Item Text	70161703-ITQ-408 Implementation and Ecological Restoration Services					
Implementation of ecological restoration services shall include scheduling, coordination, and managing all aspects of work produced in close conjunction with natural resource managers. Contractors qualifying under this category shall be responsible for the coordination and completion of awarded projects entailing:						
Pesticide Application						
<ul style="list-style-type: none"> • Pesticide suppression of invasive species or competing native vegetation through a variety of techniques including, but not limited to preemergence, high volume foliar, low volume foliar, or ultra low volume foliar, hack and squirt, cut stump, and / or basal bark treatments. • Pesticide suppression of forest pests to include but not limited to stem injection, soil injection, and horticultural oils applications. 						
Planting and Seeding						
<ul style="list-style-type: none"> • Pre-planting site or seeding preparations including mechanical (physical clearing such as scarification or tilling) or pesticide applications. • Procurement and installation of plant stock including live stake, brush mattress or wattle, bare root or containerized seedlings, or bare root, containerized, or balled and burlaped landscape stock. • Instillation of protection for planting stock including mulch, staking, tree tubes, cages, fencing, or tip protection. • Seeding with a no-till drill or a combination of operations that scarifies the surface to expose mineral soil and uniformly distributes the seed, such as frost seeding, drop or rotary spreader, broadcast seeder or cultipacker. • Tillage or discing, with plows, discs, or harrows such as necessary to prepare a seedbed, thin dense stands of herbaceous vegetation, or prepare a fire break for prescribed fire. 						
Implementation of Forest Stand Improvements						
<ul style="list-style-type: none"> • Reconnoiter and layout of forest and timber stand improvement projects and harvests, including project boundary marking and marking of trees for removal or reserve. • Intermediate cuts and reproduction cuts in even and non-even aged stands. Potentially including obtaining the highest end use of the forest product. • Targeted felling of pole to mature sized individual trees as necessary for removal of competing vegetation or as a component of stand improvement. Potentially including obtaining the highest end use of the forest product. • Mastication of competing understory vegetation or vegetation removal for maintenance of early seral communities with a FECON style rotary drum forestry mower. 						
The selected contractor will be expected to provide reports, deliverables, and other graphic materials associated with inventory, assessments, analysis and implementation of management and restoration prescriptions, including but not limited to data shapefiles and maps, budgets and cost estimates, acquiring photographs, developing conceptual renderings, design sketches, graphical depictions, typicals, and prototypes, implementation specifications, plans of study, meeting minutes, preparation of permit
