

ADDENDUM #1

April 23, 2014

Re: HACC, Central Pennsylvania's Community College
RFP14-05 Asphalt Pavement Sealing – Harrisburg Campus

From: HACC, Central Pennsylvania's Community College
Michael McEnany, Procurement Specialist
One HACC Drive
Harrisburg, PA 17110

To: All Proposers

Harrisburg Area Community College (HACC) is sending this addendum #1 to answer questions received, to better clarify the specific requirements of the Asphalt Pavement Sealing – Harrisburg Campus project.

1 – Do you want the crack filler applied before or after sealing?

The crack filler should be applied after sealing.

2 – Will there be a lot of debris removal required to prep the surface (i.e. mud, leaves, gravel etc)?

We can brush most of the debris off the lots. They will have to blow out the cracks and blow the dirt off the lots.

3 – Will vendors be able to coordinate with security, areas to be blocked off for treatment so the job can completed on consecutive days?

Different areas will be blocked off each day. Will plan on sealing Hacc Dr. and Alumni Dr. on Friday, because school will be closed. We need to discuss and coordinate HACC Drive because PSECU will need access.

4 – Are there bumper blocks, if so how many, and will you want them removed to treat underneath, or just around the blocks?

We will move some bumper blocks, but most will stay in place and gone around.

5 – Will we be contracting the line striping in a separate bid or doing it in-house?

Would like to do the line striping in house, but we plan to get some separate bids to check cost. If the vendor would like to include a separate price for striping that would be helpful.

Additional questions of clarification may be directed to:
