include findings, recommendations, project plan and cost estimates.
D-02.50	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide SLA report(s). Provide a report detailing system availability, SLA attainment, reason for outages, and recommendations for improvements.
D-02.51	Quarterly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Continuous Improvement report(s). Provide a report detailing system availability and SLA attainment. Recommend system and cost improvements as appropriate.
UNIX Support – AIX / Linux		
D-02.52	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must present their roadmap and project plan to address UNIX Support including but not limited to the following; data storage, backups, network connectivity, technical support, staffing, etc.
D-02.53	Effective Date + 45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must present plan to address the assessment recommendations identified in the UNIX Support project plan.
D-02.54	Effective Date +60 days	*Commonwealth Computing Procedures Manual (CCPM)* Present UNIX audit finding and recommendation to the Commonwealth Stakeholders, the report will include findings, recommendations, project plan and cost estimates.
D-02.55	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide SLA report(s). Provide a report detailing system availability, SLA attainment, reason for outages, and recommendations for improvements.
D-02.56	Quarterly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Continuous Improvement report(s). Provide a report detailing system availability and SLA attainment. Recommend system and cost improvements as appropriate.

Mainframe Services		
D-02.57	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must present their roadmap and project plan to address Mainframe Support (IBM & Unisys) including but not limited to the following; data storage, backups, network connectivity, technical support, staffing, etc.
D-02.58	Effective Date + 45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must present project plan to address the assessment recommendations identified in the Mainframe Support (IBM & Unisys) plan.
D-02.59	Effective Date +60 days	*Commonwealth Computing Procedures Manual (CCPM)* Present mainframe audit finding and recommendation to the Commonwealth Stakeholders, the report will include findings, recommendations, project plan and cost estimates.
D-02.60	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide SLA report(s). Provide a report detailing system availability, SLA attainment, reason for outages, and recommendations for improvements.
D-02.61	Quarterly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Continuous Improvement report(s). Provide a report detailing system availability and SLA attainment. Recommend system and cost improvements as appropriate.
Database Management Services		
D-02.62	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document their Database Management approach, tool(s) and project plan.
D-02.63	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the Database Management approach, tool(s) and project plan with Commonwealth stakeholders
D-02.64	Effective Date +60 days	*Commonwealth Computing Procedures Manual (CCPM)* Present backup audit finding and recommendation to the Commonwealth Stakeholders, the report will include findings, recommendations, project plan and cost estimates.
D-02.65	Effective Date	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Database Management Service Architecture document (Oracle, Sybase, and MS SQL).

D-02.66	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Database Management Service Usage Reports
Server Capacity on Demand		
D-02.67	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document their Server Capacity on Demand approach, tool(s) and project plan.
D-02.68	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the Server Capacity on Demand approach, tool(s) and project plan with Commonwealth stakeholders
D-02.69	Quarterly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must host a quarterly meeting with the Commonwealth to review current server utilization on all managed server platforms and locations, and forecast future quarter's server processing requirements. Recommendations to increase capacities will be made, when approved by the Commonwealth; the additional equipment will be scheduled for deployment.
Storage Capacity on Demand		
D-02.70	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document their Storage Capacity on Demand approach, tool(s) and project plan.
D-02.71	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the Storage Capacity on Demand approach, tool(s) and project plan with Commonwealth stakeholders
D-02.72	Quarterly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must host a quarterly meeting with the Commonwealth to review current SAN storage utilization on all managed SAN platforms and locations, and forecast future quarter's SAN storage requirements. Recommendations to increase capacities will be made, when approved by the Commonwealth; the additional equipment will be scheduled for deployment.
DR Infrastructure on Demand		
D-02.73	Quarterly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must host a quarterly meeting with the Commonwealth to review current disaster recovery service and capabilities, and forecast future quarter's disaster recovery requirements. Recommendations to increase capacities will be made, when approved by the Commonwealth, the additional equipment and services will be scheduled for deployment.

Additional Technical Services		
D-02.74	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide a monthly report on technical support services usage by Commonwealth datacenter customer.
Limited-Use Colocation Services		
D-02.75	Effective Date + 30 days	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must document their approach, tool(s) and project plan for supporting Limited-Use Colocation Services.
D-02.76	Effective Date +45 days	*Commonwealth Computing Procedures Manual (CCPM)* After review and approval from the Commonwealth, Offeror must review the Limited-Use Colocation Services approach, tool(s) and project plan with Commonwealth stakeholders
D-02.77	Effective Date +60 days	*Commonwealth Computing Procedures Manual (CCPM)* Present backup audit finding and recommendation to the Commonwealth Stakeholders, the report will include findings, recommendations, project plan and cost estimates.
D-02.78	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Limited-Use Colocation Services Usage Reports
Performance Monitoring & Management		
D-02.79	Monthly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide monthly summary report containing the performance level achieved for each system being monitored. This report will be reviewed with the Commonwealth and plans will be made to address system utilization as appropriate.
D-02.80	Daily	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide daily reports containing the performance level achieved for each system being monitored. Daily reports summarizing incidents for the past 24-hours and immediate reports of incidents and routine status reports of incidents in progress for resolution such as a network or server outage that impacts a facility and our business. These reports will be reviewed with the Commonwealth and plans will be made to address system utilization as appropriate.

Transition Program Management		
D-02.81	Effective Date + 60 days	*Commonwealth Computing Procedures Manual (CCPM)* Establish Interim Contract Management Procedures during the transition of datacenter services. Offeror must describe an interim procedure to monitor and manage service delivery including but not limited to the following; Problem Management, Change Management, Service Level monitoring and reporting, physical and logical security, project management, etc. while the service is transitioned from the Commonwealth to the Offeror.
D-02.82	Weekly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Transition Status reports, including any schedule variance that cannot be remediated will trigger the escalation procedures outlined in the Transition Plan/Agreement, which will be developed during Transition.
Security & Firewall		
D-02.83	Quarterly	*Commonwealth Computing Procedures Manual (CCPM)* Offeror must provide Continuous Improvement report. Provide a report detailing system availability and SLA attainment. Recommend system and cost improvements as appropriate.

D-03 Technology Architecture and Refresh Approach

The Technology Architecture and Refresh Approach will include the Offeror's proposed the Technology that will be utilized to support the architecture and delivery of services across all platform and services. The Technology Architecture and Refresh Approach should include at minimum sections that support the following:

- Datacenter Technology - describes the technology used in the delivery of the Offeror's Enterprise Datacenter Services. The technology descriptions should include hardware, software that will be included in the overall solution delivery. The technology should also include a complete list of those Service Level measurement and monitoring tools that will be used to measure and report Offeror's performance of the Services at a level of detail sufficient, as determined by the Commonwealth, to verify Offeror's compliance with those Service Levels described in **Schedule J.1 Datacenter Service Level Management** as of the Effective Date.

- Datacenter Technology Roadmap - will identify specific, short and long term steps and schedules for planned and proposed future changes with estimated timings and cost impact to Commonwealth datacenter customers. This should be the basis for generation of technology roadmaps which will include schedules, dependencies and requirements for introduction of new technology changes as well as acquisition, support, and retirement of current software/hardware.

- Configuration Item Reconciliation - is the validation and update of the CMDB of record with the Offerors configuration information including the EDC assets and Configuration Items (CI's).

Technology Refresh		
D-03.01	Effective Date + 30 days	*Technology Architecture and Refresh Approach* Offeror must document the following Technical Architecture approach and project plan including; Service Catalog, IT Architecture, and Technical support
D-03.02	Effective Date +45 days	*Technology Architecture and Refresh Approach* After review and approval from the Commonwealth, Offeror must review the Technical Architecture approach and project plan with Commonwealth stakeholders
D-03.03	Effective Date + 60 days	Offeror must identify the technical architecture organization and staff.
Infrastructure Architecture		
D-03.04	Effective Date + 45 days	*Technology Architecture and Refresh Approach* Offeror must document the approach and project plan for the computing infrastructure architecture and review with Commonwealth Stakeholders
D-03.05	Effective Date + 45 days	*Technology Architecture and Refresh Approach* After review and approval from the Commonwealth, Offeror must document the approach and project plan for the network architecture to connect Offeror's datacenter(s), review with Commonwealth Stakeholders
D-03.06	As requested by Commonwealth Stakeholders	*Technology Architecture and Refresh Approach* Offeror must describe the process to request a review new technologies evaluations by Commonwealth datacenter customers.
D-03.07	Per request – prior to a new application infrastructure service	*Technology Architecture and Refresh Approach* Offeror must provide Infrastructure Architecture Design Reports
Performance Monitoring & Management		
D-03.08	Effective Date + 30 days	*Technology Architecture and Refresh Approach* Offeror must document their Performance Monitoring and Management approach, tool(s) and project plan.
D-03.09	Effective Date +45 days	*Technology Architecture and Refresh Approach* After review and approval from the Commonwealth, Offeror must review the Performance Monitoring and Management approach, tool(s) and project plan with Commonwealth stakeholders

D-04 IT Service Continuity Architecture and Plan

The IT Service Continuity Architecture and Plan will include the Offeror's proposed Disaster Recovery (DR) solution architecture. The DR solution architecture will describe how the Offeror will deliver multiple tiers of disaster recovery services. The IT Service Continuity Architecture and Plan will also describe the Offeror's approach to reviewing the Commonwealth's current DR Plans and the updating of those plans in coordination with the Commonwealth.

IT Service Continuity Architecture		
D-04.01	Effective Date + 30 days	*IT Service Continuity Architecture and Plan* Offeror must describe their methodology for reviewing and refreshing technology on a scheduled basis.
D-04.02	Effective Date + 30 days	*IT Service Continuity Architecture and Plan* Offeror must provide an IT Service Continuity Architecture and Plan to Implement DR solution
D-04.03	30 days prior to transition of each critical application	*IT Service Continuity Architecture and Plan* Offeror must describe their approach to providing Develop/Update Agency Application DR and Business Recovery Plan(s)
D-04.04	Depending on DR Tier Solution • Current DR • Tier 0 • Tier 1 • Tier 2 • Tier 3 • Tier 4	*IT Service Continuity Architecture and Plan* Offeror must develop a plan to transition agencies to Tiered DR Solution • Currently have DR (DPH) – at time of transition • Tier 0 – Transition + 90 days • Tier 1 – Transition + 60 days • Tier 2 – Transition + 30 days • Tier 3 – at time of transition • Tier 4 – at time of transition
DR Planning & Testing		
D-04.05	Effective Date + 30 days	*IT Service Continuity Architecture and Plan* Offeror must document their Tiered Disaster Recovery approach, tool(s) and project plan.
D-04.06	Effective Date +45 days	*IT Service Continuity Architecture and Plan* After review and approval from the Commonwealth, Offeror must review their Tiered Disaster Recovery approach, tool(s) and project plan with Commonwealth stakeholders

D-04.07	Monthly	*IT Service Continuity Architecture and Plan* Offeror must provide report(s) describing schedule of stakeholder participation in DR solution

D-05 Transition Management Plan

The Transition Management Plan will provide a detailed overview of the Offeror's transition management approach, process and procedures. The Transition Management Plan will describe the enablement of the Transition Project Management Office (TPMO) and also provide a detailed implementation schedule of transition activities and milestones. The Transition Management Plan should include at minimum sections that support the following:

- Transition Management Approach
- Transition Project Management Office (TPMO) Organization and Responsibilities
- Transition Management Communications Plan
- Transition Schedule

Transition Management (New Customer and/or Services)		
D-05.01	Effective Date + 60 days	*Transition Management Plan* Offeror must create a Transition Roadmap with major milestones and present it to the Commonwealth for review
D-05.02	Effective Date + 90 days	*Transition Management Plan* After review and approval from the Commonwealth, Offeror must create a Detailed Transition Project Plan with major milestones and present it to the Commonwealth for review
D-05.03	Weekly	*Transition Management Plan* Offeror must create a report for the Commonwealth detailing the transition projects on the plan, status, schedule, risks, and the forecasted transition date.
Transition Program Management		
D-05.04	Effective Date + 60 days	*Transition Management Plan* Offeror must present their approach to transition Commonwealth computing assets. The approach must include a roadmap and project plan to successfully transition Commonwealth computing assets using the schedule identified in the RFP
D-05.05	Effective Date + 90 days	*Transition Management Plan* Present and review the transition roadmap and plan to Commonwealth stakeholders.

D-05.06	Effective Date + 60 days	*Transition Management Plan* Establish Interim Contract Management Procedures during the transition of datacenter services. Offeror must describe an interim procedure to monitor and manage service delivery including but not limited to the following; Problem Management, Change Management, Service Level monitoring and reporting, physical and logical security, project management, etc. while the service is transitioned from the Commonwealth to the Offeror.
D-05.07	Effective Date + 60 days	*Transition Management Plan* EDC / Legacy Datacenter Infrastructure Maintenance Strategy – Offeror must document their strategy as it related to providing a solution to the infrastructure maintenance expiration issue at the EDC and any other datacenter that has the same or similar issue.
D-05.08	Effective Date + 60 days	*Transition Management Plan* Offeror must provide the procedure to standup their Transition Management Office
D-05.09	Weekly during transition	*Transition Management Plan* Offeror must provide Transition Status reports, including any schedule variance that cannot be remediated will trigger the escalation procedures outlined in the Transition Plan/Agreement, which will be developed during Transition.
Security Transition Activities		
D-05.10	Effective Date + 60 days	*Transition Management Plan* Offeror must provide their Security Transition Plan
D-05.11	Weekly updates during transition	*Transition Management Plan* Offeror must provide their Security Transition Status Report(s)

D-06 Agency Level DR Plan(s)

The Offeror is required to assist the Commonwealth Agencies with updates to or development of their current DR Plans (DRPs). These Agency Level DR Plans will reflect the Offeror's DR approach and solution for DR testing. The following describes the Offeror's responsibilities regarding the updating of Agency Level DRPs:

- Within six (6) months after the Effective Date, Offeror shall complete the update all existing Agency-specific Disaster Recovery Plans and technical recovery guides to reflect all changes implemented to the Services infrastructure prior to or during the performance of Transition Services.
- For Applications lacking tested Disaster Recovery Plans, Offeror shall work with Commonwealth Agencies to complete a gap analysis of the current Disaster Recovery

Plans and technical recovery guides compared to the requested recovery time objective, as specified in **Schedule J.1 Datacenter Service Level Management**, and update the Disaster Recovery Plans with the results within forty-eight (48) months after the Effective Date.

- For Agencies without a Disaster Recovery Plan, the Offeror shall work with Agencies to develop a basic Disaster Recovery Plan and technical recovery guides within eighteen (18) months after the Effective Date.

DR Planning & Testing		
D-06.01	Monthly	*Agency Level DR Plan* Offeror must provide report(s) describing the schedule of DR test being performed by stakeholders
D-06.02	Monthly	*Agency Level DR Plan* Offeror must provide report(s) describing the results of stakeholder DR test
D-06.03	As requested– Per Agency Critical Application	*Agency Level DR Plan* Offeror must provide DR Test Plans as required

D-07 Security Management Plan

The Security Management Plan will address the overall security management for the planned facility security implementation for the EDC, the Offeror Facilities, software and equipment deployment specifically for data and online security, annual security assessments and other standard security concepts for ensuring the safety, security and confidentiality of Commonwealth Data.

The Security Management Plan shall include a complete description of the personnel security management program. It shall comply with background check requirements specified in the Terms and Conditions and shall provide a methodology for ongoing evaluation and reporting of any change in status of Offeror personnel that would negatively impact their ability to continue to meet Commonwealth or Agency security requirements.

Security Management		
D-07.01	Effective Date + 30 days	*Security Management Plan* Offeror must document their Security Management approach, tool(s) and project plan.
D-07.02	Effective Date +45 days	*Security Management Plan* After review and approval from the Commonwealth, Offeror must review their Security Management approach, tool(s) and project plan with Commonwealth stakeholders.

D-07.03	Quarterly	*Security Management Plan* Offeror must provide the Commonwealth with a report containing the detailed results of the Vulnerability Analyses testing. Include any remediation activities that are required.
D-07.04	Monthly	*Security Management Plan* Offeror must provide the Commonwealth with the detailed monthly Security Log Analysis report. Include any remediation activities that are required.
D-07.05	Ongoing	*Security Management Plan* Offeror must maintain a hardcopy file of all security access changes. The copy will contain the date, time, file changes, access rights applied and the name of the security officer completing the access request.
Security & Firewall		
D-07.06	Effective Date + 30 days	*Security Management Plan* Offeror must document their Security and Firewall approach, tool(s) and project plan.
D-07.07	Effective Date +45 days	*Security Management Plan* After review and approval from the Commonwealth, Offeror must review the Security and Firewall approach, tool(s) and project plan with Commonwealth stakeholders
D-07.08	Monthly	*Security Management Plan* Threat Assessment and Analysis Report. Provide a monthly report detailing the threat assessments, volume and major types of malware detected, volume of SPAM rejected, corrective actions, and recommendations that would improvement security of Commonwealth systems.
D-07.09	Monthly	*Security Management Plan* Offeror must provide SLA reports. Provide a report detailing system availability, SLA attainment, reason for outages, and recommendations for improvements, security incident notification, and security change request intervals and results.
D-07.10	Monthly	*Security Training and On-boarding Status Report* Offeror must provide a monthly Security Training and On-boarding Status Report detailing security training, changes to project personnel, and background check status and results.

D-08 Facilities Management Plan

The Facilities Management Plan will address management for both the EDC facility and the proposed Offeror's facility(s). The Facilities Management Plan should describe the Offeror's plan for providing and managing the physical environment. For example; power and power distribution, cooling and ventilation, fire detection and suppression, building security and access control, and environmental monitoring. Provide an approach for yearly review and self-verification that the datacenters will be managed, maintained and operated at the equivalent of Uptime Institute of Tier 3 rating. The plan should also address how the Offeror will support SSAE-16 compliance audits.

Facilities Architecture / Maintenance		
D-08.01	Effective Date + 60 days	*Facilities Management Plan* Offeror must present their assessment of the EDC and any required facility changes/modification required to upgrade the facility to meet service level objectives. The assessment must include a roadmap and project plan to make any required facility modifications.
D-08.02	On the July 31st following the Commonwealth's acceptance of Milestone M-14	*Facilities Management Plan* Present results of the SSAE 16 audit of the EDC. The audit period is to cover the period from Transition completion through the following June 30th
D-08.03	Monthly	*Facilities Management Plan* Offeror must provide monthly Facilities SLA Report, detailing environmental equipment availability, SLA attainment, and reason for outages.
D-08.04	Quarterly	*Facilities Management Plan* Offeror must provide quarterly Facility service improvement report. Report changes and improvements to the facility or the maintenance of the facilities.
D-08.05	Annual	*Facilities Management Plan* Offeror must provide annual SSAE 16 audit reports for each datacenter facility being used to support the Commonwealth. The Audit Report for the EDC must be provided on the anniversary of the Audit Report described in Deliverable D-08.02.
Site Operations		
D-08.06	Effective Date + 60 days	*Facilities Management Plan* Offeror must present their assessment of the EDC monitoring and staffing changes/modification required to upgrade the facility to meet Commonwealth service level objectives. The assessment must include a roadmap and project plan to make any required monitoring and staffing modifications.

D-08.07	Effective Date + 90 days	*Facilities Management Plan* Present plan to address the assessment recommendations identified in the EDC monitoring, project plan and staffing report.
D-08.08	Daily, Monthly	*Facilities Management Plan* Offeror must provide daily and monthly SLA report(s), detailing environmental equipment availability, SLA attainment, and reason for outages.
D-08.09	Quarterly	*Facilities Management Plan* Offeror must provide quarterly site operations improvement report. Identify changes or improvements to the site operations that would assist the Offeror in meeting the agreed facility SLAs.

D-09 Security Risk and Vulnerability Assessment Report

The Offeror will execute a Baseline Security Risk and Vulnerability Assessment. The assessment report must include a roadmap and project plan to make any required security modifications prior to final transition of services.

Security Transition Activities		
D-09.01	Effective Date + 60 days	*Security Risk and Vulnerability Assessment Report* Offeror must execute a Baseline Security Risk and Vulnerability Assessment. The assessment must include a roadmap and project plan to make any required security modifications.
D-09.02	Effective Date + 90 days	*Security Risk and Vulnerability Assessment Report* Present results of the Security Risk and Vulnerability assessment along with a Roadmap and Project Plan to address the recommendation identified in the assessment.

D-10 Gap Analysis Report

The Offeror will execute a Data Center Gap Analysis. The analysis report must identify gaps in the current data centers and the Offeror's recommendations and corrective approach.

Gap Analysis Activities		
D-10.01	Effective Date + 120 days	*Gap Analysis Report* Offeror must execute a Data Center Gap Analysis. The analysis must include gaps identified and a roadmap and project plan to institute any recommendations and corrective actions.

D-10.02	Effective Date + 150 days	*Gap Analysis Report* Present results of the Data Center Gap Analysis along with a Roadmap and Project Plan to address the recommendations identified in the analysis.

D-11 Contract Management Plan

The Contract Management Plan will address management for the overall contract. The Contract Management Plan should describe the Offeror's plan to ensure it is adhering to the terms and conditions of the contract and providing the services/products that meet the requirements of the project. The Contract Management Plan must identify the activities to be performed or initiated to manage, track, amend, and close the contract. The Contract Management Plan must include but is not limited to: participants roles and responsibilities, task accomplishment plan, status reports, deliverable management, contact performance management, risk management, and contract closeout.

Contract Management Plan		
D-11.01	Effective Date + 45 days	*Contract Management Plan* Offeror must document its Contract Management approach, tool(s) and project plan.
D-11.02	Effective Date + 60 days	*Contract Management Plan* After review and approval from the Commonwealth, Offeror must review its Contract Management approach, tool(s) and project plan with Commonwealth stakeholders.

Deliverable Acceptance Criteria Matrix

This section is provided for the Offeror to understand the process the Commonwealth will use for acceptance of Deliverables/Milestones that are committed to in the RFP. The Matrix provided below is an example of the template that will be used to capture Deliverables/Milestones and other information related to the acceptance process.

It is critical to the success of the Data Center Computing Services project that the deliverable acceptance process is thorough and that any deficiencies are addressed as early as possible to minimize impacts to the Services. Designated Commonwealth working teams will be reviewing the Deliverables/Milestones throughout the phases of development. The Offeror will solicit input from the Commonwealth team members as the items are developed with the goal of understanding expectations in advance so as to obtain acceptance upon delivery. Feedback and suggestions received from the Commonwealth must be incorporated into the Deliverables/Milestones. The Commonwealth will identify the individuals authorized to provide formal Acceptance Approval / Nonconformance notification to the Offeror for the Deliverables/Milestones. The deliverable acceptance process will comply with the following guidelines and be formally documented in the Commonwealth Computing Procedures Manual (CCPM).

1. The Offeror will give written notice to the Commonwealth that a Deliverable / Milestone is complete.
2. A walk-through review of the Deliverable and/or Milestone will be scheduled by the Offeror seven (7) days following the issuance of the written notice to the Commonwealth. The purpose of the walk-through is to provide a forum for discussion and review of the Transition Deliverable / Milestone with the approver/s. If additional review, physical inspection, on-line access or backup information is required, the Commonwealth will notify the Offeror at this time.
3. The Commonwealth will provide the Offeror with notice that the Deliverable / Milestone is Accepted or notice of Noncompliance no later than seven (7) days after the walk-through, fourteen (14) days after notice of completion.
4. If the Commonwealth does not provide notice to the Offeror of their Acceptance or Nonconformance within fourteen (14) days of notice of completion, the Offeror will give the Commonwealth written notice that the request was not received and the Acceptance Review Period will be extended an additional seven (7) days.
5. The Enterprise Datacenter Services Transition Management Committee will review all Deliverable / Milestones which have not received written notice of Acceptance or Noncompliance within fourteen (14) days after notice of completion. The Enterprise Datacenter Services Transition Management Committee's goal is to determine and document the Commonwealth and Offeror actions necessary to complete the review minimizing any potential delays to the project and addressing any substantive issues.
6. For any Deliverables / Milestones which are found to be Noncompliant, the Offeror will address the nonconformity (and any other problems of which it has knowledge) and redeliver the item to the Commonwealth using the process outlined above.

The status of each Deliverable and any associated issues will be managed through a monthly deliverables review meeting between the Commonwealth and the Offeror. The objective of the meeting is to review the status of all deliverables, communicate deliverable owners and

deliverable recipients for upcoming deliverables, review rejected deliverables and remediation plans for those deliverables.

Date:	December 5, 2012
Subject:	Data Center Computing Services Addendum
Solicitation Number:	6100022698
Solicitation Due Date	March 8, 2013
Addendum Number:	1

To All Offerors:
The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specification, or instruction of a procurement solicitation (e.g. Invitation for Bids, Request for Quotes and Request for Proposals).

The following changes have been made to the solicitation identified above:

1. In reference to Part I-8 (Enterprise Data Center (EDC) Tour) of the RFP, the Commonwealth requests Offerors register for the EDC tour prior to 2:00 PM EST on Tuesday, December 11, 2012.

2. The heading on Appendix C (Project References) was changed from "Appendix E" to "Appendix C." See updated Appendix C posted December 5, 2012.

For electronic solicitations responses via the PASupplierPortal:

- Attach this addendum to your solicitation response.
- To attach the Addendum, download the Addendum and save to your computer. Move to "My Notes", use the "Browse" button to find the document you just saved and press "Add" to upload the document.
- Review the Attributes section of our solicitation response to ensure you have responded, ad required, to any question relevant to solicitation addenda issues subsequent to the initial advertisement of the solicitation opportunity,

For Solicitation where a "hard copy" (vs. electronic) response if requested:

- If you are already submitted a response to the original solicitation, you may either submit a new response, or return this Addendum with a statement=n that your original response remain fir, by the due date to the following address:

Except as amended by this Addendum, the terms, conditions, specification, and instruction of the solicitation and any previous solicitation addenda, remain as originally written.

Subject:	Data Center Computing Services Addendum
Solicitation Number:	6100022698
Solicitation Due Date	March 8, 2013
Addendum Number:	2

To All Offerors:
The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specification, or instruction of a procurement solicitation (e.g. Invitation for Bids, Request for Quotes and Request for Proposals).

The following changes have been made to the solicitation identified above:

1. A list of visitors that attended the Enterprise Data Center (EDC) tours on December 12th & 13th, 2012 has been posted.

2. A handout provided at the tours detailing information about the EDC facility has been posted.

For electronic solicitations responses via the PASupplierPortal:

- Attach this addendum to your solicitation response.
- To attach the Addendum, download the Addendum and save to your computer. Move to "My Notes", use the "Browse" button to find the document you just saved and press "Add" to upload the document.
- Review the Attributes section of our solicitation response to ensure you have responded, ad required, to any question relevant to solicitation addenda issues subsequent to the initial advertisement of the solicitation opportunity,

For Solicitation where a "hard copy" (vs. electronic) response if requested:

- If you are already submitted a response to the original solicitation, you may either submit a new response, or return this Addendum with a statement=n that your original response remain fir, by the due date to the following address:

Except as amended by this Addendum, the terms, conditions, specification, and instruction of the solicitation and any previous solicitation addenda, remain as originally written.

Solicitation Number:	6100022698
Solicitation Due Date	March 8, 2013
Addendum Number:	3

To All Offerors:
The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specification, or instruction of a procurement solicitation (e.g. Invitation for Bids, Request for Quotes and Request for Proposals).

The following changes have been made to the solicitation identified above:

1. The Commonwealth received approximately 650 questions during the first round of Q&A. Due to the large volume, the Commonwealth will post answers to the questions in parts. A document labeled "Questions and Answers Round 1 Part "1 has been posted to the emarketplace website. Additional questions and answers will be posted as the answers are finalized. Please continue to monitor the emarketplace website.

For electronic solicitations responses via the PASupplierPortal:

Date:	January 17, 2013
Subject:	Data Center Computing Services RFP Addendum
Solicitation Number:	6100022698
Solicitation Due Date	March 8, 2013
Addendum Number:	5

To All Offerors:

The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specification, or instruction of a procurement solicitation (e.g. Invitation for Bids, Request for Quotes and Request for Proposals).

This addendum is intended to inform suppliers of the following:

1. Two sections of the RFP relating to the Small Diverse Business Program have been modified. Part I-13 (Small Diverse Business Information) and Part II-9 (Small Diverse Business Participation Submittal) have been replaced with new language.

   A revised version of the RFP has been posted to the emarketplace website. This new version of the RFP, dated January 17, 2013, replaces the previously posted RFP document.

2. The pre-proposal conference attendance list has been posted to the emarketplace website.

3. Copies of the business cards collected at the pre-proposal conference have been posted to the emarketplace website.

4. The pre-proposal conference presentation has been posted to the emarketplace website.

For electronic solicitations responses via the PASupplierPortal:

- Attach this addendum to your solicitation response.
- To attach the Addendum, download the Addendum and save to your computer. Move to "My Notes", use the "Browse" button to find the document you just saved and press "Add" to upload the document.
- Review the Attributes section of our solicitation response to ensure you have responded, ad required, to any question relevant to solicitation addenda issues subsequent to the initial advertisement of the solicitation opportunity,

For Solicitation where a "hard copy" (vs. electronic) response if requested:

- If you are already submitted a response to the original solicitation, you may either submit a new response, or return this Addendum with a statement=n that your original response remain fir, by the due date to the following address:

Except as amended by this Addendum, the terms, conditions, specification, and instruction of the solicitation and any previous solicitation addenda, remain as originally written.

Date:	January 29, 2013
Subject:	Data Center Computing Services RFP Addendum
Solicitation Number:	6100022698
Solicitation Due Date	April 12, 2013
Addendum Number:	6

To All Offerors:

The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specification, or instruction of a procurement solicitation (e.g. Invitation for Bids, Request for Quotes and Request for Proposals).

This addendum is intended to inform suppliers of the following change:

1. Due to the high volume of questions received for this RFP and the several requests from the vendor community to extend the due date for responses to this RFP, the Commonwealth has updated the Calendar of Event section of the RFP. Please note the updates/additions below:

Activity	Responsibility	Date
Enterprise Data Center (EDC) Tour and Exhibit Distribution	Issuing Office/Potential Offerors	12/12/12 and 12/13/12
Deadline to submit initial questions via email to RA-OITPurchases@state.pa.us.	Potential Offerors	12/21/12 by 1:00 PM EST
Pre-proposal Conference—Location. Forum 500 Walnut St. Harrisburg, PA 17101	Issuing Office/Potential Offerors	1/17/13 @ 9:00 AM EST
Deadline to submit second round questions via email to RA-OITPurchases@state.pa.us	Potential Offerors	2/1/13 by 1:00 PM EST
Answers to initial questions and second round questions posted to the DGS website (http://www.emarketplace.state.pa.us).	Issuing Office	2/15/13
Deadline to submit final questions via email to RA-OITPurchases@state.pa.us	Potential Offerors	2/22/13 by 1:00 PM EST
Answers to final questions posted to the DGS website (http://www.emarketplace.state.pa.us).	Issuing Office	3/6/13

Activity	Responsibility	Date
Please monitor website for all communications regarding the RFP.	Potential Offerors	Ongoing
Sealed proposal must be received by the Issuing Office at Bureau of IT Procurement c/o Commonwealth Mail Processing Center 2 Technology Park (rear) Attn: IT Procurement 506 Finance Harrisburg PA 17110 Attn: Sheryl Kimport Proposals must be time and date stamped by the facility receiving the proposals. Proposals may only be hand-delivered between 6:00 a.m. and 2:45 p.m., Monday through Friday, excluding Commonwealth holidays.	Offerors	4/12/13 by 1PM EST

For electronic solicitations responses via the PASupplierPortal:

- Attach this addendum to your solicitation response.
- To attach the Addendum, download the Addendum and save to your computer. Move to "My Notes", use the "Browse" button to find the document you just saved and press "Add" to upload the document.
- Review the Attributes section of our solicitation response to ensure you have responded, ad required, to any question relevant to solicitation addenda issues subsequent to the initial advertisement of the solicitation opportunity,

For Solicitation where a "hard copy" (vs. electronic) response if requested:

- If you are already submitted a response to the original solicitation, you may either submit a new response, or return this Addendum with a statement=n that your original response remain fir, by the due date to the following address:

Except as amended by this Addendum, the terms, conditions, specification, and instruction of the solicitation and any previous solicitation addenda, remain as originally written.

OFFICE OF ADMINISTRATION
INFORMATION TECHNOLOGY

Date:	April 3, 2013
Subject:	Data Center Computing Services RFP Addendum
Solicitation Number:	6100022698
Solicitation Due Date	June 19, 2013
Addendum Number:	14

To All Offerors:

The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specification, or instruction of a procurement solicitation (e.g. Invitation for Bids, Request for Quotes and Request for Proposals).

This addendum is intended to request additional information:

The Issuing Office received the following questions regarding the Small Disadvantaged Business (SDB) program and corresponding sections of the RFP and has not yet provided answers. To ensure the questions are addressed accurately and completely, please clarify the questions and provide additional detail to fully state all concerns about the requirements of the SDB Program specific to this RFP. **Please provide this information and any additional questions about the SDB Program no later than 4:00pm on Friday, April 5, 2013.**

Q The Commonwealth's response to question #45 (Round 1, Part 3), stated: "The 60% requirement stated in Part III-4 applies to all prime contractors. No SDB points will be awarded to an Offeror unless the company serving as the prime contractor directly performs at least 60% of the total contract value."

"Total Contract Value" implies the inclusion of labor, facilities, hardware, software, telecommunications, office space, etc. Could the Commonwealth please confirm that the aforementioned components should be included in total contract value?

Request for Offeror Clarification: If it is assumed, for purposes of evaluation only, that the total set out in the Offeror's cost submittal is the Total Contract Value, please explain why these items would not normally be included in the Total Contract Value. Also, please provide a complete list of items that the Offeror would not consider to be part of the Total Contract value.

Q Related to question #45 (Round 1, Part 3), the Commonwealth has made no commitment to a baseline volume. As such, legally, there is no financial commitment associated with this contract. In this case the Total Contract Value = $0. Given this, it would be impossible to calculate the percentage of work performed (i.e. the 60% requirement) of total contract value, because the denominator is 0. In such an event, no vendor would qualify for any of the Small Diverse Business Participation points. Is our interpretation correct?

Request for Offeror Clarification: If it is assumed that, for purposes of evaluation only, that the total set out in the Offeror's cost submittal is the Total Contract Value. What information, other than baseline commitments, is required to allow an Offeror to determine the percentage of work to be performed?

Q Section II-9, subsection B, item 1, of the RFP on page 21 states "Offerors must include a numerical percentage which represents the total percentage of the work (as a percentage of the total cost in the Cost Submittal) to be performed by the Offeror and not by subcontractors and suppliers." As this relates to the 60% requirement in RFP section III-4, item C.1 on page 24 of the RFP, can the Commonwealth provide guidance on how to meet the 60% requirement given the amount of facilities, hardware, software, telecommunications, office space, etc. that would have to be included in the denominator of this calculation?

Request for Offeror Clarification: If it is assumed that, for purposes of evaluation only, that the total set out in the Offeror's cost submittal is the Total Contract Value, with the exception of committed baselines, what other information would be required to determine the 60%.

Q The answer to this question (#29 in Round 1, Part 3) restated the requirement to provide a "numerical percentage"; however, the answer did not address how a "dollar amount of each subcontract commitment to a Small Diverse Business" (as called for in the RFP Part II-9, B, 2, page 21) can be provided since the Commonwealth is not committing to a minimum participation. In other words, given that the Commonwealth is unwilling to provide any level of financial commitment or any level of committed participation, please clarify how the "dollar amount" requirement should be calculated.

Request for Offeror Clarification: If it is assumed that, for purposes of evaluation only, that the total set out in the Offeror's cost submittal would be equivalent to the Total Contract Value, with the exception of committed baselines, what other information would be required to calculate the dollar amount for each commitment?

For electronic solicitations responses via the PASupplierPortal:

- Attach this addendum to your solicitation response.
- To attach the Addendum, download the Addendum and save to your computer. Move to "My Notes", use the "Browse" button to find the document you just saved and press "Add" to upload the document.
- Review the Attributes section of our solicitation response to ensure you have responded, ad required, to any question relevant to solicitation addenda issues subsequent to the initial advertisement of the solicitation opportunity,

For Solicitation where a "hard copy" (vs. electronic) response if requested:

- If you are already submitted a response to the original solicitation, you may either submit a new response, or return this Addendum with a statement=n that your original response remain fir, by the due date to the following address:

Except as amended by this Addendum, the terms, conditions, specification, and instruction of the solicitation and any previous solicitation addenda, remain as originally written.

Subject:	Data Center Computing Services RFP Addendum
Solicitation Number:	6100022698
Solicitation Due Date	June 19, 2013
Addendum Number:	15

To All Offerors:

The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specification, or instruction of a procurement solicitation (e.g. Invitation for Bids, Request for Quotes and Request for Proposals).

This addendum is intended to inform suppliers of the following change:

1. The document titled "6100022698 - Master Questions and Answers (4.16.13)" replaces all previously posted Question and Answer documents. This document contains responses to all questions received for this RFP as of April 17, 2013. The Commonwealth has provided revised answers to some previous responses. The revised answers can be found in the "New and Revised Answers" section of this document.

2. Revised versions of the following documents are made part of this RFP:
   - 6100022698 - Request for Proposal (4.17.13)
   - 6100022698 - Appendix A - Terms and Conditions (4.16.13)
   - 6100022698 - Schedule A - Defined Terms (4.16.13)
   - 6100022698 - Schedule C - Services Catalog (4.16.13)
   - 6100022698 - Schedule D - Transition Milestones (4.16.13)
   - 6100022698 - Schedule F - Datacenter Statement of Work (4.16.13)
   - 6100022698 - Schedule G - Staffing Plan and Key Positions (4.16.13)
   - 6100022698 - Schedule I - Offeror Pricing Forms (4.16.13)
   - 6100022698 - Schedule J.3 - Datacenter SLA Definitions (4.16.13)
   - 6100022698 - Schedule K - Key Program Deliverables (4.16.13)
   - 6100022698 - Exhibit D.1 - EDC - Server Inventory
   - 6100022698 - Exhibit J.2 - ITB SEC022
   - 6100022698 - Exhibit K - OA Enterprise ITSM System and Volumetric
   - 6100022698 - Exhibit O – 2012 Agency No Maintenance Periods

3. The following new documents are added to the RFP:
   - 6100022698 - Appendix J - SDB Letter of Intent
   - 6100022698 - Exhibit B.4 - DPH - Third Party Software - Contractor provided
   - 6100022698 - Exhibit B.9 - DPH - Recovery Time Objectives
   - 6100022698 - Exhibit B.10 - DPH - Third Party Software - Commonwealth Licensed Contractor Maintained and Managed
   - 6100022698 - Exhibit C.12 - DPW - Environments_v25_Updated_03-20-2013

- 6100022698 - Exhibit C.13 - DPW - Products on Mainframes
- 6100022698 - Exhibit D.13 - EDC - Business Partner Circuits
- 6100022698 - Exhibit D.14 - EDC - Hardware Warranty Information
- 6100022698 - Exhibit D.15 - EDC - Electrical System Testing Results
- 6100022698 - Exhibit E.42 - DLI - BOIS Software List
- 6100022698 - Exhibit E.43 - DLI - UC Software
- 6100022698 - Exhibit F.4 - DOH - Physical Servers
- 6100022698 - Exhibit G.6 - PSP - CJIS Security Policy
- 6100022698 - Exhibit I.14 - IES - IES Anticipated SLA Service Levels
- 6100022698 - Exhibit J.4 – Security Agent Standard Tools
- 6100022698 - Exhibit N.1 - PennDOT - Enterprise Network Connectivity Diagram
- 6100022698 - Exhibit N.2 - PennDOT - Monitoring
- 6100022698 - Exhibit P - Enterprise Internet Bandwidth Utilization
- 6100022698 - Exhibit Q - Mailbox Restore Policy
- 6100022698 - Exhibit R - Transition Considerations
- 6100022698 - Exhibit S - Datacenter Locations
- 6100022698 - Exhibit T - Critical Configuration Considerations
- 6100022698 - Exhibit U - COPANET Locations
- 6100022698 - Exhibit V - SCSC - Power 520 System I

Note: All Schedules and Appendices have been made available on the emarketplace website. All exhibits are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.

For electronic solicitations responses via the PASupplierPortal:

- Attach this addendum to your solicitation response.
- To attach the Addendum, download the Addendum and save to your computer. Move to "My Notes", use the "Browse" button to find the document you just saved and press "Add" to upload the document.
- Review the Attributes section of our solicitation response to ensure you have responded, ad required, to any question relevant to solicitation addenda issues subsequent to the initial advertisement of the solicitation opportunity,

For Solicitation where a "hard copy" (vs. electronic) response if requested:

- If you are already submitted a response to the original solicitation, you may either submit a new response, or return this Addendum with a statement=n that your original response remain fir, by the due date to the following address:

Except as amended by this Addendum, the terms, conditions, specification, and instruction of the solicitation and any previous solicitation addenda, remain as originally written.

Very truly yours,

Date:	May 14, 2013
Subject:	Data Center Computing Services RFP Addendum
Solicitation Number:	6100022698
Solicitation Due Date	June 19, 2013
Addendum Number:	16

To All Offerors:

The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specification, or instruction of a procurement solicitation (e.g. Invitation for Bids, Request for Quotes and Request for Proposals).

This addendum is intended to inform suppliers of the following change:

1. 1. The document titled "6100022698 - Master Questions and Answers (5.14.13)" replaces all previously posted Question and Answer documents. This document contains responses to all questions received for this RFP as of May 14, 2013.

2. Revised versions of the following documents are made part of this RFP:
   - 6100022698 - Request for Proposal (5.14.13)
   - 6100022698 - Appendix A - Terms and Conditions (5.14.13)
   - 6100022698 - Schedule A - Defined Terms (5.14.13)
   - 6100022698 - Schedule F - Datacenter Statement of Work (5.14.13)
   - 6100022698 - Schedule I - Offeror Pricing Forms (5.14.13)
   - 6100022698 - Schedule J.2 – Datacenter Service Level Matrix (5.14.13)
   - 6100022698 - Schedule J.3 - Datacenter SLA Definitions (5.14.13)
   - 6100022698 - Schedule K - Key Program Deliverables (5.14.13).
   - 6100022698 - Exhibit B.4 – DPH – Third Party Software (5.14.13)
   - 6100022698 - Exhibit B.10 – DPH – Hybrid Third Party Software (5.14.13)

Note: All Schedules and Appendices have been made available on the emarketplace website. All exhibits are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.

For electronic solicitations responses via the PASupplierPortal:

- Attach this addendum to your solicitation response.
- To attach the Addendum, download the Addendum and save to your computer. Move to "My Notes", use the "Browse" button to find the document you just saved and press "Add" to upload the document.
- Review the Attributes section of our solicitation response to ensure you have responded, ad required, to any question relevant to solicitation addenda issues subsequent to the initial advertisement of the solicitation opportunity,

For Solicitation where a "hard copy" (vs. electronic) response if requested:

- If you are already submitted a response to the original solicitation, you may either submit a new response, or return this Addendum with a statement=n that your original response remain fir, by the due date to the following address:

Except as amended by this Addendum, the terms, conditions, specification, and instruction of the solicitation and any previous solicitation addenda, remain as originally written.

Date:	May 24, 2013
Subject:	Data Center Computing Services RFP Addendum
Solicitation Number:	6100022698
Solicitation Due Date	June 19, 2013
Addendum Number:	17

To All Offerors:

The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specification, or instruction of a procurement solicitation (e.g. Invitation for Bids, Request for Quotes and Request for Proposals).

This addendum is intended to inform suppliers of the following change:

Revised versions of the following documents are made part of this RFP:

1. 6100022698 - Request for Proposals (5.24.13)
   - The Issuing Officer has been changed to:

     Janis Brown
     506 Finance Building
     Harrisburg, PA 17120
     RA-OITPurchases@pa.gov

2. 6100022698 - Appendix A - Terms and Conditions (5.24.13)
   - Section 45 (Insurance) has been revised.

Note: All Schedules and Appendices have been made available on the emarketplace website

For electronic solicitations responses via the PASupplierPortal:

- Attach this addendum to your solicitation response.
- To attach the Addendum, download the Addendum and save to your computer. Move to "My Notes", use the "Browse" button to find the document you just saved and press "Add" to upload the document.
- Review the Attributes section of our solicitation response to ensure you have responded, ad required, to any question relevant to solicitation addenda issues subsequent to the initial advertisement of the solicitation opportunity,

For Solicitation where a "hard copy" (vs. electronic) response if requested:

- If you are already submitted a response to the original solicitation, you may either submit a new response, or return this Addendum with a statement that your original response remains firm, by the due date to the following address:

Bureau of IT Procurement
c/o Commonwealth Mail Processing Center
2 Technology Park (rear)
Attn: IT Procurement 506 Finance
Harrisburg PA 17110
Attn: Janis Brown

Except as amended by this Addendum, the terms, conditions, specification, and instruction of the solicitation and any previous solicitation addenda, remain as originally written.

Very truly yours,

Name: Sheryl Kimport

Previously Answered Questions (Note: answers with strikethrough have been revised. The revised answers can be found in the "New and Revised Answers" section of this document.)

Addendum 3 - Round 1, Part 1

	Doc	Sec	Pg	Question	Answer
1.	Appendix A	N/A	N/A	As the Commonwealth has required financial background info for the Offerors, and likely they will be publically traded companies. As a result, they will be subject to Sarbanes-Oxley. In this light, it is required that firms have the ability to identity all liabilities to shareholders and the SEC. The RFP identifies unlimited liability in several areas not limited to security breaches. This provides unreasonable expectations as all liabilities are expected to be quantified. Will the Commonwealth please consider limiting all liability as it pertains to this contract?	Objections to the terms and conditions set forth in Appendix A may be made according to Part II-8 of the RFP.
2.	Appendix A	2(f)(1) & Sec. 5(a)	Pages 2 and 4	Appendix A, Sec. 2(f)(1) of the contract states that no handwritten signatures will be required in order for the Contract or Purchase Order to be legally enforceable, whereas Sec. 5(a) suggests that the contract will include a signature page. If signature pages are not required, will the Commonwealth please clarify how the parties will evidence their intent to enter into a binding contract?	The contract will include a signature page. The selected Offeror will be required to sign the contract in ink. All Commonwealth officials will sign the contract electronically.
3.	Appendix A	1.B	1	Commonwealth states "Further, the Commonwealth reserves the right to extend this Contract or any part of this Contract up to three (3) months, or as necessary to prevent a lapse in Contract coverage". As currently written the Commonwealth reserves this right in perpetuity. Is that the intent?	The term of the contract will be for 7-years and may be extended by the Commonwealth for up to three additional years. The referenced provision allows the Commonwealth to extend the contract for a period of time to avoid a lapse in contract coverage. Objections to the terms and conditions set forth in Appendix A may be made according to Part II-8 of the RFP.
4.	Appendix A	1(a) Contract Term	1	Is the estimated 18-30 month transition period included in the 7-year base contract? Or does the 7-year term begin after transition is complete (18-30 month transition plus 7-years)?	The transition period is included within the 7-year term.
5.	Appendix A	1(b)	1	In the phrase "any part of this contract", what constitutes a part i.e. a single system, a single agency, etc.?	This phrase refers to any Service or portion of a Service included in the contract. Objections to the terms and conditions set forth in Appendix A may be made according to Part II-8 of the RFP.
6.	Appendix A	2	2	How will the Purchase Order process be used and how does it differ from the Change Control procedures?	The RFP references two types of change control procedures. Section 27 (Change Control) of Appendix A sets out the procedures that will be used to modify the contract. The RFP also references ITIL change control procedures that may be used to modify the configuration of an infrastructure component of a Service. Other than a purchase order serving as a notice to proceed, the Commonwealth does not anticipate issuing Purchase Orders during the term of this contract.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
7.□	Appendix A	2(a)	Page 2	Appendix A, Sec. 2(a): The contract states that the Commonwealth may issue one or more Purchase Orders against the Contract. Will one purchase order be issued in connection with the base term of the agreement?	Other than a purchase order serving as a notice to proceed, the Commonwealth does not anticipate issuing Purchase Orders during the term of this contract.
8.□	Appendix A	2(a)	2	How do purchase orders align to the "Change Control Procedures" process defined in section 27?	Other than a purchase order serving as a notice to proceed, the Commonwealth does not anticipate issuing Purchase Orders during the term of this contract.
9.□	Appendix A	2 (g)	2	Please provide an estimate on the quantity of purchase orders over a monthly period where you expect that payment would be made using the Commonwealth Procurement Visa Card.	The Commonwealth expects this to occur very infrequently. Less than 5 times per year.
10.□	Appendix A	6 (b) (2) (ii)	5	Please provide examples of incidental services, functions or responsibilities not specifically described in the contract.	The provision speaks for itself. Objections to the terms and conditions set forth in Appendix A may be made according to Part II-8 of the RFP.
11.□	Appendix A	6.(j)	7	Please also confirm that this includes all proprietary software not found in Section 8, but listed throughout the exhibits.	"Contractor Licenses and Permits" includes software licenses for the proprietary software listed throughout the RFP.
12.□	Appendix A	6.(j)	7	Please clarify that the use of the words "Contractor Licenses and Permits" also includes software licenses.	"Contractor Licenses and Permits" includes software licenses.
13.□	Appendix A	7(a)(1) Equipment	8	"All replacements and upgrades shall be addressed through the Change Control Procedure." Does this mean any hardware refresh should be excluded from RFP solution and pricing?	All replacements, upgrades and hardware refreshes must be included within the proposal and pricing.
14.□	Appendix A	6 (i)	6	Who will manage Internet ingress points?	Initially, all internet ingress to the Commonwealth's Applications and Data is to be delivered to the Offeror's datacenters via the Commonwealth's private data network (COPANET). However, as a future option, the Commonwealth may desire to have direct access between the users and the datacenter.
15.□	Appendix A	6(g)	10	Does DC adjacency FROR extend to virtual conditions like a shared mainframe?	Please clarify the question so that the Commonwealth may respond. What is meant by adjacency?
16.□	Appendix A	6 (c)	5	In a scenario where the Commonwealth decides to "in source or re-procure any or all of the services", what is the process for termination of such services?	Refer to Section 32 (Termination) of Appendix A.
17.□	Appendix A	6 (g)	6	Please be aware that in many cases Service Providers cannot provide client names that may share environments due to security and contractual related issues. As a result, please explain in what circumstance the Commonwealth would not approve a third-party proposed to share the data processing environment.	Section 6(g) of Appendix A provides detail on this topic. Objections to the terms and conditions set forth in Appendix A may be made according to Part II-8 of the RFP.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
18.	Appendix A	6 (i)	6	Is the Commonwealth requesting that the Contractor provide remote access to the hosted services or provide remote access as a service to enable Commonwealth personnel access to their internal networks (hosted or offices)?	The Commonwealth is requiring the ability for secure remote access to hosted systems for operational and administration purposes for designated personnel. The Commonwealth currently has VPN services hosted by Verizon as part of its Telecom Contract.
19.	Appendix A	6 (d)	5	With respect to a decrease in services, what is the committed baseline of services?	There is no committed baseline.
20.	Appendix A	6 (g)	6	From the point of request for approval, how long will it take the Commonwealth to provide approval?	This question is related to the approval of a new datacenter facility and duration is variable based on many factors. Some of the factors include (but are not limited to) a review of the SSA16 audit reviews, Security policies and architecture, networking policies and architecture, and subcontractor approvals.
21.	Appendix A	6 (k)	7	Has the Commonwealth had audits to determine where exposures and current non-compliance with regulations exists? Could results be shared with vendors?	Yes. No.
22.	Appendix A	7.(a)	8	This section states that the "Contractor shall maintain, replace and upgrade the Contractor Machines at its sole cost and expense." Does this include all technology refreshes? There is a requirement to replace "Commonwealth Machine" at its respective end of life. Will this replacement be at the Commonwealth expense? Does this requirement to replace a system at the "end of life" also apply to the "Contractor Machines" and at the service provider's expense?	Yes, this includes all technology refreshes. No, the Commonwealth will not purchase new machines. The Commonwealth is procuring computing services and will no longer be purchasing equipment. The Commonwealth is procuring computing services. The contractor will be required to purchase machines to provide the Services required by the contract.
23.	Appendix A	7.a.1	8	There does not appear to be a definition in either Appendix A or Schedule A for "Commonwealth Machine". Please define.	A "Commonwealth Machine" is a piece of equipment that is owned or leased by the Commonwealth.
24.	Appendix A	9 (a)	10	Will Offeror have any responsibility for logical access (LDAP, Exchange, Active Directory, etc.)?	~~Exchange as a Service is included within the scope of the RFP but the other services such as LDAP and Active Directory will remain under the Commonwealth's control. However, the selected Offeror must provide the equipment to operate these services.~~
25.	Appendix A	9 (b)	10	The RFP states that the contractor cannot store data outside of the United States. Is it permissible for staff outside of the United States to access Commonwealth data stored in the US?	No, unless approved by the Commonwealth.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
26.	Appendix A	9 (a)	9	As indicated, the Commonwealth will retain administration of logical and data access security. Does this mean that the Commonwealth retains ID administration on all systems or will just manage the process and expect the Contractor to provide the ID administration service on all supported environments?	The Commonwealth has implemented IBM's Tivoli Identity Manager, SiteMinder and CA Identity Minder to manage the users and applications within some systems**.** However, some agencies require the Offeror to manage the System level IDs based on the application owner's needs.
27.	Appendix A	9 (d)	10	Requirements in section 9 (d) are in conflict with requirements in section 42 (d). Assuming that direction in 9 (d) prevails, can you please elaborate on the term "appropriately authenticated", and provide information regarding encryption tools the Commonwealth would use to read the encrypted data?	The requirements of Section 9(d) are more specific than those in Section 42(d) and must be followed. The Commonwealth will determine the appropriate encryption method.
28.	Appendix A	9. (a)	10	Please confirm that the Commonwealth will "retain administration of logical and data access security".	This depends on the service being acquired from the agency.
29.	Appendix A	10 (c)	12	In an "enterprise-wide" survey, will the survey include all end-users of Commonwealth systems?	No, the survey will include only the application owners and key management.
30.	Appendix A	13 (b) (3)	17	How does cost and expenses defined in this section differ from costs and expenses referenced in section 13 (d)?	Section 13 (d) details that funds from the "Reserve Account" are intended for capital improvements or major repairs to the EDC. These projects support or improve the property or facility and will remain after this contract has terminated. Section 13(b) addresses expenses for all maintenance, security and upkeep of the property under the contractor's control.
31.	Appendix A	12 (d)	15	Certain types of requirements can have an impact to the solution including requirements for physical separation and caged environments. Please provide Agency specific security requirements.	Agency specific security requirements are set forth in the RFP, including but not limited to the CJIS and CHIRA documentation.
32.	Appendix A	13(a)(1)	16	Will the Commonwealth consider an offer to buy the existing data center and lease it back to the Commonwealth as an integral part of a response to the RFP?	No.
33.	Appendix A	13 (a) (1)	16	Is it a requirement that the vendor upgrade the Enterprise Data Center to a tier 3 equivalence?	No.
34.	Appendix A	12		Given that Section 12 requires Commonwealth approval for any Services performed from or at locations outside the continental United States, and that no Commonwealth approval has yet been provided, should a Contractor assume that all Services must be performed with US-based labor?	Yes, all Services must be performed with US based labor unless approved by the Commonwealth. Offerors must submit proposals in accordance with the RFP requirements including Appendix A. Objections to the terms and conditions set forth in Appendix A may be made according to Part II-8 of the RFP. Appendix D
35.	Appendix A	12(b)	14	Why is the Commonwealth not requiring the data centers to be located within the Commonwealth of Pennsylvania, thereby securing the jobs and tax revenue for the Commonwealth?	The Commonwealth requires a minimum of one datacenter be located within the Commonwealth of PA – the Enterprise Data Center. To receive the best possible pricing, the Commonwealth is providing the option for Offerors to use their existing datacenters if they choose.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
36.	Appendix A	12 (d)	15	Commonwealth references DOD 5200.28-STD. This regulation has been superseded by DODI 8500.01 - is this acceptable to reference 8500.01 instead?	The most current standard applies.
37.	Appendix A	12 (d3)	16	Will agencies be required to perform data classifications and communicate that information in order for the Offeror to know what compliance and audit standards they must meet?	Yes – the Commonwealth expects the Offeror to determine this during transition planning in cooperation with the application/data owner.
38.	Appendix A	14 (a) (2)	19	Non-disruptive transitions are technically possible, but extremely costly. Will the Commonwealth consider some degree of downtime associated with transition that minimally impacts the business in order to contain costs?	Yes, the Commonwealth will consider a minimal amount of downtime during transition on a case-by-case basis.
39.	Appendix A	13.b.1	17	Will Offeror be responsible for paying for rent, utilities, etc for the EDC facility?	Refer to Section 13 (Conditions of Contractor's Occupancy of Commonwealth Provided Real Property) of Appendix A.
40.	Appendix A	15 Disaster Recovery and Business Continuity	23	Appendix A requires a DR plan every six months. Could you please reconcile this with the Schedule F requirements as requested in the next question (#3)?	Appendix A states: "Jointly with the Commonwealth, Contractor shall at least annually review and update the disaster recovery plan." It does not require a DR plan every six months. It does, however require that the plan be tested every six months. Frequency of DR exercises will be at the discretion of the Commonwealth.
41.	Appendix A	17 (c)	25	This section refers to the role of Contractor Services Location Manager; however, this position is not defined in schedule G Staffing Plan and Key Positions. Is this a key role?	No.
42.	Appendix A	20	29	Can you please clarify when the monthly invoices are due to the Commonwealth? Within the RFP documents, the invoicing section states the 15th of the month that is being invoiced. However within the SL credits section, there is reference that the invoice is provided to Commonwealth the month following (invoice in September for August monthly Services).	Invoices are due no later than the 15th of the month following the service provided. As described in the example, the invoice will be delivered no later than September 15th for services provided during August.
43.	Appendix A	23.c,d	Page 31	Please clarify the difference between the 2 clauses other than the addition of "liquidated" in line 4 of 23.c?	Please clarify the question. Objections to the terms and conditions set forth in Appendix A may be made according to Part II-8 of the RFP.
44.	Appendix A	33.d.ii	48	If the Service Provider has employment contracts in place with its employees, compliance with this section may not be possible. Given this, has the Commonwealth negotiated these terms with other vendors to reflect existing employment contracts?	Objections to the terms and conditions set forth in Appendix A may be made according to Part II-8 of the RFP.
45.	Appendix A	43a	67	Is there a requirement for encryption of all data?	Not all data - only data which requires encryption by IT policy, law, or other requirement of RFP.
46.	Appendix A	43 (a)	67	Does the phrase "appropriate encryption technologies" infer that a data classification exercise will take place in advance of actually enabling encryption?	Yes – the Commonwealth expects the Offeror to determine this during transition planning in cooperation with the application/data owner.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
47.	Appendix A	45(a),(1)	68-69	This section states that "Approved Subcontractors" must provide insurance as described in this section. Please confirm that this requirement also applies to all "Small Disadvantaged Businesses" that will all be listed as "Approved Subcontractors".	Confirmed. The insurance requirements apply to all subcontractors, including Small Diverse Businesses.
48.	Appendix A Contract Terms and Conditions	1(b) Contract Term	1	Document states that the three option years pricing is "to be negotiated but consistent with and no less favorable than the pricing in force at the date of the renewal". Does this mean no price required now for the option years? Language implies pricing will be provided later at end of base contract.	Offerors must provide prices for the option years as part of their proposals. Refer to Schedule I (Offeror Pricing Forms).
49.	Appendix A Exhibit D.7	13(b)	16-18	What are the DR configurations and locations for machines in the EDC?	There are no DR configurations within the EDC. However, there are DR facilities in Selinsgrove, Wyomissing, and Scranton that will be decommissioned with the full implementation of this RFP and resulting agreement.
50.	Appendix A Exhibit D.7	13(b)	16-18	Is the EDC capable of supporting water-cooled machines?	Yes, the EDC is capable of supporting water-cooled machines but is not configured to do so at this time.
51.	Appendix A Schedule F	12(a) 2.3.1 3.1.1(3)	14 8 14	Under what conditions can the Offerors make use of the existing Data Powerhouse facility for any class of services? Can it be combined with the EDC to be considered a single facility for purposes of separation?	Offerors cannot make use of the existing Data Power House facility.
52.	Asset list	Exhibit B.1	1	Reviewing the Exhibit B.1 Asset list – multiple agencies are listed – is this an all-inclusive list? Will OA's assets be a part of the data center migration?	Exhibit B.1 is only a list of DPH assets. No assets on that exhibit will be transferred only the applications will be migrated
53.	Defined Terms	Schedule A	All	There are terms in the RFP, Schedules and Appendices that have capitalized words; however, they are not included in the Schedule A Defined Terms. When do you expect these capitalized words to be defined?	Please provide specific references to the undefined terms.
54.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the warranty of the roof and are the warranties conditions being maintained?	15 Years, Yes

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
55.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the open elevation of the access floor (height between the concrete slab and the bottom of the access panels?	2 feet
56.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Electrical			What is the make, year of manufacture, type of fuel system, and emissions tier level of the generator?	2000kw, 3516C Diesel engine, CAT SR4B 2009, Tier 2
57.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the electrical demand for each UPS by month for the last 12 months?	**2012** / **UPS A KVA** / **UPS B KVA** Jan 286 199 Feb 285 200 March 286 206 April 292 206 May 297 217 June 299 220 July 299 222 Aug 305 228 Sept 313 233 Oct 319 239 Nov 331 253 Dec 335 256
58.	EDC tour	Tour handout		HVAC … 325 tons listed in tour handout; 275 listed in RFP materials. Which is correct?	325 tons

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
59.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the capacity of the CRAC equipment located in the UPS room (tons or Watts)?	60 tons
60.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the weight limit of the access panels for the access flooring?	800 lbs. per tile
61.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What type of battery monitoring system is installed?	Batteries are PM monthly, monitored only with UPS alerts through BMS
62.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Can access to the building / parking lot be restricted?	Building access is controlled with a card access security system. In addition there is fingerprint (biometric) access to selected areas of the EDC. Parking lot is a shared Commonwealth lot for four Commonwealth buildings. The Offeror must provide more details before the Commonwealth can comment on specific restrictions to the building and parking lot.
63.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What changes / modifications have been made to the Fire Control / Decoction System	Cheetah xi Addressable Fire Suppression Control System installed 2006

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
64.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Could the Commonwealth provide the actual tons installed for each area of the data center	Computer Room 1, 225 tons Computer Room 2, 100 tons
65.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the method for fuel spill containment at the facility?	Double-walled underbelly fuel tanks
66.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the capacity of the fuel storage system?	Each of the two generators is equipped with a 6000 gal. underbelly tank
67.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Could the Commonwealth describe the electrical distribution of the power from the UPS to the PDUs / RPPs?	Even numbered PDUs align to UPSB Odd numbered PDUs align to UPSA RDC 1 powered by PDUs 4 & 10 RDC 2 powered by PDUs 11 & 12 RDC 3 powered by PDUs 13 & 14 Each PDU has a Static Switch.
68.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			For the ASCO transfer switch in the warehouse space; what equipment feeds it and what equipment does it support?	Fed from two main bus panels; supports the entire building excluding the computer room

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
69.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What types of smoke detection devices are installed?	Fike thermal, photoelectric, ionization
70.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Mechanical			What is type of heat exchange system used?	Freon direct expansion; all Liebert equipment
71.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the source of fresh water for the site?	Harrisburg Water Authority
72.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there an air contamination monitoring system installed?	Yes, in the Battery Room
73.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Fire System			Where in the facility are the Halon storage tanks?	In the mechanical room in the warehouse.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
74.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the age of the building roof?	Installed June 2010.
75.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What type of leak detection is provided?	Local to each CRAC
76.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Describe how the electrical system is distributed to the mechanical systems (CRAC units / condenser units)?	Main distribution panel feeds subpanels feeds condenser units; Main distribution panel feeds CRAC
77.	EDC tour	Tour		Is electrical/mechanical maintenance and project work done by union labor?	Maintenance, no Project, yes
78.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What remote monitoring or access (control) is in operation for the electrical system?	Monitored through the BMS, Johnson Control System
79.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Are the CRAC units controlled by the BMS system or is monitoring only provided?	Monitoring only but cycles on through BMS if power interruption detected

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
80.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there a regular maintenance schedule for cleaning under the access floor? If yes, what is the schedule?	No
81.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			For the UPS power: is there a diagram of the power distribution at the device (IT equipment) level? Can this diagram be provided for review?	No
82.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is the leak detection system connected to the BMS system?	No
83.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Are there any overhead water, drain or condensate pipes or sprinkler heads located in the data centers or UPS room?	No
84.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there a wet / pre-action Sprinkler system installed? If yes, which one and in what areas?	No
85.	EDC tour	Tour		Have there been any site failures (power, cooling, infrastructure) since new electrical building was completed and brought on-line?	No

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
86.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Does an electrical single line drawing exist for the facility showing the utility and electrical distribution of the site? If yes, can the Commonwealth provide a copy?	No single line drawing exists.
87.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Has the water been tested for hardness, minerals, turbidity, etc? Can the report be provided for review?	No testing has been conducted. No report exists.
88.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the method of fresh air make-up for the data centers? What is the percentage of air exchange for fresh air?	None
89.	EDC tour			You indicated that the new electrical building was added in 2009. During that process was the site ever evaluated against the UTI Tiering criteria? If so, did an independent EE/ME firm do the evaluation? If so, what is the name of the firm and their address?	None of the EDC facilities were evaluated against UTI criteria.
90.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			How is the water treated before use on the site?	Not known.
91.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the fire rating of the data center space (1 hr, 2 hr, 3 hr or none)?	Not known.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
92.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there a drawing of the building mechanical systems, including the fresh air make-up equipment? Can the drawing be provided for review?	The Commonwealth has as-built prints only. This document is confidential. To receive a copy, please contact Sheryl Kimport, Issuing Officer.
93.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What year was the Halon system installed?	Original to EDC, approximately 21 years
94.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			How is condensate water removed from the data center?	Pumped into drain system to sanitary sewer
95.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the operating demand loads in the generators during operational (loaded) testing?	Quarterly Load bank tested approximately 1000 kw.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
96.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the demand load for each of the metered PDU's?	Racks not equipped with metered PDUs. Approximate output kva for computer room PDUs: PDU1 47 kva PDU2 39 kva PDU3 44 kva PDU4 52 kva PDU5 29 kva PDU6 46 kva PDU7 46 kva PDU8 36 kva PDU9 42 kva PDU10 17 kva PDU11 98 kva PDU12 51 kva PDU13 39 kva PDU14 43 kva
97.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Does the access floor height change in any off data center spaces?	Raised floor exists only in data center.
98.	EDC tour	tour		How long are CCTV security tapes kept on-site and off-site?	Recorder kept on site approximately 4 months

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
99.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the monthly electrical demand loads for the facility by utility feed and by month?	Secondary Utility Feed shows no usage last year. Primary Utility Feed **Billing Month** / **Usage (kwh)** / **Max Demand (kw)** Nov-12 747,750 1,182 Oct-12 867,000 1,137 Sep-12 818,250 1,250 Aug-12 745,500 1,190 Jul-12 771,750 1,197 Jun-12 810,000 1,187 May-12 707,250 1,146 Apr-12 717,000 1,135 Mar-12 689,250 1,100 Feb-12 750,000 1,079 Jan-12 689,250 1,083 Dec-11 708,000 1,091 Nov-11 759,000 1,060
100.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is the fuel storage system shared or separate?	Separate
101.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the method for humidity control in the data center?	Set individually by CRAC units

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
102.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			For the two Emerson static switch PDUs located in the warehouse, where are these devices fed from and what devices / equipment do they feed?	St Sw 13 & StSw 14 feed PDUs 13 & 14 respectively. Both static switches are fed redundantly from Switchboard #1A (UPS B) and Switchboard #2 (UPS A)
103.	EDC tour	Tour		Can the Commonwealth provide a copy of the most recent data center audit or assessment? (e.g., SAS 70, SSAE 16)	The EDC is the only in scope Datacenter for this procurement and no SSAE 16 Audit has been completed. Therefore there is no audit to provide.
104.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is a drawing available documenting the electrical distribution to the mechanical systems available? Can it be provided for review?	The only prints available are the prints used to construct the facility in 1992. There has been no update made. These documents are confidential. To receive a copy, please contact Sheryl Kimport, Issuing Officer.
105.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there a drawing showing the redundant utility feed installations? Can this drawing be provided for review?	The only prints available are the prints used to construct the facility in 1992. There has been no update made. These documents are confidential. To receive a copy, please contact Sheryl Kimport, Issuing Officer.
106.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			In the perimeter "proposed" expansion areas, what is the construction of the flooring (i.e. slab on grade? some access floor, etc.?	There are no perimeter “proposed” expansion areas identified in Exhibit D.7
107.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the structural weight loading for the concrete slabs in these areas?	There are no perimeter “proposed” expansion areas identified in Exhibit D.7
108.	EDC tour	tour		Are the CCTV video feeds monitored 7x24x365 by eyes on? Does that occur within the building?	This information is considered confidential. The selected Offeror is to provide security to the EDC as part of the contract.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
109.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the warranty on the C& D batteries (years remaining)?	Unsure of warranty. Approximately 17 years remaining on 20 year service life batteries
110.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there a vapor barrier integrated into the data center walls? Ceiling? Concrete flooring?	Walls-no; Ceiling-no; Floor-6 mil
111.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is the building floor slab sealed?	Yes
112.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is the fire control / monitoring system connected to a central station and BMS?	Yes to a central station and Capital Police
113.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there attic stock available of ceiling tiles for use in the data center? If yes, how many panels?	Yes, unknown count.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
114.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there an attic stock of access floor panels (uncut) available for use / replacement in the data center? If yes, how many panels?	Yes, approximately 80 tiles
115.	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there a warranty/ service agreement in place for the mechanical systems? Has it been in continuous service since the initial equipment installation?	Yes. Yes.
116.	Exhibit B.1			Is zVM - zVSE included in the scope as depicted in Exhibit B1 Mainframes - IBM?	Yes
117.	Exhibit B.1			Do the MIPS for zLinux environment in the pricing matrix map to Exhibit B1 Mainframes - IBM?	Yes, Line #'s 21 - 96
118.	Exhibit B.2 DPH - Commonwealth Owned DPH IT A V1 Exhibit B.5 DPT - DPH Agency Disaster Recovery V1 Exhibit D.1 EDC - Server Inventory V1 Exhibit D.5 EDC - DOT Datacenter Inventory V1 Exhibit G.1 PSP - Datacenter HW Inventory V1			For the Mid-Range and x86 servers, can the Commonwealth please provide the processor type and speed for the exhibits?	All available Commonwealth info is contained in exhibits.
119.	Exhibit B.5 DPH Agency Disaster Recovery	"DPH BCP Agencies" Tab	Page1,Line # 3-12	For the dedicated DR equipment located at SunGard in Philadelphia, please identify who will own these machines at the end of the current contract?	The Commonwealth does not know who currently has title to the equipment at SunGard. The Commonwealth does not have title to any equipment at SunGard.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
120.□	Exhibit D.1	MS and MSL	Virtual=TRUE	There are some virtual machines with high memory (16GB+). Does the Commonwealth have an expectation of the maximum amount of CPU and Memory permitted for an On Demand Server Service (Cloud)? For example, max=16GB, or Max=64GB? 8vCPU? Please provide expected min/max configuration for cloud virtualization.	The Commonwealth has no expectations related to the maximum amount of CPU and Memory permitted for an On Demand Server Service (Cloud).
121.□	Exhibit d.x edc	EDC Facility Summary		What is the diesel fuel storage capacity of the generators … belly tanks local to each gen? Is there shared fuel storage between the tanks? Is the fuel polished?	6000 gallons. No shared storage. Yes
122.□	Exhibit d.x edc	EDC Facility Summary		What is the age of the UPS, electrical switch gear, gens, and battery bank?	All were installed in 2010.
123.□	Exhibit d.x edc	EDC Facility Summary		redundant HVAC cooling … 275 tons. Does this imply that you are 2N or N+1 in cooling capacity? IS each CRAC isolatable so that it can be taken offline?	N+1 for maintenance Each CRAC is isolatable
124.□	Exhibit d.x edc	EDC Facility Summary		Are the valves in the cooling system concurrently maintainable without the need to diminish service to the critical load? Does the redundancy extend to the piping systems?	No, maintenance to valves requires condenser shutdown which reduces cooling capacity. No.
125.□	Exhibit d.x edc			Is there a specific location set aside for contractor installed electrical distribution panel and meters?	No, Offeror will be required to work with Commonwealth building manager.
126.□	Exhibit d.x edc	EDC Facility Summary		Is the BMS physically monitored 24x7x365 locally within the building? If remote … where does this occur?	This information is considered confidential. The selected Offeror is to provide security to the EDC as part of the contract.
127.□	Exhibit d.x edc	EDC Facility Summary		How many diesel vendors are under contract? What is the delivery SLA and priority vs. their other clients? What are the distances from the fuel depot to EDC for each contractor?	Varies with number listed on state contract. EDC has agreement with one vendor to deliver within 5 hours after notification of any emergency. Current vendor is less than 20 miles
128.□	Exhibit d.x edc	EDC Facility Summary		How often are the gens tested? Does this test include running the critical load off the gens?	Weekly. Test does not include running critical load off gen. Load bank tested quarterly.
129.□	Exhibit d.x edc	EDC Facility Summary		Is it standard that all components of the critical load (servers, switches, storage units, etc.) have dual power supplies?	Yes.
130.□	Exhibit d.x edc	EDC Facility Summary		If the above is affirmative, does each power supply run back to independent PDUs (in rack and on RF) and independent UPS/Gens also? We'd like to confirm that redundant implies a 2N power train all the way thru the electrical system.	Yes, redundant implies a 2N power train all the way thru the electrical system.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
131.	Exhibit d.x edc	EDC Facility Summary		Do the generators service the critical and essential systems? Do they service any other systems in the building (emergency lighting, building water pumping, etc.)	Yes. The entire building is serviced by the generators.
132.	Exhibit G.5			The architecture shows PSP having its own Private Cloud. Please comment on this, and moving forward if the PSP requires separate infrastructure from the general COPA infrastructure. Are other technologies (such as POD separation) acceptable if the PSP can be wall and separated? Are there any other Agencies that require such special handling regarding technical architecture (Private vs. Public, vs. Hybrid). Or, was it just a matter of expediency of history that PSP maintained its own Private Cloud?	PSP requires a design that is compliant with the FBI's CJIS Security Policy. The diagrams included with the Summary of CJIS Requirements are shown as examples of how data at rest and in transit needs to be protected. Yes, there are additional agencies that require "special handling" as defined with the RFP.
133.	Exhibit J.1,	Maturity Level	Page 8	"The Provider is obliged to obtain a Statement on Auditing Standards No. 70 (SAS 70) II certification for the Services provided under this Agreement." SAS 70 certification has been replaced with SSAE 16. Is the Commonwealth looking for SAS 70 II or SSAE 16?	SSAE 16.
134	Exhibit L - Schedule F -	3.3.2.2	152	Does the Commonwealth expect the Offeror to perform Baseline Security Risk and Vulnerability Assessment on all or just a sub-set of applications in-scope (as detailed in Exhibit L) for the Security Transition Services described in Schedule F? Please provide the list of applications that are in scope for the security assessment.	~~The Offeror must perform Baseline Security Risk and Vulnerability Assessments on infrastructure only.~~ ~~Security at OS level is performed by the Commonwealth. Commonwealth~~
135.	exhibit n	Penndot		What form of network redundancy standards are built into the servers?	Redundancy is dependent on business requirements. IES ERP network within the DPH is fully redundant.
136.	General	All	All	Other than the "On-Demand" optional services for Database support and application load testing, please confirm that there are no other application services (like application design, application development, application performance, and or application maintenance) within the scope of this RFP.	Items within the scope of this procurement is limited to managed infrastructure services, database management/design services, Software as a Service, and technical personnel that are related to the other services.
137.	General			Will the Commonwealth provide a financial base case of current spending?	No – the Commonwealth will not provide the current budget or spend on the services included within this procurement.
138.	General	General	General	Please clarify if the Commonwealth will own the Data Powerhouse assets at the end of the Unisys contract or if Unisys will own the assets.	The assets will not be transferred to the new contractor. Most Data Powerhouse equipment is provided as a service. The Commonwealth has title (or lease) to very little of the equipment within the Data Powerhouse.
139.	General	All	All	Who is responsible for debugging and troubleshooting 3rd party software products (including Microsoft O/S products) and Commonwealth application software, the Commonwealth or the Service Provider? If it is the Service Provider, who is financially responsible for this same work?	The Commonwealth is procuring managed services within this RFP. Therefore, the Offeror is responsible for the Hardware, network, and Operating System for all services. Troubleshooting of all Offeror provided infrastructure is the responsibilities of the Offeror (including O/S in all cases). However, software and applications provided by the Commonwealth are the Commonwealth's responsibility to troubleshoot.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
140.	General	General	General	Please confirm who will be responsible for directory services (AD, LDAP and NDS, etc.)?	The Commonwealth is responsible for the listed services.
141.	General	N/A	N/A	Is there a lab environment existing today to test applications before deployment?	There is no specific lab environment. Each agency / application may have a "Lab" established for their use.
142.	General	General	N/A	Is it permissible for Bidders to submit documents not available in Microsoft Office format in Adobe PDF format only (e.g., audited financial statements, insurance documentation, etc.)?	Yes.
143.	General Information	Exhibit B.1	1	What special consideration, if any, is being given to how geospatial services, content, data and applications are managed as a part of the project?	The Commonwealth hosts these services within the infrastructure listed. The data and applications are managed by the Commonwealth and are not within the scope of this procurement.
144.	Request for Proposal			Who is allowed to use co-location services? Exactly what services are to be provided to those co-locating?	Any Commonwealth agency is allowed to use co-location services. There is existing infrastructure owned by the Commonwealth that may remain in co-location until the infrastructure is to be refreshed. The Commonwealth owned infrastructure is required to be retired and the applications/software utilizing that infrastructure it to be moved to a managed service. The Commonwealth has a need to provide co-location services to 3rd parties as part of the services provided to/from the Commonwealth. This service will remain within the co-location service. The Commonwealth is to provide no new infrastructure into co-location services. Specific services are detailed within the RFP and include physical separation and security, cabinet space, network, cooling, and electrical power.
145.	Request for Proposal			For local Commonwealth access, will co-location facilities need to be located in the Harrisburg, PA area or can they be available anywhere in the continental USA?	Co-location can be located in other datacenters as long as the security of those datacenters meets the Commonwealth's security policies.
146.	Request for Proposal	N/A	N/A	Please confirm that the Commonwealth is looking for a prime service provider to provide all the requested services and that it is unacceptable to submit a partial response or a partial response that selectively picks favorable services and/or resource unit pricing.	Confirmed. It is unacceptable to submit a partial response.
147.	Request for Proposal	Part III III-4	24-25	Will the respondents be required to guarantee their PUE performance claims with a guarantor acceptable to the Commonwealth?	No.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
148.	Request for Proposal	Part III III-4	24-25	Will those respondents providing an energy performance guarantee have their financial offering adjusted to reflect the real costs of better or poorer energy performance?	No.
149.	Request for Proposal	Part I I-23	7	If substantial savings can be offered by the respondent with a full 10 year commitment from the Commonwealth in lieu of the 7 year commitment with an option to extend to 10 years specified in the RFP, would the Commonwealth be able to accept a 10 year commitment as an alternative offering?	No.
150.	Request for Proposal			Does the Service Provider have any responsibility for hiring displaced Commonwealth staff as a result of this RFP?	No. There is no requirement for the Offeror to hire displaced Commonwealth staff.
151.	Request for Proposal			What if the Commonwealth is unable, for any reason, to fully execute a contract by July 1, 2013? That allows less than 18 months for due diligence and for a vendor to successfully complete the EDC and DPH transitions. Will the Milestone Due Dates and Milestone Credits reflected in Schedule D be adjusted?	Objections to the terms and conditions set forth in Appendix A may be made according to Part II-8 of the RFP.
152.	Request for Proposal			What if through the due diligence process there are changes to scope or mission? Will the Commonwealth allow re-pricing at that time to recognize these changes and adjust the timelines associated with Schedule D?	Refer to Section 27 (Change Control) of Appendix A.
153.	Request for Proposal			Given the size of penalties for missed transition dates, who mediates disputes where delays are caused by the Commonwealth?	Refer to Section 34 (Contract Controversies) of Appendix A.
154.	Request for Proposal	Part III III-4	24-25	Will the Commonwealth add to the selection criteria favorable consideration for locating the data centers in areas which the Commonwealth has identified as economically distressed and in which the Commonwealth has invested millions of tax dollars? If so, how heavily will this be weighted?	The Commonwealth does not disclose detailed evaluation criteria. Offerors should propose their best solution for the Commonwealth to evaluate.
155.	Request for Proposal	Part III III-4	24-25	Will the Commonwealth add to the selection criteria favorable consideration for locating the data centers in facilities in areas which the Commonwealth has invested millions of tax dollars in those specific facilities, thereby securing a return on their investment and securing employment in those facilities in areas they have identified as economically distressed and in which they have invested? If so, how heavily will this be weighted?	The Commonwealth does not disclose detailed evaluation criteria. Offerors should propose their best solution for the Commonwealth to evaluate.
156.	Request for Proposal	Part III III-4	24-25	Will weight be given in the evaluation for energy performance guarantees? If so, how will this be evaluated?	The Commonwealth does not disclose detailed evaluation criteria. Offerors should propose their best solution for the Commonwealth to evaluate.

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
157.	Request for Proposal	Part I I-23	7	The current timing of the transition of services subsequent to the signing of the contract does not allow for the construction of new, highly efficient data centers in which to house the equipment for the provided services. Knowing that the infrastructure and energy costs in a data center account for 60% or more of the overall expense in a data center, and knowing that locating in older, less efficient data centers will ultimately cost the Commonwealth millions of additional dollars in operating expense (as much as $2,300,000 per year or more, for a total of over $16,000,000 over the 7 year life of the contract), will the Commonwealth allow for additional time in the transition of services to enable the successful vendor to build and commission a state of the art facility within the Commonwealth to house the equipment and realize millions of dollars in annual savings to the Commonwealth? If not, why not?	No. Proposals must meet the requirements of the RFP. An Offeror may propose to utilize a new facility at the start of the contract or at a later time during the term of the contract as long as all of the contract requirements are met.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
1.	Request for Proposal			Can a Service Provider use or hire redundant or excess Commonwealth staff as part of their proposal? To lower overall costs, can a Service Provider make assumptions around work that the Service Provider would assume to be the responsibility of the Commonwealth?	At this juncture the Commonwealth cannot assess the level of impact this procurement may have on existing Commonwealth IT staff. Should an impact ultimately be realized, he Commonwealth expects the Offeror to invite those impacted to apply for job opportunities, grant them interviews and provide them due consideration. No. Offerors should ask questions prior to the proposal due date to eliminate the need to make assumptions.
2.	Request for Proposal			Can a vendor use any of the existing Commonwealth data centers (beyond the EDC) to host some of the applications within scope, especially if there is a financial benefit to the Commonwealth to do so? If allowed, what sites would be available?	No. The only existing location to remain as a hosting site for applications is the EDC. All others will be repurposed.
3.	Request for Proposal			Given the Commonwealth will be providing the fiber link between the vendor data center and their network are SLAs waived if the link has any performance issues that impact categories of SLAs mandated in the RFP?	The Offeror is to provide the data link between the Commonwealth and the Offeror's datacenters. The SLAs apply.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
4.	Request for Proposal			If a vendor's data center or cloud offering is shared with other non-Commonwealth clients, what physical changes will be required to the facility, if any, to separate the Commonwealth's computing assets from those of other clients? If needed to facilitate an existing public cloud offering, is the Commonwealth willing to sign the public cloud Offerors terms and conditions?	The requirements have been provided within the RFP, including the CJIS, CHRIA, and ITB references. No. See Part II-8 of the RFP.
5.	Request for Proposal Schedule I Offeror Pricing Forms	I-5 Type of Contract Descriptions and Instructions		RFP states: "It is proposed that if the Issuing Office enters into a contract as a result of this RFP, it will be a firm, fixed price contract containing the Contract Terms and Conditions as shown in Appendix A." However, Schedule I states on Descriptions and Instructions tab: "e.) Payment for services under this contract are unit-based. The total units (volume metrics) listed are for informational purposes only and will not be binding on the Commonwealth." Could the Commonwealth clarify whether this will eventually be a fixed annual price committed contract? Are unit rates and volume metrics non-binding only for this first round of the RFP? Will all (or a portion) of the final contract be unit rate based with committed volumes?	The unit prices entered by Offerors on Schedule I will become fixed prices. The total units (volume metrics) in Schedule I are not fixed and are for evaluation purposes only and will not be binding on the Commonwealth. The Commonwealth intends to pay a fixed cost per unit with the units being determined on a consumption-based model.
6.	Request for Proposal			Should the fiber connection be delayed or any other required act by the Commonwealth, what impact does that have on the December 31, 2014 deadline including the $50M penalty?	These would be handled on a case-by-case basis. If the delay is solely caused by the Commonwealth, the Offeror will not be responsible for failing to meet a Milestone. The Fiber Connection is the responsibility of the Offeror to deliver to the Commonwealth within the Milestone due date.
7.	Request for Proposal	I-5	1	The request for a firm fixed price contract appears to conflict with the problem statements goal to provide services on a consumption-based model. Please clarify.	The unit prices entered by Offerors on Schedule I will become fixed prices. The total units (volume metrics) in Schedule I are not fixed and are for evaluation purposes only and will not be binding on the Commonwealth. The Commonwealth intends to pay a fixed cost per unit with the units being determined on a consumption-based model.
8.	Request for Proposal	I-30, B	13	For the requested COSTARS form, please provide direction for how to note that a bidder has already paid (or will continue to pay) the COSTARS Administrative Fees.	The COSTARS administrative fee is paid on a per contract basis. To participate in the COSTARS program, the Offeror must pay the administrative fee for each contract.
9.	Request for Proposal	II-6	19	In the absence of visibility into Commonwealth staffing numbers by role, please provide the number of Commonwealth personnel to be trained?	Offerors must describe their training approach and methodologies. The number of staff to be trained will be dependent on the proposed methods.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
10.	Request for Proposal	II-8	20	It appears there is conflict between the first and last paragraphs of this section. The first provides an opportunity for the Offeror to identify which of the T&C's in Appendix A they would like to negotiate and which they would like to add to the standard T&C's, whereas the last paragraph states that any proposal that is conditioned on the negotiation of the T&C's (Appendix A) will be rejected. Can you please clarify?	There is no conflict between the paragraphs. An Offeror may identify which, if any, of the terms and conditions contained in Appendix A it would like to negotiate and what additional terms and conditions the Offeror would like to add to the contract terms and conditions. The Commonwealth may, in its sole discretion, accept or reject any of the requested changes. Regardless of any objections set out in its proposal, the Offeror must submit its proposal, including the cost proposal, on the basis of the terms and conditions set out in Appendix A. The Issuing Office will reject any proposal that is conditioned on the negotiation of the terms and conditions set out in Appendix A.
11.	Request for Proposal	Sec. II-8	Page 20	RFP Sec. II-8 states that "The Offeror will identify which, if any, of the terms and conditions (contained in Appendix A) it would like to negotiate and what additional terms and conditions the Offeror would like to add to the standard contract terms and conditions… The Offeror shall not request changes to the other provisions of the RFP, nor shall the Offeror request to completely substitute its own terms and conditions for Appendix A." Given that Appendix A incorporates numerous Schedules of a contractual nature (examples: Schedule D – Transition Milestones; Schedules J1-J3 – Service Level Management), would the Commonwealth please confirm that vendors are authorized to request changes in connection with the Schedules as well?	Offerors may request changes to the Schedules attached to Appendix A in accordance with Part II-8 of the RFP. The Issuing Office will, however, reject any proposal that is conditioned on the negotiation of the terms and conditions set out in Appendix A and its Schedules.
12.	Request for Proposal	II-10 II-8	22 20	It is stated here that "Offerors should not include any assumptions in their cost submittals." Can assumptions be included according to section Part II-8 Objections and Additions to Contract Terms and Conditions of this same document?	No. Offerors should ask questions prior to the proposal due date to eliminate the need to make assumptions. Part II-8 refers to objections and additions to Appendix A.
13.	Request for Proposal	III-4	24	The RFP provides the lists of scoring criteria that will be used to evaluate and award technical proposal points. The Commonwealth has not listed the Service Provider's proposed Work Plan as a section to be scored in their criteria. Is this an oversight?	The Offeror's proposed Work Plan will be evaluated as part of the criteria listed in the RFP.
14.	Request for Proposal	IV-1	29	Is there an actual requirement to replace "the existing DPH" datacenter or can it be used as part of the proposed solution?	The existing DPH may not be used as part of a proposed solution.
15.	Request for Proposal	I-12	Page 33	Since the Commonwealth requires that Vendors submit their response in Microsoft Word format, is it acceptable to include unsigned versions of the documents/forms on the CD copies?	Signed MSWord documents are preferred. If unsigned MSWord documents are submitted, the Offeror must also submit signed PDF versions.
16.	Request for Proposal	1-12 and II	Pages 3 and 17	RFP states: "Offerors shall submit two (2) complete and exact copies of the entire proposal (Technical, Cost and SDB submittals, along with all requested documents) on CD-ROM or Flash drive…" and "three separately sealed submittals." Should Offerors seal 2 requested CD-ROMs or Flash Drives in a separate package as well? Or should Offerors include 2 electronic copies of each submittal sealed with the corresponding hard copies?	Offers should submit the two (2) complete exact copies of their entire proposal on CD-ROM or Flash Drive in a separately sealed package.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
17.	Request for Proposal Part 1/ Appendix A/	I-23/ Appendix A/Schedule D	1 -1(d)/pg 1	The intro to Schedule D - Transition Milestones, implies billing would occur after milestone completion. However, no transition can begin until the Effective date. RFP I-23 states "the Contract will commence on the Effective Date and will end in seven (7) years." Where is there a transition period if it isn't prior to Effective date? Is it expected that transition and steady state start at the same time?	The transition period cannot start before the Effective Date of the contract. No, it is not expected that transition and steady state start at the same time. The Commonwealth anticipates the transition period will occur before steady state and be part of the seven year contract term.
18.	Request for Proposal Parts I-IVIV	III-4	Page 24	For the Technical evaluation criteria, what is the Commonwealth's established value(s) for each of the five (5) evaluation factors listed: 1. Proposed Facilities 2. Offeror Qualification 3. Personnel Qualifications 4. Soundness of Approach 5. Understanding the Problem What is the value for each of the evaluation factors? Please define the percentage of points for each category?	The Commonwealth does not disclose the value of each evaluation factor.
19.	Schedule	3.2.1.7	57	Is there a master list of CI's and their associated definitions that the state requires to be populated into the CMDB?	No.
20.	Schedule D	All M		In the event a critical Milestone is missed due to a non Offeror delay (State or Agency induced), there could be additional cost incurred by the Offeror as well as missed Milestone penalties and a potential impact to the Transition plan. What would be the proper remediation process between the Commonwealth and the Offeror?	Refer to Section 27 (Change Control) and Section 34 (Contract Controversies) of Appendix A.
21.	Schedule D	M-4	2	Does the Transition Milestone of Due Diligence shown in Schedule D imply that there will be a procedure for adjusting the price of the contract following any discovery?	No.
22.	Schedule F Schedule I			Is the Fully Managed price expected to include hardware refresh?	Yes.
23.	Schedule F			Is there a firm limit placed on the amount of Co-location services to be provided? What is to stop the agencies from using only Co-location?	1. Yes, per Commonwealth policy, co-location is to be used only for 3rd party equipment. 2. Commonwealth policy will dictate the amount and use of Limited Co-Lo Services.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
24.	Schedule F			No middleware support requirements are set forth in the SOW. There is no middleware within the scope of this RFP?	The Commonwealth does not consider the management of middleware different than application management. The Commonwealth requires middleware support to be part of the service catalog offerings.
25.	Schedule F Schedule I			The SOW requires Capacity on Demand Services for I Series, P Series and Mainframe (IBM and Unisys), yet there are no Volumetrics in Schedule I. Are these services still required?	Yes. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. Actual volumes will vary.
26.	Schedule F Schedule I			There appear to be differences in server support definitions between the SOW and Schedule I. Schedule I sets forth Fully Managed, Managed Only and Limited Co-Lo. The SOW describes Managed Hosting Services for specific scenarios, such as Windows Support, and Co-location Service Options 1, 2 and 3. Could the Commonwealth please reconcile the two schedules?	The Commonwealth is procuring “Fully Managed”, “Managed Only”, and “Limited Co-Lo” for many scenarios and several technologies. Schedule F (SOW) defines the technologies and scenarios. Schedule I (Offeror Pricing Forms) includes a sample of possible scenarios and will be used for the cost evaluation.
27.	Schedule F Schedule K			What is the contract start date mentioned in the SOW? Is it the same as the Effective Date set forth in Schedule K?	The Effective Date is defined in Appendix A, Paragraph 1. All references to Effective Date and Contract Start Date have that meaning.
28.	Schedule F			Will affected employees of the Commonwealth be made available to the Offeror for hiring? If displaced, does the incumbent supplier have an obligation to make affected employees available for hiring?	At this juncture the Commonwealth cannot assess the level of impact this procurement may have on existing Commonwealth IT staff. Should an impact ultimately be realized, there is no requirement for the Offeror to hire displaced Commonwealth staff. The Commonwealth does expect the Offeror to invite those impacted to apply for job opportunities, grant them interviews and provide them due consideration. (Please note this answer replaces the answer provided for question 150 of Round 1 Part 1 posting.) The Commonwealth has no knowledge of any restrictions on employees of the incumbent contractor that may be displaced.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
29.	Schedule F	1, Offeror Guidelines	Page 4	Several sections in Schedule F contain tables/matrices with a placeholder for Offeror's response in the last row/cell. a. For ease review and evaluation, is it permissible that Offerors provide their response to each requirement immediately following the requirement? b. To accommodate and ease the use of graphics and tables in Offerors response, are Offerors allowed to provide their response not within a table cell, but outside of the table, as long as the RFP table or table row precede the response?	a. Yes B. Yes, the Offeror must provide the requirement reference number as part of their response.
30.	Schedule F	Requirements #4	14	The Request for Proposal requires the data center proposed to have 99.99% availability over the 6 months prior to December 2011. The award and transition will occur in approximately June of 2013. This creates a platform that is a minimum of 2 years old. This requirement eliminates the opportunity to transition to efficient infrastructure. Will the Commonwealth eliminate this time requirement in order to avail itself of newer, more efficient infrastructure?	The Commonwealth adjusts this requirement to: The Request for Proposal requires the data center proposed to have 99.99% availability over the 6 months prior to December 2012. The Commonwealth is procuring managed computing services not a datacenter. Therefore the Commonwealth is not dictating the age or efficiency of the Offeror's infrastructure as long as the Commonwealth's service requirement and SLA's are met.
31.	Schedule F	#6	14	The schedule states, "Each Data Center will have the capability to provide DR for the other, for the identified critical applications." What level of capability must be included at each data center?	The level of capability will be determined by application and ordered with the desired DR service capability. For each application with DR, there must be another Datacenter with the infrastructure to support the DR service.
32.	Schedule F	3.2.1.1.1	27	Does the Commonwealth have a current Chargeback backup implementation? If so, what is the product?	Currently the Commonwealth uses several chargeback processes. The intent of this procurement is to centralize these into a single product. The current methods use the Microsoft Excel, paper, and the Commonwealth's ESMS system.
33.	Schedule F	3.2.1.1.1	Page 27	How many agencies require chargeback invoices?	All Commonwealth agencies using the services must receive an invoice.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
34.□	Schedule F	3.2.1.1.1	Page 27	Please describe the level of granularity required for chargeback capability.	Each invoice item must provide the following: •□ Agency name •□ Service Name •□ Service Identifier (i.e. Product number) •□ Unit Price •□ Quantity •□ GL Account Number (7 digits) •□ Department Number (4 alphanumeric characters) •□ Reporting Level (4 digits) •□ Sub-account number (4 digits) •□ SAP Fund number (10 digits) •□ Cost Center number (10 Digits) •□ Percent Allocation (percentage) *(the percent allocation is used if an invoice item is paid across differing Cost Centers.)*
35.□	Schedule F	3.2.1.5.1	52	An estimated 36 month usable life is defined to support a technology refresh. Many data center technologies, such as Storage and Network hardware, have a longer typical life cycle than 36 months. Should the Offeror limit all components to the 36 months or manufacturer's service life?	The Offeror should use its best judgment on the service life of its infrastructure. The Commonwealth is purchasing services that have associated SLA's and the selected Offeror must provide the services within those SLAs.
36.□	Schedule F	3.2.1.5.1 Requirement 1	52	What is the frequency in which the service catalog is required to be refreshed? (i.e. annually, semi-annually, etc?)	The Service Catalog (the total list of services being offered to the Commonwealth) should always remain current and should be refreshed with every change.
37.□	Schedule F	2.3.1	8	In the event a Commonwealth agency doesn't receive Offeror DR services, does their application still need to be replicated between datacenters? Page reference: "The Offeror is expected to implement a multi DR solution to limit the impact of any disruptive event at any datacenter location. This requirement is targeted for all systems that are currently covered by a DR solution."	No.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
38.	Schedule F	2.3.1	8	Will the Commonwealth allow multiple connections to the Internet including those at EDC? Will the EDC connections to the Internet be decommissioned?	Yes, multiple connections are desired. No the current internet connection will not be disconnected.
39.	Schedule F -	3.3.2.2 & 3.2.2.5 & 3.2.1.1.2 & 3.2.3.1	152-153, 76-78, 30 & 87	We understand that the Commonwealth has EMC-RSA Archer tool licenses managing security compliance information. Can the Offeror leverage the Commonwealth's RSA Archer licenses and existing infrastructure to help track, monitor and maintain the datacenter security compliance?	Commonwealth does have the EMC-RSA Archer tool licenses; however, the vendor must have its own instance that has the ability to connect to or feed into the enterprise system, as needed.
40.	Schedule F	3.2.4.1	94	Currently, EDC provides application support in Managed Services. Are these services in scope of Offeror's responsibility?	Yes.
41.	Schedule F	3.2.4.1	94	Is the Offeror expected to provide hardware load balancing capabilities for the web applications?	Yes.
42.	Schedule F	3.2.1.1.2-2	30	As this relates to Transition, will design approval be needed for each of the 2000+ applications that need to be migrated to a new datacenter? How long will the Commonwealth need to provide such approval?	Yes, design approval is required. The time needed to approve these designs will be based on the complexity of the transition. The approval timeframes will be established as part of the Transition Plan.
43.	Schedule F	3.2.1.1.2	30	In many cases, the Commonwealth RFPs for application development projects request proposers to specify computing infrastructure requirements. How will the Commonwealth insure that future procurements for development services align to the datacenter architecture requested in this RFP?	This is an internal Commonwealth management issue and will be resolved internally.
44.	Schedule F	3.2.1.2	39	Bullet number five states that an incident report must be completed within two days of the incident and the RCA within five days of the incident. What if the incident remains unresolved after two days? Would it be acceptable to submit an incident report within two days of the incident resolution, and the RCA within five days of incident resolution?	The referenced reports must be delivered within the stated interval, and for those that are not resolved, the report must contain an action plan that is to be followed until the situation is resolved to the Commonwealth's satisfaction.
45.	Schedule F	3.2.1.2	39	What is the definition of a "major outage"?	Each service may have a unique definition but the Commonwealth views a major outage in general, as an outage where all or a substantial portion of a service is not functionally usable.
46.	Schedule F	3.2.2.2	64	Does the Commonwealth currently have a way to measure established performance baselines of its applications prior to transition?	The Commonwealth is determining these measurements at this time and will provide the measurements to the selected Offeror as part of transition planning.
47.	Schedule F	3.2.2.2-6	66	As it relates Acceptance Test Plans – Is the Commonwealth developing and benchmarking existing applications for comparison purposes and to insure that such testing works in the current environment?	The Commonwealth is determining these measurements at this time and will be provided to the selected Offeror as part of transition planning.
48.	Schedule F	3.1.2	16	Please confirm that the Offeror can procure telecomm circuits from their vendor of choice if it provides the greatest economical value to the Commonwealth.	Confirmed. T he Offeror can procure telecom services from a company of the Offeror's choice.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
49.	Schedule F	3.1.2	17	Does the provisioning of private carrier network connections between datacenters satisfy the requirement for "secure connections" Is there a requirement to encrypt all network traffic between datacenters even if data is traversing over private WAN connections?	Yes. A private carrier network connection does satisfy the requirement for a secure connection. No. Not all data must be encrypted. The Offeror must follow the policies and requirements set forth by the Commonwealth relating to data security.
50.	Schedule F	3.3.2.2	153-154	Are your requirements for a security plan met by NIST 800-18's requirements for a system security plan with addendums for Commonwealth additional requirements; along with security activities defined as part of the overall project plan we develop?	Yes.
51.	Schedule F	3.3.2.2	152-153	Are your specific training requirements met by NIST SPs 800-16 and 800-50?	Yes.
52.	Schedule F	3.3.2.2	152	Requirement 1 references a penetration test. Do you conduct the penetration test in a hard or soft manner using non-operational data?	Both as appropriate.
53.	Schedule F	3.3.2 Transition Planning / Governance	142-145	Which agencies can the Offeror transition before Month 30, so that all agencies don't have to be transitioned in parallel? Are there any limitations to transitioning any agencies before Month 30?	The Commonwealth requires all transitions to be completed no later than the end of Month 30. There is no requirement that all transitions occur during Month 30. Offeror is to provide a proposed transition schedule to meet the requirement.
54.	Schedule F	3.3.2	144	While it is clear that DPH operations support will be assumed by the Offeror once the workloads are successfully moved to the new provider's data center environment, it is unclear within the agency data centers at what point that the Offeror should plan to provide operational support for the agency data centers. Should the Offeror provide support starting on day one of the contract in the agency data centers or at a time when the systems are transition to the new data center?	The Agencies will maintain operational support of their datacenters until the applications are transitioned to the Offeror's datacenters.
55.	Schedule F	3.2.1.3	42	(4) Refer: "Establish scheduled maintenance periods, and communicate the scheduled outages. Create a notification process for maintenance, emergency, and unplanned outages. " Confirm that the Offeror must comply with Enterprise Scheduled Maintenance Windows per ITB-NET015 (Enterprise Network Maintenance Scheduling) for maintenances affecting multiple agencies.	The selected Offeror must comply with Enterprise scheduled Maintenance Windows per ITB-NET015. The selected Offeror will be required to comply with all ITBs must be followed.
56.	Schedule F	2.3.3	9	What are the requirements for facilities management at the five (5) COPA datacenters? Should vendors assume that DGS/Commonwealth continues to provide support until transition is completed?	Yes, the Commonwealth will continue to maintain and manage the Commonwealth datacenters until the transitions are completed. With the exception of the EDC, the Offeror will have no responsibilities for those datacenters.
57.	Schedule F	3.2.1.4 Service Desk	44	In paragraph 4 it states that Offeror must provide electronic connection to all of the Agency Help Desks. Please provide a table showing agencies that are not connected to the Enterprise system, which also shows what help desk systems these Agencies use.	The Offeror is only responsible to connect to the OA's Enterprise Remedy.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
58.	Schedule F	3.2.1.4	44	Who will be entitled to contact the Service Desk?	All Commonwealth Helpdesks, all Commonwealth Application Owners, and all Commonwealth IT Management (both OA and the Agencies) are entitled to contract the Offeror's Service Desk. Commonwealth End Users are not to contract the Offeror's helpdesk.
59.	Schedule F	3.2.1.4	45	In requirement #3 on page 45 please provide clarification: It is stated again that integration with the Enterprise Remedy system and other Agency Help Desks as required. But the last sentence states that integration with other agency ITSM systems is NOT required. Please clarify. If it is required, this section describes a requirement to develop a process and electronic connection to "these agency Help Desks". Other than the agencies using the Commonwealth's Enterprise Remedy System, please provide a list of all other agencies that have a requirement for an electronic connection and please provide the details on the type and brand of help desk software being used by those agencies.	The Commonwealth has several implementation of BMC's Remedy system. The Offeror will interface only with the Enterprise Remedy managed by the Office of Administration. All other Commonwealth Remedy instances will interface with the Enterprise Remedy to escalate incidents and requests to the Offeror.
60.	Schedule F	2.3.4	10	For PII have you conducted a Privacy Threshold Analysis (PTA) or Privacy Impact Assessment (PIA) and is it acceptable to follow Federal guidelines such as FISMA to address this?	1) No. 2) Yes.
61.	Schedule F	2.3.4(2)	11	To what categories of service do DBFW services apply?	DBFW services apply to databases that are considered high risk by the Commonwealth's application owners and CISO.
62.	Schedule F	3.2.4.4	112	Item number three references the Service Management Manual. Is this the same as the Commonwealth Computing Procedures Manual?	Yes. "Service Management Manual" should read "Commonwealth Computing Procedure Manual."
63.	Schedule F	3.2.4	94	Currently, the Commonwealth has Hyper-v for this section in Managed Hosting. Is it a requirement for Managed Hosting to support Hyper-V, or can the Offeror move the application to a different Hypervisor? Throughout this RFP, it is implied the Offeror has discretion on the Architecture. Is Hyper-V a requirement for MH and/or Public/Private Cloud?	Hyper-V is not a requirement for MH and/or Public/Private Cloud. The services provided by the Offeror must be able, however, to support the applications that currently operate on Hyper-V.
64.	Schedule F Exhibit J.2	(All), 3.2.4&5	(All), 133	Regarding IaaS and Managed Hosting, there is no mention of certification requirements, nor specific references in Exhibit J. How import are the following certification for the cloud provider (please rank Critical, Important, Optional: SSAE 16 Audited for SOC1, SOC2, SOC3, PCI Compliant Level 1 Service Provider underlying infrastructure and facilities, and IS0 27001,Information Security Management Systems Certification and Safe Harbor)	Offerors must meet the certification requirements set forth in the RFP.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
65.□	Schedule F	3.2.2.5 Security Management	76	For the penetration testing, how many IP addresses are in scope? What types of penetration testing (social engineering, wireless assessment, application, etc.) does the Commonwealth seek? For vulnerability analyses, is that considered the same as vulnerability scanning by the Commonwealth?	All of the Commonwealth's IP addresses are in scope. All types. No.
66.□	Schedule F	3.2.2.5	76	Item 1 references a security management plan. Are your requirements for this met by NIST 800-18's requirements for a system security plan with addendums for Commonwealth additional requirements; along with security activities defined as part of the overall project plan we develop?	Yes.
67.□	Schedule F	3.2.2.5-6	78	What form of second factor access control exists today in the EDC?	Client certificates/tokens.
68.□	Schedule F -	3.3.2.2 & 3.2.2.5	152 & 77	We understand that the Commonwealth has licenses for security vulnerability assessment (both application and infrastructure) and secure code review tools. A. Can the Offeror leverage the Commonwealth licenses for security vulnerability assessment and secure code review tools? B. If yes, please provide the list of their licensed security tools for: a. Application security vulnerability testing. b. Infrastructure security vulnerability testing. c. Secure code review.	a.□ No b.□ N/A
69.□	Schedule F	3.2.5 Capacity on Demand Services	133-141	a.□ Does CoPA have difficulty managing peaks and valleys in demand and workload in their test / dev environments? b.□ Is MS Exchange as a service considered in or out of scope? c.□ Can GR resources be utilized for back office functions in our delivery model? d.□ Is CoPA willing to relinquish architectural control in a capacity on demand environment? e.□ Is the target for Image Activation in a capacity on demand environment under 24 hours? f.□ Is CoPA willing to sign up for a minimum baseline? g.□ Is CoPA flexible to change its standardized service request process? h.□ Is CoPA comfortable with the Agencies documenting requirements, but the Offeror defining the technology and service solution against those requirements to optimize across the Data Center? i.□ Is CoPA willing to relinquish control over outage windows and when/ how images are patched for their capacity on demand?	a.□ Yes. ~~b.□ In scope.~~ c.□ Please define "GR resources." d.□ No. The Offeror must propose an architecture and the Commonwealth then will approve or disapprove before implementation. e.□ Yes, the Commonwealth is, however, always looking for the ability to deliver services in a shorter interval. f.□ No. g.□ Yes. h.□ No. The Offeror must propose an architecture and the Commonwealth then will approve or disapprove before implementation. i.□ No
70.□	Schedule F	3.2.1.1.6	36	This section refers to performing a customer satisfaction survey on a quarterly basis. How does the survey differ from the annual survey discussed in appendix A section 10 (c)?	Section 3.2.1.1.6 of Schedule F is specific to the Service Desk and the Offeror must perform quarterly quality surveys of the Service Desk. Appendix A section 10 (c) refers to the entire scope of Service provided by the Offeror.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
71.	Schedule F	3.2.1.6	56	Item number one indicates that the Offeror must assign a minimum of six dedicated account managers. Key Personnel noted in schedule G that five agency account managers are required. Which is correct?	Five are required as a minimum, but the Offeror may provide as many as are needed.
72.	Schedule F	3.2.2.6 Requirement 6	82	Where an agency will have additional agency-based monitoring tools, will the agency/Commonwealth and vendor mutually agree on a joint responsibility matrix prior to the service addition?	Monitoring tools does not mean that the Commonwealth will manage (and troubleshoot) any infrastructure under the Offeror's control. It only means that the Commonwealth wants visibility into that infrastructure. With that in mind, a responsibility matrix should be developed.
73.	Schedule F	3.2.4.6	123	Item 2 references security training. Are your specific requirements met by NIST SPs 800-16 and 800-50?	Yes.
74.	Schedule F	3.2.4.8	131	Should it be assumed that Co-location Service Option 1 will only be used by current customers of the EDC, and that availability of these services will terminate after all work is migrated to the managed service offering?	No. The Commonwealth expects to have requirements for co-location into the foreseeable future.
75.	Schedule F	2.1, 2.3	6,7	Section 2.1 indicates "*The Offeror must utilize the EDC as one of its datacenters and propose a minimum of one additional datacenter to meet the 2+ architecture requirement"* yet in Section 2.3, it indicates that *Target Datacenter 2: Architecture* indicates the EDC only needs to be included as operations support. One could interpret these two statements as conflicting. Does the EDC need to be included as part of the overarching technology and data center strategy, or is it only required to do ongoing maintenance of the facility and is optional to be included in the new technology direction?	The selected Offeror must assume operational support of the EDC as part of transition and may use the EDC as it sees fit (within the terms of the RFP) to provide services to the Commonwealth.
76.	Schedule F	2.1	5	Will the Commonwealth be establishing a corresponding architectural oversight team or process?	Yes.
77.	Schedule F	2.1	6	*"Applications hosted in the Offeror's datacenters must meet Quality of Service (QoS) requirements as determined by the Commonwealth agency application owners. "* What are the current QoS Requirements of the Agencies? How can the Commonwealth ensure unreasonable demands are not an Offeror's responsibility?	1) QoS requirements are set on a per application/service basis. 2) The Offeror must include within the transition plan a task to determine a baseline for each application. The governance process will be available to address "unreasonable" demands. Also, refer to Section 27 (Change Control) and Section 34 (Contract Controversies) of Appendix A.
78.	Schedule F	2.1	6	How will the Commonwealth ensure agency compliance with the contracted services and associated schedules? (rationalize)	This is an internal Commonwealth management issue and will be resolved internally.
79.	Schedule F	2.1	6	Please provide a copy of the Quality of Services (QoS) requirements as determined by the Commonwealth application owners.	QOS requirements are set on a per application/service basis. The Offeror must include within the Transition plan a task to determine a baseline for each application.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
80.	Schedule F	2.2	7	Section 2.2 indicates that the Commonwealth has a set of Service Levels proposed? We are unable to locate specific current SLAs that the Commonwealth has today as a baseline, or is requiring as a minimum from the Offeror. Can the Commonwealth elaborate on its baseline requirement?	Schedules J.1, J.2 and J.3 detail the Service Levels required by the Commonwealth.
81.	Schedule F	2.3	7	Do we know what the current levels of service are at all the data centers that are in scope (outside of DPH & EDC)?	No.
82.	Schedule F	3.1	12	Does the Commonwealth have established criteria defined to evaluate new technology offerings? Is it anticipated that new technology offerings will be determined on an enterprise basis instead of an agency basis?	1) The Commonwealth does not have a formalized methodology to evaluate new technology offering. 2) All new technology offerings provided through this procurement will be available to all agencies, even if initially requested by a single agency.
83.	Schedule F	3.1	12	If a study indicates that currently installed capacity is underutilized, will the Commonwealth accept less capacity to reduce costs especially if a physical asset has reached end of service life and will be replaced?	Yes – the Commonwealth wishes to only pay for the service capacity needed and have the ability to increase or decrease as needed.
84.	Schedule F	3.1	13	As far as using outside datacenters to provide additional capacity on demand, other than secure connectivity, are there any other requirements needed for approval?	Yes. The new datacenter must meet all of the requirements of the RFP. If the datacenter Services will be provided by a subcontractor to the Prime, the subcontractor must be approved by the Commonwealth.
85.	Schedule F	3.2	22	The Commonwealth's RFP is heavily guided by ITIL. Please comment on the importance (High, Medium, Low) of the Offeror's datacenter operations (Production and DR) to have their datacenter's services delivery model based on ITIL V3 guidance, and importance of having a majority of ITIL-certified staff.	The Commonwealth does not provide detailed evaluation criteria. The Commonwealth desires all datacenter service delivery models to be based on ITIL V3.
86.	Schedule F	3.3 Transition Services		Are there hardcoded IP addresses within the applications? And if can you provide the list of applications by agency / equipment with hardcoded IP addresses?	There are certain applications that are configured with "hardcoded" IP addresses. This level of detail is considered part of the information that will be provided during transition.
87.	Schedule F	3.3 Transition Services		What provision has OA/OIT made to ensure the cooperation of the agencies with the Offeror during Transition?	These issues will be resolved internally within the Commonwealth.
88.	Schedule F	3.3 Transition Services	141-155	Is there a list of application interactions between agencies that can be provided to the bidders?	No. The Offeror should determine this as a task during Transition Planning.
89.	Schedule F	3.3 Transition Services	141-155	Is there a list of application interactions within agencies that can be provided to the bidders?	No. The Offeror should determine this as a task during Transition Planning.
90.	Schedule F	3.3	Pages 141-152	Where in the proposal should the Offeror provide the draft transition plan?	Schedule M.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
91.	Schedule H	1.5.1	12	Please provide a definition for Authority Levels for changes to the Agreement.	The Commonwealth is requesting Offerors to describe their change control process. The Commonwealth will work with the selected Offeror to define authority levels within the Commonwealth for change requests.
92.	Schedule H	1.1.3	3	Please provide a list to validate agencies by location.	All agency headquarters are located within the city of Harrisburg, PA. All Commonwealth datacenters within scope of this procurement are within metro Harrisburg, PA, with the exception of the three Disaster Recovery Sites that will be consolidated into this procurement.
93.	Schedule I			Are the DASD requirements Raw or Usable?	The Offeror must be capable of providing both options.
94.	Schedule I	N/A	N/A	As the Commonwealth may be aware, GAAP accounting principles guide many organizations. Similarly, the Commonwealth is driven by budget. The lack of committed baselines could and likely will be interpreted by some as no contractually obligated revenue. As this contract is responsible for infrastructure support for several of the most critical applications in the Commonwealth, it is unrealistic to think of a situation where there would be no baselines required. It is requested that the Commonwealth provide committed baselines as it is expecting significant capital investment by the Offerors.	The Commonwealth will not provide a minimum commitment for this procurement.
95.	Schedule I			The Base Units - Volumetrics sets forth no quantity of physical systems for support of AIX. How is that to be handled?	The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all inclusive representation of every service desired by the Commonwealth. Offerors must respond to Schedule I as presented.
96.	Schedule J	5.1	5	Can you please confirm that each Critical and Key Measurement Service Level will be assigned a percentage whereby if a specific Critical Measurement is missed during a month, then the respective percentage assigned to this Critical Measurement will be used to multiply against the total At Risk amount to determine the amount of the credit due to Commonwealth?	That is not correct. The credit due the Commonwealth for a Service Level Default is defined in Schedule J.2 and is either based on the invoice amount for the impacted service or a fixed amount. The total amount of credits is not to exceed the "At Risk Amount."
97.	Schedule J.1	15	11	How do we manage to SLAs when in a test sequence? Do they still apply or are they held pending the completion of the test run?	If the duration of the Test sequence is defined within an approved infrastructure change request, the SLA's would not apply.
98.	Schedule J.1	5.1	5	A Service Level Credit is defined as 100% of the affected month's invoicing for the service that experienced a Service Level Default. According to the Commonwealth's requirements for invoicing, there is no requirement to break down the invoice by specific service being measured by a Service Level Agreement. Without that level of detail, how can the Service Provider determine the amount of the Service Level Credit?	Invoicing must be detailed by the service provided. This level of detail will be used for SLA Credit calculations.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
99.	Schedule J.2	SL22	High Risk Security Patch Updates Timeliness	What is considered a high risk?	Each patch is evaluated by the Commonwealth's security teams and assigned a risk level. The patches are then deployed according to the assigned risk level. Please refer to Commonwealth ITB on Desktop and Server Software Patching Policy ITB-SYM006.
100.	Schedule J.2			Will each agency have its own SLAs or will the SLAs be calculated as a whole for the entire contract?	Each individual order item will have a SLA. SLAs must be tracked on an individual orderable item not the contract as a whole.
101.	Schedule J.2	N/A	1-2	Key Measurements (KM's) are target measurements for non-critical service areas and are not eligible for Performance Credits. If so, why does Schedule J2 list Default Remedy Types for all listed KM's?	The credits defined for Key Measurements are established because the SLA change methodology allows the Commonwealth to convert a Key Measurement into a Critical Measurement. The credit is to provide the Offeror with the expected credit should this occur.
102.	Schedule J.2	SL1-8	Various Application Infrastructure Availability	Could the Commonwealth provide application architecture documentation, so the bidder can assess the capability of the applications to meet the desired Service Levels?	No, Commonwealth service levels are not defined by application.
103.	Schedule J.3			The Service Level references Note 2, however, there is no Note 2 at bottom of the document. Will the Commonwealth please clarify?	~~There should not be a reference to Note 2.~~
104.	Schedule J.3	Metric Exclusion for each SLA		There are multiple references to Note 2, which cannot be found in the document.	~~There should not be a reference to Note 2.~~
105.	Schedule J.3	2	5	"Metric Exclusions" states that "all items defined in Note 2 at the bottom of this Schedule J.3." We cannot find Note 2 in this Schedule?	~~There should not be a reference to Note 2.~~
106.	Schedule K	D.02-54	12	Is the request for a backup audit for UNIX systems similar to D-02.39	Yes, one is for windows and one is for Unix
107.	Schedule K	D-02.59	12	Is the request for a backup audit for Mainframe systems similar to D-02.39	Yes, one is for windows and one is for mainframes.
108.	Schedule K	D-01.04, D-01.05, D-01.06	5-6	Should the reference to "Start Up" read "Effective Date"? If not, please define "Start Up".	Yes, "Start Up" should read "Effective Date."
109.	Section F Exhibit G.7	2.1 Application Narrative	5 2	Please comment on the importance (High, Medium, Low) for data center compliance in Production and Disaster Recovery: Facility Clearance Levels (FCL) at "Top Secret" (especially in relation to the PSP CJIS requirement); NIST 800-53rev3 controls at the "Moderate Impact" level for FISMA compliance; NIST 800-37 and NIST 800-53 at a Moderate level; DIACAP audit at the "MAC III" level.	Offerors must meet all of the requirements set forth in the RFP. The Commonwealth does not provide detailed evaluation criteria.

Addendum 4 – Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
110.	Transition Milestones	Schedule D	1	Will consortiums have the ability to leverage multiple data centers to satisfy the Commonwealth business requirements? i.e. if a company specializes in line of business such as Esri GIS and offers data center capabilities focused on that suite of products and platform can that be included as part of a consortium bid to support GIS services, software, hardware, and platform requirements.	Yes, the Offeror and its consortium of subcontractors are encouraged to leverage their combined infrastructure options to provide the best service at the best price to the Commonwealth.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
1	Schedule F	3.1	12	Please explain the use of the words “like for like” or increased computing capabilities. Please confirm that the Commonwealth is expecting to acquire “like for like” configurations for hardware, software and all technology defined in all of the exhibits. Also please explain how these configurations will be priced and reflected in the Cost tab under “Volumetrics” that appear not to be consistent with the requirements reflected in the exhibits.	"Like-for-like" in this RFP is intended to convey that the services provided by the Offeror must perform at the same level as those being performed today with the Commonwealth's current infrastructure. In some cases, this will require an exact duplication of the infrastructure in place today and in some cases new and more robust architectures will be required The Offeror must determine which configurations require "like-for-like" during transition planning. The configurations and Volumetrics are hypothetical and will be used for cost evaluation only. The pricing will be based on the service catalog provided by the Offeror in Schedule C.
2	Schedule F	3.2.1.5.2	53	Which exhibits provide details regarding Tiered DDR as only Schedule J.1 is referenced.	“DDR” is a typographical error. “DDR” should read “DR” in this section. DR services should be orderable catalog items based on the technology and configuration being offered.
3	Schedule F	3.2.2.2	64	What is the Commonwealth’s definition of “At the direction” and “At its discretion”? During the Transition, Commonwealth participation, especially application support resources will be critical to the program’s success.	”At the direction” indicates that the Offeror must receive Commonwealth approval before transitioning an application. The Commonwealth will assign staff to transition activities per the application owner's “discretion.”
4	Schedule F	3.2.1.4	44	What is the expectation on behalf of the Commonwealth regarding agencies that are not using the Commonwealth's Enterprise Remedy System (ERS)?	Agencies that do not participate in the Commonwealth’s Enterprise Remedy must have the availability to contact the service provider via telephone. Also, the Offeror must accept telephone calls from the Commonwealth for the reporting of incidents in the event the Commonwealth's Remedy system is not available for the caller. When this occurs, the selected Offeror must create an incident ticket that will be updated and sent to the Commonwealth’s Enterprise Remedy for tracking, escalation, SLA, and reporting purposes.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
5	Schedule H	1.1.3	3	Please provide a list to validate agencies by location.	All agency headquarters and datacenters are located within 12 miles of Harrisburg, PA. Please note, however, the Commonwealth has over 3,200 locations that agency personnel occupy.
6	Schedule J.3	1.3.10	9	Please provide the Targeted Applications to be measured via Service Level Agreements. This was not contained in Schedule J.3	All applications will have a Service Level. The Commonwealth will select the service level category (Platinum, Gold, Silver, etc.).
7	Appendix A	17,(b)	25	Key Positions. This section states that all Key Employees shall be dedicated to the Commonwealth account on a full-time basis. This requirement is in conflict with the requirements specified in Schedule G. Please clarify?	All key employees must be dedicated to the Commonwealth account on a full time basis. Complete Schedule G accordingly.
8	Schedule F	3.2.5	133	In a cloud IaaS solution, particularly for Server Capacity, but in general, how important is available APIs to the Commonwealth? Can you rate as Critical, Important, or Optional?	All of the RFP requirements are important to the Commonwealth. The Commonwealth does not disclose detailed evaluation criteria.
9	Request for Proposal			If a vendor's data center or cloud offering is shared with other non-Commonwealth clients, can any of the computer hardware, storage devices or other IT infrastructure be shared with a non-Commonwealth client in order to help reduce costs?	As part of the Transition Process, this will be determined on an application by application basis.
10	Schedule H	1.2.3	4	To ensure that interim procedures align to current, please provide a current Joint Responsibility Matrix (JRM) of Performance Management Procedures on file.	Because the Commonwealth does not operate a majority of the datacenters jointly with a contractor, a Joint Responsibility Matrix is not available to provide.
11	Schedule H	1.2.4	5	To ensure that interim procedures align to current, please provide a current Joint Responsibility Matrix (JRM) for Financial Management Procedures.	Because the Commonwealth does not operate a majority of the datacenters jointly with a contractor, a Joint Responsibility Matrix is not available to provide.
12	Schedule H	1.2.5	5	To ensure that interim procedures align to current, please provide a current Joint Responsibility Matrix (JRM) of Contract Management Procedures.	Because the Commonwealth does not operate a majority of the datacenters jointly with a contractor, a Joint Responsibility Matrix is not available to provide.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
13	General	All	All	What application performance requirements are included in the bid? In other words, other than the requirement to provide "like for like" infrastructure based on the exhibits are there any other performance requirements like benchmarks, etc.? If performance issues are introduced during the migrations of the existing data centers, who will be financially responsible to resolve those issues?	Before migration, the contractor shall work with agencies as part of transition planning to benchmark the applications and the new infrastructure. The Offeror must provide the infrastructure performance desired by the Commonwealth.
14	Schedule F	3.2.1.4	44	What does the acronym CPPM mean in below reference from respective page? It's not identified in Scheduled A (Defined terms). "The Offeror must create and keep current a CPPM that documents the processes, procedures and timelines used to meet the requirements of this contract. The CPPM must provide detailed process descriptions to support the computing needs of the Commonwealth utilizing best practices and be made available (via Offeror's Portal) to all Commonwealth agencies throughout the term of the contract."	CPPM was an incorrect reference. It should be listed as CCPM (Commonwealth Compute Procedure Manual - Schedule H).
15	Schedule F	3.2.5.5		What constitutes "current" software? N, N-1, N-2…?	Current software in this RFP means the software is currently supported by the publisher.
16	Schedule F	2.1	6	High Availability (HA) in the data center design is mentioned multiple times, along with DR. Yet HA is as much of an application design issue as it is a data center/network issue. Are any of the applications today designed for HA and is there a program in place within the Commonwealth to design critical applications for HA? If so, please provide the list of the application programs that are HA enabled?	Currently the Commonwealth has no applications designed for High Availability across multiple datacenters. The Commonwealth desires the infrastructure to readily support HA across datacenters, thus allowing future development for this capability.
17	Schedule F	3.2.1.1.1	27	The requirement for chargeback procedures state that those procedures "will include the ability to map to discrete programs and funding sources identified by agencies with this requirement". Please provide a list of requirements for both a list of those agencies and a list of the discrete programs.	Each invoice item will need to be assigned a specific General Ledger account code for chargeback purposes. This account code will provide the detail required by the Commonwealth.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
18	Schedule J.3	SL01-SL05	5 thru 9	Hours and Days of Measurement for the five levels of service, basic through platinum, are indicated as 7 x 24 x 365. If all service levels required the same of availability is there a need for five service levels or should the hours of availability vary based on the service level being provided?	Each of the five service levels (SL01-SL05) are the same with the exception of the uptime requirement. Please refer to Schedule J.2 for those requirements.
19	Schedule F	3.2.2.4	72	For costing purposes, how many Commonwealth users should Offerors assume will require access to the online DR planning tool?	For purposes of submitting a proposal, Offerors should plan on 10 users requiring access to the DR planning tool. The actual number of users may vary during the contract term.
20	Schedule F	3.1.3 #5		What tiers of DR are required and how are they defined?	For this requirement, the Offeror should provide its approach to establishing tiers that will support the Commonwealth's DR requirements.
21	Schedule J.1	7.1.1	7	If new service levels are determined by the average of previous measurements, would the SLA for a service that has 100% availability for the previous 9 months be established at 100%?	In this specific case, the Service Level would be determined by the Commonwealth and, at the Commonwealth's sole discretion, may be set at 100%.
22	Schedule F	3.2.1.1 #4	24	Does this mean that SLAs beyond those in Schedule J will be created for the contract?	It is possible that SLAs beyond those in Schedule J will be created for the contract.
23	Appendix A	6 (f) Services	6	Does this include maintenance of existing equipment and disposal? If Offeror is responsible for disposal, what are the requirements?	Maintenance of all equipment will be the responsibility of the contractor. Disposal of Commonwealth owned equipment will be the responsibility of the Commonwealth. Disposal of contractor owned equipment will be the responsibility of the contractor.
24	Appendix A	6 (g)	6	If the vendor is proposing a shared facility, will the Commonwealth require a list of current tenants to be used in its evaluation criteria for this proposal? If so, please be aware that in any cases specific client names cannot be shared.	No – the Commonwealth does not require a list of current tenants as part of Offerors' proposals. The Commonwealth reserves the right to request this information during a later stage of the procurement process or during the term of the contract.
25	Schedule K	D-03	16	"Datacenter Technology Roadmap" requires estimated timings and "cost impact to Commonwealth". This implies that the Commonwealth is financially responsible for all technology refreshes. Is that correct?	No, that is not correct. This is a services based procurement and technology refreshes will be the responsibility of the selected Offeror.
26	Schedule F	3.1.2	18	Does the Commonwealth have a list of future application and database requirements that vendors should consider in responding to the requirement for an infrastructure environment that will meet all future data center requirements?	No, the Commonwealth does not have a list of future application and database requirements.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
27	Appendix A	12(b)	14	Will the Commonwealth amend this Request for Proposal to include a requirement that the facilities be located within the Commonwealth of Pennsylvania?	No.
28	Schedule F	Section 2.1 Section 3.2.3(3)	6 85	Would the Commonwealth accept a lower tier rating for some service classes or categories (e.g. providing co-location from a tier 2 facility.)? If so, what are the minimum tiers for those service levels or categories?	No. The Offeror must provide all datacenter services from a Tier 3 equivalent datacenter
29	Appendix A	79	93	The Commonwealth has stated its requirement for fees to increase or decrease dependent on the volume consumed or variation in scope. Without a committed minimum participation or a long-range forecast of the variability of Commonwealth needs, how can a vendor commit to a fixed and ongoing financial participation to a small diverse business that may be providing these services?	~~Offerors must include a numerical percentage which represents the total percentage of the Total Base Term in the Cost Submittal that the Offeror commits to paying to Small Diverse Businesses (SDBs) as subcontractors. Per section IV of the RFP, the selected contractor's commitments to Small Diverse Businesses made at the time of proposal submittal or contract negotiation shall, to the extent so provided in the commitment, be maintained throughout the term of the contract and through any renewal or extension of the contract~~
30	Schedule F	3.3	141	"Initial transition approach of the Commonwealth's mainframe and SAP environments requires that the results be as close to the Commonwealth's current configurations as technically possible". Since the configurations described in the exhibits are not reflected in Schedule I, (Pricing Forms) is the Commonwealth financially responsible for paying for any gaps to ensure that these configurations meet or exceed current configurations?	~~Offerors must provide a catalog of services, including pricing, that includes sufficient detail to allow the Commonwealth to order the desired configuration(s) required to satisfy the need of the application owner. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth.~~
31	Schedule F	3.2.1.8	60	Will Offeror be financially responsible for any Commonwealth-provided software?	Please clarify the question and provide additional detail.
32	Schedule J.3	SL01-SL05		What is the experience or logs for the applications' availability?	Please clarify the question and provide additional detail.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
33	Appendix D Domestic Workforce Utilization Certification	N/A	2	There are different types of Cloud resources that a Provider could recommend. One type is an "unmanaged" environment. In such an environment: 1) those who administer the base resources do not have root access to the virtual machines; 2) once an instance is provisioned, it becomes the sole responsibility of the Cloud consumer or the provider acting on his/her behalf. In the envisioned scenario, administrators of the base resources could be located in countries outside the U.S. and not part of WTO Government Procurement Agreement. Provisioned instances would be managed only by U.S. resources of the Provider. Would this scenario warrant Maximum Consideration by the Commonwealth? Or would a smaller score be awarded?	Please clarify the question and provide additional detail.
34	Schedule F	3.2.1.8	60	Will Offeror be granted permission to use any available Commonwealth ELAs?	Please define ELA and provide more detail concerning the permission being sought.
35	Appendix A	13 (b) (1)	17	Please define requirements for facility upkeep. For example does this include snow removal, janitorial services, etc.?	Please refer to Exhibit D.7 for those details.
36	Schedule F	3.2.3	85	Requirement 1 appears to be for a report only detailing the facility upgrades needed. Once the facility upgrade report is reviewed and approved by the Commonwealth, who is financially responsible for the costs of the facility upgrades? Will the capital improvement fund mentioned on page 18 of Appendix A be used to fund HVAC and power upgrades at the EDC?	Requirement 1 requires a report be provided. It does not require any changes to the building or datacenter. The Capital Improvement fund defined within Appendix A is available to fund certain building projects as detailed in Appendix A. This process requires the contractor to gain approval from the Commonwealth to use the Capital Improvements funds for a project. If approval is denied, the improvement will be the financial responsibility of the contractor.
37	Schedule G	4	6	Should the position of Sales Manager identified in the table be defined in the section 2 or is this not a required position?	Sales Manager is not a position that is considered "Key" for purposes of Schedule G.
38	Schedule F	2.3.3	10	The services framework graphic notes "Exchange as a Service" as a capacity on-demand/additional service offering. This offering is not described anywhere else in schedule F. Please provide requirements and expectations around this service.	~~Schedule F has been amended and reissued to include requirements.~~

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
39	Schedule I	Tab 3	N/A	Month 26 is missing. Please provide a revised version of the price volume template with this month included in the detail and relevant calculations.	Schedule I has been amended and reissued.
40	Schedule J.3	SL01-SL05		The calculations do not align with the definition of availability since the period of comparison is not the available time; instead the formula suggests that all applications are available 24x7 with no downtime for maintenance. Please clarify.	Scheduled and approved downtime will be deducted from the formula. The ITIL Infrastructure Change Management Procedures must be defined and followed.
41	Schedule	3.2.1.5.1	52	The pricing sheet has no place to enter the cost of the technical refresh. Is it the intention of the Commonwealth to include the technical refresh in the monthly RU? Or is Technical refresh to be considered a Project completed on a time and material basis?	Since the selected Offeror is providing a service, any refreshes are the responsibility of the Offeror and should be part of the rate that is being charged for the service.
42	Schedule F	3.1.3	18	What are the responsibilities of the Offerors for remediating or addressing application latency issues that arise by relocations from the current sites? Please provide a list of applications and a description of the latency problem to which each may be subject.	Some of the applications currently communicate through a shared core switch to minimize latency. The Offeror must provide the same level of network optimization, or better, as exists today. The Offeror must assist the Commonwealth with remediation of issues through analysis of network traffic and server performance. The Commonwealth currently is not experiencing any latency issues and is unable to anticipate which applications might experience latency issue post transition.
43	Schedule G	4	7	Should the position of Sales Support Technical Engineer be defined in section 2 or is this not a required position?	The "Sales Support Technical Engineer" position has been removed from Schedule G. Schedule G has been reissued.
44	Schedule I	1.Volumemetrics	Lines 216-217	Having tape capacity of about 1 times disk space does not conform to industry standards of having tape capacity of about 15 times disk space. Is this what the Commonwealth wants?	The 1 times disk space is the minimum acceptable by the Commonwealth. The Offeror must provide sufficient tape capacity to service the Commonwealth and meet the SLAs.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
45	Request for Proposal	III-4,C.1	25	Section C describes "Small Diverse Business (SDB) Participation". Section C.1 states that a business submitting a proposal as a prime contractor must perform "60% of the total contract value" to receive points for this criterion under "any" priority ranking. Does the 60% requirement stated in this section only apply to SDB that are priming this opportunity or does the 60% requirement apply to all primes contractors? If this statement applies to all prime contractors, please confirm that no SDB points will be awarded unless the prime contractor directly performs at least 60% of the total contract value of opportunity.	~~The 60% requirement stated in Part III-4 applies to all prime contractors. No SDB points will be awarded to an Offeror unless the company serving as the prime contractor directly performs at least 60% of the total contract value.~~
46	Schedule F Schedule I			The Baseline Units - Volumetics shown in Schedule I do not increase as would be expected upon completion of Transition at Month 30. Why is that?	The Commonwealth cannot accurately estimate changes to the Volumetrics until a transition plan is finalized. The Volumetrics in Schedule I are estimates and will be used for costing evaluation only.
47	Schedule F	3.2.1.1.5	33	Please provide expectations around volumes expected by Additional Planning Services request type.	The Commonwealth cannot estimate volumes for this requirement.
48	Schedule F	3.3.2.1	149	Requirement # 12, states that "the Offeror must ensure that critical applications are not decoupled from key infrastructure components causing system latency." Please provide all agency application dependencies as well as any multi-agency application requirements to avoid system latency issues.	The Commonwealth considers this a transition activity for the selected Offeror to determine during transition planning.
49	Schedule F	3.2.2.5	76	Please provide details regarding the current status of agency compliance with all laws, regulations, and policies as they pertain to each agency.	The Commonwealth continually reviews it compliance against laws and Commonwealth policies.
50	Appendix A	15 (b)	24	What is the Commonwealth's current disaster recovery planning methodology software?	The Commonwealth currently does not have DR software. This requirement exists to ensure the offeror will support any future DR software selected by the Commonwealth.
51	Appendix A	7 (a)	8	Does the Commonwealth define currency as N or N-1?	The Commonwealth defines currency in this reference as the a level of hardware or software that has not been discontinued by the manufactured.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
52	Schedule F	3.2.5.2		To what systems will this storage be attached? What are the anticipated volumes? What storage in current exhibits will be provided via this mechanism?	The Commonwealth desires the ability to attach any system that is compatible with the storage solution proposed. The storage solution is to be determined by the Offeror. The Commonwealth has not determined the anticipated volumes. No storage in current exhibits will be provided via this mechanism. The Commonwealth currently does not have this capability.
53	Schedule F	3.3 Transition Services	141-155	a. What does the Offeror have to demonstrate that a thorough latency strategy has been executed? What is the expectation relative to Application Discovery? Would CoPA entertain a low end validation tool to confirm manual data on application discovery and dependency mapping? Are there any assumptions CoPA has relative to the methods of migrations (lift/shift, PTV) etc?	The Commonwealth does not have a "latency strategy" documented at this time. The Commonwealth is willing to consider a "low end validation tool" to assist with discovery. However, the "tool" must be approved by the Commonwealth before implementation. The Commonwealth has no assumptions relative to methods of migration, but anticipates multiple methods of migrations to occur.
54	Appendix A	11 (b) (3)	13	Will the Commonwealth provide a gap analysis indicating where noncompliance with federal and state mandated policies exists within the infrastructure vendor is expected to support, or will the vendor be able to assess this during the due diligence period and adjust price accordingly?	The Commonwealth does not have an all-encompassing gap analysis indicating if any "noncompliance" exists. This analysis may occur during the transition planning period; however, the selected Offeror will not have an opportunity to adjust pricing.
55	Schedule F	3.2.1.1.3	Page 45	What is the average count of changes per month, for data center activity?	The Commonwealth does not have an exact count of changes per month. Between all seven in scope datacenters there are between 500 and 1,000 changes every month. Please note that these changes may vary from rather small, such as applying an operating system patch or opening a firewall port, to very large installations of several racks of servers or application updates.
56	Schedule F	2.3	7	Has a set of "available specialized services" been defined? Is it expected that "specialized services" will be built on a demand basis?	The Commonwealth does not understand the intent of this question and the meaning of "built on a demand basis." Please clarify.
57	Schedule K	Multiple	Multiple	In the second column within the tables, several requirements focused on regular reports switch from Effective Date + Number of Days to a reference of Weekly, Monthly, Quarterly. Is the Commonwealth's intension that the Offeror provides the procedure to produce the reports within the CCPM on the identified cycle or have the CCPM updated with requested reports on the identified cycle?	The Commonwealth expects the deliverables to be accomplished per the schedules set forth in Schedule K. If the requirement states that a deliverable must be performed monthly, then the Offeror must produce the deliverable every month. The same applies to the other intervals. The only one-time deliverables listed within Schedule K are those with a date or a single interval such as "Effective Date + 30 Days."

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
58	Schedule F	3.2	22	Are all Commonwealth service management processes been aligned with ITIL v3? If not, which processes are aligned at this time?	The Commonwealth has fully aligned Change Management with ITIL v3. Implementation of the other ITIL processes are in progress at this time.
59	Request for Proposal			What ITIL transformation within the Commonwealth agencies needs to be supported or engaged by the Offeror?	The Commonwealth has implemented ITIL Change Management and is using a modified ITIL Incident Management process today. The Offeror must support Incident Management, Change Management, Problem Management, CMDB, Service Level Management for all services provided within this contract. However, the Offeror is not responsible for implementing ITIL within the Commonwealth, only supporting the processes defined by the Commonwealth.
60	Schedule F	2.3.5	12	With regards to Transition Services, what are the perceived/known limitations on behalf of the Commonwealth to support the Transition Service? The Offeror must provide an estimate of any required Commonwealth resources, including the skills needed and the duration required for each of the resources required in order for the Offeror to implement its solution. Please explain the statement that "Commonwealth expects to provide limited resources." What are the Commonwealth expectations in terms of man-time commitments and direct involvement with regard to application migration schedule development, application upgrades to support new hardware and operating systems required under requirements section (3.2.1.5.1 - Technology Refresh), applications testing, architectural design and approvals?	The Commonwealth has limited staff available for the transitions related to this procurement. The referenced statement is intended to set the expectation that the Commonwealth will assist the contractor with the Transition Services, but has limited resources available. Thus, the Offeror is to provide an estimate of the Commonwealth resources it believes would be helpful.
61	Appendix A Exhibit D.7	13(b)	16-18	Has the Commonwealth evaluated or have an assessment of the EDC's tier rating? What is that assessment?	The Commonwealth has not had a formal Tier Rating assessment.
62	Request for Proposal			Does the Commonwealth intend to hire a vendor to assist them with oversight of this project? If so, what will be their role and when do you expect to have them under contract?	The Commonwealth is considering an IV&V vendor but at this time has not determined if one will be engaged. Therefore, no determination of scope and role has been defined at this time.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
63	Schedule I Schedule J.2 Schedule J.3			Does the Commonwealth expect the bidder to improve the infrastructure configurations from those shown in Schedule I to meet the Service Levels? The documented configurations lack the high availability components to meet the higher order Service Levels.	The Commonwealth is procuring computing services. The selected Offeror must configure its infrastructure to meet to the SLAs.
64	Request for Proposal			Who (Commonwealth or vendor) is responsible to make any application changes caused by moving applications to a different data center site or issues related to re-hosting applications onto refreshed hardware? For example, applications using hard coded IP addresses, application recompilations, etc.	The Commonwealth is responsible for application changes.
65	Schedule F	3.1.3, Requirement 5	20	Will the Commonwealth accept a DR tier that leverages lower level application environments that are used on a daily basis that will act as a DR platform when required as a cost savings consideration? For clarity, this translates to the unavailability of test environments to the agency during each DR testing and during an actual recovery.	The Commonwealth recognizes this as an option for DR services. This will be determined on an application-by-application basis.
66	Schedule F	3.2.5.3		Provide clarity on how the Commonwealth expects to procure this. (E.g. Subscription, duplicate of infra, etc.) Does this apply only to CoD or other service categories?	The Commonwealth will procure DR Infrastructure On Demand in the same method used to procure all other services within this procurement. The Commonwealth will place an order with the contractor and the contractor will deliver the service.
67	Schedule J.3	SL20	30	Verification that Formal RCAs are only required when requested by Authorized User. Who will be designated as Authorized Users?	The Commonwealth will determine the authorized user list as part of transition.
68	Schedule F	3.2.2.2	67	What does the Commonwealth consider to be reasonable timeframe to receive written acceptance regarding ready for use and user acceptance testing? At what level will such approvals be required i.e. system, application, agency, etc.?	~~The Commonwealth will not unreasonably withhold or delay the acceptance or rejection of the Offeror's written notice regarding "ready for use". The range may vary but will generally fall within two (2) days to two (2) weeks based on many factors such as required Commonwealth verifications, Commonwealth personnel availability, complexity of the new environment, etc.~~
69	Schedule J.1	2	3	Who is responsible for interruptions to the "application Infrastructure" caused by the Commonwealth applications or staff?	The Commonwealth would be responsible if the interruption was determined to be solely due to the actions of the Commonwealth. Otherwise, the contractor would be responsible.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
70	Schedule F	3.2.1.1.4	32	Is there a requirement to have dual connections for Commonwealth business partners to access to Commonwealth systems? Please provide a list of business partners and associated volumes such as number of users connecting, duration of connections, size of data transfers, and other relevant information.	The Commonwealth's Business Partners (BP) provide the physical circuits to the Commonwealth's BP network into the Commonwealth's Co-Location space within the EDC and DPH. The Business Partner determines the number, size and redundancy of the individual BP connections. The Offeror must support these connections by providing Security, Access, and Network Connections to the Commonwealth Network, Floor/Cabinet Space, Cooling, and Power. The Commonwealth or the Business Partner is financially responsible for these circuits. Currently there are 3.5 cabinets within the Co-Lo space in the EDC dedicated to the Business Partners containing 65 Business Partner connections to support within the EDC. The DPH has 1 data circuit (to HP) for Business Partner connections. The following is the current list of BP circuits within the EDC and may be different at the time of transition: Xerox/EBT – 2 Data Circuits, 1 Analog Circuit; FDCS/PNC Bank – 2 Data Circuits; Telvent/TrafficLand – 1 MPLS Ethernet Data Circuit; DTCC – 1 Data Circuit, 1 Analog Circuit; ITG (formerly MacGregor (MFN)) – 1 Data Circuit; Thomson Reuters/BT – 4 Data Circuits ; SGI – 1 Data Circuit ; PNC Bank – 1 Data Circuit, 1 Analog Circuit; GTECH/Central Control System – 1 Data Circuit; DST/Gateway – 1 Data Circuit, 1 Analog Circuit; Highmark – 1 Data Circuit; L-1 Identity Solutions (formerly IBT, Identix) – 1 Data Circuit; OMAP/APS – 1 Data Circuit, 1 Analog Circuit; UHC/Verizon Business – 1 Data Circuit, 1 Analog Circuit; DOLNet/BLS – 1 Data Circuit, 1 Analog Circuit; Xerox/UI-ICON – 1 Data Circuit; IBM Remote Management – 2 Data Circuits, 1 Analog Circuit; AAMVA – 2 Data Circuits, 2 Analog Circuits; Assurant – 1 Data Circuit; AT&T Messenger Services Network – 3 Data Circuits; IRS – 1 Data Circuit, 1 Analog Circuit; TitleNGo (PA Messenger Solutions) (JEBTech/Gatekeeper) – 2 Data Circuits; Verizon Business/Emissions Service – 2 Data Circuits; Xerox (formerly ACS)/Customer Call Center – 2 Data Circuits; Bloomberg – 8 Data Circuits; Financial Control Systems – 1 Data Circuit; BNY Mellon – 2 Data Circuits, 1 Analog Circuit; Trustmark Insurance/CoreSource – 1 Data Circuit, 1 Analog Circuit; Vitech – 1 MPLS Data Circuit; FMS/TOP – 1 Data Circuit; IO/Enterprise Networks – 2 Analog Circuits

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
71	Schedule F	3.2.1.7	57	As it relates to Configuration Management: What is the Commonwealth's current CMDB? What is meant by an electronic interface? Is an electronic copy/extract considered sufficient or must this be a transaction by transaction interface? What product / database is the Commonwealth using for its CMDB?	The Commonwealth's current CMDB is the BMC Remedy CMDB hosted within the Enterprise Remedy System. The data is housed within a Microsoft SQL Database located within the EDC. The Offeror is to provide updates to the CMDB directly from the Offeror's ITSM system on a regular basis.
72	Schedule F	3.2.1.7	57	Please provide more information regarding the Commonwealth's existing CMDB. Are all CIs under the scope of this contract currently documented in the Commonwealth CMDB? Has the CMDB recently been audited for accuracy?	The Commonwealth's CMDB is not complete. The Commonwealth's CMDD has not been audited.
73	Schedule F	3.2.1.4-11	46	As it relates to reporting on "Key issues relating to Service Desk processes, improvements, script development." What is the expectation regarding script development? Is this related to monitoring scripts, data collection scripts, or incident/problem resolution scripts?	The contractor must provide and continually improve the incident/problem scripts used by the helpdesk agents when a Commonwealth representative contacts the Services Desk.
74	Schedule F	3.1.3	18	This section states "The Offeror must address in its design how it will create a target environment that will minimize application latency concerns". If latency issues are introduced as part of the existing data center migrations to new facilities, who is financially responsible for resolving such issues, the Service Provider or the Commonwealth?	The contractor must provide the infrastructure to support the Commonwealth's applications. Application changes are not always possible. Therefore, it is the Offerors responsibility to resolve the issue.
75	Schedule F	3.2.1.5	50	Can the Commonwealth indicate the process that will be used to gain stakeholder approval from agency personnel in terms of format and duration for approval?	The contractor will submit a proposed architecture with anticipated costs to the respective application owner and OA-OIT. Then the application owner and OA-OIT will review, discuss, modify and approve or deny the architecture. The duration of this process is dependent on many factors including but not limited to the complexity of the proposed architecture and the availability of Commonwealth resources. Therefore, a set duration is not available.
76	Schedule F	3.2.2.4	72	Based on the statement in this section "The Commonwealth will provide the Offeror with a list of agency applications that require a DR solution and related DR plan after contract is awarded . " Are we to consider the data provided in Exhibit B.5 to be complete?	The data provided within Exhibit B.5 is the list of current DR solutions provided at this time. Additional applications may require DR. The selected Offeror must provide DR to any application that the Commonwealth orders with DR.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
77	Schedule F	2.3.4 Data Protection	11-Oct	DLI is shown as Group 2 Transition and the other agencies (DPW, DOR, DOH and PSP) are shown as Group 3 Transition. Both groups are due to be completed within 30 months of contract start. What is the difference between the transition groups?	The datacenter for the Department of Labor and Industry has special power considerations, as a result, the Commonwealth wants to track the transition separately from the other transitions.
78	Appendix A Schedule F	12(d)(2) 3.2.5.3	15 138	Does the Commonwealth anticipate designating any dev/test/pre-production systems as DR recovery targets for any primary systems? If so, are applicable SLAs waived for these DR target systems in their principal role as dev/test/preproduction until the End of the disaster?	The DR configuration described in this question is one possible solution. Whether it could be implemented would be based on the requirements of the application owner. No, there are no provisions within the RFP for SLA waivers in this situation. The Offeror must support the subscribed to SLA for the "dev/test/pre-production" system.
79	Schedule F	3.1.1, Multi Datacenter Environment (2+ Architecture)	Pages 13 and 14	The requirement in the matrix starts with number 3. Are requirements 1 and 2 missing or is this matrix numbered incorrectly? Would the Commonwealth please clarify?	The matrix is numbered incorrectly. Numbers 1 and 2 are not used, which means that the matrix begins with number 3. There is no information missing.
80	Schedule D	M4, M9	2, 4	Both the Due Diligence and the ITSM System Integration milestones must be completed in 180 days. M4 includes as a bullet point “completion of data gathering on B2B interface to Enterprise Remedy, within the 180 day, and M9 requires that completion and acceptance of Integration between Enterprise Remedy and the Offeror’s ITSM system within the 180 days. Shouldn’t M9 allow for the data gathering to be completed first, and thus the timeframe for M9 be greater than 180 day?	The Milestones set out in Schedule D may be satisfied at any time prior to the Milestone Due Dates.
81	Schedule D	M4, M5	2, 4	Both the Due Diligence and the Detailed Transition Plan milestones must be completed in 180 days. M5 has a direct dependency on the completion and acceptance of the Due Diligence deliverable. Shouldn’t M5 allow for the data gathering to be completed first, and thus the timeframe for M5 be greater than 180 days?	The Milestones set out in Schedule D may be satisfied at any time prior to the Milestone Due Dates.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
82	Schedule D	M4-M5-M9	2 and 3	It appears the delivery of the ITSM and Transition Project plans are due at the completion of the Due Diligence period all three are within 180 days of contract execution. Is this accurate or an oversight?	The Milestones set out in Schedule D may be satisfied at any time prior to the Milestone due dates.
83	Schedule D		2	Upon completion of due diligence, will the vendor have the option to modify other transition milestone deliverables that are due at the same time or prior to the completion of due diligence in accordance with results gathered during that process?	The Milestones set out in Schedule D may be satisfied at any time prior to the Milestone due dates. Refer to Section 27 (Change Control) of Appendix A regarding modifications to the milestone due dates.
84	Schedule F	3.2.1.4	44	What content does the Commonwealth envision including for agency use in the KMP and what responsibility will Offeror have regarding this content?	The Offeror must provide this portal. The information content will include but is not limited to: run-book type information for each application, service level and other management reports, configuration information that is relevant to the services provided, contact and escalation lists, process and procedure manual , project plans, and other information related to the contract and services. The Offeror will provide the portal and provide multiple levels of security for access to the information stored within. Also, the Offeror must provide the information related to the managed services provided as defined by the application owners and the Commonwealth's program office. There is to be multiple levels of access as determined by the Commonwealth.
85	Schedule F	3.2.1.8.3	60	Does the Commonwealth expect the Offeror to track application software licensing or infrastructure related software only?	The Offeror must track only the software licensing for the infrastructure included within this procurement.
86	Schedule F	3.2.1.5	50	What is the definition of industry standard software to contain the service catalog?	The Offeror must use a software package that is generally available for any US company to purchase and implement. A custom designed and written application is not acceptable.
87	Schedule F	3.2.2.4 DR Planning & Testing	72-75	From item #8: “At a minimum, the Offeror shall support annual and semi-annual DR exercises.” So, which is it?	The Offeror should plan that some applications will require an annual exercise and some will require semi-annual. Frequency of DR exercises will be at the discretion of the Commonwealth.
88	Schedule K	D-02.39	9	Is the expectation that the Offeror provide the procedures to produce the audit report or present the report as the Offeror will not have full responsibility for systems at 60 days past effective date.	The Offeror will provide the methodology to produce the audit report within the "Effective Date +60 Days" requirement. This is also the same for Deliverables D-02.39, D-02.44, and D-02.49. Schedule K has been revised and reissued.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
89	Schedule F	3.2.1.4	44	As it relates to the "Offeror must provide an Internet accessible KMP as a central repository for processes and procedures, communications plans, and other relevant documentation to be shared with the Commonwealth" What level of security will be required for this internet facing Knowledge Management Portal? Will two factor authentications be the standard?	The portal must be capable, at a minimum, of being secured at the folder level by user. Secure information must be able to be limited to a few authorized people where other information should be available to full list of authorized users at the Commonwealth. The Commonwealth will establish an authorizing process as part of transition.
90	Appendix A	22c	32	Can you please elaborate on the Commonwealth's requirement that the Commonwealth will pay monthly invoice only if Commonwealth accepts our services with WRITTEN notice? How will this action be performed?	The process will be determined with the selected Offeror as part of CCPM creation. The Commonwealth anticipates that the invoice would be submitted as an order online via Remedy and if the service is accepted by the Commonwealth, an acknowledgement will be forwarded via Remedy to the contractor.
91	Schedule F	2.3.5	12	How does this activity impact out of scope facilities such as Selinsgrove and the Reading PA DR location? How will schedule conflicts be handled?	The referenced locations will be vacated once the Services under the contract have been fully transitioned. As a result, there should not be any schedule conflicts.
92	Schedule F	3.2.5 Capacity on Demand Services	133-141	Regarding the Capacity on Demand Services, are they subject to all the requirements described elsewhere in the SOW? For example, do all the Security Management requirements apply to systems in the Cloud. Typically, the Cloud is used for quick implementation and cost effective support of systems with a lesser set of requirements, such as development and test machines.	The requirements specified within the RFP apply to all services, including Capacity on Demand Services.
93	Appendix A	14 (a)	19	Does the responsibility for all costs associated with transition also include covering the costs for Commonwealth application support resources during the relocation phases?	The selected Offeror will not be responsible for modifying an application. The selected Offeror, will, however, responsible to provide the infrastructure that is required for the application to operate at the performance levels maintained before transition to the Offeror's services.
94	Schedule I	Tab 1	N/A	Will the Offeror add a new item to the services catalog and the SLA matrix every time a new configuration is used/requested?	The Service Catalog should be unit based to allow for agencies to order configuration changes without adding items to the Catalog. If a new service needs to be added then the Catalog, service descriptions and SLAs may need to be altered.
95	Schedule J.3	SL01-SL05		Do the applications have architectures that permit this type of SLA to be measured? What is the nature of the measurement that will suitably capture "availability"? Is that measurement identical for all applications?	The SLA is on the services provided by the Offeror. The CMDB must identify all infrastructure components used to provide that service and must be identified on an application basis. Therefore, the SLA is on the sum of the infrastructure components.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
96	Schedule F	3.2.3.2	89	Requirement 1 states a need to not just monitor batch but also appears to require problem determination for "abnormal conditions" and rerun. This section also states that any abnormal condition that cannot be corrected will be referred to "technical support staff for resolution". Is the technical support staff reference in this section the Commonwealth application technical support staff responsible for the application batch jobs or the Service Provider's technical staff?	The technical staff responsible for investigating and resolving the "abnormal conditions" would be based on the results of initial troubleshooting and triage. The contractor is responsible to perform the initial triage and determine if the issue is potentially caused by an area managed by the contractor. If so, then the contractor is responsible to resolve the issue. If the troubleshooting determines it is an application issue, the contractor must contact the assigned application point of contact and assign the incident to the Commonwealth. The contractor must support the application support team in continued troubleshooting and resolution while maintaining a running log of events within the ITSM system.
97	Schedule F	2.1	5	When providing the multiple environments, does the Commonwealth require physical separation or will logical segregation and physical separation, where required by regulations and statutes be acceptable?	The type of separation required for each environment will be determined by IT policy or requirements of the application owner. This will be determined during transition planning on an application by application basis.
98	Exhibit G.12 , PSP - CHRIA Handbook			This document is missing the charts	There are no charts in Exhibit G.12 and the version provided is the current version issued by the Pennsylvania Office of Attorney General.
99	Request for Proposal			Are any of the cells in the cost matrix being weighted with greater value as part of the overall cost evaluation?	There are no minimum consumption parameters included in the contract. The volumes provided in Schedule I will be used to evaluate the cost portion of the RFP and are not a minimum commitment nor an all-inclusive list of services desired by the Commonwealth.
100	Request for Proposal	I-5	1	If Type of Contract is consumption-based model, then are there minimum consumption parameters that will be included in the contract?	There are no minimum consumption parameters included in the contract. The volumes provided in Schedule I will be used to evaluate the cost portion of the RFP and are not a minimum commitment nor an all-inclusive list of services desired by the Commonwealth.
101	Schedule F	2.3.2	8	Regarding the migration to IPv6, is there any federal or state deadline set for specific agencies to be migrated to IPv6?	There is no federal or state deadline for specific agencies to be migrated to IPv6 at this time.
102	Schedule J.2	SL29	Batch Processing	Will documentation be provided that gives specific details regarding the batch environment? There is nothing listed in the expected Exhibits related to batch.	This information will be provided as part of Transition planning.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
103	Schedule F	2.1	6	*"The cost for those Services must remain less than the cost the Commonwealth would have incurred for providing the same infrastructure itself."* How is this calculated by the Commonwealth? Does the commonwealth have costs per service already defined, and does it include Power, Networking, Maintenance, Hardware replacement, Security, etc.?	This requirement is intended to encourage Offerors to be aggressive in providing low cost / high quality services to the Commonwealth. The Commonwealth will not provide the current budget or spend on services requested within this RFP.
104	Schedule F	2.2.1	6	Commonwealth states "The cost for those Services must remain less than the cost the Commonwealth would have incurred for providing the same infrastructure itself." To meet this requirement, please provide the current cost baseline cost that the Commonwealth will use to measure against and the make-up up of the current cost baseline.	This requirement is intended to encourage Offerors to be aggressive in providing low cost / high quality services to the Commonwealth. The Commonwealth will not provide the current budget or spend on services requested within this RFP.
105	Schedule J.1	8	8	Please elaborate on the (3) Service Level Defaults in (6) month period. Is this referring to (3) repeated occurrences of the same default or (3) defaults across the enterprise in total?	This section is referring to (3) repeated occurrences of the same default.
106	Schedule J.3	SL01-SL05		Which applications are expected to run at the various SLAs today and will be in the various levels coming/wanted?	This will be determined as part of the transition planning and will be on an application-by-application basis.
107	Schedule F	3.1.3	19	In requirement 3, is there a relationship between the storage approach types (Basic, Committed and Dedicated) and the Storage Tiers in Schedule I (Pricing)? If so, what is the breakdown of the volumes in Schedule I to the storage approach types?	This will be determined as part of the Transition Planning and will be on an application-by-application basis.
108	Schedule K	Through-out		How are Commonwealth induced or required delays to be accommodated within these deliverable due dates? For example, several deliverables listed require approval and review before a follow-on deliverable can be completed (e.g. D-02.04 and D-02.05 or D-02.09 and D-02.10).	Unless otherwise set forth in the CPPM, the Commonwealth will review deliverables according to the timeframes set forth in Section 22 (Inspection and Acceptance) of Appendix A.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
109	Schedule F	3.1	12	Is the Offeror expected to reuse any Commonwealth owned hardware and software? Are there any restrictions on the reuse of Commonwealth owned hardware e.g. hardware owned by a specific agency can only be used by the owning agency?	With the application owner's approval, consolidation may be possible.
110	Schedule J.1	15	11	Do SLAs apply during a declared disaster?	Yes
111	Schedule G	4	6	There are inconsistencies noted between the requirements and the Offeror key personnel table entries. Is the Account Executive actually the Engagement Executive?	Yes, "Account Executive" and "Engagement Executive" refer to the same position. Schedule G has been reissued.
112	Request for Proposal			Can any agency that is currently included in scope of this RFP decide not to participate once bids are submitted?	Yes, an agency may choose not to participate.
113	Schedule F	2.1	7	Will agencies be able to request deviations from standard services processes used for all agencies?	Yes, however, standard processes must be developed to encompass all reasonable needs of the agencies; thus few exceptions should be required.
114	Schedule F	2.3.1	8	With regards to supporting multiple security and network zones to support specific agency requirements, other than logical VLAN separation, is there an expectation on behalf of the Commonwealth that multiple physical networks be created?	Yes, in some cases. Multiple physical networks must be created if required by law, IT policy, or an RFP requirement.
115	Exhibit K		12	Please verify – the Data Power House ACD Call volumes shown in the table are not included in the DPH line item volumes in the Table on page 11.	Yes, the ACD Call volumes are included in the Incident volumes. Not every ACD call is an Incident creation event. The call volumes provided in Exhibit K include opening an Incident, requesting and providing updates to open Incidents, and conversations on delivery of capabilities, and general questions. Incidents may, however, be requested by the Commonwealth in other means which may include email, meetings, escalations. The incumbent may also create an Incident from the incumbents' monitoring system results or through direct reports. Therefore, the number of calls do not have a direct correlation to the number of Incidents.
116	Exhibit d.x edc	EDC Facility Summary		Are there multiple data feeds into the building with diverse entry points and meet me locations?	Yes, there are multiple diverse data feeds, entry points and meet me location at the EDC.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
117	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Are there existing service / warranty agreements for the generator, transfer switches, batteries, UPS switch gear and PDU/ RPPS? What is the length of warranty or service for these devices	Yes, there is a current service agreement in place for the refaced power components. Current service agreements through 6/31/13.
118	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there an existing service agreement for the fire protection system? Has it been in continuous effect since installation? With the same service supplier?	Yes, there is an existing service agreement. Yes, an agreement has been in continuous effect since installation. No, there has been more than one service supplier.
119	Schedule J.3	All	All	This section refers to Severity Levels. Should it be referring to Priority Levels?	Yes.
120	Schedule F	3.2.4.7	128	Does the scope of the Database Management optional service include both physical and logical database administration?	Yes.
121	Schedule F	3.2.5.3	138	Are DR services expected to be limited to the same class of service as the primary system's class of service (fully-managed, managed only, etc.)?	Yes.
122	Schedule F	3.2.5	133-139	Will any critical applications be hosted in or permitted in the Capacity-On-Demand environment?	Yes. Critical applications will be permitted in the Capacity on Demand environment.

Addendum 7 – Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
123	Schedule F	3.1.2 Network and Security Architecture	17	Are HIDS required in the environment and if so which servers requires this support?	Yes. The Offeror must provide HIDS per the individual agency's requirements.
124	Schedule F	3.2.1.1.1	27	Does the request to integrate the financial management tool with the Commonwealth's Remedy Billing module constitute part of the expected invoicing process?	Yes. The selected Offeror must integrate its invoicing system into the Commonwealth's enterprise remedy system.
125	Request for Proposal			Should the fiber connection be delayed or any other required act by the Commonwealth, what impact does that have on the December 31, 2014 deadline including the $50M penalty?	The following is a revised answer to Round 1 Part 2 Question 6. The fiber connection is the responsibility of the Offeror. The selected Offeror must meet the transition milestones.
127	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there attic stock available of ceiling tiles for use in the data center? If yes, how many panels?	The following is a revised answer to Round 1 Part 1 Question 113. Yes, 13 panels.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
1	Schedule J.3	SL12	19	What is the Commonwealth's definition for "viable proposal"? What measures constitute "viability"?	A "viable proposal" for this SLA is a technically sound and complete proposal that includes enough details for the Commonwealth to place an order with the contractor. The proposal must be able to be provided from the then current Catalog of Services (Schedule C).

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
2	Appendix A	32j	51	Can you please define Proprietary Communications Network?	A communications network that is not commercially available to the Commonwealth from multiple providers.
3	Schedule J.3			What constitutes a complete request or acceptance?	A completed request is a request that has been completed by the contractor and has been turned over to the Commonwealth for validation. An accepted request is a request that has been accepted by the Commonwealth.
4	Schedule F	3.2.2.1	61	What type of peripherals does the Commonwealth currently use and expect to be moved as part of the Transition. Who manages these peripherals today?	All known hardware including peripherals is included in the existing Exhibits. Any additional peripherals will be discovered during the Transition planning stage of this procurement. These peripherals are currently managed by the Commonwealth.
5	Schedule F	3.2.5	133	In a cloud IaaS solution, particularly for Server Capacity, but in general, how important is portal access to the environment to the Commonwealth? Can you rate as Critical, Important, or Optional?	All of the RFP requirements are important to the Commonwealth. The Commonwealth does not disclose detailed evaluation criteria.
6	Appendix A	14 (c) (ii)	21	Can you please elaborate on system degradation? Does the Commonwealth have a way to collect baseline measurements and have tolerances been defined to determine if system performance is degraded?	Baseline measurements will be established during the transition phase. A service is degraded if it fails to meet the minimum baselines.
7	Exhibit K		11	Do the Incident Volumes in the table include Requests? Please provide a breakdown of call mix / call types.	Both requests and incidents are included in the table. The Commonwealth does not currently have a breakdown of the information requested and, therefore, is not available to provide it.
8	Appendix A Exhibit D.7	13(b)	16-18	Please describe any cooling challenges/hotspots, if any.	Computer Room 1 may become warm if a unit is down for an extended period of time. The area of warmth is generally limited to the area of the unit which is down. No other issues are known.
9	Schedule F	2.1	6	What HA (High Availability) application DR solutions exist today? Can the Commonwealth describe the technology and requirements around this requirement? For example: Active-Active replication requirements between data centers? What are the DR (Disaster Recovery) objectives for such HA solutions (RTO – Recovery Time Objective and RPO – Recovery Point Objective)?	Currently the Commonwealth has no applications designed for High Availability across multiple datacenters. The Commonwealth desires the infrastructure to readily support HA across datacenters, thus allowing future development of this capability. DR objectives are set on an application by application level and will be based on the needs of the application owner.
10	Appendix A Exhibit D.7	13(b)	16-18	Which equipment in the EDC is powered by dual power connections?	Dual power connections are the standard in the EDC. Very few components have a single power supply.
11	Exhibit K		11	Please provide an ACD analysis that shows hourly call arrival patterns for a representative week Sun-Sat.	See 6100022698 - Exhibit K - OA Enterprise Remedy and Volumetrics has been re-issued to provide this level of detail. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
12	Schedule F COPA	3.2.5.1 Server Capacity on Demand	134	Requirement #5 in this Section describes the desire for expedited service. How is expedited service defined?	Expedited service is the deployment of a service in an interval shorter than the standard interval identified in the service catalog. These should occur rarely, however, there may be times that this is required due to a failure of another service/equipment or a requirement set upon the Commonwealth that is outside the Commonwealth's control, such as one set by Federal or Commonwealth law.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
13	Schedule J.3	SL29	43	Do job failures include those where an application failure occurs and is the cause? How are such jobs to be counted for purposes of this SLA?	Failures that are caused solely by an action or inaction of the Commonwealth would be excluded, including any failures related to software / application that is not the responsibility of the Offeror. The type of failures described here would be listed within the SLA Report but excluded from the calculations.
14	Schedule I	1. Volumetrics	N/A	Line 192-193 Tape Stored. Please clarify if volume is expressed as native or compressed (ratio) and if encrypted.	For Line 192-193 Tape Stored, the volume is expressed as native.
15	Schedule F	3.2.1.8	60	Reference: "The Offeror's 3rd Party License Management service must ensure accurate inventory and licensing compliance for all Offeror provided infrastructure software products." Please provide license compliance report for all existing infrastructure software that will need to be supported by Offeror. (Or optionally, can Offeror assume all existing infrastructure software listed in RFP exhibits have full support till Dec 2014?)	For purposes of submitting a proposal, Offerors may assume that all 3rd party software utilized within the DPH has full support through 12/31/2014.
16	Schedule D			Given the transition services and transition timeline to transition the EDC & DPH by 12/31/2014 and the other data centers within 30 months from contract execution, and given the financial credits for not achieving those milestones, is the Commonwealth going to commit to a contract start date to provide visibility into a transition timeline?	For purposes of submitting a proposal, Offerors should assume an approximate contract start date of December 2013. The actual start date may vary and will depend on a number of factors including the length of contract negotiations and the Commonwealth contract execution process.
17	Request for Proposal (General)	N/A	N/A	In order to provide accurate costing and schedules, please state the presumed start date of the contract.	For purposes of submitting a proposal, Offerors should assume an approximate contract start date of December 2013. The actual start date may vary and will depend on a number of factors including the length of contract negotiations and the Commonwealth contract execution process.
18	Schedule F	3.2.5.5		What is the contract start date for cost/price purposes? July 1, 2013?	For purposes of submitting a proposal, Offerors should assume an approximate contract start date of December 2013. The actual start date may vary and will depend on a number of factors including the length of contract negotiations and the Commonwealth contract execution process.
19	EDC tour	Tour handout		What is the % of servers hosted vs the % of servers managed lite vs the % of servers managed full?	Fully managed = 28%, Managed lite (up to O/S) = 58%, Hosted (Co-location) = 14%
20	Request for Proposal			How are agency schedule needs accommodated in the instance where those needs will delay or cause the delay in deliverables and milestones?	Identifying specific agency scheduling needs will be part of the transition planning. The Commonwealth does not have enterprise-wide "No Maintenance" periods. Each "No Maintenance" period is requested and scheduled by the individual agency. The Commonwealth does have several regularly scheduled "No Maintenance" periods every year. Please refer to ITB-NET015 which describes the process for requesting a "No Maintenance" period and the Commonwealth's approved Enterprise Maintenance Windows. See Exhibit O - 2012 Agency NMRs for the No Maintenance periods that occurred during 2012. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
21	Exhibit d x edc	EDC Facility Summary		Are the available power/cooling density (watts/sq') the same in both rooms? What are your documented power/cooling densities?	It is not known whether the available power/cooling density is the same in both rooms. The cooling densities are not documented.
22	Exhibit B.1 DPH - Asset List			Can the Commonwealth provide more detail regarding the processors and peripherals listed in Exhibit B1? Specifically-- For the mainframe processors (2817 and 2098): amount of processor storage (memory), number and type of specialty engines (IFL, zIIP, zAAP, etc.) and number and type of other adapters, such as FICON, ESCON, OSA, etc. For DASD: amount of processor memory, number and type channel adapters, number of drive sets, function authorization (OEL, PTC, PAV, etc). Tape: detailed configuration information for the 35xx and 39xx.	Mainframes: The 2817 and 2098 processors currently have a combined quantity of: 144 GB Processor Storage (memory) + 24GB HSA; 8 - SAP; 5 - IFL; 1 - zIIP FICON - 88; ESCON - 172; OSA - 42 DASD: The combined quantity of DASD owned and operated by IBM: DASD 128 GB Processor Memory (32) - 4GB FICON/FCP Adapters (14) - 146GB 15K Drive Sets (2) - 300GB 15K Drive Sets Function Authorization includes: OEL, PTC, PAV, HyperPAV, FICON Attachment *** DMX3 **** Processor Memory: 256GB Type of Adaptors (Mainframe Only): Fiber Channel Adaptors (2Gb) Number Adaptors (Mainframe Only): 32 Number of Drive Sets: 14 Raid Type: Raid5 3+1 *** VMAX *** Processor Memory: 64GB Type of Adaptors (Mainframe Only): Fiber Channel Adaptors (8Gb) Number Adaptors (Mainframe Only): 4 Number of Drive Sets: Thin Provisioning Raid Type: Raid6 6+2 *** DMX4 *** Processor Memory: 48GB Type of Adaptors (Mainframe Only): Frame Number Adaptors (Mainframe Only): 8 Number of Drive Sets: No Dedicated Raid Sets Raid Type: Raid5 7+1 TAPE: Information about the configurations about Tape hardware is provided in Exhibit B.1 of this RFP.
23	Schedule F	2.1	5	Commonwealth references their Systems Development Lifecycle (SDCL). Have you published your SDLC so we can view your development methodologies and lifecycle approach?	No, the Commonwealth has not published a standard Systems Development Lifecycle. The Commonwealth does not have a standardized SDLC. Each application may have its own SDLC.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
24	Schedule D	M-4	2	Upon completion of due diligence, will the vendor have the option to modify other transition milestone deliverables that are due at the same time or prior to the completion of due diligence in accordance with results gathered during that process?	No, the Offeror may not modify milestones. The Offeror must follow the program deliverables set out in Schedule K - Key Program Deliverables. The milestones set out in Schedule D are in support of the outcomes required in Schedule K.
25	Schedule F	3.2.4.3	105	Should a Production Control Management requirement, such as 3.2.4.4 requirement 3, be included in ERP Hosting – SAP / Oracle?	No. A Production Control Management requirement, such as 3.2.4.4 requirement 3, should not be included in ERP Hosting - SAP/Oracle.
26	General	All	All	Will the Commonwealth consider a proposal that would include application redesign and redeployment of Agency applications to eliminate certain platforms like Unisys and IBM mainframes?	No. Application development services are outside the scope of this procurement.
27	Request for Proposal			Once due diligence is complete (starting in 2013) and the size of the fiber connection needed to connect between the vendor data center(s) and the Commonwealth's network is determined, will the Commonwealth assume full responsibility for acquiring the fiber connection (s), coordinating installation, the cost of installation and the monthly cost of the needed fiber to connect?	No. The Selected Offeror must provide the fiber connections to the Commonwealth at its cost.
28	Schedule F	3.1.3	18	This Section, first sentence states ", utilizing existing and/or underutilized technologies where appropriate," What method will be used to identify and acquire those assets if desired by the Offeror?	Offerors must propose a methodology to identify existing and/or underutilized technologies. Offerors will not "acquire" Commonwealth assets but may use certain hardware and software components with Commonwealth approval.
29	Schedule F	3.2.2.6	80	This section states that "Additional Performance Monitoring Services such as database and application monitoring will be offered to the Commonwealth as an additional level of service". Please define the use of the words "an additional level of service" and who will be financially responsible for any level of application monitoring.	Performance monitoring services should be offered to meet the specific needs of the agency and/or application. These may be built in to the level of service cost or may be offered ala carte.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
30	Schedule F	3.2.4.8		Of the machines in the various locations, how do they split down by service category? What SLAs/response times are required for the Capacity-On-Demand environment? What network connectivity is required What location is expected for the Capacity-On-Demand environment? What transition milestones are expected/required for the Capacity-On-Demand environment?	Please clarify the first question. The Offeror must provide Capacity-On-Demand according to Service Levels SL01 through SL31, as defined in Schedules J.1, J.2, and J.3. Network connectivity is the responsibility of the Offeror. The Commonwealth has as no preference or requirement on which datacenters provide Capacity-On-Demand services. The selected Offeror must meet the milestones for Capacity-On-Demand as described in Schedule K.
31	Exhibit B.4 DPH - Third Party Software Asset	All	All	Please provide the current cost, licensing arrangement, cost metric (CPU, Core, PVU, etc.), and transfer or assignment cost that currently exist for each application?	Please clarify the question and provide additional detail.
32	Schedule J.3	SL14-SL15		Which software and in what service categories are covered? How will we learn about the software that we cannot otherwise discover plus the terms of that lease?	Please clarify the question and provide additional detail.
33	Schedule F Statement of Work	Schedule F	60	Will the Commonwealth include an evaluation of enterprise licensing agreements for applications that will be consolidated in the new data center?	Please clarify the question and provide additional detail.
34	Schedule J.3	SL16	25	Please provide elaboration on the "relevant criteria" specified in the Commonwealth Computing Procedures Manual.	Relevant Criteria means the information that specifically pertains to the data recovery functions contained within the CCPM.
35	Schedule F	3.2.1.8	60	Will Offeror-provided not commercially provided software need to be transferable to the Commonwealth at the expiration of the agreement?	Requirements related to ownership and transferability of software are set out in Appendix A to the RFP. Section II-8 of the RFP provides that, the Offeror may identify which, if any, of the terms and conditions (contained in Appendix A) it would like to negotiate.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
36	Schedule F	3	12	This Task section states that the Commonwealth has provided detailed information on the current environments in the exhibits. It also states that the Offeror shall utilize the exhibits as the baseline requirements (in terms of services, quantities and bandwidth) for developing its proposal. Be aware that the "Volumetrics", reflected in Schedule I, do not reflect the current services, quantities, or the bandwidths that are reflected in the exhibits. Please explain this inconsistency. If the "Volumetrics" are only to be used for cost evaluation, how will the Commonwealth actual pay for the configurations reflected in the exhibits and being requested in this requirement?	~~Schedule I will be used to evaluate pricing. The Offeror is to provide catalog of services within the Catalog of Services tab of Schedule I, including rates that are consistent with the rates proposed throughout Schedule I. This service catalog will be used to determine the cost of each service provided to the Commonwealth. The invoice must reflect the items and rates listed in the catalog with quantities purchased.~~
37	Schedule F	3.3.2	143	This section states that "The selected Offeror shall not charge the Commonwealth for any Services currently Provided by the DPH or EDC until all of the Services provided by the DPH and EDC (Group 1) have been successfully transitioned." Can any fees be charged, such as transitions fees or any other fees, prior to transitioning all of the DPH and EDC services? Can any fees be charged to the Commonwealth prior to the expiration date of the existing contract scheduled for December 31, 2014?	~~Section 3.3.2. (Transition Planning/Governance) of Schedule F was revised by Addendum #4. The revised section states the following:~~ ~~The selected Offeror shall not charge the Commonwealth for any Services currently provided by the EDC until all of the Services provided by the EDC have been successfully transitioned.~~ ~~The selected Offeror shall not charge the Commonwealth for any Services currently provided by the DPH until all of the Services provided by the DPH have been successfully transitioned.~~ ~~The selected Offeror shall not charge the Commonwealth for any Services currently provided by an Agency's datacenter (example: DLI, DPW, DOR, DOH, PSP) until all of the Services provided by that datacenter have been successfully transitioned.~~ ~~The selected Offeror may charge the Commonwealth for new services after the contract effective date, excluding services that must be transitioned as described above.~~
38	Schedule H	1.4.3	11	Please provide the current process used for vendors to assist the Commonwealth for their budget cycle. Please elaborate on the budgeting process and your expectations for vendor participation.	See 3.2.1.1.5 for some examples of methods that could be used. The Offeror should, however, describe how it would assist the Commonwealth with the annual budgeting cycle. The offeror should describe its approach to assisting the Commonwealth through planning and forecasting.
39	Schedule F	3.1.1.9	15	Please provide further definition around segregation requirements for non-Commonwealth workloads and agency segregation. e.g. separate room / cage / raised floor in a shared datacenter.	See NIST 800-53 sections on physical security and physical security sections in CJIS policy http://www fbi.gov/about-us/cjis/cjis-security-policy-resource-center/view
40	Schedule F	3.1.2	6	What is the Commonwealth's minimum FIPS 140-2 certification level?	See page 52 of CJIS policy

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
41	Request for Proposal	I-12	Page 3	Should Vendors also submit these forms/documents in PDF version to allow for signed versions to be included?	Signed MSWord documents are preferred. If unsigned MSWord documents are submitted, the Offeror must also submit signed PDF versions.
42	Schedule A , Defined Terms	N/A	Page 6	Schedule A – Defined Terms. In this section it does not specify what the "At-Risk Amount" will be on the contract. Should the Offeror assume an amount in its proposal, or will the definitive amount be negotiated by the parties following award?	The "At-Risk Amount" is 15% of the total monthly enterprise invoice submitted to the Commonwealth by the contractor each month.
43	Appendix A Exhibit D.7	13(b)	16-18	How much utility power is available to the EDC? What types of power are available for equipment in the EDC (e.g. 110VAC, 220VAC, 440VAC)?	The building is served by an underground 2000 kVA transformer at 277-480 volts. Equipment powered from the PDUs is 110VAC or 208VAC.
44	Schedule F	3.2.4	97	Requirement number 4 states "Provide technical advice and support to the Application Development and Maintenance (ADM) and Database Administration (DBA) staff, as required." Who is financially responsible for providing the advice and support in the above stated requirement? If it is the Service Provider, please define "as required" so that support can be properly scoped the included in our price. Does the scope of this RFP include application maintenance and database support?	The Commonwealth considers the referenced services to be a consulting level engagement that would be billable to the Commonwealth according to rate card in Schedule I. The selected Offeror must receive approval from the Commonwealth for all engagements utilizing the rate card.
45	Schedule F	3.2.4.5		How does the Commonwealth envision responsibilities for production control breaking down between the Commonwealth and the Offeror?	Please clarify the question and provide additional detail.
46	Schedule D	M13 thru M19	5 and 6	Are there or will there be any active in flight projects that may impede the Offeror's ability to execute their transition plan of record effectively? If so can the Commonwealth identify any major projects at the State or Agency level?	The Commonwealth has many active in flight projects. The impact of these projects on Offerors' proposed transition plans cannot be determined by the Commonwealth.
47	General Strategy Question			Does the Commonwealth intend to issue any additional RFP's for complementary services (e.g. Service Desk, Managed Print, Independent Validation and Verification, Desktop or Field Services) that would leverage or rely on the ITSM activities (Incident, Problem, Change, Configuration, Compliance, Capacity, SLA and Asset Management) in scope within this RFP?	The Commonwealth has no plans to release an RFP for complementary services at this time.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
48	Schedule F	2.3.2	8, 9	Noting the two exceptions (Commonwealth Mainframe & SAP environments) are there any other legacy environments that will need to be transformed prior to the implementation of IPV6? What is the expectation on behalf of the Commonwealth that the O/S and applications be converted or reconfigured to IPV6 as part of the initial transition?	The Commonwealth is not ready for IPv6 at this time. Implementation of IPv6 will be a future project. The Offeror is to provide IPv4 throughout the infrastructure provided to the Commonwealth.
49	Exhibit K		11	Please provide a ticket dump for the past 6-12 months that shows ticket details.	The Commonwealth issues an average of 2,000 tickets per month. Please provide detail on the exact information requested.
50	Schedule F	2.3	7	What is meant by the word "enhanced" in the statement "enhanced disaster recovery capabilities…"?	The Commonwealth views “enhanced” as a DR service not currently used by the Commonwealth. An example of an enhanced DR service is the ability to have High Availability between geographically diverse datacenters. Offerors may propose other DR capabilities in response to this RFP.
51	Request for Proposal			Specifically what technical resources from the Commonwealth (OA and agencies) will assist with the transition? Will they be available as needed by the vendor? If not, do the penalties for missing transition dates still apply?	The Commonwealth will not identify specific technical resources at this time. The Offeror must provide an estimate of any required Commonwealth resources, including the skills needed and the duration required for each of the resources required in order for the Offeror to implement its solution. The Commonwealth expects to provide limited resources. The selected Offeror must meet the contract milestones.
52	Exhibit B.1 PSP Tab			For the two PSP partitions, can you verify the quantity, type and speed of disk interfaces?	~~The current configuration is:~~ ~~PSP Production: 6 9840C drives~~ ~~4 36 track drives (5236)~~ ~~PSP Development: 6 9840C drives~~ ~~4 36 track drives (5236)~~ ~~The Commonwealth requires the selected offeror to provide the services set forth in the RFP according to the contract terms and conditions. This existing infrastructure may not be sufficient for the long term. Offerors must determine the quantity, type, speed, etc. of the equipment required to provide the services throughout the term of the contract.~~
53	Exhibit B.1 PSP Tab			For the two PSP partitions, can you verify the quantity and type of tape drives required?	~~The current configuration is:~~ ~~* PSP Production: 4 Fibre PCI Cards SIOP Interfaces speed 2 Gb~~ ~~* PSP Development: 4 Fibre PCI Cards SIOP Interfaces speed 2 Gb~~ ~~The Commonwealth requires the selected offeror to provide the services set forth in the RFP according to the contract terms and conditions. This existing infrastructure may not be sufficient for the long term. Offerors must determine the quantity, type, speed, etc. of the equipment required to provide the services throughout the term of the contract.~~

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
54	Exhibit B.1 Dedicated DR Tab			For the three Dorado DR partitions, can you verify the quantity and type of tape drives required?	The current quantity and type of tape drive are: System A: 8 – 9840C drives 4 – 5236 drives System F: 8 – 9840C drives 2 – 5236 drives PSP: 4 – 9840C drives 2 – 5236 drives The Commonwealth requires the selected offeror to provide the services set forth in the RFP according to the contract terms and conditions. This existing infrastructure may not be sufficient for the long term. Offerors must determine the quantity, type, speed, etc. of the equipment required to provide the services throughout the term of the contract.
55	Exhibit B.1 DPW Tab			For the four Dorado partitions (Systems A, C, D, F), can you verify the quantity and type of tape drives required for each partition?	The current quantity and type of tape drive are: System A: 8 – 9840C drives 4 – 5236 drives System F: 8 – 9840C drives 2 – 5236 drives PSP: 4 – 9840C drives 2 – 5236 drives The Commonwealth requires the selected offeror to provide the services set forth in the RFP according to the contract terms and conditions. This existing infrastructure may not be sufficient for the long term. Offerors must determine the quantity, type, speed, etc. of the equipment required to provide the services throughout the term of the contract.
56	Schedule D,	M-13, M-14	Page 5	The dates for these milestones are given as calendar dates instead of elapsed time from contract execution. Please provide a defined number of days after the start of the contract before the penalty is considered invoked.	The dates are definite calendar dates. The date that the event must occur is not dependent upon the contract execution date.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
57	Schedule F	3.2.5	134	Requirement number 2 uses the word "adequate inventory". Can this requirement for "Capacity on Demand Services" be made available in a "Public" cloud and shared with other users or is it needed in a "Private" cloud and will only be available to the Commonwealth? If a "Public" cloud is acceptable, please be aware that some of the "Mainframe server" platforms may not be readily available anywhere in a public cloud. If in a "Private" cloud only, please provide your requirements regarding your use of the word "adequate" to allow the Service Providers to meet this requirement.	The decision to use a public versus a private cloud would be a risk based decision taking in to account, at a minimum, agency, data classification, risk-level, and data value.
58	Exhibit d x edc	Exhibit D1 vs D4		3022 images (679 physical servers) ; 7936 images … why the difference in the values?	The difference is because D1 is a server inventory and D4 is an application inventory. Some servers host more than one application.
59	Exhibit B.1 DPW Tab			For the four Dorado partitions (Systems A, C, D, F), can you verify the quantity, type and speed of disk interfaces required for each partition?	The following are the current configurations: System A: 10 – Fibre PCI Cards, SIOP Interfaces – speed 2 Gb System C: 6 – Fibre PCI Cards, SIOP Interfaces –speed 2 Gb System D: 4 - Fibre PCI Cards, SIOP Interfaces –speed 2 Gb System F: 6 – Fibre PCI Cards, SIOP Interfaces –speed 2 Gb The Commonwealth requires the selected offeror to provide the services set forth in the RFP according to the contract terms and conditions. This existing infrastructure may not be sufficient for the long term. Offerors must determine the quantity, type, speed, etc. of the equipment required to provide the services throughout the term of the contract.
60	Exhibit B.1 Dedicated DR Tab			For the three Dorado DR partitions, can you verify the quantity, type and speed of disk interfaces?	The following are the current quantity, type and speed of the referenced disk interfaces: System A: 2 – Fibre PCI Cards, SIOP Interfaces – speed 2 Gb System F: 2 - Fibre PCI Cards, SIOP Interfaces – speed 2 Gb System PSP: 2 – Fibre PCI Cards, SIOP Interfaces –speed 2 Gb The Commonwealth requires the selected offeror to provide the services set forth in the RFP according to the contract terms and conditions. This existing infrastructure may not be sufficient for the long term. Offerors must determine the quantity, type, speed, etc. of the equipment required to provide the services throughout the term of the contract.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
61	Exhibit B.1 Game Tab			For each of the game machines, please provide the Mip requirements and number of users, and verify the disk and tape requirements.	The following is the current information and this meets the requirements for this infrastructure: Game Production: 40 MIPS, users no limit 2 fiber PCI connections to 200 GB of disk storage 3 LTO-3 tape drives Game Test: 30 MIPS, users no limit 200 GB of internal disk storage No tape drives attached The Commonwealth requires the selected offeror to provide the services set forth in the RFP according to the contract terms and conditions. This existing infrastructure may not be sufficient for the long term. Offerors must determine the quantity, type, speed, etc. of the equipment required to provide the services throughout the term of the contract.
62	Exhibit B.1			For all Dorado and Libra systems, can you identify any required I/O throughput requirements, Request Existence Time requirements, or redundancy requirements?	The I/O throughput is application dependent based on a number of contributing variables including but not limited to the speed of the network, processors, host bus adapter speeds and other connected peripheral devices.
63	Exhibit I.1 IES - DPH COPA Owned IT Assets V1 Exhibit B.2 DPH - Commonwealth Owned DPH IT A V1	IES IES		Exhibit L1, worksheet “IES” and Exhibit B2, worksheet “IES” appear to be the same. Should the contents of both worksheets be included in the inventory?	The information provided by the Commonwealth within the referenced Exhibits must be addressed as part of an Offeror's proposal. Both exhibits (L.1 and B.2) contain the same information. They were included to provide the same information from two different points of view. L.1 is the information from the DPH point of view of Commonwealth owned assets and B.2 is from the application point of view of the infrastructure.
64	Exhibits M x DOC and Exhibits G x PSP Exhibit D.1 EDC - Server Inventory V1			It appears there is duplication in inventory between the exhibits from DOT, EDC and DOC. Which inventory or record/exhibit should be used?	The information provided by the Commonwealth within the referenced Exhibits must be addressed as part of an Offeror's proposal. The data was provided to give the Offerors points of view from several directions, such as from the agency view, from the application view, and from the datacenter view. Exhibit L = all CoPA Applications, including IES Exhibit I.2 = extract of IES Applications from L.1 Exhibit B.2 = List of physical and virtual servers and other hardware housing the I.2 applications Exhibits I.8, I.9, I.10, I.11 = list of hardware components from which B.2 systems are built.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
65	Exhibit I.1 IES - DPH COPA Owned IT Assets V1 Exhibit B.2 DPH - Commonwealth Owned DPH IT A V1 Exhibit 1.8 IES - IES Technical Refresh Exhibit I.9 IES - IES Technical Refresh Exhibit I.10 IES - IES Technical Refresh Exhibit I.11 IES - IES Technical Refresh	IES IES		Should the proposal include the contents of Exhibits I.8, I.9, I.10, I.11 in addition to the inventory listed in Exhibit LI and Exhibit B2?	The information provided by the Commonwealth within the referenced Exhibits must be addressed as part of an Offeror's proposal. The data was provided to give the Offerors points of view from several directions, such as from the agency view, from the application view, and from the datacenter view. Exhibit L = all CoPA Applications, including IES Exhibit I.2 = extract of IES Applications from L.1 Exhibit B.2 = List of physical and virtual servers and other hardware housing the I.2 applications Exhibits I.8, I.9, I.10, I.11 = list of hardware components from which B.2 systems are built.
66	Schedule I	1.Volumetrics		Are the Base Units - Volumetrics for “Fully Managed” and “Managed Only” separate and stand alone? For example, there are Fully Managed Silver P-Series (AIX) LPARs = 180. There are Managed Only Silver P-Series (AIX) LPARs = 30. Are these two volumes separate for a total of 210 LPARs, or are the 30 LPARs included in the 180? It looks like they are separate and distinct, because they add up separately into the grand totals in the Schedule I pricing file. Could the Commonwealth clarify/confirm?	The information referenced is separate and stand alone; meaning the "Fully Managed" count does not include the "Managed Only" count.
67	Exhibit B.1 Dedicated DR Tab			For the equipment identified as “L1400”, can you identify the equipment type, usage, and quantity?	The L1400 consists of two (2) StorageTek L700 units. 1 - L1400 20 – 9840C tape drives 2 – LTO-3 tape drives It is used by both the Dorado and Libra mainframes located at DR.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
68	Schedule J.2	SL21	4	Please provide definition around information contained in the columns titled Required and Earnback Minimum and how they relate to the SLM process.	The Offeror must provide the "Required" level of service to avoid a Service Level Default. Please refer to Schedule J.1 Section 6 for details on the Earnback methodology and process.
69	Schedule F	2.3.4	10	Please provide a list of confidential data and related applications, where they reside and their volumes. If not available, will the Commonwealth permit the incorporation of this information into line items in the service catalog and price sheets at a later time?	The Offeror should assume that all information hosted for the Commonwealth is confidential data. The service catalog should include various levels of security services for the Commonwealth to select.
70	Schedule F	3.1.2	17	Current Commonwealth ITB states that Proxy Servers must be hosted in the EDC. Relative to the requirement to propose a solution that minimizes application latency, will this ITB change and will Offerors be allowed to located the Proxy Servers anywhere they are needed?	The Offerors must follow the ITBs. The Commonwealth may consider revising this policy in the future.
71	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			What is the oldest HVAC device in operation in the data center today (i.e. CRAC, Condenser, air exchange)?	The oldest units are CRAC units installed in 1993.
72	Appendix A Exhibit D.7	13(b)	16-18	Please provide single line drawings for the electrical power systems including generators, UPS, and PDUs.	The previously provided single line electrical drawing included generators and UPS units.
73	Appendix A Exhibit D.7	13(b)	16-18	What is the floor loading capacity of the raised floor in the EDC? What is its height?	The raised floor loading capacity is 800 lbs per tile. The height of the raised floor is 2 feet .
74	Schedule I	Top	2	At the top of page 2, there is a reference to “This Exhibit B.5”. Is that correct?	~~The reference is incorrect. The correct reference is to "Schedule I.1."~~

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
75	Schedule F	3.2.1.7-3	58	What is considered a datacenter component as it relates to current configuration reports?	The requirement asks the Offeror to describe it process to request a report, and provide a sample of a report used on another account as part the Offeror's proposal. The Commonwealth expects a report that provides the required details to understand the information that is relevant to the component. As an example, a report for a server may contain the following information: - Server Name - applications on the server - Quantity and Speed of the network connections - Memory - Disk Space - OS - Patches - Storage type and size - Datacenter - Etc.
76	Schedule F	3.2.4	133	Is there an expected timeframe from the time the Contract starts to when Capacity on Demand services are available to the Agencies?	The selected Offeror must meet the milestones for Capacity-On-Demand as described in Schedule K.
77	Schedule D	M-14	5	What is the Offeror responsible to run in the EDC during Transition? What costs?	The selected Offeror will be responsible for services provided by the EDC once the services have been transitioned and accepted by the Commonwealth. The selected Offeror shall not charge the Commonwealth for any services currently provided by the EDC until all of the services provided by the EDC have been successfully transitioned.
78	Schedule F	3.1	12	Is the Offeror expected to reuse any Commonwealth owned hardware and software? Are there any restrictions on the reuse of Commonwealth owned hardware e.g. hardware owned by a specific agency can only be used by the owning agency?	There are restrictions on reuse of certain Commonwealth hardware and software components. The Offeror must receive prior approval from the Commonwealth before reusing any component. For purposes of submitting a proposal, Offerors should assume that no hardware or software components are available for reuse.
79	Inventory Exhibits			Could the Commonwealth provide the number of SAN ports and speed required by server?	This information, where available, was included in the Exhibits. The selected Offeror may receive additional detail from specific agencies as part of the transition planning process.
80	Inventory Exhibits			Could the Commonwealth provide the number of network ports and speed required by server?	This information, where available, was included in the Exhibits. The selected Offeror may receive additional detail from specific agencies as part of the transition planning process.
81	Request for Proposal			The RFP specifically states that any proposal must be less costly than the current as-is model. What is the current total cost of the as-is model the vendor must bid below? Does the current as-is model include any cost savings associated with reduced Commonwealth labor?	This requirement is intended to encourage Offerors to be aggressive in providing low cost / high quality services to the Commonwealth. The Commonwealth will not provide the current budget or spend on services requested within this RFP.

Addendum 8 - Round 1, Part 4					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
82	Schedule F	3.2.3	85	The contract in Appendix A has very large financial penalties associated with not compiling with the Commonwealth's security policies. Will the Service Provider be able to lock down the EDC floor space (hopefully not shared) to just those employees that are under the direct control of the Service Provider and all associated background checks have been obtained?	To a large extent, the Selected Offeror will have the ability to lock down the EDC floor space managed by the Offeror. The Commonwealth, however, requires that selected Commonwealth employees have access to this floor space. In addition, Commonwealth employees maintaining equipment in the colocation spaces will require physical access to this floor space.
83	Schedule I Offeror Pricing Form	Description and Instructions	Row 51	The Commonwealth indicates that this will be a unit-based contract. Does the Commonwealth plan to issue a pricing exhibit to explain how this will work? If not, what is the methodology that will be used to determine pricing variability? To ensure optimal pricing will the Commonwealth commit to minimum volume levels or an equitable adjustment for volumes below a certain threshold?	Unit based pricing is the concept of providing a catalog of services that provides a "unit" (of quantity one) monthly pricing that the Commonwealth can select from and order a quantity. This catalog must have the individual (unit) price components required to deliver a complete managed service. This includes, but is not limited to, units of servers, network ports, DR, SLA, storage type, Tier and quantity. The Offeror must provide unit pricing in such a way as to account for the variability's mentioned within the question. No, the Commonwealth will not commit to minimum or "Tiered" commitment levels for this procurement.
84	Schedule F	3.2.1.3	42	Pre-change test plans (bullet 3) - stipulates a test environment for any change that is being moved into production. Does this include firmware upgrades, storage changes, etc.? If that is the case, additional cost to maintain additional identical hardware platforms to test such changes would drive cost up. Please clarify.	Unless otherwise approved by the Commonwealth, the Offeror must provide a separate test environment for those changes that impact multiple environments (Dev, Test, Prod) of the same application. This includes SANs, Tape Silos, Firewalls, and other such infrastructure components. If the component supports only one environment (Dev, Test, Prod) for an application, then Offeror is not required to have separate infrastructure. All changes must follow the implementation plan approved by the Commonwealth.
85	Schedule F	3.2.4.7	128	Do optional database services include the requirement to support Unisys mainframe databases (DMS, RDMS)?	Yes, support of Unisys mainframe databases is included in these services.
86	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Does an electrical single line drawing exist for the facility showing the utility and electrical distribution of the site? If yes, can the Commonwealth provide a copy?	Yes. Please see Exhibit D.8 - Single Line Electrical Drawing. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
1	Request for Proposal			The Commonwealth is requiring consumptive-based pricing and also has not established a minimum or maximum purchase. 1) A vendor will require significant capital outlay to satisfy the requirements of the RFP. Without a commitment by the Commonwealth to purchase any level of services, this negatively impacts a vendor's ability to raise capital and also meet accounting reporting requirements mandated by the federal government. Would the Commonwealth be willing to establish a minimum purchase commitment for the 7 year contract? 2) Given agencies have a fixed budget each year for data center services, what happens when they consume in excess of their budgets? Will the vendor be impacted in any way or will the Commonwealth find the funds elsewhere?	1) No. 2) The Commonwealth is required to fund agency needs. If the funding does not meet the needs of an agency the Commonwealth will, at that time, decide the appropriate course of actions (either reduce services to reduce the costs or find the funding).
2	Schedule F	3.2.1.1.1	27	Can you please elaborate on what detailed service information will be required to ensure Commonwealth has uninterrupted flow of federal funds?	The agency invoices must include sufficient detail so the agency has full transparency into the services they consumed. This will allow the agency to apply its own cost allocation models for claiming federal funding. The Commonwealth will provide information regarding federal funding requirements during transition planning.
3	Schedule J.3	SL26	39	Please define P1, P2, P3 and P4.	"P" represents the Priority set on the incident. "P1" represents the highest priority. These are determined by the critically of the infrastructure and may be set by the reporting person.
4	Exhibit B.3 and B.4	All Tabs	All Pages	For Exhibits 3 and 4, Software is listed by Agency and by quantity, please provide a list of the Unisys mainframe software for each machine and each partition.	A new exhibit has been added to the RFP. Please see 6100022698 - Exhibit B.8 - Unisys Software - Dorado Libra contains the current software for the referenced Mainframes. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
5	Exhibit All			The Unisys billable software that runs on the mainframes (Dorado & Libra) does not seem to be identified in the software inventories. Can you verify?	A new exhibit has been added to the RFP. Please see 6100022698 - Exhibit B.8 - Unisys Software - Dorado Libra contains the current software for the referenced Mainframes. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
6	Exhibit B.3 Exhibit B.4 DPH -	UC – IBM, BOIS – IBM, DOC – IBM, DOT – IBM, REVENUE – IBM Oper.and Financial Resp.		These exhibits don't appear to provide a complete inventory (considering product inventory or version/release information of individual products) of the various software products. Will this data be updated by the Commonwealth? Additional, could the Commonwealth note if a software support agreement is currently in place with the vendor?	A new exhibit has been added to the RFP. Please see 6100022698 - Exhibit B.8 - Unisys Software - Dorado Libra contains the current software for the referenced Mainframes. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
7	Schedule F	3.1.3	18	Commonwealth States "The Offeror must address in its design how it will create a target environment that will minimize application latency concerns." If application latency issues are identified through the due diligence process and application remediation is needed will the Commonwealth take responsibility for that remediation? If that remediation causes delays in transition timeline, please provide relief to the Service Provider from committed timeline dates and credits? Regards to application performance and the potential for application/network latency, is the Commonwealth expecting application performance that will be the same as prior to the movement to a new data center model? If yes what baseline performance metrics will be used?	a) The selected Offeror must provide the infrastructure necessary to avoid latency issues. At its discretion, the Commonwealth will review the options for remediation and if it is viable for the Commonwealth to resolve the latency via a change in the application, the Commonwealth will make the change at the Commonwealth's expense. b) Transition Timelines are set out in the RFP and any changes to those dates will be addressed via the procedures set out in Appendix A (Terms and Conditions). c) The Offeror must provide infrastructure so that application performance remains the same or is improved. d) Baseline metrics are determined on an application by application basis and will be determined during transition planning.
8	Schedule F Statement of Work	Schedule F	23	How is the current geospatial enterprise environment going to be managed? Is a GIS managed services approach being considered?	a) GIS projects will be managed in the same manner as other Commonwealth projects. b) The scope of this procurement does not include outsourcing of GIS-specific services.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
9	Appendix A	11 (b) (2)	13	Certification specified in this section are those held by individuals rather than the organization. What is the Commonwealth's requirement for quantity of professionals holding those certifications?	~~At a minimum, the Chief Information Security Officer (CISO) provided by the Offeror must maintain current security certifications as stated in referenced section of Appendix A. The Commonwealth has not defined the number of individuals that must hold the referenced certifications. Offerors should propose their best solutions.~~
10	Schedule J.2	SL05	3	Please confirm that there is no earn back eligibility for SL05 Application Infrastructure Availability - Basic, while there is earn back eligibility for silver and bronze levels.	Correct, there is no earn back eligibility for SL05 Application Infrastructure Availability - Basic. Silver (SL03) and Bronze (SL04) are earn back eligible.
11	Appendix A Exhibit D.7	13(b)	16-18	Will the Commonwealth make detailed EDC engineering and architectural drawings and descriptions available to Offerors? When? In what form? What will be included?	Details about the EDC facility have been provided in Exhibits D.8 through D.12. The Commonwealth will provide additional engineering and architectural drawings to the selected Offeror during transition planning. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
12	Request for Proposal			If a vendor's data center or cloud offering is shared with other non-Commonwealth clients, do all workers in the facility need the required Commonwealth security clearances or only those specifically employed to perform the Commonwealth's work?	For purposes of submitting a proposal, Offerors should assume all workers in the facility require Commonwealth security clearances. The Commonwealth, at its sole discretion, may grant exceptions.
13	Schedule F Statement of Work	Schedule F	7	How will other Commonwealth State Agency GIS project based solutions going to be managed?	GIS projects will be managed in the same manner as other Commonwealth projects.
14	Schedule J.3	SL22	34	Please define "high risk".	In the referenced section of Schedule J.3, "High risk" is a patch assigned the "Critical" Severity Rating per ITB-SYM006, which defines the Commonwealth's patching policy.
15	Appendix A	21 (b)	29	Please provide detailed information about the Commonwealth's Invoice Processing System and its invoices so that compatibility with this system can be determined.	Invoices will be processed through the Commonwealth's Remedy ITSM system's Billing Module. The current version of the Commonwealth's Enterprise Remedy is 7.6.04. The selected Offeror must remain compatible with the appropriate version of the Commonwealth's ITSM system for the duration of the contract. The billing interface currently is via an XML file transfer and processing.
16	Schedule F	2.3.4	10	What are your encryption requirements for data at rest and data in motion - e.g. FIPS 140-2?	ITBs SEC020 (Data at Rest) and SEC031 (Data in Motion) define the Commonwealth's policies on data at rest and data in motion. Agencies may have additional requirements, such as FIPS 140-2. The selected Offeror will identify additional requirements during transition for individual services and comply with those requirements.

Addendum 9 – Round 1, Part 5

	Doc	Sec	Pg	Question	Answer
17	Request for Proposal	All Exhibits		The exhibits do not provide the necessary system level software and hardware details required for the IBM/Unisys mainframes to propose a “like for like” configuration as required. Please provide the level of detail that is missing.	New exhibits have been added to the RFP. Please see "Exhibit B.8 - Unisys Software - Dorado Libra" contains the current software for the referenced Mainframes and "Exhibit B.7 - IBM MF SW Inventory v3" for additional details. Also please see the following Table SYSTEM/PARTITION HSHA HSHC HSHF HSHD IP's …… 8 4 4 4 MIPS……..…….. 1750 400 850 50 Memory (GW……..…. 4 3 2 2 CIOP (network IOP)…..…. 3 1 1 1 Ethernet PCI (dual)…..….. 12 2 2 2 SIOP (data IOP)……..…….. 3 2 2 1 FIBRE PC ICard (dual)..…. 12 5 10 5 SCSI PCI (dual)……..…. 9 5 2 5 This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
18	Schedule J.3	SL16	25	Should the formula read “= ((Number of Successful Recoveries) / (Total Number of Scheduled Recoveries Attempted)) expressed as a percentage”?	No. The Offeror must report on all Recoveries attempted not just those "Scheduled".
19	Schedule F	3.2.4.6 Security and Firewall	Page 126, #6	How deep will penetration testing go on a system?	Penetration testing must be as deep as is required to ensure an acceptable security posture. Levels of penetration testing must be discussed/approved by application owners.
20	Exhibit B.1			Can the Commonwealth provide more detail regarding the IBM software running on the IBM mainframes?	Please see 6100022698 - Exhibit B.7 - IBM MF SW Inventory v3 for additional details. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
21	Schedule J			Where SLA performance depends upon Commonwealth participation, how is a delay in such participation in the performance to be considered for SLA calculation purposes? An example may be where Commonwealth participation in a project is key to meeting the schedule with a consequence for SLA 11.	Please see the definition #9 (Hold Time or Customer Time) within Schedule J.3 “Additional Definitions" section at the bottom of the schedule.
22	Schedule K	D-04 Service Continuity Architecture and Plan	18	What are the definitions of the DR Tiers (Tier 0, 1, 2, 3 and 4) mentioned in Schedule K on page 18?	Schedule F Section 3.1.3 Datacenter Architecture Requirement #5 states "Offeror must describe its tiered approach to the Disaster Recovery needs of the Commonwealth." The Offeror is to define the DR Tiers. Schedule K, item D-04, "IT Service Continuity Architecture and Plan" requires that the Offeror develop a plan to transition to the appropriate tier.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
23	Schedule F	3.2.1.5.2 para #1	53	Please provide the description for DR tiers referenced as being in supporting documentation.	Schedule F Section 3.1.3 Datacenter Architecture Requirement #5 states "Offeror must describe its tiered approach to the Disaster Recovery needs of the Commonwealth." The Offeror is to define the DR Tiers. Schedule K, item D-04, "IT Service Continuity Architecture and Plan" requires that the Offeror develop a plan to transition to the appropriate tier.
24	Schedule J.1			What section describes the Tiered Service Delivery and DDR requirements to support Schedule F 3.2.1.5.2 on Page 53?	Schedule F Section 3.1.3 Datacenter Architecture Requirement #5 states "Offeror must describe its tiered approach to the Disaster Recovery needs of the Commonwealth." The Offeror is to define the DR Tiers. Schedule K, item D-04, "IT Service Continuity Architecture and Plan" requires that the Offeror develop a plan to transition to the appropriate tier.
25	Request for Proposal	PART III III-4	24-25	If the Commonwealth will not amend the Request for Proposal to include a requirement that the facilities be located within the Commonwealth of Pennsylvania then will the Commonwealth assess the cost of the lost tax revenue and lost jobs against the financial offering of the respondents who would locate outside the Commonwealth?	Schedule I defines the information that will be used to evaluate Offerors' cost submittals.
26	Schedule J.2	All	Default Remedy Type column heading	There is a (c) noted but no reference is provided to what this means. Please provide definition on item (c).	Schedule J.2 has been updated. The definition of (c) was hidden in the prior version. The definition of (c) is "Amount listed for Key Measurements to be used in the event the Key Measurement becomes a Critical Measurement through the Change Management Process. While the Service Level remains a Key Measurement no Default Remedies are due."
27	Schedule F	3.2.4.6	Page 125, Item 7	SLA reporting on server performance and availability should be addressed in section 3.2.4.4 page 115, Item 11. Please clarify that the SLAs that should be addressed in section 3.2.4.6 Item 7 should be SLs 17 and 18.	Security Infrastructure is a critical component of the Infrastructure procured by the Commonwealth. The availability of all infrastructure is included in the configuration of the application centric infrastructure and therefore this infrastructure is subject to the requirements in SL01 through SL23, SL30 and SL31.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
28	Schedule I			Will the "Catalog of Services" cost sheet be used to acquire all necessary hardware and software components not included in a services provider's submitted price for a base Resource Unit? If yes, how will the Commonwealth evaluate the total cost for mainframe and AIX configurations that need to meet or exceed the performance of the current configurations on an apples-to-apples basis?	The "Catalog of Services" will be used for the Commonwealth to acquire all services from the Offeror . The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth.
29	Schedule D	M-11	4	Operational Readiness dependency listed as None under Dependency of Commonwealth. Shouldn't there be a dependency based on the acceptance component?	The "Dependency on Commonwealth" has been modified in the updated version of Schedule D.
30	Schedule J	5.1	5	Can you please elaborate on what is defined as At Risk Amount? It is unclear if it represents the total monthly Services Invoice from the Offeror.	The "At-Risk Amount" is 15% of the total monthly enterprise invoice submitted to the Commonwealth by the contractor each month.
31	Schedule F	3.2.4.7	128	Please provide a baseline of databases that need to be supported, including server platform, database vendor, database major and minor version and number of database instances.	The baseline of databases that needs to be supported are defined in the referenced section of the RFP. Additional detail will be discovered during the transition planning.
32	Schedule F	3.2.5.3	138	Please confirm that the Commonwealth is really looking for "DR Infrastructure on Demand" that implies that it will only be paid for in the event of a disaster versus paying for typical DR services. If correct, please provide your specific requirements for your use of the words "adequate inventory "as used in requirement number 1.	The Commonwealth is not looking for DR infrastructure on Demand as described within the question. The Commonwealth requires DR services to be available for any application as part of the ordered service package. On demand in this requirement indicates that the Commonwealth will change the DR requirements from time to time with or without a minimum duration.
33	Schedule J.3	SL28	42	What is the direct impact to an agency if batch processing is not started on time, but completes on time? If there is no impact in this scenario, measurement of the service level may be superfluous.	The Commonwealth requirements include both SL28 and SL29 in order to ensure that business needs are being met.
34	Appendix A Exhibit D.7	13(b)	16-18	Please provide EDC electric utility bills for the past two years.	The Commonwealth's current billing for electric utility usage is not broken out to define usage specifically for the EDC.
35	Schedule F	3.2.1.1.2	30	To better manage the costs required, please provide an indication on how governance will be applied to ensure agency compliance with enterprise direction.	The Commonwealth's Governance process is defined in Schedule B. The Commonwealth will provide a contract administrator to serve as primary contact with the selected Offeror to resolve governance-related issues.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
36	Schedule F	3.3.2.1	150	Under number 16, the Offeror must make available all system management platforms and tools that are currently supporting the Commonwealth infrastructure. Can a list of the tools required be provided?	The following are application monitoring tools known to currently be in use by the Commonwealth : MS SCOM, MS SCCM, Paessler (External URL Testing), CiscoWorks, NIMS, syslog, Vmware vCenter, Idera SQL DM, Oracle OEM, Big Brother, EMC Data Protection Advisor, JC Metasys, IBM TPC, Tivoli ITCAM, SightLine, Wiley, SAP Solutions Manager, IBM Director, Nagius. For purposes of submitting a proposal Offerors shall assume none of the Commonwealth monitoring tools may be leveraged.
37	Schedule F	3.1.3.4	20	What tools and processes exist today for application monitoring that can or must be leveraged by the Offeror?	The following are application monitoring tools known to currently be in use by the Commonwealth : MS SCOM, MS SCCM, Paessler (External URL Testing), CiscoWorks, NIMS, syslog, Vmware vCenter, Idera SQL DM, Oracle OEM, Big Brother, EMC Data Protection Advisor, JC Metasys, IBM TPC, Tivoli ITCAM, SightLine, Wiley, SAP Solutions Manager, IBM Director, Nagius. For purposes of submitting a proposal Offerors shall assume none of the Commonwealth monitoring tools may be leveraged.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
38	Schedule J	5.1	5	Please provide several specific examples of SLA defaults and how the default credit would be calculated, when the credit would appear on the invoice, when and if the credit could be earned back.	The following are to be used as examples only and represent a limited number of possible scenarios. The application of SLAS in the contract resulting from this RFP may vary from these examples. Assumptions used in these Scenarios: - 30 Day Month | SL03 used in all scenarios (99.900% Required & 99.400% Earnback) - Commonwealth pays $10,000 per month for the infrastructure supporting application Scenario # 1 - NO other SLA defaults have occurred within last 12 months - 2 network outages = 45 minutes + 1 server outage = 20 minutes - Total outage Minutes of 65 minutes - Availability at 99.850% (meets "Earnback Minimum" but not "Required") - Earnback eligible (Offeror must provide a report and track SLA Earnbacks) - Invoice shows $10,000 due from the Commonwealth Scenario # 2 - ONE other SLA defaults have occurred within last 12 months - 2 network outages = 45 minutes + 1 server outage = 20 minutes - Total outage Minutes of 65 minutes - Availability at 99.850% (meets "Earnback Minimum" but not "Required") - Earnback eligible (Offeror must provide a report and track SLA Earnbacks) - Invoice shows $10,000 due from the Commonwealth for current charges and $10,000 credit for previous SLA default (Earnback Credit rescinded) Scenario # 3 - 2 network outages = 45 minutes + 3 server outage = 220 minutes - Total outage Minutes of 265 minutes - NO pending Earnback for this Application - Availability at 99.378% (does not meet "Earnback Minimum" or "Required") - NOT Earnback eligible - Invoice shows $10,000 due from the Commonwealth for current charges and $10,000 credit for SLA default Scenario # 4 - 2 network outages = 45 minutes + 3 server outage = 220 minutes - Total outage Minutes of 265 minutes - Pending Earnback for this Application - Availability at 99.378% (does not meet "Earnback Minimum" or "Required") - NOT Earnback eligible - Invoice shows $10,000 due from the Commonwealth for current charges and $10,000 credit for SLA default plus $10,000 credit for failing to meet the Earnback from pending Earnback Eligible SLA default.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
39	Exhibit B.1 DPH – Asset List	"GAME" Tab	Page 1,Line # 5, Line #14	For the two Unisys Libra 400 machines, please confirm (or clarify) that the Operating Systems are Windows Server (and that MCP in not used).	The Libra 400 machines operate on Windows Server 2003 R2 X64 SP2/MCP 13. MCP13 is used.
40	Schedule F	3.2.4.8	131	"Limited-Use Co-location Services." Although this section states that the Commonwealth's goal is to move to a fully managed infrastructure services model, it does not place a timeframe or amount of "Limited-Use Co-location services needed. Please provide the requirements for the amount of co-location floor space needed and the length of time that floor will be needed.	The maximum space needed to accommodate EDC Co-Location space is 3,800 sq. ft. In addition, cooling and power requirements for approximately 500 servers and storage arrays must be provided. The length of time that space, cooling and power requirements will be needed will be dictated by the business and technical lifecycle of the co-located applications and associated infrastructure.
41	Schedule I Offeror Pricing Forms	4.Managed Services (Only) 10. Catalog of Services		How do unit rates for catalog services tab #10 differ from unit rates to be provided in Managed Services tab #4?	~~The Offeror is to fill Tab #4 (Managed Services Only) with the total cost of the combined catalog items to meet the configuration defined within the Tab.~~ ~~The Offeror is to fill Tab #10 (Catalog of Services) with the individual price point / configuration items that are being offered to the Commonwealth.~~
42	Schedule I	1.Volumetrics		Does the Commonwealth need separate volume metrics for database support services or disaster recovery? Or should these services be allocated across all pricing rates?	~~The Offeror is to provide Database support services within Tab 6 (Technical Staff Rate Card) only. DR services are specified within the scenarios defined within Tab 1 (Volumetrics). Therefore, the Offeror should not allocate these services across all pricing rates. Information provided by the Offeror in Schedule I is intended for cost evaluation purposes only.~~
43	Schedule F	2.3.4	11	With regard to item 2: DBFW: What is the Commonwealth's expectation with regard to the Offeror's responsibility to Discover new databases and database objects in scope for security and compliance projects and automatically apply appropriate protection and audit policies? No, not automatically enabled on case by case basis How will the Commonwealth contribute to this effort?	The Offeror must discover and report on new databases and objects that are in scope for security and compliance projects. The Offeror should report the discoveries to the Commonwealth and take appropriate action once directed to do so by the Commonwealth.
44	Schedule J.3 Schedule F	SL20 3.2.1.2 #5	30 39	This SLA describes a Formal RCA as due in 10 days. Schedule F, section 3.2.1.2 #5 on page 39, requires an RCA within 5 days. Are these addressing the same requirement? If so, which applies?	The Offeror must provide the RCA within ten (10) Business Days from the request of the RCA. The requirement specific to delivery of the RCA report has been modified in the updated version of Schedule F.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
45	EDC tour	Tour		What percent of the raised floor is open and available for additional load?	The percentage of raised floor that is open and available for additional load changes weekly based on virtualization efforts.
46	Schedule J.3	SL23	35	The calculation may incorrectly count a Change Management Request in the denominator when it may actually be scheduled in a later period. Should the formula read "=((Number of Successful Change Management Requests) / (Total Number of Change Management Requests Scheduled)) expressed as a percentage"?	The referenced formula has been modified in the updated version of Schedule J.3.
47	Schedule J.3	SL30	44	The calculation appears to incorrectly counting total reports in the denominator when some part of the total reports may actually be scheduled for delivery in a subsequent measurement period. Should the formula read "= ((Number Of Reports Delivered On Time) / (Total Number Of Reports Scheduled To Be Delivered)) expressed as a percentage"?	The referenced formula has been modified in the updated version of Schedule J.3.
48	Schedule F	3.2.1.2	38	In requirement 2, a reference to requiring Raw Data Storage (Archives) from the Service Level Management tools is required. Is there a required minimum amount of time (one month, 3 months, one year) that the archive must be online or retained to support this capability to allow Commonwealth access to the raw data?	The selected Offeror is responsible for storing raw data used to generate SLA reports for the duration of the contract plus 3 years. The selected Offeror must make that raw data available to the Commonwealth via the Offeror hosted Knowledge Management Portal for no-less than the most recent 13 months. Data older than the most recent 13 months must be provided on request in a format prescribed by the Commonwealth within 5 business days.
49	Schedule F	3.3	141	Who has the financial responsibility for 3rd party software related to the "additional licenses needed for the transition of service" as defined in this section?	The selected Offeror is responsible for the additional third-party licenses required for transition.
50	Schedule F	3.2.4.1	94	Is the Offeror expected to provide SSL hardware offloading capabilities for the web applications?	The selected Offeror must provide SSL hardware offloading capabilities for web applications. It may provide this capability with any solution that utilizes industry best practices.
51	Schedule F	3.2.3	85	When will the Service Provider be responsible for any SLAs penalties for facility failures related to the EDC facility?	The selected offeror will become responsible for the SLAs for the services provided from the EDC upon completion of the EDC transition.
52	Exhibit B.1	Mainframes - IBM	Lines 14-96	This exhibit shows the current zLinux images running for DOT. This shows fewer machines than the Schedule I Base Units -Volumetrics of 100. Could the Commonwealth please reconcile?	There are currently 93 zLinux images running for DOT. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth.

Addendum 9 – Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
53	Schedule J.3	SL01 - SL05	9-Jan	Please list the server hardware or infrastructure characteristics that drive each of the five levels of servers and which supports the application availability SLAs. Ex.: Platinum = SAN Attached, dual HBA, dual network connections, clustered servers in an active/active configuration.	When the Commonwealth orders a service, it will work with the selected Offeror to identify the hardware or infrastructure required to support the requested SLA.
54	Schedule F	2.3.4 Data Protection	11-Oct	Is Offeror monitoring and/or reporting of confidential data usage expected for both Offeror and Commonwealth staff?	Yes, the selected Offeror will monitor and/or report on confidential data usage for both Offeror and Commonwealth staff.
55	Schedule J.3	SL22	34	Some vendors utilize Critical rather than High-Risk to denote patch risk. Are the 2 terms synonymous?	Yes. Please refer to ITB-SYM006 for the Commonwealth's patching policy. For this SLA, "high risk" is a patch assigned the "Critical" Severity Rating per the ITB.
56	Schedule F	3.1.2	18	Item 7 references CJIS data. CJIS requires encryption of user encryption keys as well as data. Whose responsibility is it to ensure such levels of security typically involving HSMs?	The requirement of the signed CJIS Security Addendum allows the responsibility to reside with a vendor on behalf of PSP. The final decision on responsibility will depend upon the proposed solution and will be discussed in more detail during the agency transition planning.

Addendum 11 – Round 1, Part 6					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
1	Schedule F	3.2.3.1	85	· Please comment on the importance (High, Medium, Low) of the following requirement of certification at the datacenters: Microsoft Gold Certified Partner, Hosting & App Services HP SP Signature Certified, Hosting Services SAS 70 Type II Certified Cisco Powered Network PCI DSS	The Commonwealth does not provide detailed evaluation criteria.

Addendum 11 – Round 1, Part 6					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
2	Security Management	3.2.2.5	76	Q1. Please define the scope of the offeror's responsibilities for the below requirement. The Offeror must support all related system audits at the Offeror's expense". "The Security Management service must ensure the confidentiality, integrity and availability of Commonwealth information and infrastructure systems. All support and implementation activities must be conducted in accordance with, but not limited to, leading industry and Commonwealth standards, which included, but are not limited to, ISO 27001:2005 and ISO 27002:2005. The Offeror must support all related system audits at the Offeror's expense". Q2. Please comment as to whether offeror is to provide assessment services regarding the security posture of each agency in order to determine its level of compliance with all pertinent laws, regulations, and policies in the current state, transition state, and final [end] state architectures…… The Offeror must work with each agency to understand and ensure compliance with all laws, regulations, and policies as it pertain to each individual agency.	Q1: The selected Offeror must provide resources, documentation, physical tours, policies, etc. to provide whatever is required for system audits at the Offerors expense. Q2: Yes, the selected Offerer must provide assessment services under agency guidance.
3	Asset Schedules	All	All	Please provide the ages of the assets or should the Offeror make a simplifying assumption such as 20 percent of the assets to be refreshed each year?	~~For the purposes of submitting a proposal Offerors should assume 20% of the assets to be refreshed each year.~~
4	Schedule F	3.2.2.4	Page 72	How many Disaster Recovery plans does the Commonwealth have in place today?	The Commonwealth has multiple disaster recovery plans in place today, utilizing multiple DR sites with varying levels of DR capabilities. Current disaster recovery needs are determined at an application level and agency DR requirements will be determined during the transition phase of the procurement. The Commonwealth's disaster recovery needs will be based on the services procured through the catalog of services.
5	Schedule F	2.3.4 Data Protection	10	Regarding encryption, where is the data that needs to be encrypted located? What platforms are involved? For data in motion is encryption required in the server and on the wire ("end-to-end")?	The Commonwealth expects the selected Offeror to determine this during transition planning in cooperation with the application/data owner.
6	Schedule F	2.3.4 Data Protection	11-Oct	What are the tools in place today for DLP and DBFW?	The current DLP solution is Cisco Ironport, which is used to monitor outbound email only. Email DLP is only in place in a limited fashion with only some small groups using DLP rules. Ironport is also used to encrypt data upon designation by the sender. There are no current DBFW tools in place.
7	Schedule F Schedule I			For those services requested in the SOW without a corresponding Baseline Units - Volumetric in Schedule I, does the Commonwealth expect those prices to be included in the Service Catalog? Without a baseline, how will the Commonwealth ensure a level evaluation between bidders? Examples of such services include: DR Planning and Testing, ERP Hosting, Security & Firewall and Database Management Services.	~~1. Yes, provide a price for all services in the catalog.~~ ~~2. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth.~~
8	Schedule I	1.Volume metrics	Lines 216-218	The storage metrics seem inconsistent compared to today's actual allocations. Are these as desired by the Commonwealth?	The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth. Offerors must respond to Schedule I as presented.

Addendum 11 – Round 1, Part 6					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
9	Schedule F	3.1 Establish Datacenter Architecture	12	If a recompile is required is it still considered a like-for-like platform?	No
10	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Are there any areas on the property that is restricted for locating any equipment?	Please clarify the question and provide more details or examples.
11	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Could the Commonwealth describe the operation of the electrical system in the event of a power outage, generator failure and UPS failure?	This information is provided in Exhibit D.12 - Electrical failure sequence. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
12	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there a drawing showing the locations of the PDU's/ RPP's in the data center? Can the drawing be provided for review?	Details about the EDC facility have been provided in Exhibits D.8 through D.12. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
13	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Is there a drawing indicating the location of each CRAC unit in the data centers? Can it be provided for review?	Yes, the document exists and can be provided for review; however, it is confidential. To receive a copy, please contact Sheryl Kimport, Issuing Officer.

Addendum 11 – Round 1, Part 6					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
14	Schedule F	3.2.2.5 Security Management	76-79	a. Does CoPA have the in house skills (certified) to harvest SIEM benefits? Is a predictive monthly cost a requirement of the security environment? Does CoPA require an over SOC, single pane of glass approach? In other words, is there a method in place to map security requirements, CoPA regulatory requirements and SLA management across the contract? Does CoPA require 24x7 support? Does CoPA expect the Offeror to apply business analytics? In other word, is it expected ha intelligence to feed the ESM implementation? Who will be responsible to manage the tuning and operation of SourceFire IDS?	The Commonwealth has the in-house skills to harvest SIEM benefits. Offerors shall include security costs in the infrastructure costs. A separate charge for security is not allowed. The Commonwealth does not require an over SOC, single pane of glass approach. The Commonwealth requires 24x7 support. The Commonwealth requires the selected Offeror to apply security analytics. The selected Offeror will be responsible to manage the tuning and operation of SourceFire IDS.
15	Schedule F	3.2.1.1.1 Financial Management	27-29	i. To what extent does CoPA require a working solution for chargeback to allow States to comply with federal regulatory requirements for equality of charging for state and federal programs and justify their methodology: by not using this, are we not introducing undo risk of penalties into our bid? For example, are any of the below requirements of CoPA for Chargeback? Optimize resources by reviewing standard “Top 10” consumption reports Understand the cost details that went into the bill Understand what organization is using the most resources View invoice data online and drill down for detail information Allows client to manage chargeback system Apply price uplift to agency charges Apply additional agency or State/Company specific charges to bill Include charges for non-Offeror services for a single view of charges	The Commonwealth is not asking for a full charge back system. The agency invoices should provide billing detail so the agency has full transparency into the services they consumed. Billing details shall include all services procured by agency general ledger (GL) code. A service may be allocated across multiple GL codes. And this will suffice for equality of charging for state and federal programs. Schedule F has been revised to reflect the requirements.
16	Schedule F	3.3 Transition Services	141-155	Could the Commonwealth provide freeze periods for each agency when workloads cannot be migrated?	See Exhibit O - 2012 Agency NMRs for the No Maintenance periods that occurred during 2012. The Commonwealth cannot guarantee that the periods listed in Exhibit O will be identical during transition. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
17	exhibit n	Penndot		Is there a non-application management network for things like backup, monitoring, patching, SA access? If so, is this also a standard across the data center?	No, there is no non-application management network for things like backup, monitoring, patching, SA access, etc.
18	EDC tour	Tour handout		What is the disposition of all material in the warehouse at initiation of this contract?	The Commonwealth will relocate the material within the warehouse if requested by the selected Offeror.
19	Schedule F Statement of Work	Schedule F	23	How is the current geospatial enterprise environment going to be managed? Is a GIS managed services approach being considered?	This is an updated response to Question #8 from Round 1 Part 5. a) GIS projects will be managed in the same manner as other Commonwealth projects. The Offeror will be required to provide web servers and database infrastructure for GIS services procured through this contract. b) The scope of this procurement does not include outsourcing of GIS-specific services.

Addendum 11 – Round 1, Part 6					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
20	Request for Proposal			We understand that the Commonwealth expects the Offeror to implement a Database Firewall to help monitor privileged user and application user access. Has the Commonwealth determined the privileged user and application user groups that need to be monitored? Please provide the number of user groups that have to be monitored using DBFW to help the Offeror estimate the effort to implement?	No, the Commonwealth has not made this determination. This will be determined during transition planning.
21	Appendix A	9 (e)	11	How does the Commonwealth intend to disclose specific classification of its data to vendors to enable vendor to provide a solution which protects data based on its classification?	Data classifications are determined at agency and application level and will be determined during the transition phase of the contract.
22	Appendix A Exhibit D.7	13(b)	16-18	Please provide detailed descriptions of the EDC's mechanical/HVAC/CRAC/CRAH systems. What is the facility PUE?	Details about the EDC facility have been provided in Exhibits D.8 through D.12. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
23	Appendix A	44 (a)	68	Knowing that the PATCH background check specified in ITB-SEC009 will not report out of state infractions, will the PATCH system be the only requirement necessary for the required background checks?	No. Additional background checks must be performed to meet all requirements of the RFP, including CJIS and CHRIA requirements.
24	Schedule F	2.1	5	It states “Offeror must create and maintain test environments”; Is it mandatory for each application to have a Development, Integration, SAT/UAT, Training, Load Testing, Pre-Production and Production environments (i.e. as stated section 2.1, pg. 5) or will applications have a variable subset of these environments? What part of the volumetrics include these test environments? Which Service Tiers include these test environments?	Each application owner determines the types and counts of environments. The Offeror must be prepared to support all requested environments as ordered. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. The Volumetrics in Schedule I will be used to evaluate Offerors’ cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth. The test environment may reside in any “tier” based on the need of the application owner.
25	Schedule F	2.1	6	What is the Commonwealth expectation regarding the transformation of dedicated infrastructure to Capacity on Demand (CoD)? (rationalize)	This procurement is to provide the capability of CoD to the application owners. The application owners will determine the possibility and timeline for transformation to CoD.
26	Schedule F	3.1	13	Please define “critical Commonwealth processing”. This applies to the requirement for “each datacenter must be capable of supporting critical Commonwealth processing in the event the other datacenter goes offline”. In addition, does this requirement apply to all “critical Commonwealth processing” including those that run on IBM and Unisys Mainframes that will now require multiple platforms for those environments?	• Critical Commonwealth processing is any application determined by the Commonwealth, in its sole discretion, to be critical. For those applications with a DR subscription, the DR location must be within a geographically disperse datacenter as required by the RFP. • Yes. The platform is independent of the requirement. If DR is subscribed to for the application, then the required infrastructure must be provided by the Offeror
27	Schedule F	3.1.2, Requirement 4	17	What constitutes a "Commonwealth authorized user?" Does this include "exterior" applications that traverse the internet to gain access to Commonwealth servers and applications?	A "Commonwealth authorized user" is any user connecting to a Commonwealth resource. This does include "exterior" applications that traverse the internet to gain access to Commonwealth servers and applications
28	Schedule F	3.1.3	20	What are the specific requirements for monthly reporting of "efficiency"?	This requirement now reads "Offeror must describe its overall strategy to provide real-time scheduled system performance, operations, monitoring and capacity reporting for the entire datacenter architecture." Section 3.1.3 requirement #4 has been revised to reflect this change.

Addendum 11 – Round 1, Part 6					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
29	Schedule F	3.2.1.1.1	27	Please provide a summary of the BMC billing module (e.g., what software product) and billing format.	Invoices will be processed through the Commonwealth's Remedy ITSM system's Billing Module. The current version of the Commonwealth's Enterprise Remedy is 7.6.04. The selected Offeror must remain compatible with the appropriate version of the Commonwealth's ITSM system for the duration of the contract. The billing interface currently is via an XML file transfer and processing.
30	Schedule F	3.2.1.3	41	What are individual Agency business related change restrictions or freezes based upon the example in requirement 1?	See Exhibit O - 2012 Agency NMRs for the No Maintenance periods that occurred during 2012. The Commonwealth cannot guarantee that the periods listed in Exhibit O will be identical during transition. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
31	Schedule F	3.2.2.2 para. #3	64	To what degree may an agency delay or refuse reasonable plans and efforts to migrate their applications?	This is an internal Commonwealth management issue and will be resolved internally.
32	Schedule F	3.2.2.2-3	66	As it relates to CJIS and CHRIA requirements? Please provide all the required security and encryption requirements expected. Is the Commonwealth meeting all expected security requirements today? Are there application limitations that make meeting such CJIS requirements difficult or impossible?	1. The Commonwealth provided these details in Exhibit J.1 (Security Compliance Guidelines), Exhibit G.12 (PSP - CHRIA Handbook), Exhibit G.6 (PSP - CJIS Security Policy v5-1_07132012), and Exhibit G.7 (PSP - Summary of CJIS Requirements). This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer. 2. Yes. The Commonwealth is meeting these requirements today. 3. No. The Commonwealth is meeting these requirements today.
33	Appendix A Schedule F	9(a), 12(d)(3), 38(c), 78(b)(1) 3.2.2.2 #3 3.2.2.5 para. 2	10, 16, 58, 93 76 66	Does the Commonwealth expect that services will be provided while meeting all potential/possible applicable regulations simultaneously? When regulations are in conflict (e.g. CJIS separation requirements) how is the applicable regulation to be determined? Which regulations apply to which part of the volumetrics provided in the Pricing Schedule? Please provide counts and the applicable segregation and separation requirements for the volumetrics.	1. Yes. 2. The agency responsible for interpreting the regulation determines how conflicts are resolved. In general, the more stringent requirement would apply. 3. The volumetric are not compiled by regulation. 4. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth.
34	Schedule F	3.2.2.5 #3	77	How deeply and widely does the Commonwealth want quarterly penetration testing? Subset, all, targeted?	Penetration testing must be as deep as is required to ensure an acceptable security posture. Levels of penetration testing must be discussed/approved by application owners.
35	Schedule F	3.2.4.1	93	Should a Production Control Management requirement, such as 3.2.4.4 requirement 3 be included in Windows Support?	Yes. Requirement #3 in section 3.2.4.4 states the requirement applies across platforms (eg, Windows, Unix, and Mainframe).
36	Schedule F	3.2.4.1	94	Is the management or support of DNS or WINS within scope of Offeror's responsibility?	Yes, the management and support of DNS and WINS will be the responsibility of the selected Offeror.
37	Schedule F	3.2.4.1	94	Is the management or support of Public Key Infrastructure (PKI) within scope of Offeror's responsibility?	Yes, the management and support of Public Key Infrastructure (PKI) will be the responsibility of the selected Offeror.
38	Schedule F	3.2.4.1	94	Is the Offeror expected to procure, install or support SSL certificates from VeriSign or Entrust?	The Offeror must provide SSL certificates, including installation and support, as part of its Service offering through the Service Catalog.

Addendum 11 – Round 1, Part 6					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
39	Schedule F	3.2.4.4	110	Is the expectation to have the Contractor provide full management of the Batch service based upon Agency requirements or enable the Agency to use the batch software directly to schedule the batch activities?	This will be determined at an application level and both may be required based on the agency needs.
40	Schedule F	3.2.4.5	117	Provide all tools and apps currently being provided; the examples provided are not found in the exhibits identified.	The following are application monitoring tools known to currently be in use by the Commonwealth : MS SCOM, MS SCCM, Paessler (External URL Testing), CiscoWorks, NIMS, syslog, Vmware vCenter, Idera SQL DM, Oracle OEM, Big Brother, EMC Data Protection Advisor, JC Metasys, IBM TPC, Tivoli ITCAM, SightLine, Wiley, SAP Solutions Manager, IBM Director, Nagius. For purposes of submitting a proposal Offerors should assume none of the Commonwealth monitoring tools may be leveraged.
41	Schedule F	3.2.4.5	120	Requirement number 6 states “as required”. Please define as required and who will be financially responsible for providing this technical advice and support.	The selected Offeror will be responsible for providing this technical advice and support at its cost. Detailed engineering specification and assistance is considered a consulting type engagement and therefore would be chargeable to the Commonwealth from the Rate Card.
42	Schedule F	3.2.4.7	129	(4) Refer: "Provide a multi-tiered level of service (e.g. Platinum, Gold, Silver, Bronze, and Basic) for Oracle, Sybase, Microsoft SQL, IMS or DB2 database platforms." Sybase and IMS are not “current” database standard per ITB STD-INF001A. Confirm that Sybase and IMS support is required.	Sybase and IMS support is required.
43	Schedule F	3.2.4.8	131	Refer: “Currently there are to 3 areas within the Commonwealth EDC that are supporting co-location Services. EDC facility summary is provided as Exhibit D.7. While many of these systems will be migrated to a fully managed service over time, the Offeror shall plan for co-location space in its Datacenter Architecture.” Provide more details regarding the 3 areas supporting co-location services – specifically, floor space, weight, power and cooling requirements required.	Maximum space needed to accommodate EDC Co-Location space is 3,800 sq. ft. Cooling and power requirements for approximately 500 servers and storage arrays is currently in place. Additional information on the EDC environment will be determined during transition.
44	Exhibit L - Schedule F -	3.3.2.2	152	Has the Commonwealth categorized the risk levels for the applications described in Exhibit L? This will help estimate the effort required for performing the Baseline Security Risk and Vulnerability Assessment.	No, the Commonwealth has no comprehensive list of application security risk or vulnerability assessment.
45	Schedule J.3	SL20	30	The description speaks to Formal Root Cause Analysis while the calculation does not. In addition, the calculation may incorrectly include a Formal Root Cause Analysis in the total when that analysis may be due in a subsequent period. Should the formula read “= ((Number of Formal Root Cause Analysis’s Delivered within Established Interval) / (Total Number of Formal Root Cause Analysis’ Due)) expressed as a percentage”?	Schedule J.3 SL20 has been revised. The formula reads “= ((Number of Formal Root Cause Analyses Delivered within Established Interval) / (Total Number of Formal Root Cause Analyses Due)) expressed as a percentage”.
46	Schedule J.3	SL23	35	If a change is backed out due to a resulting Severity 1 or Severity 2 problem, is the change ignored for purpose of the SLA calculation?	No. Backed-out Changes due to a failure relating to the change is not considered a successful change and will not be ignored for SLA purposes.
47	Schedule J.3	SL28, SL29	42, 43	How are batch jobs that are run “as needed” to be counted for purposes of these measurements? Are they to be included in the calculation’s denominator as “scheduled”?	All batch jobs that are run "as needed" will be run at a "scheduled" time. These jobs must be included in the calculation, including the denominator as "scheduled."

Addendum 11 – Round 1, Part 6					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
48	Exhibit K		11, 12	What are the historical and expected incident handle times at the Service Desk?	This procurement includes consolidating several datacenters and each datacenter has a separate support organization. Therefore there is no consolidated historical data available. The Commonwealth is purchasing managed services as part of this procurement and incident handle times impact the availability of a service. The SLA's determine the availability requirement of the service. Therefore, differing levels of SLA availability (Platinum, Gold, Silver, Bronze and Basic) should include differing incident handle times. Each Offeror must establish "incident handle-times" to meet the SLAs for the service provided to the Commonwealth.

Addendum 11 – Round 2, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
1	Schedule I -- Offeror Pricing Forms	Volumetrics		Is it appropriate for vendors to assume that the tapes specified in Schedule I in the Volumetrics tab are equivalent in capacity to LTO4 tapes and that vendors can propose new technology but pricing equivalent to LTO4 tapes?	For purposes of submitting a proposal, Offerors should assume the tapes are equivalent in capacity to LTO4 tapes. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. These scenarios are for evaluation purposes only. Actual volumes will vary.
2	Schedule I – Offeror Pricing Forms	Volumetrics		Given the storage tier definition in Schedule I that indicates 10K and 15K drives in both "Tier1 Raid5" and "Tier2 Raid10", should vendors assume that the slower Tier1 RAID5 uses 10K drives and the Tier2 RAID10 uses 15K drives?	For purposes of submitting a proposal, Offerors should assume that the slower Tier1 RAID5 uses 10K drives and the Tier2 RAID10 uses 15K drives. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. These scenarios are for evaluation purposes only. Actual volumes will vary.
3	Exhibit K	Datacenter Related Volumetrics	11,12	Of the monthly volumes listed on pages 11 &12, what percentage of these volumes are Service Requests? If zero, please provide the expected monthly Service Request Volumes that are in scope by type (i.e. ID Admin, PW Resets, etc).	The volumetric provided in Exhibit K do not differentiate between incidents and service requests. The Commonwealth is unable to provide expected monthly service request volumes.
4	Exhibit K	Datacenter Related Volumetrics	11	Of the monthly volumes listed on page 11, what percentage should the Offeror expect to receive during Prime Hours? Off-hours? Weekends?	For purposes of submitting a proposal Offerors should assume 95% are received during Prime Hours and 5% are received during off hours and/or weekends.

Addendum 11 – Round 2, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
5	Schedule I	TAB 1 Volumetrics		For proper financial analysis of this RFP will the Commonwealth be providing the appropriate configurations in Schedule I to support the specified SLA levels mandated (Platinum, Gold, Silver, Bronze, and Basic)?	The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. Actual volumes will vary.
6	Schedule J.3	Section 2.Service Level Details		For "Managed Only" RUs where the Commonwealth has provided Commonwealth-owned infrastructure, please confirm that availability measurements will exclude issues related to Commonwealth provided assets. If Commonwealth owned asset issues are not excluded, please confirm that the Commonwealth will reconfigure hardware and/or purchase the necessary maintenance agreements to meet the various SLA tier requirements defined under "Managed Only" volumetric in TAB 4.	Availability measurements will not exclude issues related to Commonwealth provided assets. The selected Offeror must reconfigure hardware and/or purchase the necessary maintenance agreements to meet the various SLA tier requirements.
7	Schedule F	3.2.3.2	89	The Commonwealth requires the offeror to provide a structured disk-2-disk backup approach for systems that currently utilize this approach. Since there appear to be only options to provide pricing for tape, where in Schedule I should the offeror place pricing for their disk-2-disk backup approach?	~~Pricing should be provided in Schedule I, Tab 10 (Catalog of Services).~~
8	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	Is an extended, holiday weekend (3 days) considered an acceptable outage window? If not, could the Commonwealth please define an acceptable outage window?	An extended holiday weekend (3 days) is not necessarily an acceptable outage window. Acceptable outage windows will depend on the agency involved and the resources being transitioned. As indicated on Page 143 of Schedule F, "The Offeror must coordinate with each Commonwealth agency or datacenter representative to create a Facility Specific Transition Plan for each targeted facility".
9	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	Does the Commonwealth have limitations or implementation guidelines regarding DB stacking, such as multiple databases/schemas running under a single OS image and a single DB software instance?	There are no specific guidelines, but there could be restrictions in this area based on agency requirements including state or federal policy requirements for data separation. These requirements would be documented as part of the discovery process and factored into agency transition planning.

Addendum 12 – Round 1, Part 7					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
1	Request for Proposal	II-10	Page 22	What is the proposed mechanism for resolving discrepancies that result from unanswered questions, incomplete answers to questions, or discrepancies discovered during due diligence?	The governance process will be available to address these types of issues.
2	Schedule F –	3.2.4.3 ERP Hosting-SAP/Oracle	Page 105	a. If technical support of Oracle Applications software is in Offeror's scope of work then: What is the current version of Oracle Applications that has been implemented at PLCB? What Oracle modules have they implemented at PLCB? Requirement 2 (on Page 106 of section 3.2.4.3) mentions "Monitor local system operations, troubleshoot and resolve operational issues" in Schedule F. Is this monitoring restricted to the servers on which we host Oracle Applications or does this also include monitoring the Oracle Applications as well e.g. monitor system alerts, workflow alerts etc.? Requirement 7 (on Page 107 of section 3.2.4.3) mentions "Ensure server operating systems are maintained with current patch level". Is the Offeror required to patch the Oracle Application software as well? How big is the user base that needs to be supported for Oracle Applications? Please confirm that the Offeror will not be responsible for the following functions as these are not mentioned in the RFP: Maintaining application configurations for Oracle Modules that have been implemented Understand and maintain any current customizations made to base Oracle Applications Understand integration of Oracle Applications to any 3rd party systems and maintaining these 3rd party systems	a. The Commonwealth requires the selected Offeror to support PLCB's infrastructure for its Oracle ERP application. PLCB does not require application level support for this environment, so the version of Oracle in place at PLCB and the Oracle Modules in place at PLCB are not relevant to this procurement. b. Monitoring system operations in relation to this requirement is restricted to the servers on which Oracle Apps are hosted. c. The Offeror is not required to patch the Oracle Application software for the PLCB. d. The size of the PLCB's user base for the Oracle Application is 4,000 users. e. The Offeror is not required to maintain the Oracle Module configurations and is not required to understand and maintain the current customization made to the base Oracle Applications.
3	Schedule I	1. Volumetrics	N/A	Lines 195 – 202: Please provide a list of device models or actual devices that would be included in this category, and confirm that the level of support required for these devices is as described in Schedule F, Section 3.2.4.8, Limited-Use Colocation Services.	The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. Actual volumes will vary.
4	Exhibit J.1,	Maturity Level	Page 8	"The Provider is obliged to obtain a Statement on Auditing Standards No. 70 (SAS 70) II certification for the Services provided under this Agreement." When is the SAS 70 II certification due?	The requirement should refer to SSAE 16, not SAS 70. The selected Offeror must provide copies of initial and annual SSAE 16 audits pursuant to Schedule K, Section D-08, "Facilities Management Plan" for each datacenter used to service the Commonwealth at the Offeror's expense.
5	Schedule I	1. Volumetrics	N/A	Line 187-189 list GB volumes. Please provide volume allocation by Server Configuration and by Application.	The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. Actual volumes will vary.

Addendum 12 – Round 1, Part 7					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
6	Schedule I	1. Volumetrics	N/A	Line 192 list GB Stored. Please provide the daily data percent change to be backed up.	The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. Actual volumes will vary.
7	Schedule F	3.1.3 Datacenter Architecture and Technology	18-21	a. Have policies been documented, and data rationalized to the extent that we can identify Tier 3 and Tier 4 use cases (high latency) which can be moved to cheaper storage media? Is there a desire to lower the BAU base case price by implementing a pay as you go "target" storage environment for Tier ¾ which would not require capacity on the floor in the two production data centers? Does CoPA have a requirement to access their archives (search select for data) and to what extent? Does the capacity on demand solution we have in mind have encryption both at rest and in transit? Can you please quantify the filenet workload which can be moved off archivable content to save money?	a. The Commonwealth does not have documented policies or data rationalized sufficiently to identify Tier 3 and Tier 4 use cases. b. No. The Commonwealth is on a fixed budget and at this time the Commonwealth will subscribe to the amount of storage desired. c. Yes. This requirement is application dependent and is to be determining during transition. d. Please clarify this question. e. No. The Commonwealth has not quantified the filenet workload that could be moved off of archivable content.
8	Schedule F	3.3 Transition Services	141-155	Could the Commonwealth provide the acceptable outage windows for each application?	The Commonwealth is unable to provide an acceptable outage window for each application. ITB NET0015 references the methodology used to request periods of time where maintenance of Infrastructure is not to occur. Acceptable outage windows are determined on a case by case basis based on the application. Commonwealth does have several applications that are considered public safety and an acceptable outage window is less than 2 hours. However, most of the applications have out window tolerances of six to eight hours.
9	Services Catalog	Schedule C	2	Services Catalog is blank. Can you please provide a catalog of services that are relevant to this project, including GIS services?	~~This was intentionally left blank for the Offerors to provide the proposed catalog for Commonwealth review and evaluation. Schedule I tab 10. Catalog of Services has been revised to include a sample Catalog of Services. GIS projects will be managed in the same manner as other Commonwealth projects. The scope of this procurement does not include outsourcing of GIS specific services8.~~
10	General	All	All	If a Service Provider's attempt to provide a "like for like" infrastructure solution based on the exhibits is completely undersized from a capacity point of view, who will have the financial responsible to correct the deficiency, the Service Provider or the Commonwealth?	Exhibits are a point in time snapshot and are subject to change. The Commonwealth will order computing services from the Service Catalog on a subscription basis; therefore the service provided by the Contractor must meet the Commonwealth's needs as ordered.

Addendum 12 – Round 1, Part 7					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
11	Schedule F	2.3.1	8	Please provide a comprehensive list of agency requirements for multiple security and network zones?	The Commonwealth has seven (7) datacenters and each has several security zones. This information will be documented as part of the Discovery process during transition.
12	Schedule F	3.1	12	How will the Commonwealth govern requests for specific vendor technology by participating agencies especially if request are not consistent with a cost effective architecture?	The Offeror is to provide a Catalog of services from which the Commonwealth will order from. If an agency requests a service not in the Catalog, the Contract Change Process will govern requests for additional services.
13	Schedule F	3.1.1	14	Will vendor be able to consolidate workload from the EDC and agency server farm to another location?	Yes, with the application owner's approval. The Offeror must utilize the EDC as one of its datacenters and propose a minimum of one additional datacenter to meet the 2+ architecture requirement. It is the Offeror's option to utilize the EDC as one of its primary datacenters within its proposed solution.
14	Schedule F	3.1.1 para #1	13	Please define "integrated, qualified facilities".	The referenced requirement states "All Datacenters will be managed and maintained by the Offeror, including the Commonwealth's EDC and may be either a standalone facility, or integrated into existing qualified facilities." A qualified facility is any facility which meets the requirements of this RFP and is listed in Schedule E - Datacenter Locations.
15	Schedule F	3.1.3	21	Will the vendor have access to the Commonwealth's Remedy based CMDB? Does the Commonwealth's CMDB currently contain accurate inventory of all Commonwealth assets and relationships?	The intent is to share data between the Commonwealth's Enterprise Remedy's CMDB and the winning Offeror's CMDB for full visibility of the commonwealth's infrastructure for Incident, Problem, Change and Billing management. Currently, the CMDB contains only a partial inventory of the Commonwealth's assets but there is an ongoing project to improve the accuracy and to include assets not yet in the CMDB. It is not anticipated that the Commonwealth's Enterprise Remedy CMDB projects will be completed before the transition for this procurement begins.
16	Schedule F	3.2.1.1	24	Does the Commonwealth have specific requirements for interim contract management procedures which are expected to be different from final contract management procedures?	Yes, Offerors must describe interim procedures to monitor and manage service delivery while the service are being transitioned from the Commonwealth to the selected Offeror (conforming to Commonwealth policies and procedures) including but not limited to the following: Problem Management, Change Management, Service Level monitoring and reporting, physical and logical security, project management, etc.
17	Schedule F	3.2.1.1.1	27	What is the network connectivity today that connects the various state agencies back to the Federal Gov't?	It is a combination of direct links over telecommunications circuits provided by the Federal Government or over the internet.

Addendum 12 – Round 1, Part 7					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
18	Schedule F	3.2.4.3	108	(8) Refer: "User Account Management: Provide certified system administration staff to create and maintain the registration of profiles, associated groups, and the security permissions required to service the approved client base of the system and application." Confirm that Offeror is expected to support user account management within ERP application. Confirm that Offeror is expected to support user account management within applications running on Linux/AIX systems.	No, the Offeror is not expected to support user account management within ERP applications. No, the Offeror is not expected to support user account management within applications running on Linux/AIX systems
19	Schedule F	3.3.2.1	150	Is it expected that the existing service management data (e.g., incidents, change requests) will be transitioned to the Offeror's service management platform? What exact data should be transitioned to the Offeror's service management platform?	There is no expectation that this data will be transitioned to the selected Offeror's platform at this time, but if later desired, the Commonwealth will provide that information as part of transition.
20	Schedule J.1	5	5 & 6	How is the Service Level Default identified? Please provide an example.	A Service level default is defined as not meeting or exceeding the defined service level "Minimum" or "Target" as defined within Schedule J.3.
21	Schedule J.3	SL01-SL05		What is considered "available"?	Available means the system is fully functioning and not degraded.

Addendum 13 – Additional Answers					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
1	Exhibit B.1			Specific to PennDOT, is the intent to continue using the Tivoli Monitoring Environment on zLinux in the environment? If so, can the specifics of that monitoring environment be provided?	~~Yes, the intent is to continue using the Tivoli Monitoring Environment on zLinux. Please see Exhibit B.7 – IBM MF SW Inventory v3 and Exhibit N.1 – PennDOT Monitoring for additional details. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.~~
2	Request for Proposal	Calendar of Events	ix and x	Can you describe the high level milestones/events after March 8th for the RFP process? (downselect process, award date and timeframe, etc)	The RFP Part III contains information on evaluation and selection. Additional information on the procurement process can be found at the DGS website. The proposal submission date has been extended. Please refer to Addendum 6 for additional information.

Addendum 13 – Additional Answers					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
3	Schedule F	3.2.1.1.1	28	Please provide specific Financial Management requirements regarding asset transfer and forecasting.	For purposes of submitting proposals Offerors should assume there will be no asset transfers. The Commonwealth foresees no asset transfers at this time related to this procurement. Forecasting should include anticipated demand for the services provided within the procurement and the associated costs. The Commonwealth requires the selected Offeror to perform the tasks and provide the deliverables detailed within this section of Schedule F.
4	Schedule F	3.2.1.1.4	32	Please provide more details around the quantity and nature of its business partner agreement connectivity support requirements expected from the Offeror.	The Commonwealth's Business Partners (BP) provide the physical circuits to the Commonwealth's BP network into the Commonwealth's co-location space within the EDC and DPH. The BP determines the number, size and redundancy of the individual BP connections. The Offeror must support these connections by providing security, access, network connections to the Commonwealth, network, floor/cabinet space, cooling, and power. Currently there are 3.5 cabinets within the Co-Lo space in the EDC dedicated to the BP containing 65 BP connections to support within the EDC. The DPH has 1 BP connection. Exhibit D.13 - EDC Business Partner Circuits contains the current list of BP circuits within the EDC and may be different at the time of transition. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
5	Schedule F	3.2.1.1.5	34-35	Pertaining to the noted requests (i.e. Cost-Benefit Analysis, Conceptualization, High Level Estimate and Technical Opinion(s)), should cost for such requests be reflected in the service catalog?	The selected Offeror will be responsible for providing cost-benefit analysis, conceptualization, high level estimates and technical opinion(s) at its cost and as part of the general provision of services. These services should not be included as standalone items in the Service Catalog. The Commonwealth considers detailed engineering specification and assistance services to be a consulting level engagement that would be billable to the Commonwealth according to the rate card in Schedule I. The selected Offeror must receive approval from the Commonwealth for all engagements utilizing the rate card.

Addendum 13 – Additional Answers					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
6	Schedule F	3.2.4.4	113	Requirement number 5 states “as required”. Please define as required and who will be financially responsible for providing this technical advice and support.	“As required” in reference to this requirement means the selected Offeror will be responsible for providing the referenced technical advice and support at its cost and as part of the general provision of services. The Commonwealth considers detailed engineering specification and assistance services to be a consulting level engagement that would be billable to the Commonwealth according to the rate card in Schedule I. The selected Offeror must receive approval from the Commonwealth for all engagements utilizing the rate card.
7	Schedule F	3.2.5	134	Item #5 states “Provide expedited service,…” please define “expedited”.	An expedited service is a deployment of an existing catalog service in an interval shorter than the standard interval. These should occur rarely, however, there may be times that this is required due to a failure of another service/equipment or a requirement set upon the Commonwealth that is outside the Commonwealth’s control, such as one set by Federal or state law.
8	Schedule F	3.3.2.1	151	What is COPA's current Chargeback System and what existing services are being charged back?	The Commonwealth does not have a common system for charge backs. Some current services are not charged back, and some are done manually. All services provided by the incumbent contractor are charged back using the Commonwealth custom ESMS system. The selected Offeror must connect to the Commonwealth’s ITSM system, which is currently BMC Remedy. The Commonwealth does not require a full charge back system. The agency invoices should provide billing detail so the agency has full transparency into the services it consumed. Billing details shall include all services procured by agency general ledger (GL) code. A service may be allocated across multiple GL codes.
9	Schedule J.1	1	3	Please provide clarification on how changes to an environment or introduction of new software would allow changes to service levels. These changes would require testing to verify environment can support new service levels.	Agencies will subscribe to Service Levels. Changes to the environment or software under the control of the selected Offeror will not change the SLA. If the Commonwealth requests a change that impacts or may impact an SLA, the Offeror must notify the Commonwealth that the SLA will no-longer be supportable and provide options to the Commonwealth for resolution before implementing the new environment or new software.
10	Schedule J.1	2.1	3	How is the complete infrastructure for an application determined for SLA purposes? How are application infrastructure components not under Offeror's control excluded from the Application Infrastructure Availability SLA?	The CMDB must include enough detailed information to allow the Commonwealth and selected Offeror to make the necessary determination. The CMDB must include all infrastructure details including components not under the Offeror’s control. Application infrastructure components not under Offeror's control will be excluded from the Application Infrastructure Availability SLA.

Addendum 13 – Additional Answers					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
11	Schedule J.1	2.1	3	The definition of "Degraded Condition" is very subjective in the absence of concrete measurements and data collection. How does the Commonwealth currently measure application degradation?	Currently the Commonwealth does not have a single standard definition for Degraded Condition. For purposes of this RFP, Schedule A - Defined Terms defines degraded condition as "A Service that tests as fully operational but is degraded below user expectations across a significant segment of the user population as determined by the Commonwealth."
12	Schedule J.3	2	5 thru 9	Per definitions SL-1 - SL-5 Application Infrastructure Availability, measurement is by application, not by server instance, however, the Offeror is not responsible for the Application. What provisions in your SLA definitions/requirements take into account infrastructure availability and application downtime due to application failure, Commonwealth activities, or Commonwealth suppliers outside the scope of this contract? Will there be 2000 Application Infrastructure Availability SLAs? What applications monitoring tools and processes exists today regarding the monitoring of availability for the 2000+ applications in scope?	The selected Offeror must provide the relationship of Infrastructure to Application within the CMDB. SL01 – SL05 take into consideration every infrastructure component for the application as related to the SLA ordered. The Offeror is responsible for the services ordered. Therefore, the selected Offeror will be responsible to make sure all of the associated services are working as designed and ordered. There will be an Application Infrastructure Availability SLA for each application. The following are known tools: MS SCOM, MS SCCM, Paessler (External URL Testing), CiscoWorks, NIMS, syslog, Vmware vCenter, Idera SQL DM, Oracle OEM, Big Brother, EMC Data Protection Advisor, JC Metasys, IBM TPC. Tivoli ITCAM. SightLine.Wiley. SAP Solutions Manager. IBM Director. Nagius. Please refer to Section 3.2.3.2 Site Operations of Schedule F; specifically requirement 1 and Section 3.2.4 for additional information.
13	Schedule K	D-02.77	14	"backup audit finding". Typically in co-location services the Service Provider is not responsible for backups. Please explain the need for this audit, and please provide the requirements for backing up co-location space if needed.	The Commonwealth EDC currently provides backup services for co-location. The selected Offeror must provide backup services as ordered. An audit is necessary for co-location services if backup service is ordered.
14	Schedule J.1-3 SLA and Schedule I			How will development and test environments be selected from the RUs? How will SLAs apply to development and test environments?	Development and test environments will be ordered from the Service Catalog and identified as application test or application development. SLAs will apply based on the SLA ordered by the application owner.
15	Schedule F – CoPA Datacenter Statement of Work	3.2.4.8	131	What services, equipment or access beyond rack space will be required in support of co-location services?	Services required to support co-location include rack space, power, network connectivity and SAN connectivity within a datacenter that meets the requirements of the RFP and is included in Schedule E - Datacenter Locations. It also includes access to the server rack for agency IT staff.

Addendum 13 – Additional Answers					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
16	Exhibit K	Datacenter Related Volumetrics	12	Are Prime Hours 0600-1800 Monday – Friday, or 7 days per week?	For purposes of submitting a proposal Offerors should assume prime hours are 0600-1800 Eastern time (Standard or Daylight Savings time, as applicable) Monday - Friday.
17	Schedule F - COPA Datacenter Statement of Work	3.2.4.1	94	We understand that the Commonwealth is considering leveraging the services of NIC for some application hosting. How does this impact the servers and services included in scope for this RFP?	The services referenced which fall under the Self-Funded EGovernment Services (44000010625) Contract held by Pennsylvania Interactive LLC may reduce the amount of infrastructure that will need to be transitioned from the EDC.
18	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	Could the Commonwealth please provide the number of landscapes per SAP application?	DOR has 5 landscapes: sandbox, development, QA, training, and production. IES's SAP ERP ECC system has 6 landscapes: sandbox, development, quality control, production support, production, and training. The other SAP applications have 5 or less depending on the SAP component and business need.

	Doc	**Sec**	**Pg**	**Question**	**Answer**
20	General Question			Regarding Commonwealth of Pennsylvania Data Center Computing Services RFP 6100022698 and the current sealed proposal submission date of Friday March 8, 2013 at 1:00pm eastern standard time, we formally requests from the Commonwealth of Pennsylvania, Office of Administration, Office for Information Technology, a 60 day extension to Wednesday May 8, 2013 at 1:00pm eastern standard time for submitting our sealed proposal response. We request this extension in order to provide the Commonwealth of Pennsylvania with the highest quality proposal response that meets all the objectives and requirements specified in RFP 6100022698 . A significant number of answers to questions asked by bidders in round one are still outstanding, having not yet been posted by the Commonwealth of Pennsylvania. In addition, the answers to questions from round two are not schedule to be posted by the Commonwealth of Pennsylvania until February 15, 2013. Answers to all questions are vital to us, in order to provide the highest quality proposal response to the Commonwealth of Pennsylvania. With the current schedule, time is of the essence given the current submission date.	The proposal submission date has been extended. Please refer to Addendum 6 for additional information.
21	Schedule A, Defined Terms	General Question	General Question	Which data centers utilize Internet service provided locally versus leveraged service from one location? What is the bandwidth and average utilization for Internet access at each location, which will need to be accommodated at the target data center?	All datacenters are connected to COPANET. The current internet connections are connected to COPANET. See Exhibit P – Enterprise Internet Bandwidth utilization. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.

Addendum 13 – Additional Answers					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
22	Schedule A, Defined Terms and Schedule I , Offeror Pricing Forms	General Question	General Question	How many licensed Site to Site VPN tunnels will terminate in the EDC or Target Data Centers?	This is dependent upon the architecture provided.
23	Exhibit G.7, PSP – Summary of CJIS Requirements	General Question	General Question	Would the Commonwealth please describe the remote access systems which may be leveraged, the capacity, and how many users will require access into the EDC and Target Data Centers for PSP?	All remote access by technical staff supporting CJIS infrastructure and systems must be compliant with the CJIS Security Requirement. The Pennsylvania State Police maintains its own remote access infrastructure which is utilized for all remote access to PSP components residing in remote data centers for its technical staff and vendors supporting IT solutions. PSP's solution is a cluster of Juniper SSL VPN appliances which are maintained by the PSP Network Security Unit. Less than one hundred PSP users require access to the Data Centers.
24	Schedule A, Defined Terms	General Question	General Question	If the offeror expected to provide Internet Service at the EDC, what are the bandwidth requirements?	Internet service is already in place in the EDC. Expansion of Internet service, if required, shall be provided by the selected Offeror. See Exhibit P – Enterprise Internet Bandwidth Utilization. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
25	Schedule A, Defined Terms	General Question	General Question	What types of access and connectivity options are available to the offeror for CopaNet and at what locations?	The Commonwealth requires the selected Offeror to have at least two diverse connections to COPANET. One being EDC and the other determined during the discovery process in transition planning.
26	Schedule F, Statement of Work	3.2.3.2	88	As part of the security requirement, does all backup media need to be encrypted other than the listed CJIS and CCHRI requirements?	For purposes of submitting a proposal Offerors should assume all backup media must be encrypted.
27	Schedule F, Statement of Work	3.2.3.2	88	Would the Commonwealth please provide the current offsite storage vendor for the Commonwealth's tape/media handing?	Adaptive Data Storage, New Jersey
28	Schedule F	3.2.3.2	88	Is there any historical data that is retrieved on a regular basis? If so, would the Commonwealth please provide the typical age of the data along with the backup software and type of media?	Yes, there is historical data that is retrieved on a regular basis and is stored on primary server/storage. Typical/default retention policy for backups: Daily = 30 days Weekly = 30 days Monthly = 1 year Yearly = 7 years

Addendum 13 – Additional Answers

	Doc	Sec	Pg	Question	Answer
29	Revised Schedule F, Statement of Work	3.2.4.4 3.2.4.4	95 #1 110 #1	For servers hosted at the EDC facility, would the Commonwealth please provide the following information: • Location of the staff providing server console monitoring operations. • What systems management toolset is in place to perform server monitoring and console monitoring operations? • Who performs the console monitoring operation services? • What other duties do the console monitoring operations staff performs at the EDC facility?	The location of primary support/monitoring staff for server console monitoring operations is EDC. EDC systems management tools: MS SCOM, MS SCCM, Paessler (External URL Testing), CiscoWorks, NIMS, syslog, Vmware vCenter, Idera SQL DM, Oracle OEM, Big Brother, EMC Data Protection Advisor, JC Metasys, IBM TPC EDC console monitoring operations are performed by onsite operations staff at the EDC. Other duties include reporting, troubleshooting, patching, deployment assistance, etc.
30	Schedule A, Defined Terms	General Question	General Question	Please confirm that the offeror will not manage any network assets, belonging to the Commonwealth, outside the EDC.	The Commonwealth confirms that the Offeror will not manage any network assets, belonging to the Commonwealth, outside the EDC.
31	General Question	N/A	N/A	Would the Commonwealth list any tools or automations in place to update site content and how it avoids the manual process of updates?	Please clarify the question. The Commonwealth needs more specifics on what the Questioner means by "site content." Does "site content" refer to websites, Content Management Systems, or something else?
32	Schedule I, Offeror Pricing Forms	General	N/A	In the event Optional Services (use of Technical Rate Card) requires travel in order to perform the required services, how would the Commonwealth prefer these costs to be recovered? Is it reasonable to assume that the preferred approach would be to rebill travel expenses if and when required? If this is not acceptable to the Commonwealth, please provide the preferred approach.	~~In regard to Optional Services (use of Technical Rate Card), travel costs will be paid in accordance with Commonwealth Management Directive 230.10.~~.

	Doc	**Sec**	**Pg**	**Question**	**Answer**
33	Schedule G, Staffing Plan and Key Positions	Sections 2 & 4	3-4	Section 2 of Schedule G has text describing positions and Section 4 has a table of positions. The 2 sections do not match. The table does not have 4 of the positions listed in the text (Availability Manager, Sr. Enterprise Infrastructure Architect, Incident Management Manager and Chief Information Security Officer) and it has 2 positions (Sales Manager and Sales Support Technical Engineers) that are not listed in the text. Can you clarify which Key Personnel are required in the proposal response?	The Commonwealth has amended Schedule G as part of Addendum 7. Please see the revised Schedule G. Also, Offerors may add additional "Key Personnel" to Schedule G outside of the required list if additional positions are critical to the proposed solution.
34	Schedule F, Statement of Work	3.2.4.1	94	What currently provided EDC application support in Managed Services is in scope of offeror's responsibility? See Q&A Round1, Part 2, #40. What agencies are the services provided for? What services are provided, for how many applications, of what level of complexity?	All of the applications in Managed Services are in scope. Agency application lists are provided in Exhibit D.4. Which applications will be provided by the selected Offeror, and their complexity, will be determined during the discovery process in transition planning.
35				In reference to Datacenter Computing Services RFP # 6100022698, we respectfully requests from the Commonwealth of Pennsylvania Office of Administration, Office for Information Technology, a 60 day extension to Wednesday May 8, 2013 at 1:00pm eastern standard time for submitting our sealed proposal response. Additionally, we respectfully request that OA IT consider providing their position on the extension request to the vendor community ASAP for planning purposes considering the considerable investment necessary to complete a high quality proposal response.	The proposal submission date has been extended. Please refer to Addendum 6 for additional information.
36	Schedule F – COPA Datacenter Statement of Work	3.2.5.5	142	Please confirm that the Commonwealth will be responsible for maintaining Desktop OS and Office versions at the required levels.	The Commonwealth will be responsible for maintaining Desktop OS and Office versions at the required levels.

Addendum 13 – Additional Answers

37	RFP			In reference to Datacenter Computing Services RFP # 6100022698, we respectfully request from the Commonwealth of Pennsylvania Office of Administration, Office for Information Technology, at a minimum a 90 day extension to Friday July 12, 2013 at 1:00pm eastern standard time for submitting our sealed proposal response. Additionally, we respectfully request that OA IT consider providing their position on the extension request to the vendor community as soon as possible for planning purposes considering the considerable investment necessary to complete a high quality proposal response. We are excited about the opportunity to respond to the Commonwealth's RFP for Data Center Computing Services. Our team is assembled and working through providing the State a response that addresses all facets of the RFP requirements and subsequent Q & A's. Our request for the 90 day extension is based on the following: • Finally, we recognize the Commonwealth's desire for competition which will provide the best outcome for a mutual partnership with the winning vendor/Commonwealth. With the 90 day extension the Commonwealth has our commitment that we will submit a Prime bid for the RFP with a very compelling solution, efficient pricing model and mutually beneficial small business plan. • A significant number of answers to questions asked by bidders in Round 1 are still outstanding, having not yet been posted by the Commonwealth. The questions asked pertain to items that are critical to providing a compliant, responsive and top quality proposal solution that provides maximum benefit to the Commonwealth. • Answers from Round 2 Questions are still pending. Additional questions s will most likely arise from feedback on outstanding Round 1 and Round 2 answers. Finally, we still will have to draft and submit Round 3 questions to the Commonwealth.	The proposal submission date has been extended. Please refer to Addendum 6 for additional information.

Addendum 13 – Additional Answers					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
38	Questions and Answers – Round 1 Part 3 Questions and Answers – Round 1 Part 1	28 33		Answers to these two questions appear to contradict each other. Please indicate whether the EDC must be upgraded to Uptime Institute Tier 3 equivalence in order to be used for any services. If it does not, what are the limits upon its use as a lessor facility?	The EDC does not have to be upgraded to Uptime Institute Tier 3 equivalence in order to be used for any services. Existing services provided by the EDC may remain in the EDC as long as the facility continues to meet the requirements for those services as set forth in the RFP. New applications may be added to the EDC with Commonwealth approval.
39	Questions and Answers – Round 1 Part 3	30		What represents “desired configurations”? (e.g. those represented on Schedule I “Managed Services”)	The desired configuration is the configuration as ordered by the application owner.
40	Questions and Answers – Round 1 Part 3	74 93		The answers to these questions appear to be in conflict in a requirement on the Offeror for making sure that required application changes ultimately fall on the Offeror even when the infrastructure meets the SLA requirements. Please clarify the answers. Does the Offeror have any responsibility for applications when an application modification is the means to resolving the issue?	The selected Offeror will not be responsible for modifying an application. The selected Offeror must provide the infrastructure required for the application to operate at the performance levels maintained prior to transition to the Offeror's services.
41	Questions and Answers – Round 1 Part 3	95		An arithmetic sum of availability measurements would result in availabilities higher than 100%. Please clarify on what is meant by “sum” of the infrastructure components and provide an example.	The service level calculation is " = 1 – ((Sum of Minutes the Application is not Available) / ((1440 Minutes Per Day) X (Calendar Days In Month))) expressed as a percentage". This calculation is based on the Sum of minutes the application is not available, not based on individual components.
42	General Question			The Appendix-F, Non-Disclosure Agreement HPES has signed limits our ability to share the confidential exhibits provided to HPES. We want to ensure we limit the administrative burden put on the Commonwealth. We would like to share the additional confidential exhibits with some of our Teaming Partners. Could you please provide us guidance on how we should proceed in providing certain Teaming Partners the confidential exhibits?	The confidential exhibits may be shared with teaming partners once the teaming partners have signed Appendix-F, Non-Disclosure Agreement. The teaming partners may email a scanned image of the signed Non-Disclosure Agreement to Sheryl Kimport, the Issuing Officer, at RA-OITPurchases@state.pa.us.

Revised (original answer posted as Addendum 13 – Additional Answers)

	Doc	Sec	Pg	Question	Answer
32	Schedule I, Offeror Pricing Forms	General	N/A	In the event Optional Services (use of Technical Rate Card) requires travel in order to perform the required services, how would the Commonwealth prefer these costs to be recovered? Is it reasonable to assume that the preferred approach would be to rebill travel expenses if and when required? If this is not acceptable to the Commonwealth, please provide the preferred approach.	~~In regard to Optional Services (use of Technical Rate Card), travel costs will be paid in accordance with Commonwealth Management Directive 230.10..~~ **Revised Answer:** The rates provided in the Technical Rate Card in Schedule I - Offeror Pricing Forms, should include all travel costs. The Commonwealth will not pay any travel costs in addition to the rates provided.

Revised (original answer posted as Addendum 3 - Round 1, Part 1)

	Doc	Sec	Pg	Question	Answer
134	Exhibit L - Schedule F -	3.3.2.2	152	Does the Commonwealth expect the Offeror to perform Baseline Security Risk and Vulnerability Assessment on all or just a sub-set of applications in-scope (as detailed in Exhibit L) for the Security Transition Services described in Schedule F? Please provide the list of applications that are in scope for the security assessment.	~~The Offeror must perform Baseline Security Risk and Vulnerability Assessments on infrastructure only.~~ ~~Security at OS level is performed by the Commonwealth. Commonwealth~~ **Revised Answer:** The selected Offeror must perform Baseline Security Risk and Vulnerability Assessments.

					The selected Offeror is required to perform host/network/OS level scanning and quarterly PCI scanning. OA is responsible for Web application scanning.

Revised answer (original answers posted as Addendum 4 - Round 1, Part 2)

	Doc	Sec	Pg	Question	Answer
103	Schedule J.3			The Service Level references Note 2, however, there is no Note 2 at bottom of the document. Will the Commonwealth please clarify?	~~There should not be a reference to Note 2.~~ **Revised Answer:** Schedule J.3 has been revised. The following exclusions have been identified in Note 2. Offeror's failure to achieve any Service Level will not constitute a Service Level Default or accrue toward a Service Level Termination Event to the extent such failure is directly attributable to any of the following: (i) the failure or unavailability of equipment or other resources for which the Commonwealth is operationally and managerially responsible pursuant to the Contract, (ii) changes made to the environment by the Commonwealth that were not communicated in accordance with the Change Control Procedure or other method agreed upon by the Parties, and (iii) scheduled and approved maintenance windows.
104	Schedule J.3	Metric Exclusion for each SLA		There are multiple references to Note 2, which cannot be found in the document.	~~There should not be a reference to Note 2.~~ **Revised Answer:** Schedule J.3 has been revised. The following exclusions have been identified in Note 2. Offeror's failure to achieve any Service Level will not constitute a Service Level Default or accrue toward a Service Level Termination Event to the extent such failure is directly attributable to any of the following: (i) the failure or unavailability of equipment or other resources for which the Commonwealth is operationally and managerially responsible pursuant to the Contract, (ii) changes made to the environment by the Commonwealth that were not communicated in accordance with the Change Control Procedure or other method agreed upon by the Parties, and (iii) scheduled and approved maintenance windows.

105	Schedule J.3	2	5	"Metric Exclusions" states that "all items defined in Note 2 at the bottom of this Schedule J.3." We cannot find Note 2 in this Schedule?	~~There should not be a reference to Note 2.~~ **Revised Answer:** Schedule J.3 has been revised. The following exclusions have been identified in Note 2. Offeror's failure to achieve any Service Level will not constitute a Service Level Default or accrue toward a Service Level Termination Event to the extent such failure is directly attributable to any of the following: (i) the failure or unavailability of equipment or other resources for which the Commonwealth is operationally and managerially responsible pursuant to the Contract, (ii) changes made to the environment by the Commonwealth that were not communicated in accordance with the Change Control Procedure or other method agreed upon by the Parties, and (iii) scheduled and approved maintenance windows.

Revised (original answers posted as Addendum 13 - Additional Answers)

	Doc	Sec	Pg	Question	Answer
1	Exhibit B.1			Specific to PennDOT, is the intent to continue using the Tivoli Monitoring Environment on zLinux in the environment? If so, can the specifics of that monitoring environment be provided?	~~Yes, the intent is to continue using the Tivoli Monitoring Environment on zLinux. Please see Exhibit B.7 - IBM MF SW Inventory v3 and Exhibit N.1 - PennDOT Monitoring for additional details. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.~~ **Revised Answer:** Yes, the intent is to continue using the Tivoli Monitoring Environment on zLinux. Please see Exhibit B.7 - IBM MF SW Inventory v3 and Exhibit N.2 - PennDOT Monitoring for additional details. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.

Revised (original answers posted as Addendum 7 - Round 1, Part 3)

	Doc	Sec	Pg	Question	Answer
45	Request for Proposal	III-4,C.1	25	Section C describes "Small Diverse Business (SDB) Participation". Section C.1 states that a business submitting a proposal as a prime contractor must perform "60% of the total contract value" to receive points for this criterion under "any" priority ranking. Does the 60% requirement stated in this section only apply to SDB that are priming this opportunity or does the 60% requirement apply to all primes contractors? If this statement applies to all prime contractors, please confirm that no SDB points will be awarded unless the prime contractor directly performs at least 60% of the total contract value of opportunity.	~~The 60% requirement stated in Part III-4 applies to all prime contractors. No SDB points will be awarded to an Offeror unless the company serving as the prime contractor directly performs at least 60% of the total contract value.~~ **Revised Answer:** The 60% requirement in Part III-4 has been deleted and Part II-9 of the RFP has been revised.
29	Appendix A	79	93	The Commonwealth has stated its requirement for fees to increase or decrease dependent on the volume consumed or variation in scope. Without a committed minimum participation or a long-range forecast of the variability of Commonwealth needs, how can a vendor commit to a fixed and ongoing financial participation to a small diverse business that may be providing these services?	~~Offerors must include a numerical percentage which represents the total percentage of the Total Base Term in the Cost Submittal that the Offeror commits to paying to Small Diverse Businesses (SDBs) as subcontractors. Per section IV of the RFP, the selected contractor's commitments to Small Diverse Businesses made at the time of proposal submittal or contract negotiation shall, to the extent so provided in the commitment, be maintained throughout the term of the contract and through any renewal or extension of the contract~~ **Revised Answer:** Part II-9 of the RFP has been revised.

New Answers

	Doc	Sec	Pg	Question	Answer
1	Schedule F	3.2.4.3	Page 105	Please clarify the intent of the ERP Hosting requirement. Does the requirement include SAP Basis support and technical application support for the Oracle Application software, or does the Commonwealth intend to retain technical application support for these items? If technical application support is to be included, is it the Commonwealth's intent to treat ERP Hosting as an optional service?	Schedule F Section 3.2.5.4 Additional Technical Services has been revised to include Basis and SAP Oracle support resources. ERP infrastructure hosting is a required service of this RFP.
2	Schedule F Schedule K	3.3 Transition Services		What assistance can be expected from the incumbent supplier during Transition? Who funds such assistance?	Under its contract the incumbent contractor is required to provide transition assistance. The selected Offeror will not be responsible to fund such assistance.
3	Schedule F Schedule I Offeror Pricing Forms Schedule J.1			There appear to be differences in storage support definitions between the SOW and Schedule I. The SOW sets forth Basic, Committed and Dedicated in section 3.1.3 on p. 20. Schedule I mentions Tier 1, 2 and 3 are associated with service levels and indicates these are defined in Schedule J.1, but they are not. However, Config 1, 2 and 3 is defined in Schedule I. Could the Commonwealth please reconcile?	~~For purposes of submitting proposals Offerors should assume the Configurations listed in Schedule I Offeror Pricing Forms are Dedicated. Schedule I has been revised to remove the "Tier" references from Enterprise Storage. Offerors should also include pricing in Schedule I Catalog of Services for Basic and Committed.~~
4	EDC tour Exhibit D.7 EDC Facility Summary and Requirements Facilities - Architecture			Are regularly scheduled full function / failure / back-up tests of the electrical systems performed? If yes, can test results be provided for review?	Yes. The results are provided in Exhibit D.15 - EDC Electrical System Testing Results. This document is confidential and to receive a copy, please contacts Sheryl Kimport Issuing Officer of IT Procurement.
5	Schedule F	3.1.3 Datacenter Architecture and Technology	18-21	a. Is the expectation that the Offeror will provide an out-of-region solution, so CoPA will not be affected by a regional disaster? b. Concerning the Disaster Recovery Exhibit, does CoPA have documented RPOs and RTOs for its critical applications? c. Can CoPA provide a list of applications with documented dependencies? d. This list, if it exists, was it gathered manually or through the application of automation? e. Can CoPA elaborate on their requirements for the "tiers of service" they expect, the volumes of applications they apply to, and the associated RTO / RPO's? f. Is the Offeror expected to document an overall	a. The purpose of a 2+ datacenter configuration and requiring a minimum of 50 miles between datacenters is intended to mitigate the impact of a regional disaster. b. See Exhibit B.9 – DPH – Recovery Time Objectives for a list of RTOs for applications in the DPH. The Commonwealth does not have RPO documentation. This information will be documented as part of the discovery process in transition planning. Exhibit B.9 – DPH – Recovery Time Objectives is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer. c. Application dependencies will be documented as part of the discovery process in transition planning. d. See answer to c.

				resiliency strategy and design as a part of due diligence so that each tier of service has been adequately designed into the data center architecture? g. Is the Offeror expected to document an overall resiliency strategy and design as a part of due diligence so that each tier of service has been adequately defined? h. Is the Offeror responsible to develop effective disaster recovery, business continuity and crisis plans as well as conduct testing during due diligence for the critical applications?	e. Section 3.1.3 of schedule F refers to "Multi-Tiered Storage Management". It is defined in section 3.1.3 as: • Basic – based on Pay-As-You-Go allocation model with no upfront resource allocation and resources are reserved on demand per workload. (shared, multitenant) • Committed – based on Allocation Pool allocation model which gives a minimal initial commitment of resources plus the ability to burst above that minimum if additional capacity is needed – usually a percentage of resources reserved for agency with over-allocation. (shared, multitenant) • Dedicated – based on Reservation Pool allocation model – 100% of resources are reservation–guaranteed. (dedicated, single tenant) The Commonwealth cannot provide the volume of applications these tiers apply to. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all inclusive representation of every service desired by the Commonwealth. See answer to b. for RTO/RPOs. Any additional information needed will be documented as part of the discovery process in transition planning. f. Yes, the Offeror is expected to document an overall resiliency strategy and design, so that each tier of services has been adequately designed into the data center architecture. The strategy and design must be reviewed and approved by the Commonwealth prior to implementation. g. See answer to f. h. Yes, See section 15. Disaster Recovery and Business Continuity of Appendix A.

6	Schedule F	3.2.5 Capacity on Demand Services	133-141	a. Does CoPA desire to better manage their capacity plan by having an online data backup capability that can flex as the information requirements expand over the next several years so capacity at the production centers does not have to be added? Does CoPA have detailed knowledge of their data access patterns to provide to a vendor who can then determine what data is eligible to move from tape to online storage, at a lower cost with greater backup recovery success rates then tape? Does CoPA have a written archiving policy, and does it currently move fixed data regularly to lower cost storage? Does CoPA have a requirement for Virtual Server Recovery outside of the primary geography?	~~a. The Commonwealth seeks the best solution for capacity planning. Offerors should include the services they offer in their technical proposal and as part of Schedule I tab 10. Catalog of Services.~~ ~~b. No, the Commonwealth does not have data access patterns to provide to an Offeror. The Commonwealth will work with the selected Offeror to determine the best solution when selecting services from the Service Catalog.~~ ~~c. The Commonwealth currently has a written archiving policy. Fixed data is currently moved regularly to lower cost storage.~~ ~~d. Please clarify or provide example defining "Virtual Server Recovery outside of the primary geography"~~
7	Request for Proposal			How are agency schedule needs accommodated in the instance where those needs will delay or cause the delay in deliverables and milestones?	Identifying these impacts is to be part of the transition planning and need to be taken into consideration by the Offerors in their planning. The agencies have several regularly scheduled "No Maintenance" periods every year. See Exhibit O - 2012 Agency NMRs for the No Maintenance periods that occurred during 2012. See Exhibit R - Transition Considerations for information on identified considerations which could impact transition planning. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
8	Appendix A	7	8	This section states “At its sole cost and expense, Contractor shall maintain the Commonwealth Machines and shall replace each Commonwealth Machine at its respective end of life or as otherwise required to provide the Services.” Will the Commonwealth be providing details on purchase date, warranty, and “end of life” for all systems currently owned by the Commonwealth that will be assumed under this contract?	Exhibit D.1 - EDC - Server Inventory and Exhibit D.14 - EDC Hardware Warranty Information provide information on warranty and maintenance for the equipment in the EDC. Any additional information needed will be documented as part of the discovery process in transition planning. The EDC is the only datacenter which the Offeror will take operational control. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.

9	Appendix A Exhibit D.7	13(b)	16-18	What are the typical calendar/schedule limitations for major facility or system work? What are any lockdown/blackout periods?	Identifying schedule limitations for major facility or system work will occur during transition planning. The Commonwealth does not have enterprise-wide "No Maintenance" periods. Each "No Maintenance" period is requested and scheduled by the individual agency. Please refer to ITB-NET015 which describes the process for requesting a "No Maintenance" period and the Commonwealth's approved Enterprise Maintenance Windows. The agencies have several regularly scheduled "No Maintenance" periods every year. See Exhibit O - 2012 Agency NMRs for the No Maintenance periods that occurred during 2012. See Exhibit R - Transition Considerations for information on identified considerations which could impact transition planning. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
10	Schedule F	2.3.4	10, 11	With regard to item 1: DLP (Data Loss Prevention) What is the Commonwealth's expectation with regard to the Offeror's responsibility to "Discover confidential data wherever it is stored, inventory sensitive data, and automatically manage data cleanup" as well as "identify" sensitive and confidential Citizen Personal Identifiable Information (PII) within the Commonwealth's databases, DNS and file systems? How will the Commonwealth contribute to this effort?	The parameters for confidential information will be documented as part of the discovery process in transition planning. The selected Offeror must discover any confidential information that is outside parameters defined by the Commonwealth. The selected Offeror must inform the Commonwealth of any information that is discovered to be outside the parameters defined by the Commonwealth. The Commonwealth will give guidance on resolution of any information which is discovered to be outside the established parameters.

11	Schedule F	3.1.1.5	14	Reference: "The current maintenance contract for the EDC servers is scheduled to expire on June 30, 2014." Confirm that all server maintenance in the EDC is scheduled to expire on 6/30/2014. What about other hardware in the EDC such as storage units, tape drives, etc.? Will the Offeror be financially responsible for maintenance on all data center components including those owned by the Commonwealth?	Not all server maintenance in the EDC is scheduled to expire on 6/30/2014. The server maintenance contract is dynamic. As manufacturer warranties expire, those servers are added to the extended maintenance contract if they are still in use and not refreshed. As servers retire or are refreshed, they are removed from the extended maintenance contract. The Offeror must maintain either the manufacturer's warranty or extended maintenance for all equipment in the EDC. Yes, the selected Offeror will be financially responsible for maintenance on all data center components in the EDC. Exhibit D.1 - EDC - Server Inventory and Exhibit D.14 - EDC Hardware Warranty Information provide information on warranty and maintenance for equipment in the EDC. Any additional information needed will be documented as part of the discovery process in transition planning. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
12	Schedule F	3.2.1.3	42	As it relates to testing infrastructure changes. What is the criteria by which testing environments must be maintained? Must new hardware be tested in a separate 'testing environment' prior to implementation? Is testing in a 'Test environment that my not 100% match production sufficient for testing, or are model office environments that 100% match production required? Is such testing required for antivirus updates?	Unless otherwise approved by the Commonwealth, the Offeror must provide a separate test environment for those changes that impact multiple environments (Dev, Test, Prod) of the same application. This includes SANs, Tape Silos, Firewalls, and other such infrastructure components. Offerors should assume that a test environment must be a 100% match of the production environment; unless the Commonwealth approves a lesser environment for testing. If the component supports only one environment (Dev, Test, Prod) for an application, then Offeror is not required to have separate infrastructure. All changes must follow the implementation plan approved by the Commonwealth.
13	Schedule F	3.2.1.4	44	Do the agency help desks have security restrictions that will need to be remediated to support connectivity?	Yes. Firewall and other security adjustments will be necessary for the Offeror to interface with the agency help desks.
14	Schedule F	3.2.1.5.1	52	What percentage or number of physical hosts in the baseline count are VM hosts, or are they not counted in the physical server count?	The number of physical hosts and VM hosts will be documented as part of the discovery process in transition planning.

15	Schedule F	3.2.1.6	55	(2) Reference: "Assign an Account Manager to each identified agency." Please provide a list of all agencies in scope.	Offeror will provide a minimum of five (5) dedicated Agency Account Managers responsible for understanding all of the services provided by Offeror and providing guidance to the agencies in understanding their datacenter business needs. Offeror must assign an Agency Account Manager to each agency that purchases services through the contract. Not all Agency Account Managers must be assigned to a single agency.
16	Schedule F	3.2.1.8.3	60	This section states that “the Offeror will be solely responsible for the management of all infrastructure software products provided through this contract”. Please explain the use of the words “the management” as required in this section. Who is financially responsible for the installation, troubleshooting, and maintenance of the 3rd party software described in this section?	The Commonwealth is subscribing to managed infrastructure services; therefore, the selected Offeror is responsible for providing and managing the infrastructure and the software needed to operate that infrastructure. This includes licenses, patches, updates, maintenance, etc. Financial responsibility for Third party software is set out in Appendix A - Data Center RFP Terms and Conditions.
17	Schedule F	3.2.2.2	64	This section states “Offeror must work with the Commonwealth agencies to understand the systems involved, and the timeframe of these migrations”. If there are specific and known requirements for agency timelines, please provide those details.	Identifying agency timeline needs is to be part of the transition planning and need to be taken into consideration by the Offeror during development of the detailed transition plan. The Commonwealth does not have enterprise-wide "No Maintenance" periods. Each "No Maintenance" period is requested and scheduled by the individual agency. Please refer to ITB-NET015 which describes the process for requesting a "No Maintenance" period and the Commonwealth's approved Enterprise Maintenance Windows. The agencies have several regularly scheduled "No Maintenance" periods every year. See Exhibit O - 2012 Agency NMRs for the No Maintenance periods that occurred during 2012. See Exhibit R - Transition Considerations for information on identified considerations which could impact transition planning. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.

18	Schedule F	Section 2.1 Section 3.2.3(3)	6 85	Which of the Uptime Institute's measures for Tier 3 are required to meet the standard for Tier 3 equivalence? (Tier 3 design, Tier 3 operations, etc.) Will the standard to be used include any optional measures or only minimum requirements? Requirement 2 states "Provide fully redundant environmental Services. To include, but not limited to, HVAC, UPS, conditioned power and distribution, generator backup, automated transfer switch, fire suppression system". Is this requirement for all other facilities other than the EDC or must the Service Provider upgrade the EDC, at their cost, to provide this requirement?	The Offeror must meet two Uptime Institute, LLC Tier III Data Center Site Infrastructure Tier Standards. The first standard is "Data Center Site infrastructure Tier Standard: Topology" at a Tier III level. The second standard is "Data Center Site infrastructure Tier Standard: Operational Sustainability" at a Tier III level. These standards can be found at the Uptime Institute, LLC's website -http://uptimeinstitute.com/. The Offeror must meet the minimum requirements to be considered compliant with the requirement. This requirement applies to all datacenters hosting Commonwealth applications. If, at any time, the selected Offeror determines a datacenter is not compliant with the minimum Tier III requirements, the Offeror must document and report to the Commonwealth, the noncompliance for a determination on possible resolutions. For the purposes of submitting a proposal, the Offerors are to assume that the EDC is compliant with the minimum requirements of a Tier III datacenter.
19	Schedule F	3.2.5	133	We understand the requirement for "short-term" needs as described in this section for IaaS. Please be aware that most 3rd party software for Unisys and IBM mainframe is not available for use in an "On-Demand" model. Please explain how the Commonwealth will acquire the necessary 3rd party software license upgrades to accommodate this requirement and who will have the financial responsible to manage this short-term need.	The Commonwealth is procuring managed services through this RFP. The selected Offeror is responsible for managing the infrastructure and the software needed to operate that infrastructure. This includes licenses, patches, updates, maintenance, etc. for the referenced mainframes. The selected Offeror will have the financial responsibility to manage a short term need.
20	Schedule F	3.3.2.1	150	What is the expected transition timeframe and associated acceptance criteria for all the existing agency service management systems to the Offeror's service management platform?	~~See milestone M-9 ITSM System Integration in Schedule D - Transition Milestones~~

21	Schedule I	TAB 1 Volumetrics		Was the intent to have rounded units in the Volumetrics? The Commonwealth has used a formula to increase/decrease each category of units which leaves partial Servers, GB, etc. After Year 1 Volumes, the Servers/Unix counts are adjusted by a formula that leaves partial devices, which will impact the Total Charges tab because it multiplies PxQ and Q won't be a whole number.	Schedule I - Offeror Pricing Forms has been revised to include rounded units.
22	Schedule I	TAB 1 Volumetrics		There are a number of configurations defined (i.e. Unisys DR Mainframe Config 3 and 4, IaaS Linux/Windows Config 4 and 5) in TAB 1 without corresponding Baseline Unit Volumetrics. Where should the Offeror provide pricing for these configurations and what baseline volumetrics should be used?	Schedule I has been revised to include volumetrics for the referenced configurations. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. The volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all inclusive representation of every service desired by the Commonwealth.
23	Schedule F	3.2.3.2	88	What is the peak number of batch jobs that need to run in a 24 hour period by agency across all platforms (IBM Mainframe, Unisys, Mainframe, AIX, Windows, etc.)?	The peak number of batch jobs needed in a 24hr period is unknown. The Offeror will be responsible for the batch jobs based on the needs of the agency. This will be documented as part of the discovery process in transition planning.
24	Appendix A	14 (c) (ii)	21	Commonwealth requirement "In contractor's performance and completion of Transition Services, no functionality of the Commonwealth's then current business operations or environment will be discontinued until contractor demonstrates to Commonwealth's reasonable satisfaction that the affected processes and operations have been successfully migrated to contractors target environment and are functioning properly in that environment." This requirement could imply that existing assets cannot be relocated and any proposed application migrations would need to use new or alternative infrastructure to maintain functional parallel application environments. If so, this would impact a service provider's ability to use a lower cost "lift and shift" migration strategy and Server – Managed Only pricing. Is that your intention? Will the Offeror be permitted to relocate the Commonwealth-owned existing hardware platform supporting an application if the hardware has useful life remaining? If agreed by the Commonwealth on a case-by-case basis, can an agency application platform	The Commonwealth does not own all of the infrastructure within the scope of this RFP. Therefore, "lift and shift"is not an option in most cases. For purpose of submitting a proposal, Offerors should assume no assets can be relocated. On a case-by-case basis and with agency approval, an agency application platform may be shut down, packaged, physically relocated to a new data center, and reactivated at the new data center location. For purposes of submitting a proposal, Offerors should, however, assume that no agency assets can be relocated.

				be shut down, packaged, physically relocated to a new data center, and reactivated at the new data center location?	
25	Schedule F - COPA Datacenter Statement of Work	3.3.2.2 3.2.2.5	152 77	In response to Q 134 of Addendum 3 Q&A round 1 part 1, the Commonwealth indicated the Offeror has to perform infrastructure vulnerability testing only. Whereas, in response to Q65 of the Addendum 4 Q&A round 1 part 2, the Commonwealth indicated that the Offeror needs to perform all types of penetration testing including "applications". Can the Commonwealth clarify if the Offeror is required to perform web application vulnerability testing as part of the Baseline security risk and vulnerability assessment and/or the Quarterly vulnerability scan?	The selected Offeror is required to perform host/network/OS level scanning and quarterly PCI scanning. OA is responsible for Web application scanning.
26	Schedule I – Offeror Pricing Forms	Volumetrics		Does Schedule I's volumetrics for physical and virtual servers account for the planned technology refreshes in Commonwealth-owned assets to be migrated from "Co-Lo" or "Managed Only" to "Fully Managed"?	No, the volumetrics provided do not account for planned technology refreshes. It is specifically for pricing evaluation, as set forth in Schedule I. Actual volumes will vary.
27	Schedule I – Offeror Pricing Forms	Managed Services		The Commonwealth has indicated that Contract signing = Effective Date = Start date. The Commonwealth has also stated that Transition is part of the base term of the contract and transition is prior to Steady State. Can "Transition Charges" be billed prior to the DPH/EDC being fully migrated and/or prior to December 31, 2014? If Steady State RU's are not "available" until the DPH/EDC have been fully migrated (which is required by 12/31/14) do the Volumetrics not come into play until 1/1/15 or can RU pricing begin with a fully migrated DPH/EDC and prior to 1/1/15?	~~Schedule I – Offeror Pricing Forms has been revised. Transition costs are now deliverable based and cannot be billed until the Commonwealth accepts the deliverable and all associated milestones. Refer to Schedule D – Transition Milestones and Schedule K – Key Program Deliverables which set forth acceptance criteria and due dates.~~ ~~Applications cannot be billed until the application has been fully transitioned to the Offeror and accepted by the Commonwealth.~~

28	Schedule I – Offeror Pricing Forms	Volumetrics		The current configurations for x86 and pSeries resource units at the service level tier Platinum are incapable of meeting the SLA measurement for infrastructure at 99.999% availability. In the absence of pConfigs that support clustering configurations, how does the Commonwealth wish to deal with the discrepancy?	Schedule J.3 - Datacenter SLA Definitions has been revised to exclude scheduled and approved maintenance windows in availability SLA calculations. Please provide clarification on why the current configurations for x86 and pSeries resource units at the service level tier Platinum are incapable of meeting the SLA measurement for infrastructure at 99.999% availability.
29	Schedule D – Transition Milestones	M-11	4	Please define “operational readiness”. What demonstrates that the facility is “ready”?	Operational readiness is determined by the Commonwealth’s acceptance of the Operational Readiness Report indicating Offeror is ready to transition the Commonwealth’s Applications and Services to other Datacenters.
30	Schedule I – Offeror Pricing Forms	Volumetrics		Do the numbers of servers for x86 configurations 4 and 5 relate to current equipment dedicated to DR? If not, how quickly will a maturing DR posture begin to reach or surpass these levels?	No, the numbers of servers for x86 configurations 4 and 5 do not relate to current equipment dedicated to DR. The Offeror must provide the DR posture ordered by the Commonwealth. Since the infrastructure is to be transitioned to the Offeror's datacenter(s), the maturity of the Commonwealth's DR equipment is irrelevant to the Offerors ability to submit a proposal. Please clarify the question.
31	Exhibit B.4			Does the Offeror have to provide a price for the software listed in Exhibit B.4? If so, where does the Offeror provide a price for third-party software?	~~Schedule I – Offeror Pricing Forms has been revised to include software pricing as part of the Catalog of Services tab.~~
32				Do regulations related to Board of Elections data require that all such data remain within the Commonwealth at all times?	There are no requirements for Board of Elections’ data to remain within the Commonwealth. The data must meet the data protection standards specified in the RFP. The specific requirements for Board of Elections data will be documented as part of the discovery process in transition planning.

33	Exhibit K Schedule J.3 Datacenter SLA Definitions	Datacenter Related Volumetrics SL26	11,12	Of the monthly volumes listed on pages 11 & 12 in Exhibit K, please provide an expected volume breakdown by Priority for Service Incidents and Service Requests so that Offeror can match these volumes to the required SLAs in Schedule J.3: Service Restorals P1: every 15 minutes P2: 30 minutes P3: daily P4: weekly Service Requests P1: Daily P2: Weekly P3: every 2 weeks P4: Monthly	Expected volume breakdown by Priority for Service Incidents and Service Requests will be documented as part of the discovery process in transition planning.
34	Answers to Questions Round #1, Part #2	Q40		Currently EDC provided managed services support includes responsibility for application installation, application support, application troubleshooting, application monitoring, etc. The Commonwealth response to this question implies that application support is in scope for the Offeror. This contradicts with responses to Q 136 and 139 in Round #1, Part #1, which indicate that the Offeror is only responsible for infrastructure. Please clarify.	Currently in Exhibit D.4 - EDC - Application Server Agency Report, applications identified a “MSL” are considered managed service lite. All other applications are fully managed. The services considered managed services lite today would require infrastructure support and not application level support. Fully managed services require the Offeror to provide infrastructure and application level support.
35	Schedule J.3	Section 2.Service Level Details	5-9	For SLAs SL01-SL05, please confirm that the measure of application availability will exclude downtime associated with problems related to Commonwealth application programs and/or any items not under the direct control of the infrastructure and or services being provided by the service provider.	Schedule J.3 has been revised. The following exclusions have been identified. Offeror’s failure to achieve any Service Level will not constitute a Service Level Default or accrue toward a Service Level Termination Event to the extent such failure is directly attributable to any of the following: (i) the failure or unavailability of equipment or other resources for which the Commonwealth is operationally and managerially responsible pursuant to the Contract, (ii) changes made to the environment by the Commonwealth that were not communicated in accordance with the Change Control Procedure or other method agreed upon by the Parties, and (iii) scheduled and approved maintenance windows

36	Appendix A	9(a)	10	As it pertains to this section, "(a) Commonwealth will retain administration of logical and data access security, and Contractor will host Commonwealth security applications software utilized by the Commonwealth in managing logical and data access security, and will not implement configurations that would prevent Commonwealth from managing logical and data access security." Is it the intention of the Commonwealth to control "privileged Root and Admin logon and rights" to servers managed by the Offerer or will "privileged Root and Admin logon and rights" to be controlled by the Offerer? Or, is it the intention of the Commonwealth to control "privileged Root and Admin logon and rights" to servers managed by the Offerer will the Commonwealth agree to restrict such access to only those authorized by the Offerer? Or, is the intention of the Commonwealth to control "privileged Root and Admin logon and rights" to servers managed by the Offerer and not agree to restrict such access to only those authorized by the Offerer, and allows administrative access to Commonwealth or other parties for a managed server, that the Commonwealth agrees to waive any and all SLA's for failures resulting from said access?	The Offeror will be required to manage/control/monitor "privileged Root and Admin logon and rights". The Commonwealth and the selected Offeror will establish an approved process for Commonwealth staff to request "Privileged" access. This process will be documented in the CCPM. Schedule J.3 - Datacenter SLA Definitions has been revised to include exceptions to SLAs.
37	Schedule F	3.2.4.4 & 3.2.4.5	105&111	Is the offeror responsible for performing batch job scheduling functions in a batch scheduling system or will scheduling continue to be performed by the agency with the offeror managing and monitoring batch execution only?	Responsibility for batch processing is determined at an application level and will be documented as part of the discovery process in transition planning. For purposes of submitting a proposal, Offerors should assume the selected Offeror will be responsible for batch job scheduling in a batch scheduling system.
38	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	Does the Commonwealth have a suggested migration/wave schedule for the agencies?	The Commonwealth does not have a suggested migration/wave schedule for the agencies. Transition Milestones are defined in Schedule D - Transition Milestones. Offerors are to propose a transition plan to meet those requirements.

39	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	Do the individual agencies have change freeze periods or business black-out dates that require consideration? If yes, what are they?	Identifying specific agency scheduling needs will be part of the transition planning. The Commonwealth does not have enterprise-wide "No Maintenance" periods. Each "No Maintenance" period is requested and scheduled by the individual agency. Please refer to ITB-NET015 which describes the process for requesting a "No Maintenance" period and the Commonwealth's approved Enterprise Maintenance Windows. The agencies have several regularly scheduled "No Maintenance" periods every year. See Exhibit O - 2012 Agency NMRs for the No Maintenance periods that occurred during 2012. See Exhibit R - Transition Considerations for information on identified considerations which could impact transition planning. These are confidential documents. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
40	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	Could the Commonwealth please provide the number of images considered: 1) Critical Virtual Images (virtual servers with an outage window tolerance of less than 24 hours and significant business impact); 2) Critical Physical Images (non-virtual servers with an outage window tolerance of less than 24 hours and significant business impact)?	The Commonwealth cannot provide the number of images considered Critical Virtual Images or Critical Physical Images. The criticality of a virtual server will depend on agency requirements and will be documented as part of the discovery process in transition planning. The criticality of a physical server will depend on agency requirements and will be documented as part of the discovery process in transition planning.
41	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	What is the average change rate per day for the data on SAN/NAS?	The Commonwealth cannot provide the average change rate per day for the data on SAN/NAS. This will be documented as part of the discovery process in transition planning.
42	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	Could the Commonwealth please provide application flow documentation (by individual application) including firewall and load balancer requirements?	The requirements of each application vary and will be documented as part of the discovery process in transition planning.
43	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	What are the application limitations (by individual application), such as cannot be virtualized, cannot be combined with other applications, etc.	The requirements of each application vary and will be documented as part of the discovery process in transition planning.

44	Schedule F – CoPA Datacenter Statement of Work	3.3 Transition Services	141 - 155	Does the Commonwealth have limitations or implementation guidelines regarding OS virtualization, such as stacking of workloads within a single OS image using "container" technology?	Limitations and implementation guidelines regarding OS virtualization will depend on agency requirements and will be documented as part of the discovery process in transition planning.
45	Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit E.1 DLI Data Center Inventory Template			Could the Commonwealth provide the addresses of the physical location of the remote servers?	See Exhibit S - Datacenter locations for datacenter addresses
46	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Could the Commonwealth map each server image to its desired Service Level in the RFP and provide such information?	The desired service level of each server image will depend on agency requirements and will be documented as part of the discovery process in transition planning.
47	Exhibit E.1 DLI Data Center Inventory Template			What is the number of server virtual guests per physical server?	The Commonwealth cannot provide the number of server virtual guests per physical server. This will be documented as part of the discovery process in transition planning.

48	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			How many virtual cores per image?	The Commonwealth cannot provide the number of virtual cores per image. This will be documented as part of the discovery process in transition planning.
49	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			How much virtual RAM per image?	The Commonwealth cannot provide the amount of virtual RAM per image. This will be documented as part of the discovery process in transition planning.

50	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			How many virtual NIC ports per image?	The Commonwealth cannot provide the number of NIC ports per image. This will be documented as part of the discovery process in transition planning.
51	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			How many virtual fiber channel ports per image?	The Commonwealth cannot provide the number of virtual fiber channel ports per image. This will be documented as part of the discovery process in transition planning.

52	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Could the Commonwealth please provide system utilization data (performance and capacity) for each image?	The Commonwealth cannot provide the system utilization data for each image. This will be documented as part of the discovery process in transition planning.
53	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Could the Commonwealth please provide data regarding the amount of SAN disk in use per physical and logical image?	The Commonwealth cannot provide the amount of SAN disk in use per physical and logical image. This will be documented as part of the discovery process in transition planning.

54	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			DOR Is data replication required for any of the physical and logical images? If yes, could details please be provided?	DOR replicates data from its mainframes to a replication server using Sybase Replication Software. The details will be documented as part of the discovery process in transition planning.
55	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Could the Commonwealth please provide details regarding third-party contracts in support of the servers, such as maintenance agreements?	The Commonwealth utilizes the IBM maintenance contract for much of its mission-critical equipment (servers, etc), and also uses its Third Party IT Hardware Maintenance contract with Pomeroy for some equipment (including servers). These contracts are available on the Commonwealth's eMarketplace website. The "Third Party IT Hardware Maintenance" contract number is 4400004924. The "IT Hardware Servers – Lot 1" contract number is 4400008767. The "IT Hardware Storage" contract number is 4400008774.

56	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Is there a requirement to monitor and respond to application alerts and, if so, for which systems and applications?	The Offeror is responsible for monitoring and responding to application alerts for the managed services ordered. The systems and applications that need to be monitored will be documented as part of the discovery process in transition planning and/or when new services are ordered.
57	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			What platform automated monitoring and alert tools are used today?	The following application monitoring tools are currently in use by the Commonwealth: MS SCOM, MS SCCM, Paessler (External URL Testing), CiscoWorks, NIMS, syslog, Vmware vCenter, Idera SQL DM, Oracle OEM, Big Brother, EMC Data Protection Advisor, JC Metasys, IBM TPC, Tivoli ITCAM, SightLine, Wiley, SAP Solutions Manager, IBM Director, Nagius. For purposes of submitting a proposal Offerors should assume none of the Commonwealth monitoring tools may be leveraged.

58	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Which servers (physical and logical) have Disaster Recovery requirements?	DR requirements for servers (physical and logical) will depend on agency requirements and will be documented as part of the discovery process in transition planning.
59	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit H.2 DOR DPH Asset List Exhibit I.9 IES Technical Refresh DP Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Which servers/images have a high availability requirement?	Server/image high availability requirements will depend on agency requirements and will be documented as part of the discovery process in transition planning.

60	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Are SVCs being used? If yes: 1) How much usable storage is virtualized using SVCs if any? 2) Can the SVC Clusters see multiple tiers of storage? 3) Do the SVC devices support real-time compression of block storage?	IES and DOR do not use SVCs. DLI uses SVCs. 1) Currently 8TB is virtualized using SVC. L&I has plans to increase this to 43TB. 2) Yes, DS8000 class and XIV class storage. 3) No, this is an add-on license that L&I has not purchased.
61	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Could the Commonwealth please describe the SAN storage system(s), including total physical disk (size and number of drives), number of partitions and sizes per partitions?	For IES, see Exhibit I.4 and I.11. Information for other agencies will be documented as part of the discovery process in transition planning.

62	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			What management software is being used to manage the storage hardware for performance and capacity?	DOR is using XIV GUI, IBM Storage Manager. For IES, see Exhibits I.2, I.3, I.4 and I.11. Information for other agencies will be documented as part of the discovery process in transition planning.
63	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Is point-in-time, flash copy or snapshots being used? What is the amount of data flashed or duplicated?	DOR currently uses Snapshots at DPH for the SAP systems with up to 5TB flashed or duplicated. IES uses IBM XIV Snaps. See Exhibits I.4 for additional information. Any additional information needed will be documented as part of the discovery process in transition planning.

64	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Does the SAN/NAS perform data replication communications with another site? If yes: 1) Total amount of data (GB) replicated between sites? 2) What is the daily data change rate in percentage or GBs? 3) What is the sustained peak/maximum update or data transfer rate to the edge routers and SAN network devices? 4) Is data replication done on a real-time basis or on a periodic time delay basis, such as every 30 minutes, 1 hour, etc.?	The Commonwealth can provide the following information: DOR performs data replication for the imaging Centera which replicates with a box at the Brookwood Street Data Center in Harrisburg. IES performs replication for DPH backup solutions (Data Domain and Avamar) for the applications, databases and operating systems to the DR site. Any additional information needed will be documented as part of the discovery process in transition planning.
65	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Does the SAN have unique features installed to support backup, archiving, data de-duplication, etc.? Could the Commonwealth please provide a list of such features?	The Commonwealth can provide the following information: DOR has no unique features installed except for the imaging Centera which replicates with a box at the Brookwood Street Data Center in Harrisburg. IES in the DPH uses Data Domain for backup of application database and Avamar to backup operating systems. These products provide archiving and de-duplication. Any additional information needed will be documented as part of the discovery process in transition planning.

66	Exhibit B.1 DPH Asset List Exhibit B.2 DPH Common Wealth Owned DPH IT Exhibit H.1 DOR Data Center Inventory Exhibit I.1 IES DPH COPA Owned IT Assets Exhibit E.1 DLI Data Center Inventory Template			Does solution require peer-to-peer communications of data with another site? If yes: 1) What is the typical and maximum network traffic used by this communication? 2) What is the average daily update or data transfer rate that the edge routers and SAN network devices will need to support? 3) What is the sustained peak/maximum update or data transfer rate the edge routers and SAN network devices will need to support time of day)? 4) Is SAN fabric reporting currently implemented?	The Commonwealth has the following specific information: DOR and IES do not require peer-to-peer communications of data with another site. Any additional information needed will be documented as part of the discovery process in transition planning.
67	Appendix A	9 (a)	10	In the Commonwealth response to questions, round 1, part 1, question #24, the Commonwealth stated that the responsibility for logical security/ID administration remains with the Commonwealth. Does this include privileged users?	Please clarify question to explain "Privileged Users" in the context of this question.
68	Schedule J.3	SL01 – SL05	5*9	Which Commonwealth applications are included in these particular Service Levels? Which applications are assigned to which particular Service Level? Does the Commonwealth require that instrumentation be implemented for each individual application to measure availability?	Applicable SLAs will be determined based on the services ordered. The Commonwealth requires service levels SL01-SL05 to be associated at an application level of reporting. Yes, the Offeror must implement instrumentation to measure availability.
69	Schedule F, Statement of Work	3.1.2-5	17	How many security zones per agency should offerors assume?	The Commonwealth has seven (7) datacenters and each has several security zones. The actual number of security zones will be documented as part of the Discovery process during transition.
70	Schedule F, Statement of Work	2.3.1	8	What is the average utilization and bandwidth provided between each Data Center and end user locations on CopaNet and via PIP? Which will need to connect to the target data centers?	All datacenters are connected to COPANET. The current internet connections are connected to COPANET. See Exhibit P – Enterprise Internet Bandwidth Utilization. The selected Offeror's data centers must connect to COPANET.

71	Schedule A, Defined Terms and Schedule I , Offeror Pricing Forms	General Question	General Question	How many concurrent licensed VPN users will terminate in the EDC or Target Data Centers? How many of each type (IPSec or SSL)?	The Commonwealth is requiring the ability for secure remote access to hosted systems for operational and administration purposes for designated personnel. The Commonwealth currently has VPN services hosted by Verizon as part of its Telecom Contract. The number of licensed site to site VPN tunnels is dependent upon the architecture provided and may vary during the term of the contract. Currently the Commonwealth has 5,619 total VPN users.
72	Exhibit D.2, EDC-Switch Inventory	General Question	General Question	What are the device counts for firewalls, WAN Optimization controllers, Wireless controllers, routers and other appliances by model which the supplier will be responsible for by location?	The Commonwealth can only provide the information that is included in Exhibit D.2 - EDC - Switch Inventory. Additional information will be documented as part of the discovery process in transition planning.
73	Schedule F, Statement of Work	3.2.4.2.7	103	Outside of state regulatory requirements, would the Commonwealth please provide backup retention requirements (e.g., retain 12 months full backups, 5 year annuals, etc.)?	Data retention policies will be determined by IT policy, law, and the requirements of the RFP The Commonwealth has data retention polices. Management Directive 210.5 (Commonwealth of PA State Record Management Programs) and several Information Technology Bulletins on this subject. Management Directives can be found at - http://www.portal.state.pa.us/portal/server.pt/community/policies/10301/management_directives/551950 ITBs can be found at - http://www.portal.state.pa.us/portal/server.pt?open=514&objID=210791&mode=2 Individual agencies may have additional data retention policies, such as IRS Pub 1075, etc. The selected Offeror will identify additional requirements during transition for individual services and comply with those requirements.

74	Schedule F, Statement of Work	3.2.4.2.7	103	Would the Commonwealth please state the current backup schedules (e.g., daily Incremental, weekly full, monthly full, etc.)?	Backup schedules vary by agency and will be documented as part of the discovery process in transition planning.
75	Schedule F, Statement of Work	3.2.4.2.7	103	What is the estimated daily change rate for the backups (e.g., 10% for file backups, 20% for database backups, etc.)?	The daily change rate varies by agency and will be documented as part of the discovery process in transition planning.
76	Exhibit E.1, DLI Datacenter Inventory Template	Applications Tab	rows 62 - 78	Would the Commonwealth please provide the following information regarding each AS400 iSeries server: • Location • Model Number • CPU (type, model, feature, etc.) • RAM GB • DASD Storage information • Operating system version and release • Number of LPARs	The Commonwealth cannot provide the information regarding each AS400 iSeries server. This will be documented as part of the discovery process in transition planning.
77	Revised Schedule F, Statement of Work	3.2.4.4	110 #3	Would the Commonwealth please provide the following regarding Production Control/Scheduling for open systems: • Number of batch jobs per month • •Monthly Abend rate	The Commonwealth can provide the following information regarding Production Control/Scheduling for open systems. IES - SAP batch/job processing is internal to the SAP application software. DOR - 46,793 batch jobs per month; 713 abends per month L&I - There are approximately 51,118 batch jobs that are executed within Dollar Universe per month, in which 36% of those batch jobs are aborted. Note: The Offeror may be required to assume responsibility for all or a subset of an agency's batch operations. This will be determined as part of the discovery process in transition planning.

78	Revised Schedule F, Statement of Work	3.2.4.4	111 #3	Regarding open systems batch processing, what software product is used for batch processing?	IES: SAP application manages/schedules batch processing. Integration file processing is managed by BMC Control M. DOR Redwood CPS, IBM's Tivoli Workload Scheduler. L&I - The Orsyp Dollar Universe Job Scheduling software is the Department of L&I enterprise job scheduler. In addition to Dollar Universe, the Microsoft Windows Task Scheduler, Cron, and mainframe job scheduling are used within the agency.
79	Revised Schedule F, Statement of Work	3.2.4.4	111 #3	Regarding open systems batch processing: • What is the level of automation for batch processing? • Describe any manual intervention required to perform batch job processing to completion.	The Commonwealth can provide the following information regarding open systems batch processing. IES: SAP application manages/schedules batch processing. Integration file processing is managed by BMC Control M. DOR Automation of jobs is about 75-80% on a normal day. L&I - All batch jobs processing within Dollar Universe are automatically processed. Those batch jobs that are aborted are then manually executed to process
80	Exhibit B.1, DPH - Asset List	All Agency Tabs listing server HW assets	N/A	In order to provide a fixed price for transition, would the Commonwealth please provide following information to the asset hardware lists for each server / virtual line entry: • Server name or identifier • Platform operating system and level • TIER classification (PTL, GLD, SLR, BRN, Basic) • Primary Application (DB, App, Web, etc.) • Function (Prod, Dev, test, etc.) • SAN attached? (Y/N). If yes, add storage used / allocated (GB)	Any information in addition to what is included in exhibit B.1 DPH Asset List will be documented as part of the discovery process in transition planning.
81	Revised Schedule F, Statement of Work	3.2.1.4	44	What is the total number of users in-scope for Service Desk support? What is the total number of Authorized Commonwealth users?	For purposes of submitting a proposal, Offerors should consider the number of service desk users as 300 and the total number of Commonwealth users as 300. These figures are estimates and may vary.

82	Exhibit K, Enterprise Remedy and Volumetrics	DC Related Volumetrics	11	What is the monthly average count of service requests expected for this scope of work?	There were approximately 350 service requests in 2012 across all in-scope data centers. The expected volume in unknown and will vary during the term of the contract.
83	Exhibit K, Enterprise Remedy and Volumetrics	DC Related Volumetrics	11	What is the average call handle time (talk time plus wrap-up) for contacts to the Service Desk today?	The average duration for an incoming call coming into the DPH help desk in the month of February was 88 seconds. This is for the DPH help desk only; there is no reporting on the other tier 2 service desks.
84	Exhibit K, Enterprise Remedy and Volumetrics	DC Related Volumetrics	11	Are there additional incident volumes that should be expected above what is listed on page 11? If yes, please provide a monthly average estimate for the additional volume.	In addition to the ticket volumes provided, PennDOT has its own Remedy System and processes approximately 160 tickets per month. Labor and Industry processes approximately 100 server-related tickets per month in its Remedy System. Actual volumes will vary during the term of the contract. The selected Offeror must handle all call volumes which occur over the life of the contract.
85	Exhibit D.7, EDC Facility Summary and Requirements	Voice and Data Network Connectivity	11	Would the Commonwealth please provide the specific requirements, for each connection, including bandwidth, circuit or connection type, services included, location addresses, and NPA/NXX for each served location which the offeror is required to maintain connectivity to the Commonwealth's voice and data networks at offeror's expense	Bandwidth information has been provided in Exhibit P - Enterprise Internet Bandwidth Utilization. The Offeror is required to connect to COPANET. See Exhibit U – COPANET Locations for address and NPA/NXX information. Additional information will be documented as part of the discovery process in transition planning.
86	General Question	N/A	N/A	Would the Commonwealth provide a Middleware instance count along with the number of sites each server serves?	The Middleware instance accounts will vary by agency and will be documented as part of the discovery process in transition planning.
87	General Question	N/A	N/A	Would the Commonwealth provide the rate of change each of the Middleware environments (e.g., sites, apps., etc.) get updated, and the level of effort required on a typical update?	The rate of change for each Middleware environments will vary by agency and will be documented as part of the discovery process in transition planning.
88	Exhibit E.33, DLI - UC Telco Layout	All	All	Please advise which, if any, of the equipment shown in this exhibit should be considered to be in scope for migration, and what type of support is required.	All of the equipment in the referenced exhibit is out of scope for migration.

89	Exhibit E.1 vs other DLI Exhibits	General	N/A	Exhibit E.1 indicates a server/image count of 1360; however a review of the various application architectures appears to indicate a server/image count of well over 2000. We understand, of course, that this is a dynamic environment, and a more precise count would be more readily available during transition planning and due diligence; however, for preliminary planning purposes, which of these should be considered to be more accurate to understand the volume of DLI's IT systems?	1360 is the correct server/image count for Labor and Industry. . The application architecture models show shared servers which are redundant in the overall count.
90	Schedule F, Statement of Work	3.2.4.1	116	Please provide the average monthly MIP usage for each of the Dorado LPARs for the most recent 12 month period?	Monthly MIP usage for each of the Dorado LPARs will be documented as part of the discovery process in transition planning.
91	Schedule F, Statement of Work	3.2.4.1	118-119	Please supply the number of batch processing jobs and ABEND rates for each of the Unisys Dorado Partitions?	The number of batch processing jobs and ABEND rates for each of the Unisys Dorado Partitions will be documented as part of the discovery process in transition planning.
92	Schedule F, Statement of Work	3.2.4.1	116	Please provide performance data for each Unisys Libra machine - the average monthly MIP usage for each of the Libra machines in the previous 12 months?	The performance data for each Unisys Libra machine will be documented as part of the discovery process in transition planning.
93	Schedule F, Statement of Work	3.2.4.1	118-119	Please supply the number of batch processing jobs and ABEND rates for each of the Unisys Libra machines?	The number of batch processing jobs and ABEND rates for each of the Unisys Libra machines will be documented as part of the discovery process in transition planning.
94	Schedule F, Statement of Work	3.2.4.1	94	For the Unisys Dorado Machines, how many physical tapes by type (9840, 36-track, etc.) exist?	The number of physical tapes by tape type will be documented as part of the discovery process in transition planning.
95	Schedule F, Statement of Work	3.2.4.1	94	For the Unisys Dorado Machines, how many virtual tapes by type (9840, 36-track, etc.) exist?	The number of virtual tapes by tape type will be documented as part of the discovery process in transition planning.
96	Schedule F, Statement of Work	3.2.4.1	94	For the Unisys Libra Machines, how many physical tapes by type (LTO-3, 36-track, etc.) exist?	The number of physical tapes by tape type will be documented as part of the discovery process in transition planning.
97	Schedule F, Statement of Work	3.2.4.1	94	For the Unisys Libra Machines, how many virtual tapes by type (LTO-3, 36-track etc.) exist?	The number of virtual tapes by tape type will be documented as part of the discovery process in transition planning.
98	Schedule F, Statement of Work	3.2.4.1	94	RFP states "Provide all tools and apps that are currently being provided, for example MAPPER/APPMAP, browser based terminal emulation access, and middleware components (e.g., OpenTI, IBM WBM & WMQ, etc.) that are critical to agency operations and application usage." For the Unisys Dorado Machines, please provide a list of Unisys Software including operating Systems Software and tools that are being used today, by partition?	Exhibit B.4 - DPH - Third Party Software - Contractor Provided and Exhibit B.10 - DPH - Third Party Software - Commonwealth Provided, Contractor Maintained and Managed contain lists of Third Party software for the DPH. Any additional information will be documented as part of the discovery process in transition planning.

99	Schedule F, Statement of Work	3.2.4.1	94	RFP states "Provide all tools and apps that are currently being provided, for example MAPPER/APPMAP, browser based terminal emulation access, and middleware components (e.g., OpenTI, IBM WBM & WMQ, etc.) that are critical to agency operations and application usage." For the Unisys Libra Machines, please provide a list of Unisys Software including operating Systems software and tools that are being used today?	Exhibit B.4 - DPH - Third Party Software - Contractor Provided and Exhibit B.10 - DPH - Third Party Software - Commonwealth Provided, Contractor Maintained and Managed contain lists of Third Party software for the DPH. Any additional information will be documented as part of the discovery process in transition planning.
100	Exhibit H.3, DOR – DPH COPA Software Asset OBM Mainframe		Tab_Revenue-IBM	Please provide a comprehensive inventory of ALL Software Titles installed on ALL six z/OS LPARS defined on z/Series Processor 2817-603 serial number 85C6F. Please indicate who will hold financial responsibility for each product.	The software titles installed on the six z/OS LPARS will be documented as part of the discovery process in transition planning. Financial responsibility for Third party software is set out in Appendix A - Data Center RFP Terms and Conditions
101	Exhibit B.1, DPH – Asset List		Tab_Mainframes_IBM	Please provide processor configuration for processor 2817-603 serial number 85C6F. Please include: • Number of IFL processors installed • Amount of Memory installed • Number of FICON Channels installed • Number of Escon Channels Installed • Number and type of OSA cards installed • Any other specialty processors installed (ZIIP, ZAAP, ICF, Crypto)	Processor configuration for processor 2817-603 serial number 85C6F will be documented as part of the discovery process in transition planning.
102	Exhibit B.1, DPH – Asset List		Tab_Mainframes_IBM	Please provide processor configuration for processor 2098-J02 serial number 3E5DE. Please include: • Amount of Memory installed • Number of FICON Channels installed • Number of Escon Channels Installed • Number and type of OSA cards installed	Processor configuration for processor 2098-J02 serial number 3E5DE will be documented as part of the discovery process in transition planning.
103	Exhibit B.3, DPH - Commonwealth Software Asset Listing		TAB DOC IBM	Please provide a comprehensive inventory of ALL Software Titles installed on the single z/VSE LPAR defined on z/Series Processor 2098-J02 serial number 3E5DE. Please indicate who will hold financial responsibility for each product.	The software titles installed on the single z/VSE LPAR defined on z\Series Processor 2098-J02 will be documented as part of the discovery process in transition planning. Financial responsibility for Third party software is set out in Appendix A - Data Center RFP Terms and Conditions.

104	Exhibit B.1, DPH - Asset List		Tab_Shared SAN Storage	Are the ESCON Channels still in use for DPW, GAME, and PSP Mainframe systems? Are there any known issues with changing these to FICON?	Escon Channels are not still in use for DPW, GAME, and PSP. FICON is an IBM proprietary technology that is not applicable to Unisys mainframe systems.
105	Exhibit B.1, DPH – Asset List		Tab_Shared SAN Storage	Are the 30 9840 tapes for DPW and the 12 9840 tape drives for PSP ESCON or FICON connected within the SL8500? What Model type are the 9840 tape drives (A, B, C, or Ds)?	The 9840 tape drives are Model C and are connected via FICON to the SL8500 tape silo.
106	Exhibit B.1, DPH – Asset List		TAB_Dedicated DR	Is the data from the DMX3 on the shared SAN Storage Tape replicated to the DMX4 on this tab or is the recovery done by performing tape restores from the 9840s?	A subset of the data from the DMX3 is replicated to the DMX4 and is resident at all times at the DR location. The remainder of the data required for disaster recovery on the DMX4 is restored from tape.
107	Schedule F – COPA Datacenter Statement of Work	3.2.5.5 (12)	142	What is intended with the requirement “The service must provide personal email files (.pst).”? Does the requirement indicate that the Service Provider should support existing .pst files or provide new .pst files? Does this indicate a need to support more than one mailbox with an additional 5GB mailbox limit?	The selected Offeror must support new .pst files and support existing .pst files or migrate the existing .pst to a new .pst file. No, it does not indicate the need to support more than one mailbox with an additional 5GB mailbox limit.
108	Schedule F – COPA Datacenter Statement of Work	3.2.5.5	142	When providing personal archiving capabilities, how much of the archival space should be available to users?	The Commonwealth currently uses the .pst files on local storage for archival purposes. Personal archiving is outside the scope of this RFP. See Exhibit Q - Mailbox Restore Policy for additional information. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
109	Schedule F – COPA Datacenter Statement of Work	3.2.5.5	142	Will there be a need to migrate existing .pst files to personal archives?	The Commonwealth currently uses the .pst files on local storage for archival purposes. The selected Offeror is not required to migrate existing .pst files to personal archives, but must support the ability to access existing archived.pst files and create new .pst archives.
110	Schedule F – COPA Datacenter Statement of Work	3.2.5.5	142	Is the Commonwealth willing to transfer any existing non-expired licenses to the Service Provider?	For the purpose of submitting a proposal, Offerors should assume no licenses will be transferred.
111	Schedule F – COPA Datacenter Statement of Work	3.2.5.5	142	Please confirm that the recovery of existing COPA AD will not be part of DR requirement.	The Commonwealth confirms that the recovery of existing COPA AD will not be part of DR requirement.

112	Schedule F – COPA Datacenter Statement of Work	3.2.5.5	142	Does the Commonwealth have any special retention policies and requirements for recovering messages and mailboxes? If so, what are they?	Mailboxes must not to be deleted earlier than 30 days after account deactivations. Individual mail items must be recoverable for at least 5 days after deletion. See Exhibit Q - Mailbox Restore Policy for additional information. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
113	Schedule F – COPA Datacenter Statement of Work	3.2.5.5	142	Are there any legal hold capabilities required for any of the mailboxes? If so, please define the retention period.	Yes, the Commonwealth requires the mailboxes include legal hold capabilities. The required retention period will vary.
114	RFP	Section I-30 COSTARS PROGRAM	23	Can COSTARS participation be added after the contract is negotiated?	Yes.
115	RFP	Section I-30 COSTARS PROGRAM	23	Given the multi-tenant nature of the environment, does the Offeror need COPA approval to add a COSTARS member to the environment when a PO is received?	Commonwealth approval is required to add a COSTAR member to the environment. COSTARS member must be on a segregated environment, not connected to the Commonwealth shared environment.
116	RFP	Section I-30 COSTARS PROGRAM	23	Will the Commonwealth allow a COSTARS member to participate in the shared environment established for the Commonwealth of Pennsylvania?	No.
117	RFP 6100022698	Part 3	23 of 31	As the Offeror, we do not have the certification ISO 27001, 9001, 20000 and SSAE 16 Audit. However, the Data Center we work with and who will be involved in this RFP, has these certifications. In this situation, would the requipments be met?	Offerors may use subcontractors to meet the RFP requirements. The data center proposed by an Offeror must have the required certifications.
118	Questions and Answers – Round 1 Part 1	*126*		Other than security, does the EDC monitor other items within the EDC (e.g. generators, UPS, etc.) using a building management system (BMS) or a data center infrastructure manager system (DCIM)? If so, can the Offeror utilize these systems? Can the Offeror connect electronically to these systems to receive alerts and alarms to its monitoring systems?	The Commonwealth has a BMS that the Offeror may access for generator, UPS and air handler alerts, monitoring and information. The selected Offeror will be able to connect to the BMS electronically.
119	Questions and Answers – Round 1 Part 1	131		How much load does the balance of the building represent as part of the generator capacity? Can this load be isolated and switched off in the event of an emergency within the computer room (e.g. in case of an extended emergency)?	Approximately 600 amps of service to the building are non-data center load. Under the current configuration this load cannot be switched off.

120	Questions and Answers – Round 1 Part 3 Schedule F	4 3.2.1.4	44	How many tickets/calls are from agencies that do not utilize the Commonwealth's Enterprise Remedy System? Will these tickets/calls add to the call/ticket volumes previously provided?	In addition to the ticket volumes provided, PennDOT has its own Remedy System and processes approximately 160 tickets per month. and Labor and Industry processes approximately 100 server-related tickets per month in its Remedy System. Actual volumes will vary during the term of the contract. The selected Offeror must handle all call volumes which occur over the life of the contract.
121	Questions and Answers – Round 1 Part 3	34		The Commonwealth's Microsoft Exchange Enterprise License Agreement may be less expensive than those that may be purchased by an Offeror. To provide greater savings to the Commonwealth, will the Offeror be granted permission to use this or similar Commonwealth ELAs?	~~For the purpose of submitting a proposal, Offerors should assume they will not be permitted to use the Commonwealth's Microsoft Exchange Enterprise License Agreement.~~
122	Questions and Answers – Round 1 Part 3	40		Will the Commonwealth update Schedule J.3 to reflect the definitions of calculations to remove scheduled and approved downtime?	Schedule J.3 has been revised. The following exclusions have been identified. Offeror's failure to achieve any Service Level will not constitute a Service Level Default or accrue toward a Service Level Termination Event to the extent such failure is directly attributable to any of the following: (i) the failure or unavailability of equipment or other resources for which the Commonwealth is operationally and managerially responsible pursuant to the Contract, (ii) changes made to the environment by the Commonwealth that were not communicated in accordance with the Change Control Procedure or other method agreed upon by the Parties, and (iii) scheduled and approved maintenance windows
123	Questions and Answers – Round 1 Part 3	77		Please provide details on the special power requirements at the Department of Labor and Industry.	There are no special power requirements for the Department of Labor and Industry. The power concerns were listed due to an aging transformer at the Labor and Industry building. The Labor and Industry server farm has no special power requirements in and of itself.
124	Questions and Answers – Round 1 Part 3	117		Will the EDC facility service agreements such as those for generators, switches, batteries, etc. be covered from the EDC Reserve Account?	Operating expenses such as service agreements will not be covered from the EDC Reserve Account.

125	Questions and Answers – Round 1 Part 3	123		Please provide information regarding the HIDS required for each agency that will be relocated or in use within the EDC.	See Exhibit J.4 - Security Agent Standard Tools. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
126	Questions and Answers – Round 1 Part 4	39		How many environments have a requirement for physical segregation? What are their respective area requirements?	Requirements for physical segregation will depend on agency requirements and will be documented as part of the discovery process in transition planning.
127	Questions and Answers – Round 1 Part 4	43		Is this transformer shared with the entire facility housing the EDC including non-data center areas?	The PP&L transformer is shared by the entire building (data center and non-data center).
128	Questions and Answers – Round 1 Part 4	45		Please provide the requirements that agencies will have for managing, submitting and controlling scheduled and unscheduled jobs within the environment.	The selected Offeror will provide all job scheduling in the managed hosting services environment. Commonwealth agencies will manage the jobs in non-managed hosting environments.
129	Questions and Answers – Round 1 Part 3 Schedule F	124 3.2.1.1.1 Financial Management	27	What are the expected data integration requirements between the Offeror's invoicing system and the Commonwealth's Remedy System? What module or application within Remedy, what data forms, and what is the expected output to the Commonwealth's Remedy System?	There are no integration requirements with the Commonwealth's ITSM system (currently Remedy). Invoicing will occur via a file transfer procedure that conforms to a format approved by the Commonwealth. The required data forms and output required from the selected Offeror will be documented as part of the discovery process in transition planning.

130	Questions and Answers – Round 1 Part 4	52 53		Please confirm that answers to these two questions have been reversed.	These answers were reversed. Question 52 from Round 1 Part 4 answer has been revised to read:: The current configuration is: * PSP Production: 4 – Fibre PCI Cards SIOP Interfaces – speed 2 Gb * PSP Development: 4 – Fibre PCI Cards SIOP Interfaces – speed 2 Gb The Commonwealth requires the selected Offeror to provide the services set forth in the RFP according to the contract terms and conditions. This existing infrastructure may not be sufficient for the long term. Offerors must determine the quantity, type, speed, etc. of the equipment required to provide the services throughout the term of the contract. Question 53 from Round 1 Part 4 answer has been revised to read: The current configuration is: PSP Production: 6 – 9840C drives 4 – 36 track drives (5236) PSP Development: 6 – 9840C drives 4 – 36 track drives (5236) The Commonwealth requires the selected Offeror to provide the services set forth in the RFP according to the contract terms and conditions. This existing infrastructure may not be sufficient for the long term. Offerors must determine the quantity, type, speed, etc. of the equipment required to provide the services throughout the term of the contract.

131	Schedule I	Volumemetrics Tab and Managed Services (Only) Tab		In the Volumetrics Tab, under the section of "Other Devices (non-Server) - Managed Only" there are baseline quantities listed for a general group of equipment labeled as "Network, Security, Storage, Appliances, and other non-Server Devices" Please be aware that the service requirements for this group of equipment would vary greatly depending on the specific equipment manufacturer, model number, and the actual number of each type of equipment. For instance, a single "appliance" could range from a very sophisticated database appliance requiring a great deal of labor to a very simple appliance that may not require much labor at all. Given the current requirement to provide a single unit price for this entire group of equipment, please provide details on each type of equipment in this group and the baseline quantities for each type. If this equipment cannot be identified at this time, the Commonwealth may want to consider adding this type of equipment to the service catalog on an as-needed basis in an effort to reduce overall pricing.	"Network, Security, Storage, Appliances, and other non-Server Devices" section of Schedule I - Offeror Pricing Forms has been removed. Schedule I has been revised to include this change.
132	Schedule F – Statement of Work (Amended 2.18.13) Schedule J – all	3.2.4.7 SL01-SL05	128	Which SLAs, if any, apply to database services? If any, how does the Commonwealth see the database service being measured beyond those SLAs applicable to the server resource unit SLAs?	SL01 – SL05 take into consideration every infrastructure component for the application as related to the SLA ordered. The Offeror is responsible for the services ordered. This includes database services. Therefore, the selected Offeror will be responsible to make sure all of the associated services are working as designed and ordered.

133	Schedule F – Statement of Work (Amended 2.18.13)	3.2.4.7	128	For which service tiers (Fully Managed, Managed Only, IaaS, etc.) are database services to be provided?	~~Database services may be required for all Tiers, based on the service ordered by the Commonwealth.~~ ~~Other than those provided for in the rate card in Schedule I there are no Database Administration functions required. The selected Offeror will be required to provide technical assistance to the Commonwealth's DBA staff.~~ ~~Offerors may include a Database Administration as a service in the Service Catalog.~~
134	Schedule D – Transition Milestones Schedule F – Statement of Work (Amended 2.18.13)	M-14 3.3.2	146	In Schedule D – Transition Milestones Document (M-14) the target date for EDC Operational Transition Completion is 12/31/2014. However, Schedule F – Statement of Work (3.3.2) states that the Offeror must assume operations support of the EDC datacenter within 90 days of Contract start date. What is the difference between Operational Transition Completion and Operations support? If these terms are the same, which completion date is actually required?	The EDC Operational Transition Completed milestone due date is 12/31/2014. Schedule F - Datacenter Statement of Work has been revised to remove the reference to "Contract start date + 90 days.
135	Schedule D – Transition Milestones Schedule F – Statement of Work (Amended 2.18.13)	M-14 3.3.2	146	When does the 90-day takeover for the EDC period to begin? What does this takeover entail (e.g. operational take-over of the environment, service desk, ITSM support, etc.)?	The EDC Operational Transition Completed milestone due date is 12/31/2014. Schedule F - Datacenter Statement of Work has been revised to remove the reference to "Contract start date + 90 days. Refer to Schedule D - Transition Milestones for milestone acceptance criteria.
136	Schedule D – Transition Milestones	General		To aid transition, will the Offeror be allowed to install device and security discovery tools within the existing agency environments? If so, what will be required to gain the needed network and device access?	Yes, with Commonwealth approval. Prior to installing these items on the Commonwealth's network, the selected Offeror must have the appropriate background checks and the devices and network requirements must be vetted with the Commonwealth's Chief Information Security Officer to ensure there will be no harm or loss of Commonwealth data or disruption to network resources.
137	Schedule F – Statement of Work (Amended 2.18.13)	2.3.4 #1	11	If security vulnerability assessments of the existing agency environments indicate the need for agency security remediation, will the consequences of this remediation be taken into consideration with regards to the transition timelines and key milestones?	Identifying these impacts will be part of the transition planning and should be taken into consideration by the Offerors in their planning.
138	Schedule J.3 SLAs	General		Please confirm that SLAs will not apply prior to the completion of an agency, DPH, or EDC transitions?	The SLAs will apply once an application is transitioned.

139	Appendix A	II-8	20	Can the Commonwealth please confirm the intent that the proposals are based on the terms and conditions set out in Appendix A so that the Commonwealth can compare proposals on an apples to apples basis, then later intending to negotiate the terms and conditions as highlighted in the RFP submission from the Offeror in good faith after award to the winning proposal?	The intent of Part II-8 is to ensure all proposals are based on the terms and conditions set out in Appendix A. The Issuing Office may, in its sole discretion, accept or reject any requested changes to the terms and conditions. The Issuing Office will reject any proposal that is conditioned on the negotiation of the terms and conditions set out in Appendix A.
140	Schedule F, COPA Data Center Statement of Work	3.2.4.7	Database Services Page 128	Would the Commonwealth please provide the RDMS instances and types executing on all z/Os and z/VSE LPARs (e.g., DB2, IMS, Oracle)?	The Commonwealth can provide the following information regarding RDMS instances. DPW has two AS400 LPARs, both of which run DB2. DOR has the following: • Production - Relational DBMS: DB2P, DB2R, DB2T, DSN • Production Hierarchical DBMS: IMS, IMSB • Test - Relational DBMS: DB2B • Test Hierarchical DBMS: IMSZ PennDOT has the following: RDMS instances: z/OS: IMS is used in Sandbox (PDTT), Pre-Prod (PDT1) and Prod (PDT0) 1 instance pre environment, DB2 is used in Sandbox (PDTT) 1 instance, Pre-Prod (PDT1) 5 instances and Prod (PDT0) 2 instances. z/VM: Oracle is used in Pre-Prod (DOTLNX01) 7 instances and Prod (DOTLNX02) 2 instances. L&I has one (1) instance DB2 z/OS, one instance IMS. Any additional information will be documented as part of the discovery process in transition planning.

141	Schedule F, COPA Data Center Statement of Work	3.2.4.5	Mainframe Services Page 116	Would the Commonwealth please provide the number of CICS regions and MQ Series regions running on all z/OS and z/VSE LPARs?	The Commonwealth can provide the following information regarding the number of CICS regions and MQ Series regions running on all z/OS and z/VSE LPARs. Neither DPW LPAR uses CICS or MQ Series. DOR is running the following: • 10 CICS regions on the production LPAR and 1 CICS region on the Dev/Test LPAR. • WebSphere MQ managers is running 2 on the production LPAR and 1 on the 1 on the Dev/Test LPAR. • DOR is not using z/VSE operating system. Just z/OS. PennDOT uses WMQ in z/OS: Sandbox (PDTT), Pre-Prod (PDT1) and Prod (PDT0 and in z/VM: Pre-Prod (DOTLNX01) and Prod (DOTLNX02). L&I is using 6 IMS, 5 CICS, and 2 MQ

142	Exhibit B.1, DPH-Asset List		Mainframes-IBM Tab	a. Would the Commonwealth please confirm if there are a total of two or three 3584 dedicated tape libraries? b. Please confirm the configuration of these libraries and their functions. For example: 1 – 3584-L53 frame 5 – 3584-D53 frames 8 – 3588-F4A (LTO3 drives) 1 – HA feature code This library is used to back up the z/LINUX environment. c. Are the two TS7740s libraries in a GRID configuration? d. Please confirm that the 3592-J70 controllers are used to support the 3590-H11 tape drives. e. What is the cache size for each TS7740 Virtual Tape Engine? f. Are you currently using encrypting data going to the 3592-E05 and/or 3592-E06 tape drives? I f.1 so, is the Commonwealth using software or hardware encryption? f.2 If the Commonwealth is using hardware encryption, what is used for the key management (i.e., EKM, TKLM, or ISKLM)? f.3 Is the key management software installs in z/platform or on a midrange platform?	a. There are three 3584 dedicated tape libraries. b. Reference Exhibit B1. If questions remain, please provide clarification c. Yes d. The 3592-J70 controllers are used to support the 3590-H11 tape drives e. 16GB f. Data encryption requirements are agency and application specific and will be documented as part of the discovery process in transition planning.

143	Schedule F, COPA Data Center Statement of Work	3.2.4.5	Mainframe Services Page 116	Please provide information on the batch environment including the following data items: 1) Number of batch jobs that execute on all the z/OS, z/VM, and z/VSE LPARs 2) Abend Ratio (number of abends expressed as a percentage of executed jobs) 3) On a monthly basis, the average number of adhoc batch requests 4) On a monthly basis, the average number of change requests to the monthly batch schedules 5) On a monthly basis, the average number of new batch requests added to the batch schedule	The following is the available agency specific information on the batch environment: DPW: 1) Between the two LPARs, there are approximately 40 monthly batch jobs, 40 weekly batch jobs, and 25 daily batch jobs. 2) Abends are rare as are batch job changes. 3) On average, there are approximately 8 ad hoc batch jobs a month. 4) New requests are less than one a month. 5) The average number of batch requests added will be documented as part of the discovery process in transition planning. DOR: 1) The number of batch jobs will be documented as part of the discovery process in transition planning. 2) Abend Ratio around 12 % (49,465 jobs, 602 abends for the month) 3) Average AdHoc requests per month are about 200 to 300(busy month) 4) more than 300 5) The average number of batch requests added will be documented as part of the discovery process in transition planning. PennDOT: PennDOT currently uses IBM Tivoli Workload Scheduler (TWS) for scheduling jobs. PennDOT is responsible for managing, submitting, controlling the TWS applications and DPH IBM monitors the jobs. 1) The number of batch jobs will be documented as part of the discovery process in transition planning. 2) The abend ratio will be documented as part of the discovery process in transition planning. 3) The number of AdHoc batch requests will be documented as part of the discovery process in transition planning. 4) the number of change requests will be documented as part of the discovery process in transition planning. 5) The average number of batch requests added will be documented as part of the discovery process in transition planning. L&I: 1) 1609 2) 5% 3) 25 4) 10 5) 5

144	Schedule F, COPA Data Center Statement of Work	3.2.3.2	Site Operations Page 88	For tape processing, would the Commonwealth please provide the volumes requested below: 1) Number of manual mounts on the z/OS, z/VM, and z/VSE LPARs 2) The number of tapes that are rotated on/off site per month 3) Number of physical tape media in the entire z/OS, z/VSE, and z/VM library by media type (e.g. 3590, 3592)	The following is the agency specific information regarding tape processing: DPW: The two LPARs use a small number of 3584 and 3592 tapes, around two each per month, with a small subset (less than 10%) of these being sent offsite for storage. DOR: For DOR's datacenter, roughly 200-250 a month go in and out. There are 1000 tapes in the system of which about 750-800 are in the library at any given time. L&I: 1) The majority of mounts are virtual. The estimated volume of physical mounts is less than 20 per month. 2) Under the outsourced agreement, our tapes and data are combined with outer shared agency resources. Accurate data is not available for this. 3) 7431 Total Physical tapes 100 – 3592 cartridges 7331 – 3490 cartridges Additional information regarding tape processing will be documented as part of the discovery process in transition planning.
145	Schedule F, COPA Data Center Statement of Work	3.2.4.5	Mainframe Services Page 116	Please confirm that there are no Database Administration functions in scope other than technical assistance to the Commonwealth's DBA staff.	Other than those provided for in the rate card in Schedule I there are no Database Administration functions required. The selected Offeror will be required to provide technical assistance to the Commonwealth's DBA staff. Offerors may include a Database Administration as a service in the Service Catalog.
146	Exhibit I.1, IES - DPH COPA OwnedIT Assets		Rows 123 & 124	Would the Commonwealth please provide details on what the application is for Filenet? Is this P8?	FileNet software is no longer used by IES. The servers listed in Exhibit I.1 (PRDARCI1U, PRDARCW1U) have been decommissioned.

147	Exhibit I.1, IES - DPH COPA OwnedIT Assets		IES Tab	There are several SAP servers included in the list without details of what SAP component they belong to. Would the Commonwealth please provide details onwhat the following servers are: dba01u, dc6dca0u, dc7dca0u, DE2CIA0U, DEVALM01, devdb01u, DEVDQM01, DEVLVC01, IESDC02, prddb01u, prddb02u, PRDDQM01, PRDI3U, PRDSROUTE01 (CTC), qasdb01u, qc6dca0u, qcpapp1u, qcpdca0u, QEPCIA0U, qppdca0u, QVPCIA0U, qwpdca0u, sc2dca0u, STGW6U (CTC)?	dba01u - Development SAP Portal database, dc6dca0u - Development SAP ECC DB/CI, dc7dca0u - Development SAP ECC DB/CI, DE2CIA0U - Development SAP Portal, DEVALM01 - Development HP Quality Center, devdb01u - Development SAP Portal database, DEVDQM01 - Development SAP BOBJ Data Quality Management, DEVLVC01 - Development HP LoadRunner, IESDC02 - IES Domain Controller, prddb01u - Production SAP Portal database, prddb02u - Production non-SAP Oracle databases, PRDDQM01 - Production SAP BOBJ Data Quality Management, PRDI3U - Production MQ Series and SAP Business Connector, PRDSROUTE01 - SAProuter used for connection to SAP for software support, qasdb01u - Quality Control SAP Portal databases, qc6dca0u - Quality Control SAP ECC DB/CI server, qcpapp1u - Quality Control SAP ECC application server, qcpdca0u - Quality Control 2 SAP ECC DB/CI server, QEPCIA0U - Quality Control SAP Portal, qppdca0u - Quality Control 2 SAP ECC DB/CI, QVPCIA0U - Quality Control SAP Portal, qwpdca0u - Quality Control SAP Business Warehouse DB/CI, sc2dca0u - Sandbox SAP ECC DB/CI, STGW6U (CTC) - SAP BOBJ staging server located in CTC DMZ
148	Exhibit I.1, IES - DPH COPA OwnedIT Assets		IES Tab	Are the servers defined as DPH servers, SAP servers? If so, please indicate what SAP Component these are.	The servers designated as DPH systems do not host SAP software. They are used by the DPH for management and support of the AIX or VMWare environments.
149	Schedule F, COPA Data Center Statement of Work	3.2.4.3.8	User Account Management – page 108	Is the Commonwealth requesting that Offerors provide SAP security? If so, would the Commonwealth please provide the total number of SAP users for all production and non-production users who will have access to the systems?	The Commonwealth will perform SAP software application security administration for all SAP systems. The selected Offeror is required to provide operating system level user administration for CoPA staff supporting the SAP applications. All Commonwealth users (Commonwealth employees, business partners, contractors, etc.) are potential SAP users.

150	Exhibit B.1, DPH – Asset List	DOR Tav		The last 13 rows appear to be SAP servers. Would the Commonwealth please confirm that these are indeed SAP servers: EP, BOBJ, BI/BW Java. Also, please clarify what SAP components RMP, Production, Production Master Media Server, and Migration servers are. Are these SAP ABAP, JAVA, NetWeaver systems? Or are they SAP 3rd Party systems?	The following list provides details on the 13 servers, indicating if they are SAP or Non-SAP servers. RVDPHRPX- SAP NetWeaver 7.3 Java Ent. Portal RVDPHRPP- Not currently used; RVDPHROD- SAP NetWeaver 7.3 Java BOBJ CPS RVDPHROX - SAP Netweaver 7.3 Java BOBJ RVDPHROT - SAP Netweaver 7.3 Java BOBJ RVDPHROQ - SAP Netweaver 7.3 Java BOBJ CPS RVDPHRXJ - Not currently used RVPDPHDC1 - Non-SAP Server - SQL Server RVPDPHDC2 - Non - SAP Server - Data Masking Engine RVDPHROP1 - SAP Netweaver 7.3 Java CPS RVDPHROP2 - SAP Netweaver 7.3 Java CPS RVDPHMMBK1 - Non-SAP Server RVDPHDC3 - Non-SAP Server - SQL Server

151	Schedule F, COPA Data Center Statement of Work	3.2.5.5 3		Would the Commonwealth please describe the client workstation OS distribution used in the COPA environment – Windows, MAC, etc.? Please describe the Outlook/email client versions used (i.e., Outlook 2003, etc.), and is there a current program to maintain a minimum standard version?	The Commonwealth currently has various desktop client workstation OS distributed in the COPA environment. 95% of Commonwealth desktop clients utilize Microsoft Windows operating systems (e.g. Windows 7, XP), none of which are older than XP. In addition, the Commonwealth has a limited number of Macintosh and Linux operating systems for desktop clients. Linux desktop clients are mainly used to connect to Virtual desktop Infrastructure (VDI) which uses Windows OS environment. As the Commonwealth use of VDI increases, additional operating systems may be used to connect to VDI. The Commonwealth currently has various Outlook/email client versions distributed in the COPA environment. The Windows based desktop clients use Outlook 2003, 2007, 2010 and a few have Office XP version. The Macintosh OS desktop clients use Mail.
152	Schedule F, COPA Data Center Statement of Work	3.2.5.5 10		Would the Commonwealth please describe the supported mobile device types/OS and breakdown the approximate number of devices by type (Blackberry, Android, iOS, etc.)? Is there a projected growth rate on mobile devices in the environment? Is there a current MDM application in use for the mobile devices?	The Commonwealth cannot provide an approximate number of mobile devices by OS. The service must be able to support iPhone/iPad and Android devices, and Blackberry Enterprise Server. The Commonwealth cannot provide a projected growth rate on mobile devices in the environment. The Commonwealth is implementing Airwatch but does not have a timeframe on when it will be fully rolled out.
153	Schedule F, COPA Data Center Statement of Work	3.2.5.5 15		For encryption, is the ability to encrypt email internally desired or only needed for email sent externally?	Yes, the Commonwealth requires the ability to encrypt email internally as well as externally.
154	Exhibit A, Commonwealth Network Environment	Target Data Center	P2	How many concurrent PSP users should the Offeror assume will connect to the Consolidated Data Center and how many will connect via IPSec vs. SSL VPN, vs. Copanet WAN?	All PSP users connect through COPANET using the same route to the Consolidated Data Center whether they are using IPSEC or SSL VPN.
155	Exhibit A, Commonwealth Network Environment	Target Data Center	P2	How many concurrent NON PSP users should the Offeror assume will connect to the Consolidated Data Center and how many will connect via IPSec vs. SSL VPN, vs. Copanet WAN?	The Commonwealth cannot provide the number of concurrent users. The Commonwealth has provided a bandwidth report as part of Exhibit P – Enterprise Internet Bandwidth Utilization.
156	Schedule F, COPA Data Center Statement of Work	3.2.1.1.4	32	What business partners or third parties will not provide WAN routers and premises equipment to connect the circuits which they are providing, to the cnetwrks in the target data center ?	Currently all Business Partners must provide Ethernet connectivity. The type of premise equipment depends on the connectivity needed and is negotiated with each Business Partner.

157	Schedule F, COPA Data Center Statement of Work	3.2.4.7	Database Management Services	Regarding open systems, would the Commonwealth please provide the database vendor platforms required by the Commonwealth for database management services (i.e., Oracle, MS SQL, DB2, etc.)?	Currently the database vendor platforms vary by agency and applications. DPW has a Database group that manages its Oracle, SQL Server, and Unisys mainframe DMS and RDMS databases. DOR: Oracle, MS SQL, DB2, Sybase, IMS Health: Oracle, MS SQL, Sybase PennDOT: RDMS instances: z/OS: IMS is used in Sandbox (PDTT), Pre-Prod (PDT1) and Prod (PDT0) 1 instance pre environment, DB2 is used in Sandbox (PDTT) 1 instance, Pre-Prod (PDT1) 5 instances and Prod (PDT0) 2 instances. z/VM: Oracle is used in Pre-Prod (DOTLNX01) 7 instances and Prod (DOTLNX02) 2 instances. L&I: Oracle Database, Microsoft SQL Server, DB2 z/OS, IMS, DB2 UDB, Sybase ASE Additional information regarding database vendor platforms will be documented as part of the discovery process in transition planning.
158	Exhibit E.1 – DLI, Datacenter Inventory Template	Applications Tab	rows 62 - 78	Does the Commonwealth own the iSeries (AS400) hardware and LPP program software products? Is the Commonwealth the original purchaser of the iSeries license and LPP program software products and available for transfer to a providers hardware asset?	The iSeries hardware is owned by Unisys. The LPP program is a Labor and Industry in-house written system.
159	Exhibit E.1 – DLI, Datacenter Inventory Template	Applications Tab	rows 62 - 78	What is the long term strategic direction for the iSeries platform?	The Commonwealth plans to move off of the iSeries platform within the next two years.
160	General Question	N/A	N/A	Is Oracle ERP in scope? It is not listed in the software inventory.	PLCB's Oracle ERP solution is not in scope except for the infrastructure hosting that supports the Oracle ERP solution.
161	General Question	N/A	N/A	Does each agency/organization under the Commonwealth have its own security policy or program?	The Commonwealth has defined IT policies (ITBs) and directives that must be followed by the enterprise. In addition, some agencies have more detailed and specific policies depending upon the agency's business requirements.

162	General Question	N/A	N/A	How is DLP implemented today within the Commonwealth? Are there separate instances with different tools? Is it implemented per agency	Currently the Commonwealth uses Cisco Ironport for egress email DLP at the enterprise level.
163	General Question	N/A	N/A	a) Have any data discovery or data reduction initiatives taken place? B)Are there any standards around data storage, retention, encryption, etc.?	a) On a case by case basis by application, data discovery or reduction activities have taken place. No enterprise data discovery or data reduction initiatives have taken place. b) Data retention, data storage, or encryption policies will be determined by IT policy, law, and the requirements of the RFP The Commonwealth's data retention polices. Are set out in Management Directive 210.5 (Commonwealth of PA State Record Management Programs) and several Information Technology Bulletins on this subject. Management Directives and ITBs can be found at http://www.portal.state.pa.us/portal/server.pt/community/policies/10301/management_directives/551950 and http://www.portal.state.pa.us/portal/server.pt?open=514&objID=210791&mode=2 ITBs SEC020 (Data at Rest) and SEC031 (Data in Motion) define the Commonwealth's policies on data at rest and data in motion. Individual agencies may have additional data retention, data storage, or encryption policies, such as the FBI's CJIS Security Policy, IRS Pub 1075, FIPS 140-2, etc. The selected Offeror must identify any additional applicable requirements during transition for individual services and comply with those requirements.
164	General Question	N/A	N/A	How is RSA Archer used today? What information is provided to Archer? What components of Archer are implemented today?	RSA Archer is used to provide audit and compliance assistance within EDC. The following modules are used - Enterprise, Risk, Policy, Threat. At this time there are no data feeds connected to Archer.
165	General Question	N/A	N/A	Is it permissible for Offerors to submit documents not available in Microsoft Office format in Adobe PDF format only (e.g., audited financial statements, insurance documentation, etc.)?	Yes.

166	Schedule I, Offeror Pricing Forms	1.Volumetrics	Row no 190, Col E	Would the Commonwealth please confirm if the total storage listed in baseline quantity includes the Production and Disaster Recovery (DR)? If so, would the Commonwealth provide a breakup of production volumes and DR volumes?	The baseline quantity includes production only. The configuration definitions tab identifies which configurations include DR. Each configuration has associated volumetrics. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. Actual volumes may vary.
167	Schedule I, Offeror Pricing Forms	1.Volumetrics	Row no 192, Col E	Does the baseline quantity for "server tape stored" include Production and Disaster Recovery (DR)? If so, please provide a breakup of production and DR volumes.	The baseline quantity includes production only. The configuration definitions tab identifies which configurations include DR. Each configuration has associated volumetrics. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. Actual volumes may vary.
168	Schedule F, COPA Data Center Statement of Work		101	Would the Commonwealth please provide the current Recovery Point Objectives (RPO) and Recovery Time Objectives (RTO) categorized by server tier/application?	See B.9 – DPH – Recovery Time Objectives for a list of RTOs for applications in the DPH. The Commonwealth cannot provide RPO documentation; this information will be documented as part of the discovery process in transition planning. This is a confidential document. To receive a copy, please contact Sheryl Kimport, the Issuing Officer.
169	Addendum 7 Questions and Answers Round 1 Part 3	Question #45	7	The Commonwealth's response to question #45, stated: "The 60% requirement stated in Part III-4 applies to all prime contractors. No SDB points will be awarded to an Offeror unless the company serving as the prime contractor directly performs at least 60% of the total contract value." "Total Contract Value" implies the inclusion of labor, facilities, hardware, software, telecommunications, office space, etc. Could the Commonwealth please confirm that the aforementioned components should be included in total contract value?	The 60% requirement in Part III-4 has been deleted and Part II-9 of the RFP has been revised.

170	Addendum 7 Questions and Answers Round 1 Part 3	**Question #45**	7	Related to question #45, the Commonwealth has made no commitment to a baseline volume. As such, legally, there is no financial commitment associated with this contract. In this case the Total Contract Value = $0. Given this, it would be impossible to calculate the percentage of work performed (i.e. the 60% requirement) of total contract value, because the denominator is 0. In such an event, no vendor would qualify for any of the Small Diverse Business Participation points. Is our interpretation correct?	The 60% requirement in Part III-4 has been deleted and Part II-9 of the RFP has been revised.
171	**Request for Proposal**	II-9, B., 1. III-4, C., 1.	21 24	Section II-9, subsection B, item 1, of the RFP on page 21 states "Offerors must include a numerical percentage which represents the total percentage of the work (as a percentage of the total cost in the Cost Submittal) to be performed by the Offeror and not by subcontractors and suppliers." As this relates to the 60% requirement in RFP section III-4, item C.1 on page 24 of the RFP, can the Commonwealth provide guidance on how to meet the 60% requirement given the amount of facilities, hardware, software, telecommunications, office space, etc. that would have to be included in the denominator of this calculation?	The 60% requirement in Part III-4 has been deleted and Part II-9 of the RFP has been revised.
172	Questions and Answers – Round 1 Part 3 RFP	29 11-9, B,2, a	21	The answer to this question restated the requirement to provide a "numerical percentage"; however, the answer did not address how a "dollar amount of each subcontract commitment to a Small Diverse Business" (as called for in the RFP Part II-9, B, 2, page 21) can be provided since the Commonwealth is not committing to a minimum participation. In other words, given that the Commonwealth is unwilling to provide any level of financial commitment or any level of committed participation, please clarify how the "dollar amount" requirement should be calculated.	Part II-9 of the RFP has been revised.
173	General Question			The current contract with the Unisys Corporation-Exhibit 1.02(31), within (Article 34.0- Service Level Credits) document does not exist. Our SLA Manager needs the information within Exhibit 1.02(31) to complete the review of the SLAs. Could you please send us Exhibit 1.02(31)?	The contract documents have been posted on the Pennsylvania Treasury website http://contracts.patreasury.gov/View.aspx?ContractID=228198.

174	General Question			The current contract with the Unisys Corporation- Exhibit 21.01, pages 7-33 are cut off in the PDF file that is found online in the eMarketplace. Could you please send us a copy of the Exhibit 21.01 that includes all of the pages so there are not cut off pages due to a landscape orientation?	The contract documents have been posted on the Pennsylvania Treasury website http://contracts.patreasury.gov/View.aspx?ContractID=228198.

Addendum 16 – New and Revised Answers

Revised Answers

Addendum 3 - Round 1, Part 1					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
24.	Appendix A	9 (a)	10	Will Offeror have any responsibility for logical access (LDAP, Exchange, Active Directory, etc.)?	~~Exchange as a Service is included within the scope of the RFP but the other services such as LDAP and Active Directory will remain under the Commonwealth's control. However, the selected Offeror must provide the equipment to operate these services.~~ **Revised Answer:** Exchange as a Service has been removed from this RFP. Schedule F, I, J.2 and J.3 have been revised to remove exchange as a service.

Addendum 4 - Round 1, Part 2					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
69.	Schedule F	3.2.5 Capacity on Demand Services	133-141	a.□ Does CoPA have difficulty managing peaks and valleys in demand and workload in their test / dev environments? b.□ Is MS Exchange as a service considered in or out of scope? c.□ Can GR resources be utilized for back office functions in our delivery model? d.□ Is CoPA willing to relinquish architectural control in a capacity on demand environment? e.□ Is the target for Image Activation in a capacity on demand environment under 24 hours? f.□ Is CoPA willing to sign up for a minimum baseline? g.□ Is CoPA flexible to change its standardized service request process? h.□ Is CoPA comfortable with the Agencies documenting requirements, but the Offeror defining the technology and service solution against those requirements to optimize across the Data Center? i.□ Is CoPA willing to relinquish control over outage windows and when/ how images are patched for their capacity on demand?	~~a.□ Yes.~~ ~~b.□ In scope.~~ ~~c.□ Please define "GR resources."~~ ~~d.□ No. The Offeror must propose an architecture and the Commonwealth then will approve or disapprove before implementation.~~ ~~e.□ Yes, the Commonwealth is, however, always looking for the ability to deliver services in a shorter interval.~~ ~~f.□ No.~~ ~~g.□ Yes.~~ ~~h.□ No. The Offeror must propose an architecture and the Commonwealth then will approve or disapprove before implementation.~~ ~~i.□ No~~ **Revised Answer:** a.□ Yes. b.□ Exchange as a Service has been removed from this RFP. Schedule F, I, J.2 and J.3 have been revised to remove exchange as a service. c.□ Please define "GR resources." d.□ No. The Offeror must propose an architecture and the Commonwealth then will approve or disapprove before implementation. e.□ Yes, the Commonwealth is, however, always looking for the ability to deliver services in a shorter interval. f.□ No. g.□ Yes. h.□ No. The Offeror must propose an architecture and the Commonwealth then will approve or disapprove before implementation. i.□ No

Addendum 7 - Round 1, Part 3					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
38	Schedule F	2.3.3	10	The services framework graphic notes "Exchange as a Service" as a capacity on-demand/additional service offering. This offering is not described anywhere else in schedule F. Please provide requirements and expectations around this service.	~~Schedule F has been amended and reissued to include requirements.~~ **Revised Answer:** Exchange as a Service has been removed from this RFP. Schedule F, I, J.2 and J.3 have been revised to remove exchange as a service.

Addendum 15 – New Answers					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
121	Questions and Answers – Round 1 Part 3	34		The Commonwealth's Microsoft Exchange Enterprise License Agreement may be less expensive than those that may be purchased by an Offeror. To provide greater savings to the Commonwealth, will the Offeror be granted permission to use this or similar Commonwealth ELAs?	~~For the purpose of submitting a proposal, Offerors should assume they will not be permitted to use the Commonwealth's Microsoft Exchange Enterprise License Agreement.~~ **Revised Answer:** Exchange as a Service has been removed from this RFP. Schedule F, I, J.2 and J.3 have been revised to remove exchange as a service.

Addendum 9 - Round 1, Part 5					
	Doc	**Sec**	**Pg**	**Question**	**Answer**
9	Appendix A	11 (b) (2)	13	Certification specified in this section are those held by individuals rather than the organization. What is the Commonwealth's requirement for quantity of professionals holding those certifications?	~~At a minimum, the Chief Information Security Officer (CISO) provided by the Offeror must maintain current security certifications as stated in referenced section of Appendix A. The Commonwealth has not defined the number of individuals that must hold the referenced certifications. Offerors should propose their best solutions.~~ **Revised Answer:** At a minimum, the Security Manager provided by the Offeror must maintain current security certifications as stated in referenced section of Appendix A. The Commonwealth has not defined the number of individuals that must hold the referenced certifications. Offerors should propose their best solutions.

Revision: All references to "Sheryl Kimport, Issuing Officer" should reference "Issuing Officer".

Revised answer (original answers posted as Addendum 7 - Round 1, Part 3)					
	Doc	Sec	Pg	Question	Answer
30	Schedule F	3.3	141	"Initial transition approach of the Commonwealth's mainframe and SAP environments requires that the results be as close to the Commonwealth's current configurations as technically possible". Since the configurations described in the exhibits are not reflected in Schedule I, (Pricing Forms) is the Commonwealth financially responsible for paying for any gaps to ensure that these configurations meet or exceed current configurations?	~~Offerors must provide a catalog of services, including pricing, that includes sufficient detail to allow the Commonwealth to order the desired configuration(s) required to satisfy the need of the application owner. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth.~~ Offerors must provide the requested catalog of services, including pricing, that includes sufficient detail to allow the Commonwealth to order the desired configuration(s) required to satisfy the need of the application owner. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth.
68	Schedule F	3.2.2.2	67	What does the Commonwealth consider to be reasonable timeframe to receive written acceptance regarding ready for use and user acceptance testing? At what level will such approvals be required i.e. system, application, agency, etc.?	~~The Commonwealth will not unreasonably withhold or delay the acceptance or rejection of the Offeror's written notice regarding "ready for use". The range may vary but will generally fall within two (2) days to two (2) weeks based on many factors such as required Commonwealth verifications, Commonwealth personnel availability, complexity of the new environment, etc.~~ The Commonwealth will not unreasonably withhold or delay the acceptance or rejection of the Offeror's written notice regarding "ready for use". The range may vary but will generally fall within two (2) days to two (2) weeks based on many factors such as required Commonwealth verifications, Commonwealth personnel availability, complexity of the new environment, etc.

Revised answer (original answers posted as Addendum 8- Round 1, Part 4)					
	Doc	Sec	Pg	Question	Answer
36	Schedule F	3	12	This Task section states that the Commonwealth has provided detailed information on the current environments in the exhibits. It also states that the Offeror shall utilize the exhibits as the baseline requirements (in terms of services, quantities and bandwidth) for developing its proposal. Be aware that the "Volumetrics", reflected in Schedule I, do not reflect the current services, quantities, or the bandwidths that are reflected in the exhibits. Please explain this inconsistency. If the "Volumetrics" are only to be used for cost evaluation, how will the Commonwealth actual pay for the configurations reflected in the exhibits and being requested in this requirement?	~~Schedule I will be used to evaluate pricing. The Offeror is to provide a catalog of services within the Catalog of Services tab of Schedule I, including rates that are consistent with the rates proposed throughout Schedule I. This service catalog will be used to determine the cost of each service provided to the Commonwealth. The invoice must reflect the items and rates listed in the catalog with quantities purchased.~~ Schedule I will be used to evaluate pricing. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth. The Offeror is to provide the services within the Catalog of Services tab of Schedule I, at the rates proposed in Schedule I. This Catalog of Services will be used to determine the cost of each service provided to the Commonwealth. Invoices must reflect the items and rates listed in the catalog with quantities purchased. Changes to the requested catalog will be addressed with the selected Offeror via the contract change control process.
37	Schedule F	3.3.2	143	This section states that "The selected Offeror shall not charge the Commonwealth for any Services currently Provided by the DPH or EDC until all of the Services provided by the DPH and EDC (Group 1) have been successfully transitioned." Can any fees be charged, such as transitions fees or any other fees, prior to transitioning all of the DPH and EDC services? Can any fees be charged to the Commonwealth prior to the expiration date of the existing contract scheduled for December 31, 2014?	~~Section 3.3.2. (Transition Planning/Governance) of Schedule F was revised by Addendum #4. The revised section states the following:~~ ~~The selected Offeror shall not charge the Commonwealth for any Services currently provided by the EDC until all of the Services provided by the EDC have been successfully transitioned.~~ ~~The selected Offeror shall not charge the Commonwealth for any Services currently provided by the DPH until all of the Services provided by the DPH have been successfully transitioned.~~ ~~The selected Offeror shall not charge the Commonwealth for any Services currently provided by an Agency's datacenter (example: DLI, DPW, DOR, DOH, PSP) until all of the Services provided by that datacenter have been successfully transitioned.~~ ~~The selected Offeror may charge the Commonwealth for new services after the contract effective date, excluding services that must be transitioned as described above.~~ The referenced requirement in section 3.3.2 has been deleted. Fees may be charged at any time pursuant to Part IV-3.E of the RFP which has been revised to state: E. **Payment for Services** The selected Offeror may bill for a Service, including those transitioned from the EDC, DPH or a Commonwealth Agency datacenter, once the Commonwealth accepts the Service via ITSM.

74	Schedule I	Top	2	At the top of page 2, there is a reference to “This Exhibit B.5”. Is that correct?	~~The reference is incorrect. The correct reference is to "Schedule I.1"~~ The reference is incorrect. The correct reference is to "Schedule I."

Revised answer (original answers posted as Addendum 9 - Round 1, Part 5)					
	Doc	Sec	Pg	Question	Answer
41	Schedule I Offeror Pricing Forms	4.Managed Services (Only) 10. Catalog of Services		How do unit rates for catalog services tab #10 differ from unit rates to be provided in Managed Services tab #4?	~~The Offeror is to fill Tab #4 (Managed Services Only) with the total cost of the combined catalog items to meet the configuration defined within the Tab.~~ ~~The Offeror is to fill Tab #10 (Catalog of Services) with the individual price point / configuration items that are being offered to the Commonwealth.~~ The Offeror is to fill in Tab #4 (Catalog of Services) with the individual price point / configuration items that are being offered to the Commonwealth.
42	Schedule I	1.Volumetrics		Does the Commonwealth need separate volume metrics for database support services or disaster recovery? Or should these services be allocated across all pricing rates?	~~The Offeror is to provide Database support services within Tab 6 (Technical Staff Rate Card) only. DR services are specified within the scenarios defined within Tab 1 (Volumetrics). Therefore, the Offeror should not allocate these services across all pricing rates. Information provided by the Offeror in Schedule I is intended for cost evaluation purposes only.~~ The Offeror is to provide Database support services within Tab 3 (Technical Staff Rate Card) only. DR services are specified within the scenarios defined within Tab 1 (Volumetrics). Therefore, the Offeror should not allocate these services across all pricing rates. Information provided by the Offeror in Schedule I is intended for cost evaluation purposes only.

Revised answer (original answers posted as Addendum 11 - Round 1, Part 6)					
	Doc	Sec	Pg	Question	Answer
3	Asset Schedules	All	All	Please provide the ages of the assets or should the Offeror make a simplifying assumption such as 20 percent of the assets to be refreshed each year?	~~For the purposes of submitting a proposal Offerors should assume 20% of the assets to be refreshed each year.~~ The Commonwealth is purchasing services that have associated SLA's and the selected Offeror must provide the services within those SLAs. Offerors should use their best judgment on the service life of their infrastructure and how often that infrastructure must be refreshed to meet the SLAs.

7	Schedule F Schedule I			For those services requested in the SOW without a corresponding Baseline Units - Volumetric in Schedule I, does the Commonwealth expect those prices to be included in the Service Catalog? Without a baseline, how will the Commonwealth ensure a level evaluation between bidders? Examples of such services include: DR Planning and Testing, ERP Hosting, Security & Firewall and Database Management Services.	~~1. Yes, provide a price for all services in the catalog.~~ ~~2. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth.~~ 1. Yes, provide a price for all services requested n the Catalog of Services. Additional services will be addressed with the Selected Offeror via the contract change control process. 2. The Commonwealth has established multiple scenarios of infrastructure configurations specifically for pricing evaluation, as set forth in Schedule I. The Volumetrics in Schedule I will be used to evaluate Offerors' cost proposals and are not a minimum commitment or an all-inclusive representation of every service desired by the Commonwealth.

Revised answer (original answers posted as Addendum 11 - Round 2, Part 1)					
	Doc	Sec	Pg	Question	Answer
7	Schedule F	3.2.3.2	89	The Commonwealth requires the offeror to provide a structured disk-2-disk backup approach for systems that currently utilize this approach. Since there appear to be only options to provide pricing for tape, where in Schedule I should the offeror place pricing for their disk-2-disk backup approach?	~~Pricing should be provided in Schedule I, Tab 10 (Catalog of Services).~~ Pricing should be provided in Schedule I, Tab 4 (Catalog of Services).

Revised answer (original answers posted as Addendum 12- Round 1, Part 7)					
	Doc	Sec	Pg	Question	Answer
9	Services Catalog	Schedule C	2	Services Catalog is blank. Can you please provide a catalog of services that are relevant to this project, including GIS services?	~~This was intentionally left blank for the Offerors to provide the proposed catalog for Commonwealth review and evaluation. Schedule I tab 10. Catalog of Services has been revised to include a sample Catalog of Services. GIS projects will be managed in the same manner as other Commonwealth projects. The scope of this procurement does not include outsourcing of GIS specific services.~~ See revised Schedule C, which removes the requirement for Offerors to submit Schedule C as part of the proposal.

Revised answer (original answers posted as Addendum 15, New Answers)

	Doc	Sec	Pg	Question	Answer
3	Schedule F Schedule I Offeror Pricing Forms Schedule J.1			There appear to be differences in storage support definitions between the SOW and Schedule I. The SOW sets forth Basic, Committed and Dedicated in section 3.1.3 on p. 20. Schedule I mentions Tier 1, 2 and 3 are associated with service levels and indicates these are defined in Schedule J.1, but they are not. However, Config 1, 2 and 3 is defined in Schedule I. Could the Commonwealth please reconcile?	~~For purposes of submitting proposals Offerors should assume the Configurations listed in Schedule I - Offeror Pricing Forms are Dedicated. Schedule I has been revised to remove the "Tier" references from Enterprise Storage. Offerors should also include pricing in Schedule I Catalog of Services for Basic and Committed.~~ For purposes of submitting proposals Offerors should assume the Configurations listed in Schedule I - Offeror Pricing Forms are Dedicated. Schedule I has been revised to remove the "Tier" references from Enterprise Storage.
6	Schedule F	3.2.5 Capacity on Demand Services	133-141	a. Does CoPA desire to better manage their capacity plan by having an online data backup capability that can flex as the information requirements expand over the next several years so capacity at the production centers does not have to be added? Does CoPA have detailed knowledge of their data access patterns to provide to a vendor who can then determine what data is eligible to move from tape to online storage, at a lower cost with greater backup recovery success rates then tape? Does CoPA have a written archiving policy, and does it currently move fixed data regularly to lower cost storage? Does CoPA have a requirement for Virtual Server Recovery outside of the primary geography?	~~a. The Commonwealth seeks the best solution for capacity planning. Offerors should include the services they offer in their technical proposal and as part of Schedule I tab 10. Catalog of Services.~~ ~~b. No, the Commonwealth does not have data access patterns to provide to an Offeror. The Commonwealth will work with the selected Offeror to determine the best solution when selecting services from the Service Catalog.~~ ~~c. The Commonwealth currently has a written archiving policy. Fixed data is currently moved regularly to lower cost storage.~~ ~~d. Please clarify or provide example defining "Virtual Server Recovery outside of the primary geography".~~ a. The Commonwealth seeks the best solution for capacity planning. Offerors should include the services they offer in their technical proposal and as part of the requested Schedule I tab 4. Catalog of Services. b. No, the Commonwealth does not have data access patterns to provide to an Offeror. The Commonwealth will work with the selected Offeror to determine the best solution when selecting services from the Service Catalog. c. The Commonwealth currently has a written archiving policy. Fixed data is currently moved regularly to lower cost storage. d. Please clarify or provide example defining "Virtual Server Recovery outside of the primary geography".
20	Schedule F	3.3.2.1	150	What is the expected transition timeframe and associated acceptance criteria for all the existing agency service management systems to the Offeror's service management platform?	~~See milestone M-9 ITSM System Integration in Schedule D - Transition Milestones.~~ See milestone M-8 ITSM System Integration in Schedule D - Transition Milestones.

27	Schedule I – Offeror Pricing Forms	Managed Services		The Commonwealth has indicated that Contract signing = Effective Date = Start date. The Commonwealth has also stated that Transition is part of the base term of the contract and transition is prior to Steady State. Can "Transition Charges" be billed prior to the DPH/EDC being fully migrated and/or prior to December 31, 2014? If Steady State RU's are not "available" until the DPH/EDC have been fully migrated (which is required by 12/31/14) do the Volumetrics not come into play until 1/1/15 or can RU pricing begin with a fully migrated DPH/EDC and prior to 1/1/15?	~~Schedule I – Offeror Pricing Forms has been revised. Transition costs are now deliverable based and cannot be billed until the Commonwealth accepts the deliverable and all associated milestones. Refer to Schedule D – Transition Milestones and Schedule K – Key Program Deliverables which set forth acceptance criteria and due dates.~~ ~~Applications cannot be billed until the application has been fully transitioned to the Offeror and accepted by the Commonwealth.~~ Schedule I - Offeror Pricing Forms has been revised. Transition costs are now to be included as part of the unit cost. Billing will commence upon service acceptance by the Commonwealth. Applications cannot be billed until the application has been fully transitioned to the Offeror and accepted by the Commonwealth.
31	Exhibit B.4			Does the Offeror have to provide a price for the software listed in Exhibit B.4? If so, where does the Offeror provide a price for third-party software?	~~Schedule I – Offeror Pricing Forms has been revised to include software pricing as part of the Catalog of Services tab.~~ Schedule I - Offeror Pricing Forms have been revised to include software pricing as part of Schedule I. Offerors must provide pricing for all software included in the Schedule I.
133	Schedule F – Statement of Work (Amended 2.18.13)	3.2.4.7	128	For which service tiers (Fully Managed, Managed Only, IaaS, etc.) are database services to be provided?	~~Database services may be required for all Tiers, based on the service ordered by the Commonwealth.~~ ~~Other than those provided for in the rate card in Schedule I there are no Database Administration functions required. The selected Offeror will be required to provide technical assistance to the Commonwealth's DBA staff. Offerors may include a Database Administration as a service in the Service Catalog.~~ Database services may be required for all Tiers, based on the service ordered by the Commonwealth. Other than those provided for in the rate card in Schedule I there are no Database Administration functions required. The selected Offeror will be required to provide technical assistance to the Commonwealth's DBA staff.

Revised answer (original answers posted as Addendum 16 – New Answers)					
	Doc	Sec	Pg	Question	Answer

11	Exhibit B.4, Schedule I, Third Party Software – Contractor Provided		Volume metrics Tab	Given certain software products are priced by the application server specifications (platform, # cpu's, # cores, etc.) Oracle for example, would the Commonwealth please provide the software vendors catalog part number that is associated to the quantity listed in B.4, DPH - Third Party Software – Contractor Provided?	~~No, the Commonwealth will not provide vendor catalog part numbers for the software listed in Exhibit B.4 as the proposed configurations are not required to duplicate the current configuration. The Offeror must provide a catalog of monthly single unit prices as part of its proposal. A single unit could be a single MIP, a single core, a single user, a single server, etc.~~ No, the Commonwealth will not provide vendor catalog part numbers for the software listed in Exhibit B.4 as the proposed configurations are not required to duplicate the current configuration. The Offeror must provide the requested catalog of monthly single unit prices as part of its proposal. A single unit could be a single MIP, a single core, a single user, a single server, etc.
19	Schedule D	All	All	The Transition Milestones defined in Schedule D do not align with the definitions found in Schedule I (i.e. M-2). Which set of Milestone definitions should be used for RFP submission?	~~Schedule I has been revised to align with the Milestones defined in Schedule D.~~ Schedule I has been revised and references to the Milestones defined in Schedule D have been removed.
20	Schedule I Exhibit E.43 DL1-UC Software	All 4.6.13		Section 4.6.13 does not appear to be included in Schedule I, Offeror Pricing form. Does the cost for maintenance and support for these software tools need to be included in the Offeror's proposal?	~~Any third party software needed for the Offerors proposed solution in addition to the software as listed in schedule I should be added to the Catalog of Services under "Additional Services." Maintenance and support must be provided for the software as set forth in Appendix A and included in the Offeror's proposal.~~ Offers must provide pricing for all software packages in Schedule I. Any software packages required to maintain the Offeror's proposed solution should be included in the unit prices in Schedule I.
34	6100022698 - Master Questions and Answers (4.16.13)	Item 2 Second question	Page 114	a) Is it correct to assume that all Transition services will be the responsibility of the incumbent and that no cost should be included in the pricing schedule? b) Could a bidder assume that all required Transition work will not need to be priced or that much of the work will be completed by the incumbent? c) If not, could the Commonwealth please clarify so that bidders do not incorrectly assume scope to be completed by the incumbent that actually should be included and evaluated as part of the RFP response?	~~a) No.~~ ~~b) Offerors must provide pricing for transition. See Schedule I tab 3 Transition Charges. Offerors should not assume that much of the work will be completed by the incumbent.~~ ~~c) Offerors should not assume all transition assistance as proposed or assumed necessary will be provided by the incumbent. The selected Offeror will not be responsible to pay for transition assistance provided by the incumbent. For purposes of submitting a proposal, Offerors should assume transition assistance provided by the incumbent will be minimal. The selected Offeror is responsible to fund all other transition costs.~~ a) No. b) Schedule I instructions have been updated to address how transition charges are to be provided. Offerors should not assume that much of the work will be completed by the incumbent. c) Offerors should not assume all transition assistance as proposed or assumed necessary will be provided by the incumbent. The selected Offeror will not be responsible to pay for transition assistance provided by the incumbent. For purposes of submitting a proposal, Offerors should assume transition assistance provided by the incumbent will be minimal. The selected Offeror is responsible to fund all other transition costs.

40	6100022698 - Schedule I - Offeror Pricing Forms – ammended xls	Volumemetrics Transition Charges, Managed Services		Are the prices to be shown on the Transition Charges tab to reflect the transition of the infrastructure counts reflected in the Volumemetrics tab or should the transition charges reflect the price for the relocation of the items shown in the Exhibits? If it is to reflect of the infrastructure counts reflected in the Volumemetrics tab we have no breakdown by agency to spread within the Transition Charges tab; please provide an agency breakdown of the counts within the Volumemetrics tab.	~~Transition Charges in Schedule I on the "Transition Charges" tab should reflect the price for the relocation of the items shown in the Exhibits and not the transition of the infrastructure counts reflected in the Volumemetrics tab.~~ Schedule I instructions have been updated to address how transition charges are to be provided.
47	Schedule K	D-10	23	Are there any differences between deliverables D-10.01 and D-10.02? Only D-10.01 is required for a Transition milestone and there is only 30 days between the two due dates.	~~Schedule I has been revised to align with the Milestones defined in Schedule D.~~ ~~Deliverable D-10.01 is the Gap Analysis Report and D-10.02 is to present the results of the Data Center Gap Analysis along with a Roadmap and Project Plan to address the recommendations identified in the analysis .~~ Deliverable D-10.01 is the Gap Analysis Report and D-10.02 is to present the results of the Data Center Gap Analysis along with a Roadmap and Project Plan to address the recommendations identified in the analysis .
48	Schedule I and Schedule B.4	Volumemetrics		The following items on Schedule I on the Volumemetrics tab under Third Party Software – Commonwealth Provided Contractor Maintained and Managed, but are documented in Exhibit B.4 which is defined as Third Party –Contractor Provided. Should the offeror provide the quote based upon the definition with in Schedule I or Exhibit B.4 for the following products? USPS Correct Address – Schedule I Volumemetrics Row 568; Exhibit B.4 item 204 IBM FileNet – Schedule I Volumemetrics Row 569; Exhibit B.4 item 205 Microsoft Sharepoint (with SA) – Schedule I Volumemetrics Row 570; Exhibit B.4 item 206 IBM Websphere MQ (Processor Value Unit) – Schedule I Volumemetrics Row 571; Exhibit B.4 item 207 Xerox XeroxDocuShare – Schedule I Volumemetrics Row 572; Exhibit B.4 item 208	~~Schedule I has been revised to align with Exhibit B.4.~~ Schedule I has been revised to align with Exhibit B.4. Offers must provide pricing for all requested software packages in Schedule I.

53	Schedule I-Offeror Pricing Forms	Catalog of Services Excel	Row 775	Should we price using BL/LIB with the DSI Virtual Tape, Robotic Devices or stand alone?	~~The Offeror must provide a catalog of monthly single unit prices as part of its proposal. A single unit could be a single MIP, a single core, a single user, a single server, etc. The configuration will be determined as part of transition planning. For purposes of this proposal the Offeror is to use Robotic Devices.~~ The configuration will be determined as part of transition planning. For purposes of submitting a proposal the Offeror is to use Robotic Devices.
91	Master Questions and Answers	#34	125	(a) Please describe in detail the application support to be provided in EDC's Fully Managed services where the Offeror will now assume responsibility for application support (i.e. application design, application development, application maintenance, which applications, products use, etc.). (b) Will this application support be provided as an optional service and billed on a T&M basis or should it now be bundled in one of the Resource Units for both Fully Managed or Managed Only categories in Schedule I?	~~a) Fully managed services require end to end support of all of the backend infrastructure, server hardware, operating systems and applications. It is all inclusive.~~ ~~b) Fully managed support will not be on a T&M basis. The support costs must be built in into the Fully Managed offering. Managed Only services include infrastructure support costs and do not include application level support costs.~~ a) Fully managed services require infrastructure application support including all backend infrastructure, server hardware, operating systems, and all other components of the Offeror's proposed solution. It is all inclusive. b) Infrastructure application support described in part a) above must be included in the unit prices.
98	Schedule I	Transition Charges	Transition Charges tab	On the Transition Charges Tab, M-2 is now Contract Management, but has been left off the Transition Charges Milestone table? Additionally, should Due Diligence now be listed as Data Gathering?	~~Schedule I has been revised to align with the Milestones defined in Schedule D. Yes, Due Diligence is now listed as Data Gathering.~~ Schedule I instructions have been updated to address how transition charges are to be provided.

Best and Final Offer - Questions and Answers (09/11/2013)

No.	Doc	Sec	Pg	Question	Answer
1	6100022698 - Schedule C - Services Catalog (09.03.13) (BAFO).doc	"(4) Mainframe Services - Include both IBM and Unisys Mainframe services"	Pages 4-5	This section states that software should be included, but the associated footnote "exhibit B1 DPH Asset List" on page 5 reflects hardware only. In addition, the mainframe system software listed in DPH Exhibits B.7 and B.8 is not reflected in Schedule I, Tab 5 "Software". By the use of the word "software" in this section, is the Commonwealth also expecting all of the necessary mainframe system software reflected in Exhibits B.7 and B.8 to be included in the resource unit pricing for Mainframe Services?	Yes, mainframe system software required for defined configurations must be included in the resource unit pricing for Mainframe Services.
2	6100022698 - Schedule D - Transition Milestones (09.03.13) (BAFO).docx 6100022698 - Schedule K - Key Program Deliverables (09.03.13) (BAFO).docx	Milestone M-2 D-11 Contract Management Plan	Page 2 Page 24	The BAFO update of Schedule K added Key Deliverable D-11.02 that is due 60 days after the Effective Date. Is Milestone M-2 due at 45 days after contract effective date or 60 days?	Milestone M-2 is due 60 days from the Contract Effective Date. Schedule D has been revised accordingly.

3	6100022698 - Schedule F - Datacenter Statement of Work (09.03.13)(BAFO).docx	2.1 Program Objectives	Page 6	This section states, "The Offeror must utilize the EDC as one of its datacenters and propose a minimum of one additional datacenter to meet the 2+ architecture requirement. It is the Offeror's option to utilize the EDC as one of its primary datacenters within its proposed solution." Throughout the RFP requirements, there is an expectation that the EDC must be used. Based on the above ambiguity, please confirm that the Offeror must utilize the EDC as one of the two data centers required.	Offerors must include the EDC in the proposed 2+ datacenter architecture.
4	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "Configuration Definitions"	Rows 88, 89, 93, 94, 98, 99, 103, 104, 110, 111, 117, 119, 124, 125, 132, 133, 137, 138	Each of these configurations includes a configuration-related component that is later called out for pricing in tab "4. Catalog of Services" described simply as "Disaster Recovery Server". Does this component represent a duplication of the related configuration's specification (e.g. row 88's specification of "2-way Six-Core 2.4 GHz, 16 GB RAM, Mirrored 146 15K Hard Drives; Windows Server 2008 R2")? If not, what is the specification for the "Disaster Recover Server" noted in each configuration where this item appears?	Yes, this component represents a duplication of the related configuration's specification.

5	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "Configuration Definitions"	"x86 Server Configurations", rows 95-104	Virtual server configurations for Windows (rows 95 - 99), Linux (rows 100 - 104), and IaaS (rows 129 - 138) include requirements for Firewall/IDS, Site-to-Site VPN, VPN Client, and VLAN. No specifications for these requirements are provided though they are listed as components requiring prices in tab "4. Catalog of Services", rows 196-405. With no other description provided we would anticipate definitions for these items as: • Firewall/IDS - firewall/IDS software running on ESX host or network based hardware which protects and separates the individual images • Site to Site VPN - software running on an ESX host or network based hardware to generate site to site VPN from data center to another facility • VPN Client - Remote administration access client such as RDP or SSH • VLAN - assignment of a VLAN and IP range for the server instance Please confirm or update these definitions and provide detailed specifications for each of Firewall/IDS, Site-to-Site VPN, VPN Client and VLAN components called out for virtual server configurations. These same items do not appear for the physical x86 server configurations in rows 83-94. Are these capabilities also required for physical x86 servers? If so, what would the specifications be for these components in the context of physical x86 server configurations?	Schedule I has been revised. The components and services required to meet the security requirements of the RFP for all compute services, including but not limited to Schedule F Sections 3.2.4.6 and 3.2.2.5, must be included in the base unit pricing for all configurations Scenarios presented in Schedule I are for evaluation purposes only.

6	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "Configuration Definitions" Tab "1. Volumetrics"	Rows 88, 93, 98, 103, 110, 117, 119, 124, 125, 132, 137 Rows 187-189	Each of these configurations indicate that restoration will be from the "Backup-Site's Local SAN Storage". Please provide specifications for the volume and type of SAN storage that each of these configurations will need to have replicated in the Backup Site's Local SAN Storage. Is this SAN storage included in the volumes provided in tab "1. Volumetrics", rows 187-189? If not, please indicate specifications for the SAN storage that is not incorporated into the volumes provided in tab "1. Volumetrics", rows 187-189.	Actual specifications for volume and type of SAN storage will be based upon services ordered. Scenarios included in Schedule I are for evaluation purposes only. Yes, for evaluation purposes SAN storage is included in the volumes provided in tab "1. Volumetrics" of Schedule I.
7	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "1. Volumetrics"	NA	With the expectation that AIX server configurations will include all hardware and software to be included in the RU pricing (and not in separate service catalog entries), which exhibits should be used for software and configuration information? The exhibits provided are not consistent with the same level of detail or completeness of information. Reference the exhibits below: Exhibit E.1 for DLI Exhibit H.4 for DOR Exhibits I.2; I.3; I.13 for IES	Base unit pricing for all components must include hardware and software (operating system, system management, and security) required to provide the Offeror's proposed solution for the services requested in the RFP. Scenarios included in Schedule I are for evaluation purposes only. Any additional information needed will be documented as part of the discovery process in transition planning.
8	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "4. Catalog of Services"	"P-Series Server Configurations", rows 406-491	Row 408 requests pricing for one half of a system core, but each of the resource unit configuration calculations (on rows 440, 450, 460, 470 and 481) treats this configuration item as if a whole core price was provided in cell D408. The pricing sheet appears to need either to double the amounts in column D (cells D440, D450, D460, D470 and D481) for each configuration or to ask for the price of a whole core in row 408. Please indicate the Commonwealth's intent or provide an update to Schedule I.	Schedule I has been revised.

9	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "5. Software"	Row 42	The EMC Corporation's Symmetrix VMAX Fully Automated Storage Tiering for Virtual Pools (Fast VP) is not available as software separately from an EMC VMAX Disk Storage hardware system. Consequently, this software license is dependent upon the size of the hardware with which it will be used. Please provide the hardware specifications for the related EMC VMAX Disk Storage systems requiring this software.	Refer to Exhibit B.1 Shared SAN Storage lines 72-75 for the referenced hardware specifications.
10	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "5. Software"	Row 116	Oracle's Exadata Storage Software is not available separately from the purchase of an Oracle Exadata system. Please provide the hardware specifications for the Oracle Exadata system that the Commonwealth will require that will be needing Oracle's Exadata Storage Software.	Refer to Exhibit B.1 DPW lines 1321-1326 for the referenced hardware specifications.
11	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "5. Software"	Row 58	The Offeror has contacted Marble Computing Inc. to obtain new software licensing for this product. Marble Computing Inc. has informed the Offeror that the Commonwealth is the last client running the "OS DCD III Data Correlation and Documentation System". The vendor will be providing no new releases or software updates. In addition, Marble Computing will not provide any formal maintenance agreements on this software. Has the Commonwealth chosen a software solution to replace this product? If not, please provide a list of product features and functions that the Offeror can use to evaluate potential replacements.	The referenced software title has been removed from Schedule I. The Commonwealth will work with the Selected Offeror to acquire the software as part of transition planning.
12	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "5. Software"	Row 101	The Offeror has attempted to obtain new license costs from Schema Systems Limited. We have not been successful in contacting this vendor. Is the Commonwealth still utilizing this software or have they chosen a new software solution to replace this product? If not, please provide a list of product features and functions that the Offeror can use to evaluate potential replacements.	The referenced software title has been removed from Schedule I. The Commonwealth will work with the Selected Offeror to acquire the software as part of transition planning.

13	6100022698 - Schedule I - Offeror Pricing Forms (09.03.13) (BAFO).xlsx	Tab "5. Software"	Row 205 Row 278	The Offeror has attempted to obtain new license costs from Western American Data. We have not been successful in contacting this vendor. Is the Commonwealth still utilizing this software or have they chosen a new software solution to replace this product? If not, please provide a list of product features and functions that the Offeror can use to evaluate potential replacements.	The referenced title has been removed from Schedule I. The Commonwealth will work with the Selected Offeror to acquire the software as part of transition planning.
14	6100022698 - Schedule K - Key Program Deliverables (09.03.13) (BAFO).docx	Table of Contents	Pages 2, 25, 27	The table of contents for Schedule K indicates that "D-11 Contract Management Plan" is on page 25 and "Contract Management Plan" is on page 27. No "Contract Management Plan" section appears on page 27 of Schedule K. Is this a typographical error in the Table of Contents or is text missing from Schedule K?	Schedule K has been revised.
15	6100022698 - Master Questions and Answers (09.03.13) (BAFO).docx Best and Final Offers Letter XXXXXXX RFP 6100022698 (09.03.13).pdf	"Revised answer (original answers posted as Addendum 9 - Round 1, Part 5)"	Page 196, item 42	The revised answer regarding Schedule I, "1. Volumetrics", states that "[i]nformation provided by the Offeror in Schedule I is intended for cost evaluation purposes only." However, the "List of Items to Address in BAFO" attached to the Issuing Officer's letter dated September 3, 2013 states that "[t]he 'Grand Total Base Term' will be used to determine the cost score." Please clarify whether the 'Grand Total Base Term' is the sole factor that will be used to determine the cost score or whether other information provided in Schedule I would be used to determine the cost score. If other information provided in Schedule I will be used to determine the cost score, please specify.	The "Grand Total Base Term" within Schedule I, "Tab 2. Total Charges" (cell C40)" will be used to determine the cost score.

16	6100022698 - Master Questions and Answers (09.03.13) (BAFO)	Question 27	199	The offeror Pricing Form has been revised to eliminate milestone Transition payments and the instruction is that Transition costs are now to be included in the unit rates. This seems inconsistent with the Commonwealth's lack of committed volumes. Depending on how the costs are spread across the unit rates and depending on the actual usage by the Commonwealth the offeror could either under-recover or over-recover its Transition costs. Since there are no committed volumes, how does the Commonwealth propose to fairly compensate the offeror for Transition costs?	The Commonwealth understands there is risk to all parties in this initiative. Termination for Convenience Fees were added to limit the Offeror's risk. Transition costs must be included in the service rates over the course of the base contract (7 years).
17	6100022698 - Appendix A - Contract Terms and Conditions (09.03.13) (BAFO)	Section 32.A.1	42	Based on the requirements specified in the RFP, the Commonwealth is asking for significant investments in Transition, datacenter improvements, software licenses, and equipment in its facilities. It is customary for a government customer to allow its vendor to recover unamortized start-up costs in the event of a termination for convenience. The payment formula established under the revised termination for convenience provision seems arbitrary and not related to the size of the offeror's required investment. With very limited payments for termination for convenience, no Transition payments, no committed volumes, and no commitment to purchase the provided assets how does the Commonwealth envision ensuring the offeror is compensated for making the multi-million dollar investments necessary to fulfill the Commonwealth's requirements?	The Commonwealth understands there is risk to all parties in this initiative. Termination for Convenience Fees were added to limit the Offeror's risk. Transition costs must be included in the service rates over the course of the base contract (7 years).

18	6100022698 - Schedule D - Transition Milestones (09.03.13) (BAFO)	M-12, M-13	9-11	We understand that the transition for DPH is now split into two transitions – DPH (1) and DPH (2). Please explain the reason for this split.	The DPH transition is one single transition. Milestones M-12 and M-13 identified in the version of Schedule D provided with the BAFO request are identical to Milestones M-14(A) and M-14(B) identified in the version of Schedule D published prior to the BAFO requests. Milestone M-12 applies to the period of time 18 months after contract execution but prior to 24 months after contract execution. Milestone M-13 applies to the period of time on or after 24 months after contract execution. M-13 only applies if the DPH transition exceeds 24 months after contract execution.
19	6100022698 - Schedule D - Transition Milestones (09.03.13) (BAFO)	M-12	9-10	Define the scope of DPH (1) transition.	The DPH transition is one single transition. Milestones M-12 and M-13 identified in the version of Schedule D provided with the BAFO request are identical to Milestones M-14(A) and M-14(B) identified in the version of Schedule D published prior to the BAFO requests. Milestone M-12 applies to the period of time 18 months after contract execution but prior to 24 months after contract execution. Milestone M-13 applies to the period of time on or after 24 months after contract execution. M-13 only applies if the DPH transition exceeds 24 months after contract execution.
20	6100022698 - Schedule D - Transition Milestones (09.03.13) (BAFO)	M-13	10-11	Define the scope of DPH (2) transition.	The DPH transition is one single transition. Milestones M-12 and M-13 identified in the version of Schedule D provided with the BAFO request are identical to Milestones M-14(A) and M-14(B) identified in the version of Schedule D published prior to the BAFO requests. Milestone M-12 applies to the period of time 18 months after contract execution but prior to 24 months after contract execution. Milestone M-13 applies to the period of time on or after 24 months after contract execution. M-13 only applies if the DPH transition exceeds 24 months after contract execution.
