1.0 Executive Summary

ADVANTAGE ENGINEERS, LLC (ADVANTAGE) has performed a Phase I Environmental Site Assessment (ESA), of the property referenced as “83 Murtland Avenue” herein referred to as the “subject property” or “property”. **ADVANTAGE** performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*⁽¹⁾.

1.1 Site Description

The subject property is located at 83 Murtland Avenue in the City of Washington, Washington County, Pennsylvania. The subject property consists of a parcel of land totaling 3.00 acres, with a tax parcel identification number of 760-005-00-01-0001-00. The subject property contains an office building (former police barracks) with a basement and automotive service garage, totaling 21,664 square foot with associated paved parking areas and drive lanes, a fenced gravel impound lot, a decommissioned radio tower, and vegetated areas. In general, the area immediately surrounding the site consists of commercial and residential properties.

1.2 Findings and Opinions

The following is a summary of the findings and opinions of this report:

Subject Property:

- Historically, the subject property consisted primarily of wooded areas since 1939. In 1949 the subject property was developed into its current configuration to contain an office building (police barracks) and automotive garage, totaling 21,664 square foot with associated paved parking areas and drive lanes, and vegetated areas. It is the opinion of **ADVANTAGE** that this finding does not represent a Recognized Environmental Condition.
- Within the former police barracks are storage closets on each floor that contain general cleaning products. All cleaning chemicals appeared to be in their original containers with no signs of leaking or staining within the closets. It is the opinion of **ADVANTAGE** that this finding does not represent a Recognized Environmental Condition.
- A 275 gallon used oil AST is located on the north side of the automotive garage structure. The tank appeared and sounded to be empty during the site reconnaissance. The AST appeared to be in good condition with no signs of leaking or staining within the area. Additionally, two (2) 55-gallon used oil storage

drums are located within the automotive garage. One (1) of the two (2) storage drums appeared to contain used oil. No signs of leaking or staining were noted at the base of the storage drums. It is the opinion of **ADVANTAGE** that these findings does not represent a Recognized Environmental Condition.

- One (1) approximate 10,000 gallon gasoline vaulted AST and pump are located on the central portion of the subject property, west of the automotive garage structure. According to the OEL8000 tank monitoring system the AST currently contains approximately 371 gallons of product. Advantage was unable to gain access to the vault due to the access hatch being frozen shut during the site reconnaissance. A data gap was encountered due to the inability to gain access to the AST vault for inspection. According to Mr. Godleski, the AST is in good operating condition with no signs of deterioration. However, **ADVANTAGE** feels that this data gap does not change this finding, based on the current tank monitoring system and information provided by Mr. Godleski, it is the opinion of **ADVANTAGE** that this finding does not represent a Recognized Environmental Condition.
- Three (3) pole mounted electrical transformer were observed on the south western portion of the subject property. The pole mounted transformers appeared in good condition, with no stressed vegetation or leaking noted. It is the opinion of **ADVANTAGE** that this finding does not represents a Recognized Environmental Condition.
- A pad mounted diesel generator is noted just north of the police barracks within the parking lot. No signs of leaking or staining was noted at the base of the generator. **ADVANTAGE** believes that this finding does not represent a Recognized Environmental Condition.
- The EDR report identified the subject property on the PA RGA LUST and PA LUST database. During the site reconnaissance saw cuts and patched asphalt were noted along the western side of the automotive garage. According to the owner representative, a UST system (including tank, piping, and dispenser) containing gasoline was removed from this location. The PA LUST database lists a confirmed release date from a UST on November 6th, 1997. The facility status as of October 24th, 2011 is listed as Cleanup Completed. However, at the time of writing this report, no records were available to detail the cleanup actions at the site. It is unknown if confirmatory soil or groundwater sampling was conducted at the time of the tank removal, nor any record of a PADEP response

letter indicating No Further Action. Therefore, it is the opinion of **ADVANTAGE** that this finding does represent a Recognized Environmental Condition.

- The automotive garage formerly contained two (2) aboveground hydraulic lifts within the garage bay area according to the owner representative. During the site reconnaissance it appeared that the automotive garage previously contained in-ground hydraulic lifts due to saw cuts and concrete patches in the garage bay area that did not appear to be part of the original construction. In ground hydraulic lifts are often associated within an in ground hydraulic reservoir. Staining, considered to be de minimis was noted within the garage bay area. Based on the historic use of the site as an automotive garage and the former in ground hydraulic lifts, the potential exists for petroleum products to have impacted the site. It is the opinion of **ADVANTAGE** that this finding does represent a Recognized Environmental Condition.

Sites Within ASTM-Specified Search Distances:

- The EDR Report identified thirty-seven (37) database listings associated with surrounding properties. The database listings associated with surrounding properties were reviewed and based on the location and details of these facilities, Advantage believes it is unlikely that any surrounding properties have negatively impacted the subject property. Advantage believes that these findings do not represent a Recognized Environmental Condition.

1.3 Conclusions

This assessment has revealed no evidence of recognized environmental conditions in connection with the property, except the following:

- The potential presence of petroleum products within the soil or groundwater from documented release from a former 10,000 gallon gasoline UST system.
- The potential presence of petroleum products within the soil or groundwater from the historic use of the site as an automotive garage.

1.4 Data Gaps

ADVANTAGE performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*. During the course of this assessment, two (2) data gaps were encountered while conducting this Phase I Environmental Site Assessment.

- ASTM E 1527-13 states the historical use of a property should be identified at five year intervals dating back to original development or 1940, whichever is earlier. Data gaps exceeding five year intervals were encountered during our historical research of the subject property.
- The inability to gain access to the AST vault for inspection is considered a data gap for this assessment. However, **ADVANTAGE** feels that this data gap does not change this finding, based on the current tank monitoring system and information from the owner representative.

However, it is the opinion of **ADVANTAGE** that these data gaps are not significant with regard to identify RECs.

1.5 Reliance And Declaration

ADVANTAGE performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*. **ADVANTAGE** prepared this Phase I ESA for the exclusive benefit and use of Pennsylvania Department of General Services (DGS), Bureau of Real Estate.

2.0 Introduction

ADVANTAGE ENGINEERS, LLC (ADVANTAGE) has performed a Phase I Environmental Site Assessment (ESA) of the property referenced as "83 Murtland Avenue" located at 83 Murtland Avenue in Washington, Washington County, Pennsylvania (herein referred to as the "subject property" or "property"). **ADVANTAGE** prepared this Phase I ESA for exclusive benefit and use of DGS, Bureau of Real Estate. Sections 8.0 and 9.0 contain the findings and opinions, and conclusions, respectively, of this Phase I ESA.

ADVANTAGE performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*.

ADVANTAGE derived the findings presented within this Phase I ESA report from the following sources: records review of reasonably ascertainable and practically reviewable sources, site reconnaissance (a visit to the property), and interviews with knowledgeable parties. Any exceptions to (or deletions from) this practice are described in Sections 2.4, 2.5, 10.0 and 14.0 of this report.

2.1 Purpose

ADVANTAGE conducted this Phase I ESA at the request of Mr. Andrew Lick, Real Estate Coordinator, DGS, Bureau of Real Estate, in preparation of selling the property. The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to this process, recognized environmental conditions (RECs) in connection with the subject property. ASTM International (ASTM) defines a REC and related terms as follows:

Recognized Environmental Condition (REC) is "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to the release; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

Historical REC (HREC) is "a past release of any hazardous substance or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls."

Controlled REC (CREC) is "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the

satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls."

De minimis condition is "a condition that generally does not represent a threat to human health or the environment and that generally would not be the subject of an enforcement action brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions."

Business Environmental Risk (BER) is "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations."

2.2 Detailed Scope of Services

ADVANTAGE performed this Phase I ESA to assess the potential for RECs at the subject property and in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*. The Phase I ESA included the following activities:

- Research and review of available background information (provided to us and from in-house data base systems) regarding the subject property in order to identify areas and/or items of potential concern relative to contamination or storage of hazardous waste. We coordinated a computer search of various pertinent databases (including Sanborn maps).
- Contacting state and local agencies regarding the availability of files for the subject site.
- A site visit to perform a visual reconnaissance to identify evidence of RECs. The reconnaissance included readily visible and accessible areas of the site only. The site reconnaissance also included observing the current uses of adjoining properties to the extent practicable without entering the adjoining properties.
- Review of selected historical aerial photographs.

The findings and conclusions discussed in this report are based on the historic data readily available to our project team and the specific conditions observed (and documented) during our site inspection. No attempt has been made to comment on

conditions beyond those documented in our Phase I ESA report and certification of the property is not made or implied in this regard.

The following information and arrangements, also discussed in the *User Questionnaire* (Appendix A) were provided to **ADVANTAGE**:

- Copies of any available permits related to current and past site operations.
- Permission and arrangements for site access.
- Identification of appropriate persons to be interviewed regarding past and present site operations and arrangements for the interview(s).
- Copies of all available site plans and drawings.

ADVANTAGE relied upon the documents and information provided; we assume no responsibility or liability for their accuracy or completeness. Further, it is possible that due to site-specific limitations certain RECs might not have been visible. **ADVANTAGE** provides no guarantee that this Phase I ESA identified all RECs associated with the subject property.

Special Note Regarding Procedural Changes for “All Appropriate Inquiry”

The Small Business Liability Relief and Brownfields Revitalization Act of 2002 mandated that the United States Environmental Protection Agency (USEPA) develop a rule to establish procedures that a person claiming liability relief as an “innocent purchaser”, a “bona fide prospective purchaser” or a “contiguous landowner” must follow. The 2002 legislation identified the assessment mechanism as the ASTM International E 1527-00 “Standard for Environmental Site Assessments: Phase I Environmental Site Assessment Process”. USEPA developed the All Appropriate Inquiry Rule (the Rule), which was published in the November 1, 2005 Federal Register with an effective date of November 1, 2006. The Rule also identifies the ASTM Standard as the assessment mechanism to demonstrate “All Appropriate Inquiry”. ASTM worked closely with the USEPA so that a revised Standard (E 1527-13) was prepared to mirror and implement the new rule. ASTM published Standard E 1527-13 in November 2005. **ADVANTAGE** performed this Phase I ESA in accordance with E 1527-13.

2.3 Significant Assumptions

ADVANTAGE assumes that all information provided to us either by the client, the client’s representatives, persons identified as being knowledgeable about the subject property history and/or operations, the environmental database search subcontractor, regulatory agencies or other involved parties was truthful, complete, accurate and provided in good faith. **ADVANTAGE** relied upon the documents and information provided; we assume no responsibility or liability for their accuracy or completeness.

2.4 Limitations and Exceptions

ADVANTAGE performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*. The RECs identified in this Phase I ESA report are limited to those **ADVANTAGE** identified in the records reviews, site reconnaissance, and interviews that are documented within. This Phase I ESA did not include an inspection of subsurface conditions, or any subsurface testing or sampling (e.g., air, water, soil, and building materials).

2.5 Special Terms and Conditions

No special terms or conditions were part of this assessment.

2.6 User Reliance

All reports, plans, specifications, electronic data, field data, notes and other documents (“Work Product”) prepared by **ADVANTAGE** pursuant to this Agreement are intended for the exclusive use and reliance by the Client. Any other use or reliance by others without the written approval of **ADVANTAGE** will be at the Client's sole risk and without liability or legal exposure to **ADVANTAGE**. The Client shall indemnify, defend and hold harmless **ADVANTAGE** from and against any claims, damages or losses including reasonable attorney's fees and costs, arising out of or resulting from such unauthorized use or reliance.

ADVANTAGE assumes that the client intends to use this Phase I ESA for the purposes of qualifying for one of the Landowner Liability Protections (LLP) offered by the Small Business Liability Relief and Brownfields Revitalization Act (SBLRBRA) and the regulations set forth at 40 CFR 312, and the Client can rely upon this Phase I ESA for this purpose.

3.0 Site Description

3.1 Location and Legal Description

The subject property is located at 83 Murtland Avenue in the City of Washington, Washington County, Pennsylvania. The subject property consists of a parcel of land totaling 3.00 acres, with a tax parcel identification number of 760-005-00-01-0001-00. The subject property contains an office building (former police barracks) with a basement and automotive service garage, totaling 21,664 square foot with associated paved parking areas and drive lanes, a fenced gravel impound lot, a decommissioned radio tower, and vegetated areas. Figure 1, located within the Appendix, displays the approximate location of the subject property on a portion of the USGS 7.5 Minute Washington East, PA Quadrangle Map⁽²⁾. Figure 2 displays the tax parcel boundary of the subject property according to RealQuest⁽³⁾. The property is currently owned by Washington 6th WD Exempt Property (Pennsylvania State Highway Building).

3.2 Subject Property and Vicinity Characteristics

The subject property is comprised of a two (2) story office building (police barracks) with a basement and automotive garage formerly utilized by the Pennsylvania State Police with associated paved parking areas and drive lanes, a fenced gravel impound lot, a decommissioned radio tower, and vegetated areas. Vegetated areas and a strip mall are situated to the north of the subject property. Murtland Avenue, a commercial property, and Linn Avenue are located to the south of the subject property. Commercial properties, a paved parking lot, and residential properties are located to the west of the subject property. Commercial properties and vegetated areas are located to the east of the subject property.

3.3 Current Use of the Subject Property

The subject property currently encompasses 3.0 acres, and contains a former Pennsylvania State Police barracks and automotive service garage in the southern portion of the property.

3.4 Descriptions of Site Features

3.4.1 Structures

The two-story former state police barracks was constructed in 1949 according to historic sanborns.

3.4.2 Roads

Access to the subject property is provided north off of Murtland Avenue.

3.4.3 Heating/Cooling Systems

The subject property is heated via natural gas and cooled via window cooling units.

3.4.4 Sewage Disposal

The subject property utilizes a public sewer system. Floor drains throughout both structures are connected to a pump system that pumps the floor drains to a public sanitary sewer line.

3.4.5 Potable Water

The subject property utilizes a private potable water system.

3.4.6 Other Site Improvements

No other site improvements were noted on the property.

3.4.7 Surface Water

Stormwater inlets were observed on the subject property.

3.5 Current Uses of Adjoining Properties

The subject property is located in a rural area. Land use surrounding the subject property is detailed below.

North – Vegetated areas and a strip mall.

South – Murtland Avenue, a commercial property, and Linn Avenue.

East – Commercial properties and vegetated areas.

West – Commercial properties, a paved parking lot, and residential properties.

4.0 User Provided Information

The User, Robert Hoffman of the Pennsylvania State Police completed an “All Appropriate Inquiry” User Questionnaire that describes knowledge relative to the information discussed in the following subsections. A copy of the completed User Questionnaire is included in Appendix A.

4.1 Title Records

The property is owned by Washington 6th WD Exempt Property (Pennsylvania State Highway Building). Additional information regarding land title records is provided in Section 5.4.4 of this report.

4.2 Environmental Records or Activity and Use Limitations

Mr. Hoffman indicated that he has no knowledge regarding any environmental cleanup liens or other use limitations against the property.

4.3 Specialized Knowledge

Mr. Hoffman indicated that he does not have specialized knowledge pertaining to the site.

4.4 Commonly Known or Reasonably Ascertainable Information

Mr. Hoffman indicated that he has no knowledge of any specific chemical use on the property and/or any spills, releases, or other environmental impact or cleanup at the site. He stated he is aware of an aboveground oil tank on the property.

4.5 Valuation Reduction for Environmental Issues

Mr. Hoffman stated the this does not apply for the purposes of this Phase I ESA.

4.6 Owner, Property Manager, and Occupant Information

The current property owner is listed as Washington 6th WD Exempt Property (Pennsylvania State Highway Building).

4.7 Reason(s) for Performing Phase I Environmental Site Assessment

The User has requested the ESA completion in consideration for selling the subject property.

5.0 Records Review

5.1 Standard Environmental Record Sources

The ASTM Phase I ESA process includes the review of select Federal and State environmental record sources in order to evaluate the potential existence of RECs either on the subject property or within specified distances from the property. ASTM has established search radii for each of these standard environmental record sources. **ADVANTAGE** performed this records review utilizing a computer database search report (Appendix B) prepared by Environmental Data Resources, Inc. (EDR)⁽⁴⁾. The outlined area on the Topographic Map, Overview Map and Detail Map of the database report marks the approximate location of the subject property. This report keys the surrounding sites on the ASTM-specified databases to the inclusive Overview Map and Detail Map. **ADVANTAGE** notes that some of the sites may be listed in more than one (1) database. Furthermore, EDR may have been unable to plot certain sites due to incomplete information, resulting in a list of “unplottable” or “orphan” sites.

Table 1 presented below summarizes the database listings from the EDR Report. Only those databases which have facilities within the specified search distances are provided within this table. For a full list of the databases searched, please refer to the EDR Report within the Appendix.

Table 1							
Database	Target property	Search Distance (miles)	<1/8 mile	1/8 – 1/4 mile	1/4 – 1/2 mile	1/2 - 1 mile	Total Plotted
RCRA-SQG		0.25	2	2	-	-	4
RCRA-CESQG		0.25	1	2	-	-	3
PA LUST	1	0.50	1	3	4	-	9
PA UST		0.25	1	2	-	-	3
AST	1	0.25	0	0	-	-	1
PA AUL		0.50	0	1	0	-	1
RCRA NonGen / NLR		0.25	0	1	-	-	1
PA MANIFEST		0.25	4	4	-	-	8
RI MANIFEST		0.25	0	1	-	-	1
NY MANIFEST		0.25	1	0	-	-	1
EDR MGP		1.00	0	0	0	1	1
EDR Hist Auto		0.125	4	-	-	-	4
EDR Hist Cleaner		0.125	2	-	-	-	2
PA RGA LUST	1	TP	-	-	-	-	1
TOTAL	3	-	16	16	4	1	40

“-“ Indicates no database search for this search distance
 “TP” Target Property

The subject property **was** identified on three (3) databases within the EDR database search report. The EDR report identified thirty seven (37) other database listings within the ASTM defined search radius of the site. Only identified facilities that were located within 1/8 mile are detailed below. Further details regarding these facilities are presented below. Refer to the EDR report within the Appendix for additional information.

- **Troop B HQ (Target Property)** – 83 Murtland Avenue. The subject property is listed on the PA RGA Leaking Underground Storage Tank (LUST) database. The database list the site on the PA RGA LUST database from 2003-2012. Additionally, the site is listed on the PA LUST and PA Aboveground Storage Tank (AST) databases. The PA LUST database lists a confirmed release date from a UST on November 6th, 1997. The facilities status as of October 24th, 2011 is listed as Cleanup Completed. The site is listed on the aboveground storage tank (AST) database for having a 10,000 gallon gasoline AST currently in use.
- **71 Murtland Ave** – The site is approximately 283 feet southwest of the subject property at a higher elevation. The site is listed on the EDR Hist Auto database. The site is listed as Budd Baer Collision Center in 2012, 2011, 2007, and as Swoagers Auto Body and Graphics in 1999. Additionally, the site is listed on the PA Manifest & NY Manifest database for the transfer of hazardous materials offsite. The site is listed on the RCRA Small Quantity Generator of ignitable waste and spent nonhalogenated solvents.
- **70 Murtland Ave** – The site is approximately 316 feet southwest of the subject property at a higher elevation. The site is listed on the EDR Hist Cleaner database. The site is listed as Shueys Cleaners in 1999 - 2003.
- **PA Department of Transportation Dist 124** – 89 Murtland Avenue. The site is approximately 354 feet east southeast of the subject property at a higher elevation. The site is listed on the RCRA Small Quantity Generator, FINDS, and ECHO database. The site is listed on the RCRA Small Quantity Generator of ignitable waste. The ECHO database lists that the site is on the RCRA SQG database. Additionally, the site is listed on the PA Manifest database for the transfer of hazardous materials offsite.
- **Bud Baer Collision Center** – 88 Murtland Avenue. The site is approximately 397 feet southeast of the subject property at a higher elevation. The site is listed on the RCRA Conditionally Exempt Small Quantity Generator (RCRA-CESQG) database. The site is listed on the RCRA-CESQG of ignitable waste, barium, cadmium, chromium, lead and spent nonhalogenated solvents. Additionally, the site is listed on the PA Manifest database for the transfer of hazardous materials

offsite. Additionally the site is listed on the EDR Hist Auto database for Budd Baer Collision Center in 2012.

- **48 Murtland Ave** – The site is approximately 397 feet southwest of the subject property at a higher elevation. The site is listed on the EDR Hist Cleaner database. The site is listed as Fristick Cleaning in 2006 - 2008.
- **286 Pine Street** – The site is approximately 462 feet east southeast of the subject property at a higher elevation. The site is listed on the EDR Hist Auto database. The site is listed as A&E Auto Clinic Inc. from 2011 to 2012.
- **33 Murtland Ave** – The site is approximately 609 feet west southwest of the subject property at a higher elevation. The site is listed on the EDR Hist Auto database. The site is listed as Midas Auto Service from 1999 to 2011.
- **Gas N Go Washington** – 98 Murtland Avenue. The site is approximately 645 feet east southeast of the subject property at a lower elevation. The site is listed on the PA Underground Storage Tank (PA UST) database. The site is listed as having three (3) 10,000 gallon gasoline USTs and one (1) 6,000 gallon diesel fuel UST that are all currently in use. Additionally, the site is listed on the PA LUST and PA Manifest databases. The PA LUST is listed a release of diesel into the groundwater and soil on October 25, 1994. The site is listed as cleanup completed on August 1, 2013 for benzene, cumene, ethyl benzene, fluorine, naphthalene, phenanthrene, and toluene. Additionally, there is a release of unleaded gasoline into the soil and groundwater that is listed as “interim or Remedial Actions Initiated” on March 9, 2003.

5.2 Additional Environmental Record Sources

5.2.1 Records Request

ADVANTAGE submitted information requests for the subject property to the following agencies:

- United States Environmental Protection Agency (USEPA)⁽⁵⁾
- Pennsylvania Department of Environmental Protection (PA DEP) Office of the Records Custodian
- Washington County - Right to Know
- The City of Washington – Right to Know

ADVANTAGE submitted an electronic request to the USEPA on December 5, 2016. The USEPA database search revealed the subject property was not listed.

The Pennsylvania Department of Environmental Protection (PADEP) was contacted via fax on December 6, 2016 for files pertaining to the subject property. On December 19, 2016 Dawn Schaef, Agency Open Records Officer with the PA DEP, responded via email with a written response stating the request has been filed. No further information pertaining to the site was given in the response. Additionally, PADEP stated that they require an additional 30 days to issue a final response.

ADVANTAGE submitted a records request to Washington County Right to Know via fax on December 5, 2016. As of writing this report no responses have been received.

ADVANTAGE submitted a records request via email to the city of Washington on December 5, 2016. As of writing this report no responses have been received.

Copies of all information requests and any pertinent information obtained as a result of each request are included in the Appendix. If any additional pertinent information is received from any of the abovementioned agencies within thirty (30) days of the submission of this report, the information will be forwarded to the client for review.

5.2.2 Database Search

In order to obtain further information regarding the subject property and adjacent properties, information was reviewed on the following database:

- Environment Facility Compliance Tracking System (eFACTS)⁽⁶⁾
- eMapPA⁽⁷⁾
- Storage Tanks Application Database⁽⁸⁾

The subject property was identified on the eFACTS database for Environmental Cleanup and Brownfields. The database lists a release of petroleum from a UST on November 6, 1997. The cleanup was completed on October 24, 2011.

The subject property was not identified on the eMapPA database.

The subject property was identified on the Storage Tanks Application Database for a 10,000 gasoline AST that was installed on December 15, 1997.

5.2.3 Additional Sources

Mr. Robert Hoffman, Facilities Manager 1 supplied Advantage with a Underground Tank and Line Testing document dated March 13th, 1996 for a 10,000 gallon UST. That document stated that the UST passed all tightness testing conducted by Crompco Corporation.

Additionally, Advantage was supplied with a request to waive an upcoming operation inspection of the UST system due to the pending replacement of the existing system. The document is dated December 10th, 1996 and addressed to the PA Department of Environmental Protection.

5.3 Physical Setting Source(s)

5.3.1 Topography

The USGS provides topographic map coverage for this property in the Washington East 7.5 Minute Quadrangle. According to the topographic map, the subject property is located at approximately 1201 feet above mean sea level. The surface topography at the site gently slopes towards the northwest and local topography slopes generally toward the southwest. The topographic map showed the body of surface water, nearest the subject property, as Charters Creek, which is located approximately 7,000 feet west of the property. Based on the regional topography, groundwater is assumed to flow in a western direction. However, the actual direction of groundwater flow beneath the site can only be determined through a groundwater investigation.

5.3.2 Geology

According to the Pennsylvania Geologic Survey Geologic Map of the State of Pennsylvania, 1980, the project site is underlain by the Waynesburg Formation (geologic symbol PPw). The Pennsylvania Geologic Survey publication, *The Engineering Characteristics of the Rocks of Pennsylvania*, Second Edition, 1982, describes the rock in this formation as consisting of cyclic sequence of sandstone, shale, limestone, siltstone, some claystone, and coal; limestone is grey, finely crystalline, argillaceous, locally nodular, and interbedded with claystone; sandstone is light gray, very fine to medium grained, and crossbedded; shale is grey and locally calcareous, and may be interbedded with siltstone and sandstone; siltstone is grey.

The rock in this formation is generally well bedded. The rock is moderately resistant to weathering. Weathering occurs to a deep depth; small, irregular shaped fragments result from weathering. Excavation is difficult, except where highly fractured, in which case excavation is moderately easy.

5.3.3 Soils

According to soil data obtained from the NRCS Web Soil Survey⁽¹¹⁾, the soils within the southern portion of the subject property consist primarily of Guernsey silt loam, 3 to 8 percent slopes (GeB). According to the USDA Soil Conservation Service, Guernsey silt loam consists of colluvium derived from limestone and shale over residuum weathered from limestone and shale. These soils are listed as having a high available water storage and are moderately well drained.

5.4 Historical Use Information on the Property

ASTM E 1527-13 provides eight (8) standard sources from which the history of the subject property/area may be established. These sources include the following:

1. Aerial Photographs
2. Fire Insurance Maps
3. Property Tax Files
4. Recorded Land Title Records
5. USGS 7.5 and 15 Minute Topographic Maps
6. Local Street Directories
7. Building/Engineering Department Records
8. Zoning/Land Use Records

The following subsections document **ADVANTAGE**'s research of these Standard Historical Sources.

5.4.1 Aerial Photographs

Aerial photographs of the site were obtained from EDR⁽¹³⁾. Copies of historical aerial photographs are provided in the Appendix. The following bulleted items provide **ADVANTAGE**'s interpretation of key highlights presented on these aerial photographs. Brief land use observations are summarized below.

1939 - The property appears to be primarily comprised of wooded areas. Surrounding properties appear to be comprised of residential and agricultural properties.

1952 - The subject property appears to be developed into its current configuration. The subject property contains a structure on the southern portion of the property and a structure on the central portion of the property. No other significant changes have occurred to the subject property.

1958 - No significant changes have occurred to the subject property.

1967 - No significant changes have occurred to the subject property.

1969 - No significant changes have occurred to the subject property.

1975 - No significant changes have occurred to the subject property.

1982 - No significant changes have occurred to the subject property.

1993 - No significant changes have occurred to the subject property.

2001 - No significant changes have occurred to the subject property.

2005 - No significant changes have occurred to the subject property.

2006 - No significant changes have occurred to the subject property.

2008 - No significant changes have occurred to the subject property.

2010 - No significant changes have occurred to the subject property.

In summary, the aerial photograph review indicated that the subject property was primarily comprised of wooded areas since at least 1939. Sometime between 1939 and 1952 a structure was constructed on the southern portion of the property and on the central portion of the property.

5.4.2 Fire Insurance Maps

ADVANTAGE researched the availability of Sanborn Fire Insurance Maps (Sanborn Maps)⁽¹⁴⁾ for the subject property. The fire insurance maps were obtained from EDR.

1914 – The subject property appears to not contain any structures.

1925 – No significant changes have occurred to the subject property.

1947 – No significant changes have occurred to the subject property.

1969 – A two (2) story structure with a basement is located on the southern portion of the subject property. The structure is labeled as Pennsylvania State

Police Barracks and is constructed of concrete floors, steel joist, steel trusses and cinder blocks. A private garage is located on the central portion of the property. The single story private garage was constructed using concrete floors, steel decks and cinder block walls. Both structures on the property were both constructed in 1949.

In summary, review of the fire insurance maps indicated that the subject property was developed in 1949 to contain a two-story structure and a private garage.

5.4.3 Property Tax Files

ADVANTAGE reviewed the available tax information for the subject property via the RealQuest website. It was reported that the property tax parcel reference number for the property is 760-005-00-01-0001-00. The current owner of the subject property is Washington 6th WD Exempt Property (Pennsylvania State Highway Building).

5.4.4 Recorded Land Title Records

Land title records were not reviewed for the subject property.

5.4.5 USGS 7.5 and 15 Minute Topographic Map(s)

ADVANTAGE did not obtain Historic Topographic Maps for the subject property since it is unlikely that such a report would provide any additional information with respect to the subject property.

5.4.6 Local Street Directories/MacRae's Industrial Directories

ADVANTAGE did not obtain a Local Street Directory or Industrial Directory Report for the subject property.

5.4.7 Building/Engineering Department Records

No building and engineering department records were reviewed for the subject property. Further details are described within Section 5.2.1 – Records Request.

5.4.8 Zoning/Land Use Records

Land use for the subject property parcel is designated as Exempt.

5.5 Historical Use Information on the Adjoining Properties

Based on information gathered from the historical resources, the land use surrounding the subject property has consisted of commercial and residential properties.

5.6 Vapor Migration

The environmental records review was also completed to identify potential off-site sources for vapor migration of hazardous substances or petroleum products into the subsurface strata of the subject property. Upon reviewing the applicable records, topography, hydrogeological information, and potential hydraulic barriers; no properties were identified in connection with potential vapor migration onto the subject property.

6.0 Site Reconnaissance

ADVANTAGE conducted the site reconnaissance for this ESA on December 20, 2016 for the subject property review. The following subsections provide a summary of the on-site conditions that are pertinent to this ESA. Site reconnaissance photographs are included in the Appendix of this report.

6.1 Methodology and Limiting Conditions

The site investigation consisted of a visual inspection of the property to determine if any REC's exist on the subject property. These independent conclusions represent **ADVANTAGE's** best professional judgment based on information and data available during the course of the project. **ADVANTAGE** was accompanied through the structures during the site visit by Mr. Rodger Godleski, Stock Clerk III of the PA State Police Department. Advantage was unable to access the AST vault due to the access hatch being frozen shut. No other limiting factors were encountered during the site investigation or visual inspection of the subject property.

6.2 General Site Setting

The subject property is comprised of a two (2) story office building (police barracks) with a basement and automotive garage formerly utilized by the Pennsylvania State Police with associated paved parking areas and drive lanes, a fenced gravel impound lot, a decommissioned radio tower, and vegetated areas. Vegetated areas and a strip mall are situated to the north of the subject property. Murtland Avenue, a commercial property, and Linn Avenue are located to the south of the subject property. Commercial properties, a paved parking lot, and residential properties are located to the west of the subject property. Commercial properties and vegetated areas are located to the east of the subject property.

6.3 Site Observations

The subject property is located at 83 Murtland Avenue in the City of Washington, Washington County, Pennsylvania. The subject property consists of a parcel of land totaling 3.00 acres, with a tax parcel identification number of 760-005-00-01-0001-00.

The site investigation was conducted on December 20, 2016. The following summarizes the on-site observations.

Table 2

Item	Identified on-site	Comments
Hazardous Substances	No	

Petroleum Products	Yes	Diesel generator
Aboveground Storage Tanks (ASTs)	Yes	One (1) 10,000 gallon gasoline vaulted AST and one (1) 275 gallon used oil AST are located on the central portion of the property.
Underground Storage Tanks (USTs)	No	
Storage Drums	Yes	Two (2) used oil 55-gallon storage drums located within the automotive garage.
Unidentified Containers	No	
Equipment Containing PCBs	Yes	Three (3) pole mounted transformers on the south western portion of subject property.
Interior Staining or Corrosion	Yes	Staining was noted within the automotive garage.
Drains or Sumps	Yes	Floor drains located throughout the property.
Wastewater	No	
Pits, Ponds, or Lagoons	No	
Pools of Liquid	No	
Solid Waste Dumping, Landfills, Fill Material	No	
Stained Soil or Pavement	No	
Stressed Vegetation	No	
Septic Systems	No	
Wells	No	
Odors	No	
Other Conditions of Concern	Yes	Signs of a former in ground hydraulic lifts within the automotive garage.

6.3.1 Exterior Observations

The subject property is comprised of an office building (police barracks) and automotive garage, totaling 21,664 square foot with associated paved parking areas and drive lanes, a fenced gravel impound lot, a decommissioned radio tower, and vegetated areas. Three (3) pole mounted electrical transformer were observed on the south western portion of the subject property. The pole mounted transformers appeared in good condition, with no stressed vegetation or leaking noted. A decommissioned radio tower and empty equipment shelter are located just north of the former police barracks within the parking lot. Additionally, a pad mounted diesel generator is noted just north of the police barracks within the parking lot. No signs of leaking or staining was noted at the base of the generator.

A 275 gallon used oil AST is located on the north side of the automotive garage structure. The tank appeared and sounded to be empty during the site reconnaissance. The AST appeared to be in good condition with no signs of leaking or staining within the area. A vaulted 10,000 gallon gasoline AST and pump are

located on the central portion of the property. Advantage was unable to gain access to the vault due to the access points being frozen shut.

Saw cuts and patched asphalt was noted along the western side of the automotive garage. According to Mr. Godleski a former gasoline pump and underground storage tank were removed from this area.

6.3.2 Interior Observations

Upon entering the basement level of the former police barracks are the former holding cells, a corridor that leads to several offices, storage closets, boiler room, locker rooms, and restrooms. The first and second floor consist of offices, locker rooms, restrooms, and storage closets. The storage closets contain general cleaning products which all appeared to be in their original containers with no signs of leaking or staining within the closets. Floor drains were located throughout the former barracks that all drain to the pump system within the automotive garage.

Upon entering the automotive garage structure from the west into the bay area are two (2) 55-gallon used oil storage drums. One (1) of the two (2) storage drums appeared to contain used oil. No signs of leaking or staining were noted at the base of the storage drums. Additionally, an OEL800 tank monitoring system is located in the central portion of the automotive garage for the vaulted 10,000 gallon gasoline AST. The monitoring system display read that the tank currently contains approximately 371 gallons of product.

According to the owner representative, two (2) aboveground hydraulic lifts were formerly located within the bay area of the automotive garage. The lifts were transferred to the new police barracks automotive garage. During the site reconnaissance it appeared that the automotive garage previously contained in ground hydraulic lifts due to saw cuts and concrete patches in the garage bay area that did not appear to be part of the original construction. Staining was noted within the garage bay area. However, the staining was considered to be de minimis in quantity. Additionally, floor drains located in the automotive garage, drain to the pump system within the automotive garage, which connects all drains to the sanitary sewer.

7.0 Interviews

7.1 Interview with Owner

Mr. Rodger Godleski, Stock Clerk III of the PA State Police Department was interviewed on December 20, 2016. **ADVANTAGE** was informed of the following:

- Mr. Godleski stated that currently the facility is vacant.
- Mr. Godleski stated the structure is heated via natural gas
- Mr. Godleski stated the building utilizes public utilities.
- Mr. Godleski stated all floor drains at the facility are drained to a pumping system within the automotive garage that pumps to the public sanitary sewer.
- Mr. Godleski stated he was unaware of any environmental cleanups at the site.
- Mr. Godleski stated he was aware of one (1) 10,000 gallon gasoline vaulted AST and 275 gallon used oil AST.
- Mr. Godleski stated he that historically the used oil within the storage drums and AST were removed from the site.
- Mr. Godleski stated a 10,000 gallon gasoline UST was removed and was previously located west of the automotive garage.

8.0 Findings and Opinions

ADVANTAGE has performed the Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 for the subject property located at 83 Murtland Avenue in the city of Washington, Washington County, Pennsylvania. The findings of this report are for the exclusive benefit and use of DGS, Bureau of Real Estate. Any exceptions to or deletions from this practice are described in Sections 2.4, 2.5, 10.0 and 14.0 of this report.

Subject Property:

- Historically, the subject property consisted primarily of wooded areas since 1939. In 1949 the subject property was developed into its current configuration to contain an office building (police barracks) and automotive garage, totaling 21,664 square foot with associated paved parking areas and drive lanes, and vegetated areas. It is the opinion of **ADVANTAGE** that this finding does not represents a Recognized Environmental Condition.
- Within the former police barracks are storage closets on each floor that contain general cleaning products. All cleaning chemicals appeared to be in their original containers with no signs of leaking or staining within the closets. It is the opinion of **ADVANTAGE** that this finding does not represents a Recognized Environmental Condition.
- A 275 gallon used oil AST is located on the north side of the automotive garage structure. The tank appeared and sounded to be empty during the site reconnaissance. The AST appeared to be in good condition with no signs of leaking or staining within the area. Additionally, two (2) 55-gallon used oil storage drums are located within the automotive garage. One (1) of the two (2) storage drums appeared to contain used oil. No signs of leaking or staining were noted at the base of the storage drums. It is the opinion of **ADVANTAGE** that these findings does not represent a Recognized Environmental Condition.
- One (1) approximate 10,000 gallon gasoline vaulted AST and pump are located on the central portion of the subject property, west of the automotive garage structure. According to the OEL8000 tank monitoring system the AST currently contains approximately 371 gallons of product. Advantage was unable to gain access to the vault due to the access hatch being frozen shut during the site reconnaissance. A data gap was encountered due to the inability to gain access to the AST vault for inspection. According to Mr. Godleski, the AST is in good operating condition with no signs of deterioration. However, **ADVANTAGE** feels that this data gap does not change this finding, based on the current tank monitoring system and information provided by Mr. Godleski, it is the opinion of **ADVANTAGE** that this finding does not represent a Recognized Environmental Condition.

- Three (3) pole mounted electrical transformer were observed on the south western portion of the subject property. The pole mounted transformers appeared in good condition, with no stressed vegetation or leaking noted. It is the opinion of **ADVANTAGE** that this finding does not represents a Recognized Environmental Condition.
- A pad mounted diesel generator is noted just north of the police barracks within the parking lot. No signs of leaking or staining was noted at the base of the generator. **ADVANTAGE** believes that this finding does not represent a Recognized Environmental Condition.
- The EDR report identified the subject property on the PA RGA LUST and PA LUST database. During the site reconnaissance saw cuts and patched asphalt were noted along the western side of the automotive garage. According to the owner representative, a UST system (including tank, piping, and dispenser) containing gasoline was removed from this location. The PA LUST database lists a confirmed release date from a UST on November 6th, 1997. The facility status as of October 24th, 2011 is listed as Cleanup Completed. However, at the time of writing this report, no records were available to detail the cleanup actions at the site. It is unknown if confirmatory soil or groundwater sampling was conducted at the time of the tank removal, nor any record of a PADEP response letter indicating No Further Action. Therefore, it is the opinion of **ADVANTAGE** that this finding does represent a Recognized Environmental Condition.
- The automotive garage formerly contained two (2) aboveground hydraulic lifts within the garage bay area according to the owner representative. During the site reconnaissance it appeared that the automotive garage previously contained in-ground hydraulic lifts due to saw cuts and concrete patches in the garage bay area that did not appear to be part of the original construction. In ground hydraulic lifts are often associated within an in ground hydraulic reservoir. Staining, considered to be de minimis was noted within the garage bay area. Based on the historic use of the site as an automotive garage and the former in ground hydraulic lifts, the potential exists for petroleum products to have impacted the site. It is the opinion of **ADVANTAGE** that this finding does represent a Recognized Environmental Condition.

Sites Within ASTM-Specified Search Distances:

- The EDR Report identified thirty-seven (37) database listings associated with surrounding properties. The database listings associated with surrounding properties were reviewed and based on the location and details of these facilities, Advantage believes it is unlikely that any surrounding properties have negatively impacted the subject property.

Advantage believes that these findings do not represent a Recognized Environmental Condition.

9.0 Conclusions

ADVANTAGE has performed the Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 for the subject property located at 83 Murtland Avenue in the City of Washington, Washington County, Pennsylvania. The findings of this report are for the exclusive benefit and use of DGS, Bureau of Real Estate. Any exceptions to or deletions from this practice are described in Sections 2.4, 2.5, 10.0 and 14.0 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the property, except the following:

- The potential presence of petroleum products within the soil or groundwater from documented release from a former 10,000 gallon gasoline UST system.
- The potential presence of petroleum products within the soil or groundwater from the historic use of the site as an automotive garage.

10.0 Data Gaps, Deviations, and Limitations

A data gap is defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice including but not limited to site reconnaissance and interviews.

Two (2) data gaps were encountered while conducting this Phase I Environmental Site Assessment.

- ASTM E 1527-13 states the historical use of a property should be identified at five year intervals dating back to original development or 1940, whichever is earlier. Data gaps exceeding five year intervals were encountered during our historical research of the subject property. However, it is the opinion of **ADVANTAGE** that these data gaps are not significant with regard to identify RECs.
- The inability to gain access to the AST vault for inspection is considered a data gap for this assessment. However, **ADVANTAGE** feels that this data gap does not change this finding, based on the current tank monitoring system and information from the owner representative.

No other significant data gaps were noted during the course of this Phase I Environmental Site Assessment.

ADVANTAGE performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*.

No deviations, limitations or deletions from ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13* occurred or were imposed by the client during the preparation of this Phase I ESA.

11.0 Additional Services/Non-Scope Considerations

This assessment did not include any additional services/non-scope considerations from ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*.

13.0 Environmental Professional(s) Statements and Signature(s)

We have the specific qualifications based on education, training, and experience necessary to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

I declare that to the best of my professional knowledge and belief that I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312.

Charles R. Wolf III
Environmental Scientist II

Adam J. Bower
Project Manager

14.0 General Limitations

The Environmental Assessment activities and the preparation of this Report were conducted in accordance with practices and procedures generally accepted in the consulting engineering field. The information contained in this Report is further qualified as follows:

1. **ADVANTAGE** assumes no responsibility for matters of a legal nature affecting the subject property inspected or the title thereto.
2. Any sketch appearing in or attached to the inspection Report, or any statement of dimensions, capacities, quantities or distances, are approximate and are included to assist the reader in visualizing the subject property. **ADVANTAGE** made no survey of the subject property.
3. Employees of **ADVANTAGE** are not required to give testimony or appear in court because of having made the inspection with reference to the subject property in question, unless arrangements have been previously made therefore.
4. This Report is not intended to have any direct effect on the value of the subject property inspected but simply to provide a visual Environmental Assessment solely for the benefit of the Principal Parties.
5. Information, estimates and opinions furnished to **ADVANTAGE** and contained in the report, were obtained from sources considered reliable and believed to be true and correct. However, **ADVANTAGE** has made no independent investigation as to such matters and undertakes no responsibility for the accuracy of such items. No other warranty is given or implied by this Report.
6. The Report is solely for the benefit and personal use of the Principal Parties, and is subject to and issued in connection with the Proposal and the Terms and Conditions attached thereto. The data reported and findings, observations, and conclusions expressed in the Report are limited by the Scope of Work.

User Questionnaire

Name: Robert Hoffman Date: 12-12-16
Subject Property: PSP old Washington H/O

All Appropriate Inquiry User Questionnaire

In order to qualify for one of the Landowner Liability Protections (LLPs)¹ offered by the Small Business Liability Relief and Brownfields Revitalization Act (the "Brownfields Amendments"),² the *user must provide* the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

1. Environmental cleanup liens that are filed or recorded against the site (40 C.F.R. 312.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

NO

2. Activity and land use limitations that are in place on the site or have that been filed or recorded in a registry (40 C.F.R. 312.26).

Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

NO

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 C.F.R. 312.28).

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

NO

¹ Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* ("Common Elements" Guide) issued on March 6, 2003.

² P.L. 107-118.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 C.F.R. 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

I am not a real estate agent and don't know.

5. Commonly known or reasonably ascertainable information about the property (40 C.F.R. 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

a) Do you know the past uses of the property? *Always a PSP facility*

b) Do you know of specific chemicals that are present or once were present at the property? *No, just fuel and oil for vehicles*

c) Do you know of spills or other chemical releases that have taken place at the property? *No*

d) Do you know of any environmental cleanups that have taken place at the property? *No*

6. The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 C.F.R. 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

83 MURTLAND AVENUE
WASHINGTON, PA 15301

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oil waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WASHINGTON GAS CO	EAST MAIDEN STREET	S 1/2 - 1 (0.859 mi.)	31	115

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

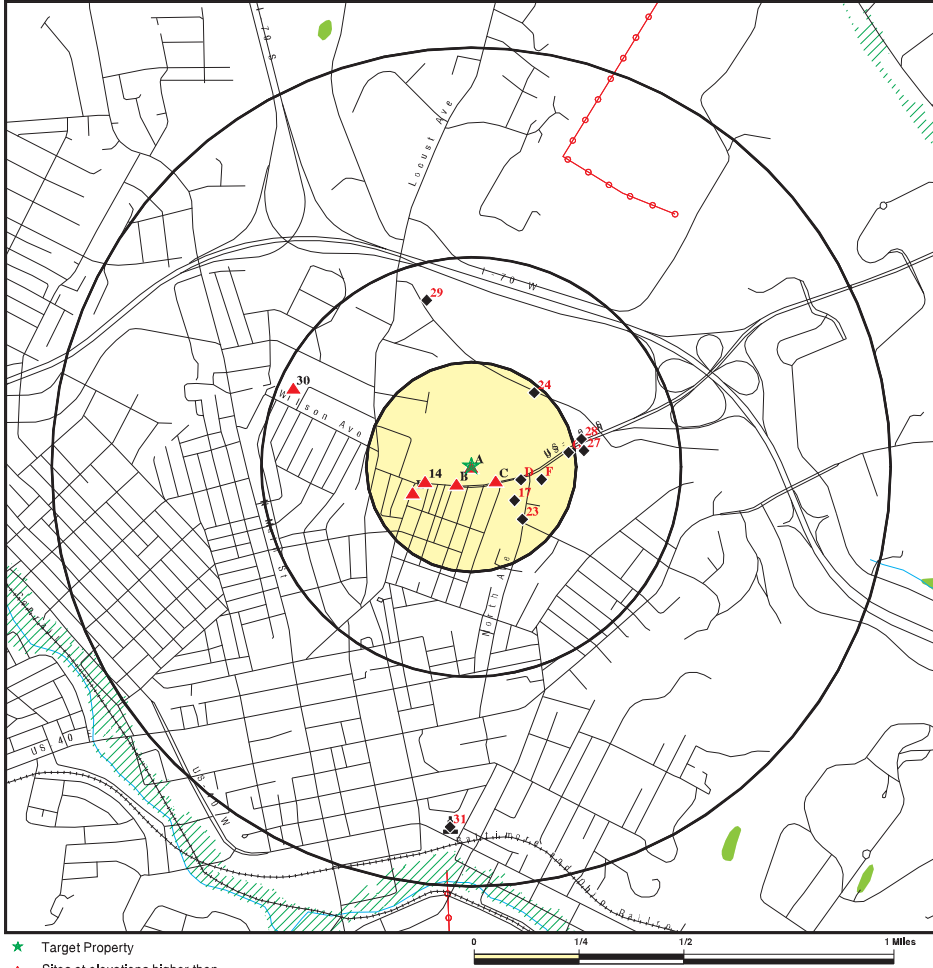

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016 Source: EPA
Date Data Arrived at EDR: 04/05/2016 Telephone: N/A
Date Made Active in Reports: 04/15/2016 Last EDR Contact: 10/05/2016
Number of Days to Update: 10 Next Scheduled EDR Contact: 01/16/2017
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

ORPHAN SUMMARY

City	EDR ID	Site Name	Site Address	Zip	Database(s)
------	--------	-----------	--------------	-----	-------------

NO SITES FOUND

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2016	Telephone: 703-603-8704
Date Made Active in Reports: 10/21/2016	Last EDR Contact: 10/04/2016
Number of Days to Update: 17	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: 800-438-2474
Date Made Active in Reports: 09/02/2016	Last EDR Contact: 09/28/2016
Number of Days to Update: 64	Next Scheduled EDR Contact: 01/09/2017

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: 800-438-2474
Date Made Active in Reports: 09/02/2016	Last EDR Contact: 09/28/2016

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/21/2016
Date Data Arrived at EDR: 06/30/2016
Date Made Active in Reports: 09/02/2016

INST CONTROL: Institutional Controls Site Listing

Under the Land Recycling Act (Act 2) persons who perform a site cleanup using the site-specific standard or the special industrial area standard may use engineering or institutional controls as part of the response action. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites
Brownfields are generally defined as abandoned or underused industrial or commercial properties where redevelopment is complicated by actual or perceived environmental contamination. Brownfields vary in size, location, age and past use. They can range from a small, abandoned corner gas station to a large, multi-acre former manufacturing plant that has been closed for years.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

	Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

December 19, 2016

VIA EMAIL: cwolf@advantageengineers.com

Charles R. Wolf, III
435 Independence Avenue
Suite C
Mechanicsburg, PA 17055

RE: Right-to-Know Request Numbers: 1400-16-752 (CO) and 4500-16-221 (SW)

Dear Mr. Wolf:

On December 12, 2016, the open-records officer of the Department of Environmental Protection (Department) received your written request for records and assigned it the tracking numbers listed above. The subject of your request requires its assignment to the Department's Central Office (CO) and the Southwest (SW) Regional Office. Each office has its own tracking number and may respond separately to your request for records in their possession. For this letter, the Department's CO is initially responding on behalf of all assigned offices under the Pennsylvania Right-to-Know Law, 65 P.S. §§ 67.101-67.3104 (RTKL).

You requested a formal review of 83 Murtland Avenue, Washington, Pennsylvania. You are seeking records of all environmental concerns. Records should consist of site history, ownership, improvements, planning/zoning, underground and aboveground storage tanks, permits, hazardous substances or spills, areas of fill, historical enforcement actions, and investigations of soil or groundwater quality/contamination. You identified the facility identification number 613343.

Under the RTKL, a written response to your request is due on or before December 19, 2016.

This is an interim response. Under the provisions of 65 P.S. § 67.902(b)(2). The Department will require up to an additional 30 days, until January 18, 2017, to issue a final response to your request for the following reasons:

- The extent or nature of the request precludes a response within the required time period.
- A response by the mailing date of this letter could not be accomplished due to bona fide staffing limitations.

Please note that if responsive records exist at more than one Department location, you will be required to view the records at the office where they are maintained. Records are not transferred among Department locations for file reviews.

Lastly, for your future convenience, the Department has an online RTKL request form. You can access the form at:

<http://www.dep.pa.gov/Citizens/PublicRecords/RightToKnowLaw/Pages/default.aspx#.VIRKEBwo5D8>

Testing Procedures:

The Sure Test system Has been CERTIFIED by an independent testing laboratory to meet E.P.A. specifications for testing underground storage tanks under protocol document EPA/503/UST-90/004 (Final Report March 1990). The results are valid for the tested portion of the tank.

All interpretations are based on inferences from electronic or other measurements. Our tests are performed in accordance with standards accepted in the industry.

December 10, 1996

PA Department of Environmental Protection
Corey L. Giles
400 Waterfront Drive
Pittsburgh, Pennsylvania 15222-4745

Dear Sir:

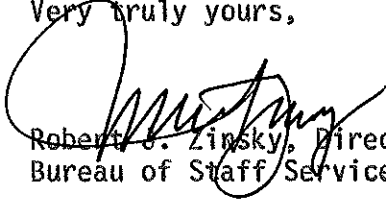

The Pennsylvania State Police, Troop "B" Washington, D.E.P. Facility I.D. 63-12759, was notified to perform an operation inspection of its underground storage tank. Due to an upcoming scheduled tank replacement, a waiver is being requested of the operation inspection.

Attached is a copy of the Work Request and a Survey Report by D.G.S. for the 10,000 gallon gasoline tank/dispensing system removal and complete replacement. The project is D.G.S. Project No. A229-5.

Presently, D.G.S. is preparing specifications and drawings for bidding. It is anticipated Project A229-5 will be bid in January 1997, with a bid opening approximately March 1997. Anticipated construction may begin April or May of 1997.

If you have any questions, you may contact Richard Pryor, Facility Management Division, at (717) 783-5484.

Very truly yours,

Robert J. Zinsky, Director
Bureau of Staff Services

RJZ/RLP/de

cc: C.O., Troop "B" Hdqtrs.
Facility Mgt. Division

DATE: July 30, 1996

SUBJECT: **SURVEY REPORT**
Project No. DGS A 229-5
Underground Storage Tank Replacement
PA State Police, Troop "B" Headquarters
Washington, Washington Co, PA

TO: Joseph R. Mancuso, P.E., Chief
Engineering Design Division
Bureau of Engineering & Architecture

FROM: David W. Galloway *DWG*
Mechanical Engineering Design Section
Engineering Design Division

THRU: Robert L. Holzman, Supervisor *RLL*
Mechanical Engineering Design Section
Engineering Design Division

ALLOCATION:

No funds allocated.

USING AGENCY PERSONNEL:

Captain George Lasalvia --- PA State Police
Trooper Brian Linhart --- PA State Police

DGS PERSONNEL:

David W. Galloway -- Mechanical Design Engineer, Bureau of Engineering/Architecture

BRIEF PROJECT DESCRIPTION (SCOPE):

Replace one (1) 10,000 gallon underground gasoline storage tank and dispenser with a new 10,000 gallon underground vaulted storage tank and a dispenser.

INVESTIGATIONS AND/OR OBSERVATIONS:

The existing 10,000 underground gasoline storage tank and dispenser are in use. This tank passed the Federal and State tightness testing requirements on March 13, 1996. The existing tank is located in a high large truck traffic and multi-grade area, with limited space available for installation of a vaulted underground storage tank. Parking spaces are at a premium at this site.

SURVEY REPORT

Project No. DGS A229-5

July 30, 1996

Page 2

RECOMMENDATIONS:

It is recommended that the existing 10,000 gallon underground gasoline storage tank and dispenser be replaced with a new 10,000 gallon underground vaulted fuel storage system, including a new dispenser and fuel management system. Relocation of the tank to the flat area on the lower side of the existing retaining wall will solve the problems stated above. Removal of approximately 20 L.F. of curved retaining wall; and extension of approximately 20 L.F. of new retaining wall in a straight line is required, along with some additional grading. This new configuration will provide approximately 4 to 6 additional parking spaces. The vault to be installed with top at grade.

PRELIMINARY COST ESTIMATE:

The estimated cost to accomplish the above stated work is \$150,000.00 which includes \$6,800.00 for disposal of 20 cubic yards of contaminated soil, additional grading, replacement of 20 L.F. of concrete retaining wall, and a 10% contingency.

DWG/nc

WORK REQUEST

(See reverse side for instructions governing the use of this form.)

1 TO Director, Professional Selections and Project Control Office Room 104 Headquarters Building 13- & Herr Streets, Harrisburg, Pennsylvania 17125	2. Date Prepared May 15, 1996
3. FROM. (Department, Board or Commission) Pennsylvania State Police	4. Bureau or other (as appropriate) Staff Services
REQUEST A PROJECT BE ESTABLISHED TO ACCOMPLISH THE FOLLOWING:	
5. Project Title Underground Storage Tank Replacements Pennsylvania State Police	6. Using Agency Project Number Bix #7523
7. Project Site State Police Facilities (Approx. 13 locations - see attached list)	8. Institution Representative at Job Site Dick Pryor or Les Brightbill 783-5484
9. Scope of Work (This work involves Commonwealth-owned property.)	

The Pennsylvania State Police will receive funds via a Program Revision Request for the removal and installation of underground storage tanks. This consists of the removal of approximately 14 tanks and installation of approximately 10 tanks. A total of \$1,648,000 is allocated for this project. Funds will be allocated into this project upon budget release.

Work to consist of removal of nine (9) 10,000 gallon gasoline with replacement of eight (8) 10,000 gallon complete dispensing systems.

Removal of four (4) fuel oil tanks, (2) 5,000 gallon, (1) 1,500 and replacement of two fuel oil tanks.

Attached is a location, county breakdown of work areas.

Appendix H
Resumes of Environmental Professionals

Charles R. Wolf III

EDUCATION

- M.E.P.C. – (coursework) Environmental Pollution Control, Pennsylvania State University
- B.S. – Earth Science, Pennsylvania State University, 2005
- Minor - B.S. – Earth Systems, Pennsylvania State University, 2005

PROFESSIONAL REGISTRATIONS

- Asbestos Inspector 24hr. Initial Training, 2013
- Asbestos Inspector 4hr. Refresher, 2014, 2015
- Lead Based Paint Building Inspector 24hr. Initial Training, 2015
- Lead Based Paint Abatement Risk Assessor 16hr. Initial Training, 2015
- OSHA 40hr. HAZWOPPER Health & Safety
- OSHA 8hr. HAZWOPPER Health & Safety Annual Refresher

SPECIAL TRAINING

- ACI Concrete Field Testing Technician Grade 1
- Nuclear Moisture Density Gauge, Q/C Resource, 2006
- Pennsylvania Asbestos Certification, Inspector, #050115
- Pennsylvania Lead Certification, Risk Assessor, #006118
- ASTM Technical Training and E-Learning, Environmental Site Assessments, June 2015

SUMMARY OF EXPERIENCE

Mr. Wolf, Environmental Scientist II, has over 9 years of environmental experience in the management of NEPA/Section 106 reports for all telecommunications sites. His environmental engineering responsibilities include the preparation of Phase I and II Site Assessments, installation of groundwater monitoring wells, permitting, Asbestos inspection, and UST remediation. Mr. Wolf's responsibilities included scheduling, contract review and preparation, proposal preparation, and client relations.

PROJECT EXPERIENCE

Asbestos Inspections - Waynesboro Mall, Waynesboro, Franklin County, PA – Environmental Scientist/ Asbestos Inspection was completed on shopping for the support of a potential property transaction. This survey was completed by a Pennsylvania State Licensed Asbestos Building Inspector and consisted of visual review of sampling of suspect asbestos containing materials. Approximately 550 samples were submitted and tested using Polarized Light Microscopy (PLM) Method EPA 600/R-93/116. Results, conclusions, and recommendations regarding the location and amount of all ACMs were provided.

Highland Park Members 1st Asbestos Investigation, Lemoyne, Cumberland County, PA - Environmental Scientist who performed Asbestos Containing Materials (ACM) inspection and conducted a Phase I Environmental Site Assessment (ESA) for the support of a potential property transaction.

Environmental Compliance, Various Telecommunications Facilities, Various Locations, PA, VA, WV, NC, OH, MD, & MA—Environmental Scientist responsible for the preparation and review of over 125 Phase I environmental site assessments, more than 30 Phase II environmental site assessments, and construction inspection services during foundation installation.

NEPA Compliance, Various Telecommunications Facilities, Various Locations, PA, MD, & DE – Environmental Scientist who has completed over 25 NEPA Compliance reports on telecommunication facilities located throughout the tri-state area. The scope of work for each site included the determination of impact in the following areas: Historic/Archeological Resources, Endangered Species, Critical Habitats, Wetlands, Floodplains, wilderness areas, wildlife preserves, and Indian Religious Resources.

PSECU Monitoring Wells, Harrisburg, Dauphin County, PA – Environmental Scientist who performed groundwater sampling of monitoring wells on a proposed building site.

Genuardi's Food Stores Phase I, Montgomery County, PA – Environmental Scientist who prepared multiple Phase I Environmental Site Assessments of the multiple subject properties in support of a potential property transactions.

Adam J. Bower

EDUCATION

- B.S. – Geo-Environmental Studies Shippensburg University, 2003
- B.S. – Earth Space Science, Shippensburg University, 2003
- Geographic Information Systems (GIS) Certificate, Shippensburg University, 2003

PROFESSIONAL REGISTRATIONS

- OSHA 40hr. HAZWOPER Health & Safety
- OSHA 8 hr. HAZWOPER Health & Safety Annual Refresher
- State Board for Certification of Sewage Enforcement Officers

SPECIAL TRAINING

- FCC Towers and Environmental / Historic Preservation Compliance Training, 2012, 2011
- Section 106 Refresher Course, CTIA, 2008, 2011
- Certified for Use of Nuclear Moisture–Density Equipment, Q/C Resource, 2003

SUMMARY OF EXPERIENCE

Mr. Bower, Project Manager, has 12 years of experience in project coordination and oversight of various environmental projects. These projects include Phase I and Phase II Environmental Site Assessments, NEPA Compliance, Cultural / Tribal Consultation and Oversight, Groundwater and Soil Sampling Activities, Soil-Gas and Indoor Vapor Sampling Activities, coordination of subcontractors, laboratory analysis, engineering analysis of data and report preparation. He has prepared Spill Prevention Control and Countermeasure (SPCC) Plans and Health and Safety (HASP) Plans. Mr. Bower's project management responsibilities include scheduling, contract review and preparation, client relations, review of engineering drawings, and employee development.

PROJECT EXPERIENCE

Countywide Public Safety Radio Network Phase I ESA's and NEPA Compliance, Various Counties, PA – Project Manager for completion of Phase I Environmental Site Assessments in accordance with ASTM E1527-13 requirements on numerous telecommunication facilities throughout Pennsylvania. Additionally, National Environmental Policy Act (NEPA) Compliance Reports were completed for the project sites to determine possible impact on the following areas: Historic / Archeological Resources, Endangered Species, Critical Habitats, Wetlands, Floodplains, Wilderness Areas, Wildlife Preserves, and Indian Religious Resources.

National Steel Plant Facility SPCC Plan and Additional Environmental Compliance Services, Camp Hill, Cumberland County, PA – Project Manager who prepared Tier II Hazardous and Chemical Inventory, Spill Prevention, Control, and Countermeasure (SPCC) Plan, groundwater sampling, and waste characterization of various materials at the facility. Also worked closely with the plant's management team to ensure that the facility's design for storage and secondary containment of oil and petroleum products met requirements outlined within the SPCC Plan. Advantage currently conducts biannual storm water sampling at the site, and prepares Discharge Monitoring Reports (DMRs) for the facility, in accordance with the PADEP issued NPDES permit.

Carlisle Area Gas Station Phase I ESA and Phase II ESA, Cumberland County, PA – Project Manager who conducted Phase I EAS in accordance with ASTM E1527-13 requirements, for an existing gas station facility in Cumberland County, Pennsylvania. Scope of work also included the completion of a Phase II ESA that consisted

of soil and groundwater sampling to determine extent of contamination across the site.

NEPA Compliance, Various Telecommunications Facilities – PA, MD, NJ, VA, WV, DE, & NC – Senior Environmental Scientist who has completed over 800 NEPA Compliance reports on telecommunication facilities located throughout the tri-state area. The scope of work for each site included the determination of impact in the following areas: Historic/Archeological Resources, Endangered Species, Critical Habitats, Wetlands, Floodplains, wilderness areas, wildlife preserves, and Indian Religious Resources.

Tops Markets Phase I Environmental Site Assessments, PA and NY – Senior Environmental Scientist for the completion of 82 Phase I Environmental Site Assessments for Tops Markets Grocery Store chain throughout New York. These projects were completed within an advanced timeframe as required by the clients demanding schedule. In addition, 15 file reviews were completed at the associated Pennsylvania Department of Environmental Protection and the New York State Department of Environmental Conservation offices in order to further document past environmental concerns at the project sites.

Clemens Market Environmental Site Assessments, Various Locations, PA – Senior Environmental Scientist for the completion of 15 Phase I Environmental Site Assessments for Clemens Markets Grocery Store chain. These projects were completed within an advanced timeframe as required by the clients demanding schedule. In addition, 8 file reviews were completed at the associated Pennsylvania Department of Environmental Protection office in order to further document past environmental concerns at the project sites. Asbestos containing materials building inspections were completed at 10 of the locations due to the age of the structures and anticipated proposed renovations.

Non-Operating Tops Locations Phase I Environmental Site Assessments, Buffalo, Erie County, NY – Senior Environmental Scientist for completion of Phase I Environmental Site Assessment and Site Investigations for 11 properties for an international grocery store chain in accordance with ASTM E1527-05 within the Buffalo region.

Hampden Township Member's 1st Phase I ESA and Phase II ESA, Cumberland County, PA – Senior Environmental Scientist who conducted Phase I EAS in accordance with ASTM International Methodology, for a proposed construction a new bank facility in Hampden Township, Cumberland County, Pennsylvania. Scope of work also included the completion of a Phase II ESA that consisted of soil, groundwater, and soil gas sampling to determine extent of contamination across the site.

Section 106 Historical Assessments, Various Locations, Cecil County, MD – Senior Environmental Scientist for the completion of National Environmental Policy Act (NEPA) Compliance Reports for ten (10) wireless telecommunication project sites to determine possible impact to historical and archeological Resources. The scope of work included historical assessments per Section 106 of the National Historical Preservation Act (NHPA) and Nationwide Programmatic Agreement (NPA). Also provided Collocation Submission Reports to the Maryland Historical Trust and consulted with The Maryland Historical Society and the Historical Society of Cecil County to determine if the proposed undertakings will have an adverse effect on historical and archeological resources.
