

APPENDIX B.

Qualifications:

- 1) Does your organization have at least two (2) Qualified Bat Surveyors listed on the Pennsylvania approved bat surveyor list, that will be on site at all times, with each supervising all aspects of work within each survey area? Please provide the names of those QBS's here.
- 2) Does your organization have the equipment and staff to deploy a variety of netting (single highs to triple or quad highs) so the paired survey areas per game land can be surveyed appropriately and simultaneously?
- 3) Does your organization have enough appropriate models of bat acoustic detectors to be deployed simultaneously at the paired survey areas? Please provide the make/model of the detector which you will be using here.
- 4) Does your organization have more than two (2) seasons of experience performing acoustic monitoring, where those surveys followed the U. S. Fish and Wildlife Service guidance, and which you can verify upon request that the summarized data was submitted properly to the USFWS or NABat? If yes, please provide the dates, locations, and scope of those qualifying projects here.
