

Specifications – Truck Caps and Covers

General Requirement:

Fiberglass caps for truck bed to fit 2012-2013 or latest model Light Duty Pickup Trucks. Cap to include recessed externally mounted high center mounted LED third brake light, frame on rear window with dual locking handles. Cab height/full length fiberglass pickup truck bed caps. Front window, left and right side, longest size available; side lift-up windows supported by spring loaded or gas operated door struts and each window to have locking capability, horizontal rear door with window and spring loaded or gas operated door struts, rear door locking capability, interior light and switch (wiring for light is to be off of the fuse block with an additional in-line fuse in the cap). All areas where the wiring emerges through the truck bed must be insulated with grommets. Direct hotline wiring to the battery will not be accepted.

Low height utility truck covers for truck bed to fit 2012-2013 or latest model Light Duty Pickup Trucks. Low height, approximate bed height, fiberglass or aluminum utility truck cover. Cover to be hinged and supported by gas struts in the open position. Cover shall be lockable. If more than one lock is included, they shall be keyed alike. Cover shall be weather resistant.
